\* Degree of importance of pest:

- I – Important pest, frequent occurrence
- II – Usually present but generally not a pest
- III – An occasional pest

- S – Sprays
- G – Granules
- B – Baits

\*\* Preferred grass species:

- a – Fescue and many other grasses
- b – St. Augustine
- c – Fescue
- d – Bluegrass
- e – Bermudagrass
- f – Zoysiagrass
- g – Bentgrass

| <b>Pest</b>  | <b>Insecticide &amp; Formulation</b>                    |           | <b>Amount per 1000 sq ft</b>                  | <b>Precautions and Remarks</b>  |
|--|---|-----------|---|---|
| <i>ANTS</i><br>(Also see imported fire ants)                 | <i>chlorpyrifos</i><br>(Dursban Pro)                    | 2 E       | 1.5 fl oz                                     | <i>For turfgrass use on golf courses, road medians and industrial plant sites. Dursban 50 W can be used in addition on turfgrass grown for sod or seed. Treat mounds and surrounding areas or apply broadcast to entire area.</i> |
|  | (Dursban 50W)   | 50 WSP    | 2 lb./acre                                    |   |
|  | <i>carbaryl</i><br>(Sevin Brand SL)                     | 4 SL      | 1½ to 3 fl oz                                 |   |
|  | <i>lambda-cyhalothrin</i><br>(Scimitar CS, Scimitar GC) | 9.7 CS    |   | <i>Use 0.5 fl. oz. per 2.5 gallons of water and thoroughly cover and soak each mound and treat a 4-foot diameter circle around the mound. Scimitar GC can be used on golf courses.</i>  |
|  | <i>deltamethrin</i><br>(DeltaGard G)                    | 0.1 G     | 2 to 3 lb                                     | <i>Irrigate with an adequate quantity of water to thoroughly moisten grass and thatch and dissolve the insecticide granules.</i>  |
|  | <i>cyfluthrin</i><br>(Tempo 20 WP)                      | 20 WP     | (1 packet)<br>50 gm per 7,500 to 10,000 sq ft | <i>Tempo 20 WP not for use on sod farms or golf courses.</i>  |
|  | (Tempo 20 WP GC)  | 20 WP     | 55 gm (1 packet) per 11,000 sq ft             | <i>Tempo 20 WP GC for use on residential and commercial sites including golf courses.</i>   |
|  | <i>beta-cyfluthrin</i><br>(Tempo SC Ultra)              | 1 SC      | 4-6 ml  | <i>Not for use on sod farms or golf courses.</i>  |
|  | <i>bifenthrin</i><br>(Talstar Lawn & Tree)              | 7.9 F     | 0.5-1 fl oz                                   |   |
|  | (Talstar GC)  | 7.9 F     | 1 fl oz                                       |   |
|  | <i>fipronil</i><br>(Chipco Topchoice)                   | 0.0143% G | 2 lb or 87 lb/acre                            | <i>For best results, treated turf should be watered or irrigated after application.</i>   |
| <b>YELLOW JACKETS</b><br>(Also other burrowing bees & wasps) | <i>carbaryl</i><br>(Carbaryl 80 S)                      | 80 WP     | 4 oz  | <i>Most burrowing wasps and bees are parasitic on other insects. Treatment is seldom needed. Water in thoroughly and apply in late afternoon. Bee, wasp and hornet sprays in pressurized cans are also effective.</i>             |
|  | (Sevin Brand SL)  | 4 SL      | 3 fl oz per gallon of water                   |   |
| <b>BILLBUGS</b>  | <i>bifenthrin</i><br>(Talstar Lawn & Tree)              | 7.9 F     | 0.25-0.5 fl oz                                | <i>For control of adult billbugs when they are first observed during April – early May.</i>   |
|  | (Talstar GC)  | 7.9 F     | 0.25-0.5 fl oz                                |   |

| <b>Pest</b>                     | <b>Insecticide &amp; Formulation</b>                  |                                       | <b>Amount per 1000 sq ft</b>  | <b>Precautions and Remarks</b>   |
|---------------------------------|---|---------------------------------------|---|--|
| <i>BILLBUGS</i><br>(cont'd)     | <i>clothianidin</i><br>(Arena 50 WDG)                 | 50WDG                                 | 6.4-12.8 oz/acre  | Do not apply more than 12.8 oz of Arena 50 WDG per acre per season.  |
|                                 | <i>chlorantraniliprole</i><br>(Acelepryn)             | 1.67 SC                               | 0.184 - 0.46 fl oz<br>8 - 20 fl oz/acre   | Apply when overwintered adult billbugs are first observed in April. This application will also provide white grub control.   |
|                                 |   | 0.2% G                                | 1.15 - 2.3 lb<br>50 - 100 lb/acre   |  |
|                                 | <i>imidacloprid</i><br>(Merit 75WP)<br>(Merit 0.5 G)  | 75 WP                                 | 6.4 to 8.6 oz/acre  | For optimum control, make application prior to egg hatch, followed by sufficient irrigation or rainfall within 24 hours of application. Not for use on commercial sod farms. |
|                                 |   | 0.5 G                                 | 1.4 to 1.8 lb   |  |
|                                 | <i>deltamethrin</i><br>(DeltaGard G)                  | 0.1 G                                 | 2 to 3 lb   | Irrigate with an adequate quantity of water to thoroughly moisten grass and thatch and dissolve the insecticide granules.  |
| <i>halofenozide</i><br>(MACH 2) | 1.5 G   | 2.3 lb                                | MACH 2 Granular is labeled for use on all turfgrass sites, while MACH 2 Liquid is registered for use on commercial sites including golf courses, sod farms, commercial lawns and cemeteries. Make only one application. |  |
|                                 | 2 L   | 2.2 fl oz                             |   |  |
|                                 | (GrubEx)  | 1.5 G                                 | See label for spreader settings.  |  |
| <i>CHINCH BUGS</i>              | <i>cyfluthrin</i><br>(Tempo 20 WP)                    | 20 WP                                 | (1 packet) 50 gm per<br>7,500 sq ft   | Tempo 20 WP not for use on sod farms or golf courses.  |
|                                 |   | 20 WP                                 | 55 gm (1 packet ) per<br>7,800 sq ft  | Tempo 20 WP GC for use on residential sites, including golf courses.   |
|                                 | <i>beta-cyfluthrin</i><br>(Tempo SC Ultra)            | 1 SC                                  | 6 ml  | Not for use on sod farms or golf courses.  |

|-----|---|-----------------------|---------|---|--------------------------|
| WSP | - | Water soluble packets | E or EC | - | Emulsifiable concentrate |
| WP  | - | Wettable powder       | SL      | - | Suspended liquid         |
| SP  | - | Soluble powder        | F       | - | Flowable                 |
|     |   |                       | G       | - | Granules                 |

### Sampling and Economic Thresholds for Turfgrass Insect Pests

*White grubs – Treat in mid-August when the economic threshold has been reached. Sample several square foot sections of turf by using a shovel or spade to cut out a square-foot section and lift the turf back to count grubs.*

#### Threshold Targets for White Grubs –

#### Assuming Adequate Growing Conditions & No Digging Animals

*Annual White grubs \* 5-10 grubs/square foot \**

*(Japanese Beetle, Oriental Beetle, European Chafer, Asiatic Garden Beetle)*

*Masked Chafer (Annual White Grub) \* 15-20 grubs/square foot \**

*Black Turfgrass Ataenius \* 30-50 grubs/square foot \**

*May/June Beetles \* 3-8 grubs/square foot \**

*Green June beetle grubs \* 6-8 grubs/square foot \**

*Adapted from D.J. Shetlar (1995) and D.A. Potter (1982)*

**Sod webworms** – These caterpillars feed on the blades of grass. The light-colored caterpillars with dark spots make silk tunnels in the grass. Check for sod webworms and cutworms by preparing a soap solution of 2 teaspoons of liquid dishwashing detergent in a gallon of water. Pour this solution over a 2 ft by 2 ft area (4 ft<sup>2</sup>). Treat when 4-6 or more sod webworms per 4 ft<sup>2</sup> are found.

**Cutworms** – These dark, dingy-colored caterpillars feed at night and hide in the ground in the daylight. They clip off the blades of grass at the crown. Treat when one or more cutworms per 4 ft<sup>2</sup> are found.

*Precautionary Statement*

*To protect people and the environment, pesticides should be used safely. This is everyone's responsibility, especially the user. Read and follow label directions carefully before you buy, mix, apply, store or dispose of a pesticide. According to laws regulating pesticides, they must be used only as directed by the label. Persons who do not obey the law will be subject to penalties.*

*Disclaimer Statement*

*This publication contains pesticide recommendations that are subject to change at any time. The recommendations in this publication are provided only as a guide. It is always the pesticide applicator's responsibility, by law, to read and follow all current label directions for the specific pesticide being used. The label always takes precedence over the recommendations found in this publication.*

*Use of trade or brand names in this publication is for clarity and information; it does not imply approval of the product to the exclusion of others that may be of similar, suitable composition, nor does it guarantee or warrant the standard of the product.
