## Your F.I.T.ness Prescription

**F**requency — be active every day.

**I**ntensity — moderate and low intensity exercise is good for you.

**T**ime — at least 30 minutes daily five or more days a week.

## Aerobic Conditioning and Target Heart Rate

To strengthen your heart, you need to exercise within your target heart rate range. The target heart rate range is 60 to 80 percent of your maximum heart rate. To calculate your target heart rate range, use this simple formula: subtract your age from 220 (maximum heart rate) and multiply the result by 60 percent or 80 percent. Or use the Target Heart Range chart below.

### Target Heart Rate Range Beats/Minute

Age	60%	80%
15	123	164
20	120	160
