This Newsletter is brought to you for free and open access by the Office of Research & Engagement at TRACE: Tennessee Research and Creative Exchange. It has been accepted for inclusion in News and Opportunities by an authorized administrator of TRACE: Tennessee Research and Creative Exchange. For more information, please contact trace@utk.edu.

UPCOMING EVENTS

CENTRIPETALS LUNCHEON

Thursday, January 29
UC Executive Dining Room

Joanne Logan, Biosystems Engineering and Soil Science
"Community Waters: The Acequia Culture of the Southwestern U.S."
\$8.00 payable at the door

SCIENCE FORUMS

Fridays from 12 noon to 1 p.m.
Dining Room C-D in Thompson-Boling Arena

Bring lunch or buy at Arena Café

Friday, January 30

Mark Cox, Vice President, Chemicals & Fibers Technology, Eastman Chemical Company
"Can Trees Do That? The Remarkable Versatility of Cellulosics"

Friday, February 6

Gregory V. Button, Anthropology
"Hurricane Katrina and the Challenge of Disaster Research"

Friday, February 13

Thomas Gaines, Cardiothoracic Surgeon at UT Medical Center
"New Advances in the Treatment of Atrial Fibrillation"

Friday, February 20

Benjamin M. Auerbach, Anthropology
"A Case of Cold Feet? Human Colonizations of the Americas"

CLARENCE BROWN THEATER

January 29–February 15, 7:30 p.m.

The Triumph of Love

by Pierre Marivaux
Tickets: 974-5161 or
www.uttheatre.org/order

UT CULTURAL ATTRACTIONS

February 4, 7:30 p.m.

Bijou Theatre

Hubbard Street 2 Dance Company
Tickets: 656-4444; UC Central Ticket Office; Thompson-Boling Arena Ticket Office; or online at www.knoxvilletickets.com

Funds available to support open-access publication

Funding is still available for UT faculty and graduate students who need to pay article-processing charges to publish in open access journals. A pilot program sponsored by the Office of Research and the University Libraries has committed \$20,000 to pay fees charged by open access publishers. Open access publications are peer-reviewed like traditional publications. Benefits of open access publishing include: (1) articles are freely available online to readers, increasing the potential for discovery and citation; (2) authors retain copyright; and (3) costs to publish open access journals are generally lower than traditional publishing.

The pilot program will be available through June 2009 or until the fund is exhausted. Any open-access journal that makes issues freely available at the time of initial publication will be considered. The Office of Research and UT Libraries will evaluate the program's usefulness.

Program description, list of open access publishers, and application form:

Yale fined for misusing grant funds

Irregularities in the spending of federal research funds have cost Yale University more than \$7.6 million for violations of the False Claims Act.

The U.S. Attorney for Connecticut announced in December that Yale agreed to a civil settlement of federal charges on two types of violations: (1) Yale researchers allegedly transferred funds from federal accounts that were ending to other ongoing federal accounts in order to spend down remaining funds before the expiration of the grants; and (2) Researchers allegedly charged 100 percent of time and effort in summer months to federal accounts when the work being done was not related to the accounts charged.

Yale cooperated with the federal investigation, which covered funding from the Department of Health and Human Services, the National Science Foundation, the Department of the Army, NASA and a number of other federal agencies.

'StatNews' name-change shows growth in scope

"StatNews," a semiannual publication of the Office of Information Technology, has changed its name to "Research Computing News." Robert Muenchen, who edits the newsletter, said that the number and scope of computational tools for faculty and students have expanded beyond statistical applications, necessitating the change. The newsletter serves some 500 researchers on all UT campuses with news of new analytical tools and policies for their use.

New LISTSERV address: rcnews@listserv.utk.edu

Plant biology video contest begins

A competition for new YouTube videos that illustrate the remarkable aspects of plant life is being held this winter with up to \$8,000 available to winners. The deadline for submitting a video is 1 March 2009, and winners will be announced on 31 March 2009. The competition, which is open to everyone, is organized by ChloroFilms, a nonprofit organization directed by Penn State Professor of Biology Daniel Cosgrove. Additional support for the video contest comes from the American Society of Plant Biologists, the Botanical Society of America, and the Canadian Botanical Association.

The goal of the video competition is to encourage a greater appreciation and understanding of plant life through the production of informative, creative, and entertaining videos. The best of the submitted videos will be posted on an easy-to-find website intended to serve the general public and educators at all levels.

Video submissions can be made in three different categories:

(1) general videos, which are intended for a general audience and do not assume that the viewer has knowledge of technical terms; (2) technical videos, which are intended for a technical audience and assume that the viewer has some technical background; and (3) videos in a series, which are intended for either a general or technical audience and consist of two or more videos that are connected by a common theme.

Apologies to Miriam Campo

Please accept our sincere apologies for the spelling error printed in the January 14 issue of "News & Opportunities." We make every attempt at accuracy in names and information published in the newsletter. Sometimes we miss the mark. Our error does not diminish the sincerity of our welcome to the UT Office of Research.

The Editors

NSF High-End Computing University Research Activity (HECURA)

The High-End Computing University Research Activity (HECURA) program invites research and education proposals in the areas of I/O, file and storage systems design for efficient, high-throughput data storage, retrieval and management in cases where HEC systems comprise hundreds of thousands to millions of processors.

Deadline: 8 a.m., 9 April 2009 to UT Office of Research

Details: http://www.nsf.gov/pubs/2009/nsf09530/nsf09530.html?govDel=USNSF_25

NSF Ethics Education in Science and Engineering (EERE)

The Ethics Education in Science and Engineering (EERE) program accepts proposals for research and educational projects to improve ethics education in all of the fields of science and engineering that NSF supports, especially in interdisciplinary or inter-institutional contexts. Proposals must focus on improving ethics education for graduate students in those fields, although the proposed programs may benefit advanced undergraduates in addition to graduate students.

LIMITED SUBMISSION: May require internal competition. The University of Tennessee, as accredited, is allowed to submit only one proposal to the EERE competition. Faculty who are interested in submitting an EERE proposal must express intent to Bill Dockery (dockeryb@utk.edu) and Jim Mazzoucolo (jmazzoucolo@utk.edu).

Deadlines: Letter of intent, 2 February 2009; completed proposal due to UT Office of Research, 8 a.m., 24 February 2009.

Details: <http://www.nsf.gov/pubs/2008/nsf08530/nsf08530.htm>

NSF Course, Curriculum, and Laboratory Improvement (CCLI)

The National Science Foundation's Course, Curriculum, and Laboratory Improvement (CCLI) program seeks to improve the quality of science, technology, engineering, and mathematics (STEM) education for all undergraduate students. It especially welcomes proposals that have the potential to transform undergraduate education in science, technology, engineering, and mathematics (STEM) for all students. The program supports efforts to create, adapt, and disseminate new learning materials and teaching strategies to reflect advances both in STEM disciplines and in what is known about teaching and learning.

Deadlines: Type 1 proposals from Tennessee, 22 May 2009; Type 2 & 3 proposals, 13 January 2010. **NOTE:** All proposals must be submitted to the UT Office of Research five full business days before the agency due date.

Details: <http://www.nsf.gov/pubs/2009/nsf09529/nsf09529.html>

NSF CISE Pathways to Revitalized Undergraduate Computing Education (CPATH)

Through the CPATH program, CISE challenges the academic community to identify and define the core computing concepts, methods, technologies and tools to be integrated into promising new undergraduate education models, and to demonstrate effective strategies to develop and assess computational thinking competencies in the relevant learning communities. While aimed primarily at revitalizing undergraduate education, CISE encourages the exploration of new models that extend from institutions of higher education into the K-12 environment; activities that engage K-12 teachers and students to facilitate the seamless transition of secondary students into CT-focused undergraduate programs are particularly encouraged.

Deadline: 8 a.m., 22 April 2009 to UT Office of Research

Details: http://www.nsf.gov/pubs/2009/nsf09528/nsf09528.html?govDel=USNSF_25

DOD Environmental Security Technology Certification Program (ESTCP)

The Department of Defense's ESTCP has issued a Broad Agency Announcement requesting preproposals for 2010 in the following topics: remediation of contaminated groundwater; in situ management of contaminated sediments; characterization, control, and treatment of range contamination; military munitions detection, discrimination, and remediation; and energy efficiency and renewable energy for DOD installations.

Deadline: Completed preproposal to UT Office of Research 8 a.m., 27 February 2009.

Details: Solicitation, www.estcp.org/opportunities; archived web seminar (download), http://www.clu-in.org/conf/tio/estcpfunding_011708/

DOD Strategic Environmental Research and Development Program (SERDP)

The Department of Defense's SERDP has issued a Broad Agency Announcement requesting proposals involving advanced technologies for detection, discrimination, and remediation of military munitions on land and underwater; innovative control/eradication approaches for the brown tree snake, and replacement of ammonium perchlorate in tactical missile rocket motors.

Deadline: Completed proposals to UT Office of Research, 8 a.m., 6 March 2009.

Details: <http://www.serdp.org/Funding/seed-nonfed/index.cfm>

Toyota Family Literacy Program Grant Opportunity

The National Center for Family Literacy is seeking five school districts to receive an award of \$600,000 to implement the Toyota Family Literacy Program in three elementary schools that provide K-3 education. Awards will be made based on a competitive application process. The program focuses specifically on at-risk populations of Hispanic and other immigrant families. According to the program director, university units can apply for the program in conjunction with local school systems.

Deadline has not been announced but the qualifying survey will be posted the week of 26 Jan 2009.

Details: <http://www.familit.org/site/cgtJWJdMQIsE/b.3781979/>

21st-Century Scientists Awards: Studying Complex Systems

The James S. McDonnell Foundation is soliciting proposals that will support scholarship and research directed toward the development of theoretical and mathematical tools that can be applied to the study of complex, adaptive, nonlinear systems. Such proposals should address issues in biology, biodiversity, climate, demography, epidemiology, technological change, economic development, governance, or computation. Proposals attempting to apply complex system tools and models to problems where such approaches are not yet considered usual are encouraged.

Deadline: 17 March 2009

Details: www.jsmf.org/apply/research/index.htm
