†Associate Professor, University of Tennessee College of Law.

In the last fifteen years, the Supreme Court has been taking legal realism a bit too seriously. “We were all brought up on sophisticated talk about the fluidity of the line between substance and procedure,”¹ but for many years, when presented with a problem of vertical choice of law, the Supreme Court hemmed and hawed about the subtleness of the distinction—and picked one. Ultimately, a decision had to be made; either the federal courts would follow a particular state law in diversity cases or they would not.

In the First Phase of *Erie*,² state law was ascendant and almost always deemed binding.³ In the second phase, after *Hanna v. Plumer*,⁴ the Federal Rules reigned supreme, sweeping aside any state law in or near their path.⁵ In both phases, the Supreme Court’s decisions sometimes strained credulity. They did, however, perform the function of answering the question “Does this state law govern in federal court?” with a “yes” or a “no.” Beginning with *Gasperini v. Center for Humanities*,⁶ however, a shifting coalition of justices has pursued a third path, neither declaring state law applicable nor declaring it inapplicable. Instead, they have claimed for themselves the prerogative to fashion law that purportedly accommodates the interests of both sovereigns.⁷ With the cover of an intellectual critique of the substance-procedure dichotomy, the Court has thus embarked on a Third Phase of the *Erie* doctrine, a phase that replaces “yes” or “no” with “Let’s see what we can work out.”

This new venture—so far, *Gasperini*, *Semtek v. Lockheed*,⁸ and, most recently, a plurality of the Court in *Shady Grove v. Allstate*⁹—

has been the object of “a chorus of academic criticism.”¹⁰ Most of this criticism focuses on problems of administrability, lack of adequate guidance to lower courts, and the continuing absurdity of reading a Federal Rule to mean one thing in federal cases and another in diversity.¹¹

This Article adds a new level of critique. It argues that Phase Three and its rejection of the substance—procedure dichotomy are *ultra vires* and are based on a misguided aspiration to accommodate state substantive policies at the expense of federal procedure. This thesis requires me to defend both a descriptive and a prescriptive claim. Descriptively, in order to have a dichotomy, it is necessary to have two poles. I therefore demonstrate that the distinction between substance and procedure is appropriately represented by a single-dimensional spectrum. That is, even though there are several different ways of making the distinction—the Rules of Decision Act (“RDA”) approach,¹² the Rules Enabling Act (“REA”) approach,¹³ the inherent powers approach¹⁴—the tests for each of these approaches can be understood as marking different points along the same linear continuum. With pure substance at one end and pure procedure at the other, all legal rules can be thought of as lying at some point between these two poles. Part of what the Court has done wrong is to ignore this linear relationships by insisting, for example, in *Semtek*, that *res judicata* is “too substantive” to be addressed in the Federal Rules yet procedural enough to be governed by federal common law under the RDA.¹⁵

¹⁵ *See infra* part II.B.1.

My second task is to defend the dichotomy. Given the linearity of substance and procedure, one could imagine the distinction either as a dichotomy of black and white, with every legal rule falling into one category or the other, or as a spectrum of gray, with many or even most legal rules falling in the mushy middle. Descriptively, of course, the latter view is more accurate. My claim, however, is that the Court should, with full awareness of the grayness of all things, nevertheless classify each one as black or white, rather than attempt to accommodate both its procedural and its substantive aspects.

This Article offers two reasons for preferring the black—white approach. First, the governing statutes contemplate a dichotomy between substance and procedure, and the Court is not authorized to use the ambiguity in that distinction to replace the statutory scheme with its own discretionary treatment of state law. Second, ending Phase Three and returning to the black-white approach would promote democratic transparency in the states. Specifically, in addition to traditional *Erie* concerns about judicial lawmaking, Congress has set a policy of establishing a uniform body of trans-substantive procedural law. State lawmakers know this, and there is nothing wrong with federal courts expecting them to act accordingly. If they, as Representative Dingell famously offered,¹⁶ prefer to manipulate procedure in order to undermine the substantive rights they purport to have created, the threat of fixed procedures in diversity could and should restrain them. Too often, the Supreme Court treats legislative enactments as fixed, so that the game begins when the litigants start their forum shopping. The game begins earlier, in the legislature, and the Court's ad hoc, accommodating approach to state law in *Erie*'s third phase creates the wrong incentives for that game.

Part I of this Article describes *Erie*'s three phases and identifies a key characteristic of each phase's treatment of the relationship

¹⁶ "I'll let you write the substance ... you let me write the procedure, and I'll screw you every time." *Regulatory Reform Act: Hearing on H.R. 2327 Before the Subcomm. on Admin. Law and Governmental Regulations of the House Comm. on the Judiciary*, 98th Cong. 312 (1983) (statement of Rep. John Dingell).

between state law and the Federal Rules. For those readers fortunate enough to have escaped law school before the Third Phase, part I.C describes its leading cases—*Gasperini*, *Semtek*, and *Shady Grove*—in detail. It shows that while the First Phase was characterized by deference to state policy and the Second Phase by the ascendancy of the Federal Rules, the Third Phase is characterized by Supreme Court discretion in formulating the law that controls in diversity cases. Part II.A argues that the Court lacks authority for exercising this discretion: the Phase Three Court perceives itself as a creative problem-solver that crafts accommodations to serve state and federal interests, while its proper role in this context is much more limited. Part II.B argues that the Phase Three approach also undermines separation of powers principles at the state level. The Supreme Court has justified its Phase Three approach by the purported need to vindicate state policy choices. However, state-level democracy would be better served by forcing state lawmakers to enact their policy choices in substantive law, rather than allowing them to manipulate outcomes through procedure. One way to make them do so is to adhere to a uniform system of federal procedure, rather than modifying procedure on an ad hoc basis as the Court has done in Phase Three. Part III offers suggestions for minimizing the damage: confining the Phase Three cases to their facts and returning to the conceptual structure of Phase Two.

I. THE THREE PHASES OF *ERIE*

Vertical choice of law doctrine has developed in three stages since *Erie* was decided. In Phase One, the Supreme Court held that almost every state law it encountered was “substantive” for purposes of the RDA.¹⁷ In Phase Two, the Court reversed course, holding that almost everything was not only procedural but also already covered by the Federal Rules.¹⁸ The Federal Rules fared poorly in Phase One, while state law fared poorly in Phase Two. In both of these phases, however, the Court honored the need to choose: state law either did or did not apply.

¹⁷ See *infra*, Part I.A.

¹⁸ See *infra*, Part I.B.

In Phase Three, the Supreme Court struck out in a new direction.¹⁹ The new approach, which began in *Gasperini*, starts with the observation that substance and procedure are inextricably intertwined.²⁰ A law that on its face regulates procedure may be intended to serve a substantive policy. In Phases One and Two, this reality meant that the decision whether to apply state law was often difficult. In Phase Three, the Court has taken the initiative to craft compromises that accommodate state policy while retaining federal control. The Third Phase is thus characterized by the federal Supreme Court exercising discretionary authority over whether and how to accommodate what it perceives to be state policy preferences expressed in state procedural law.

A. Phase One: Extreme Deference to the States

The Supreme Court held in *Erie Railroad v. Tompkins*²¹ that the Rules of Decision Act requires a federal court sitting in diversity²² to apply the substantive law of the state in which it sits.²³ In the standard telling of the story, the reasons for the decision were both jurisprudential and political. Jurisprudentially, legal realism and positivism had swept aside belief in a single, universal common law that could be discovered by state and federal courts alike.²⁴

¹⁹ See *infra*, Part I.C.

²⁰ See, e.g., *Gasperini v. Ctr. for Humanities*, 518 U.S. 415, 426 (1996).

²¹ State substantive law may apply in federal court for reasons other than diversity jurisdiction, such as when state law claim is litigated under the supplemental jurisdiction granted by 28 U.S.C. § 1367. For the sake of convenience, this Article follows the common practice of referring to *Erie* questions as arising primarily in diversity cases.

²² State substantive law may apply in federal court for reasons other than diversity jurisdiction, such as when a state law claim is litigated under the supplemental jurisdiction granted by 28 U.S.C. § 1367. For the sake of convenience, this Article follows the common practice of referring to *Erie* questions as arising primarily in diversity cases.

²³ *Erie R.R. v. Tompkins*, 304 U.S. 64 (1938). More precisely, *Erie* held that federal courts must follow state law “rules of decision,” a requirement that in retrospect has been understood as drawing a distinction that maps, at least approximately, onto the concepts of “substance” and “procedure.” See *id.*

²⁴ See Edward A. Purcell, *The Story of Erie: How Litigants, Lawyers, Judges, Politics, and Social Change Reshape Law*, in *CIVIL PROCEDURE STORIES* at 23-24

Politically, the old guard in the federal courts was adhering to common law doctrines—especially doctrines that hindered tort plaintiffs—that in state courts were giving way to the demands of new social realities in the wake of the industrial revolution.²⁵ The *Erie* doctrine restricted the power of the federal diversity courts over substantive law, confining them to the task of providing an alternative forum for enforcing legal rights that are created and defined by the states.²⁶

The *Erie* dissenters were the first to anticipate what would become the central meaning of *Erie* to future generations: the distinction between substance and procedure. They observed, “The line between procedural and substantive law is hazy but no one doubts federal power over procedure.”²⁷ Consistent with this point, *Erie*’s First Phase was devoted primarily to developing a menu of tests for distinguishing substance from procedure under the RDA.²⁸

(Kevin M. Clermont ed., 2004) (describing the pre-*Erie* “declaratory” theory of law); HOWARD FINK & MARK TUSHNET, *FEDERAL JURISDICTION: POLICY AND PRACTICE* 190 (2d ed. 1987).

²⁵ See Purcell, *supra* note 24, at 25 (“[Before *Erie*], the federal courts were becoming identified with the new national economy and the protection of corporate rights, and their ‘general’ law decisions spread from commercial issues into most common-law fields and seemed to grow ever more favorable to corporate interests.”); JoEllen Lind, “*Procedural Swift*”: *Complex Litigation Reform, State Tort Law, and Democratic Values*, 37 AKRON L. REV. 717, 732 (2004) (“According to some commentators, *Swift v. Tyson*, 41 U.S. 1 (1941),] secured the federal courts as ‘business courts’ used by corporations to resist the claims of workers seeking redress for injuries.”); Adam N. Steinman, *What Is the Erie Doctrine? (And What Does It Mean for the Contemporary Politics of Judicial Federalism?)*, 84 NOTRE DAME L. REV. 245, 248 (2008) (“Justice Brandeis’ ruling in *Erie* restrained a pro-corporate federal judiciary by eliminating its power to create substantive rules of federal common law, which had operated to displace state rules that were often less favorable to corporate litigants.”).

²⁶ *Erie*, 304 U.S. at 78 (“There is no federal general common law.”).

²⁷ *Erie*, 304 U.S. at 91-92 (Reed, J., dissenting) (citation omitted).

²⁸ The Court at times refused to describe the distinction as one between substance and procedure, perhaps wishing to retain those terms for marking the bounds of the REA. See *Guaranty Trust v. York*, 326 U.S. 99, 109 (1945) (“It is ... immaterial whether statutes of limitations are characterized either as ‘substantive’ or ‘procedural’ in State court opinions in any use of those terms unrelated to the specific issue before us.”). This Article refers to both the REA and the RDA—and,

When a litigant proposes that a particular state law should govern in a diversity action, federal courts ask whether the matter is outcome-determinative in a run of cases, so as to implicate the “twin aims” of *Erie*: to avoid inequitable outcomes and to discourage forum shopping.²⁹ If so, then state law should apply.³⁰ Depending on the circumstances, courts may also balance *Erie* concerns against other federal interests that may favor the application of federal law.³¹

Although the *Erie* dissenters’ comment could be read as implicitly insisting that the brand-new Federal Rules of Civil Procedure not be disregarded in diversity cases, the majority seemed to have a different idea. For the next three decades, the Court bent over backwards to apply state law, holding that state law governed even such plausibly procedural matters as statutes of limitations, enforcement of arbitration clauses, and bond requirements.³² For example, the Court showed great deference to the states in *Ragan v.*

for that matter, the powers of Congress and the courts to regulate judicial proceedings—as distinguishing between “substance” and “procedure,” while recognizing that the dividing line is in a different place under each regime. I will usually refer to matters as being either substantive or procedural “for purposes of the REA [or the RDA, or inherent powers, or whatever].” For readers who prefer a more prominent reminder that these labels are conclusory rather than inherent in the matters discussed, I suggest globally replacing “substance” and “procedure” with more clearly arbitrary terms, such as “Salt” and “Pepper.”

²⁹ *Hanna v. Plumer*, 380 U.S. 460, 466-67 (1965).

³⁰ *Hanna*, 380 U.S. at 470.

³¹ *Byrd v. Blue Ridge Rural Elec. Coop.*, 356 U.S. 525, 538 (1958). *Byrd* was the only major case that refused to follow state law in Phase One, concluding that federal practice, rather than state, determined the division of responsibility between judge and jury in federal court. Although the Court did not reach the question whether the Seventh Amendment required this outcome, the Court made plain that it reasoned in the shadow of the Seventh Amendment by introducing the concept of “countervailing federal interests” into the *Erie* analysis. Confronted with a potential constitutional command, the Court at last remembered that federal law is supreme; in this sense, *Byrd* can be seen as a forerunner of the Second Phase. *See Byrd*, 356 U.S. at 537-539.

³² *See Guaranty Trust Co. v. York*, 326 U.S. 99 (1945) (length of statute of limitations); *Ragan v. Merchants Transfer & Warehouse Co.*, 337 U.S. 530 (1949) (what action is needed to toll statute of limitations by initiating litigation); *Cohen v. Beneficial Indus. Loan Corp.*, 337 U.S. 541 (1949) (bond requirement); *Bernhardt v. Polygraphic Co. of Amer.*, 350 U.S. 198 (1956) (arbitration).

Merchants Transfer & Warehouse Company.³³ The question in *Ragan* was whether the plaintiff had satisfied the statute of limitations by filing the complaint in federal court.³⁴ According to Federal Rule 3, an action is “commenced” as soon as it is filed, which would seem to indicate that any limitations period stops running.³⁵ State law, however, maintained that an action was not “commenced” until the summons and complaint had been served.³⁶ Anxious to defer to state law, the Supreme Court implausibly read Rule 3 as pertaining only to the federal courts’ internal administrative processes.³⁷ In non-diversity cases, however, Rule 3 continued to be understood as defining commencement for limitations purposes.³⁸ In diversity cases it meant something different. The characteristic feature of this First Phase was the Court’s finding that almost all law was “substantive” and thus controlled by the states, even to the point of adopting a dual interpretation of a single Federal Rule of Civil Procedure.³⁹

B. Phase Two: The Imperial Rules

By apt coincidence, *Erie* was decided in 1938, the same year the Supreme Court first promulgated uniform, trans-substantive Federal Rules of Civil Procedure for use in federal courts, pursuant to the Rules Enabling Act of 1934.⁴⁰ Alongside the developing *Erie*

³³ 337 U.S. 530 (1949).

³⁴ *Ragan*, 337 U.S. at 531.

³⁵ Fed. R. Civ. Proc. 3.

³⁶ *Ragan*, 337 U.S. at 531 (describing state law).

³⁷ *Ragan*, 337 U.S. at 533.

³⁸ *West v. Conrail*, 481 U.S. 35, 39 (1987) (“[W]e now hold that when the underlying cause of action is based on federal law and the absence of an express federal statute of limitations makes it necessary to borrow a limitations period from another statute, the action is not barred if it has been ‘commenced’ in compliance with Rule 3 within the borrowed period.”).

³⁹ The dual-interpretation problem can be elided by treating the “federal” version of each Federal Rule as a judicial gloss akin to common lawmaking. If that gloss is “substantive” for RDA purposes, it must give way to a “state” version of the Federal Rule in diversity cases. However, this is not how the Supreme Court has framed its analysis in the dual-interpretation cases. See comment by Adam Steinman on civil procedure professors’ listserv, 4/3/10 (on file with author).

⁴⁰ 28 U.S.C. § 2072; Pub. L. No. 73-415, ch. 651, § 1, 48 Stat. 1064 (1934).

doctrine distinguishing substance from procedure under the RDA, a separate line of cases addressed the validity of particular Federal Rules, under the mandate of the REA that the Rules govern “procedure” and do not “modify or abridge substantive rights.”⁴¹ The REA cases adopted a much broader understanding of the procedure category: to this day, anything that “really regulates procedure” is valid territory for the Federal Rules.⁴²

The REA line of cases collided with *Erie* and the RDA in *Hanna v. Plumer*,⁴³ which marks the beginning of *Erie*’s Second Phase. *Hanna* recognized that if valid, controlling federal law dictated a result, that law superseded any state law, under the Supremacy Clause as well as under the language of the RDA.⁴⁴ *Hanna* further pointed out that the Federal Rules are federal laws. They thus control whenever they validly apply.⁴⁵

In *Hanna*, this issue played out on the question of service of process. State law required personal service on the defendant, while Federal Rule 4 offered options for substituted service.⁴⁶ Under cases like *Ragan*, the defendant had a plausible argument that the mode of service constituted substantive state policy to which the federal court should defer.⁴⁷ Rule 4, however, is certainly valid under the “really

⁴¹ 28 U.S.C. 2072; *Sibbach v. Wilson & Co.*, 312 U.S. 1, 13-14 (1941) (stating the “really regulates procedure” test).

⁴² See *Shady Grove Orthopedic Assoc. v. Allstate Insur. Co.*, ___ U.S. ___, 130 S.Ct. 1431, 1444 (2010) (affirming that “really regulates procedure” remains the test under the REA).

⁴³ 380 U.S. 460 (1965).

⁴⁴ *Hanna*, 380 U.S. at 472.

⁴⁵ *Hanna*, 380 U.S. at 473-74 (“To hold that a Federal Rule of Civil Procedure must cease to function whenever it alters the mode of enforcing state-created rights would be to disembowel either the Constitution’s grant of power over federal procedure or Congress’ attempt to exercise that power in the Enabling Act.”).

⁴⁶ *Hanna*, 380 U.S. at 463 (describing the differences between state and federal requirements).

⁴⁷ See *Ragan v. Merchants Transfer & Warehouse Co.*, 337 U.S. 530 (1949) (holding that state law determines when an action has “commenced,” for purposes of tolling the statute of limitations). Because state law determines whether service is required to toll the statute of limitations, it makes sense that state law would determine how service must be performed.

regulates procedure” standard of the REA.⁴⁸ It is therefore a valid federal law that speaks directly to the question, and it trumps state law.⁴⁹

After *Hanna*, the Court once again swung to the extreme, this time aggressively reading federal law to displace state law. The zenith of this Phase is illustrated by a pair of Alabama cases. In one, the plaintiff argued that a federal court sitting in diversity should follow Alabama courts in refusing to enforce forum-selection clauses.⁵⁰ Such clauses were against public policy in Alabama.⁵¹ Although no federal law requires that forum-selection clauses be enforced, the Supreme Court held that the general change-of-venue statutes covered the territory and therefore superseded Alabama law.⁵² The other Alabama case dealt with a state statute requiring defendants to pay penalties for unsuccessful appeals.⁵³ Again, no federal law appeared directly on point. The Court, however, looked to general provisions in the Federal Rules of Appellate Procedure that deal with taxation of costs on appeal.⁵⁴ In the Phase-Two enthusiasm for Federal Rules over state law, these provisions were close enough to the general topic of penalizing unsuccessful appeals to justify disregarding the state law.⁵⁵ The Second Phase, then, is characterized by the Court’s aggressive use of federal procedural law to avoid any obligation to advance state policies.

After *Hanna*, it was also clear that there were two separate standards for distinguishing substance from procedure. In what *Hanna* called “unguided *Erie*” analysis,⁵⁶ courts distinguish between substance and procedure by using the twin aims of *Erie* in combination with earlier precedents such as *Guaranty Trust* and

⁴⁸ See *Hanna*, 380 U.S. at 464.

⁴⁹ *Hanna*, 380 U.S. at 464.

⁵⁰ *Burlington N. R. v. Woods*, 480 U.S. 1, 7 (1987).

⁵¹ *Burlington*, 480 U.S. at 8.

⁵² *Burlington*, 480 U.S. at 8.

⁵³ *Stewart Org. v. Ricoh*, 487 U.S. 22 (1988).

⁵⁴ *Stewart*, 487 U.S. at 27.

⁵⁵ *Stewart*, 487 U.S. at 28.

⁵⁶ *Hanna v. Plumer*, 380 U.S. 460, 471 (1965).

Byrd, which ask whether the rule is outcome-determinative, whether it is bound up with substantive rights, and whether there are countervailing federal interests.⁵⁷ On the spectrum from substance to procedure, these tests mark the dividing line somewhere in the midst of an admittedly very large gray area:

In contrast, when the analysis is “guided” by the existence of a Federal Rule on point, the Court is much more strongly inclined to find that the matter is procedural. That is, the Federal Rules of Civil Procedure get the benefit of the doubt that they really are procedural. Thus, the REA line is much closer to the “substance” end of the spectrum, while the RDA line is closer to the “procedure” end:

A state law that would be deemed “substantive” under unguided *Erie* analysis might still be superseded by a Federal Rule.

⁵⁷ See *Guaranty Trust Co. v. York*, 326 U.S. 99, 109 (1945) (outcome-determination test); *Byrd v. Blue Ridge Rural Elec. Coop.*, 356 U.S. 525, 535 (1958) (*Byrd* balancing test).

⁵⁸ Note that none of the diagrams that follow is necessarily to scale. The arrows mark relative positions on the substance-procedure line but are not intended to suggest claims about the relative size of each segment of the line.

For example, in *Ragan*, the Court concluded that the state's rule for when an action is "commenced" for statute of limitations purposes is substantive under *Erie*.⁵⁹ This conclusion followed naturally from *Guaranty Trust*, which held that statutes of limitations were themselves substantive.⁶⁰ The federal court in *Ragan* was therefore obliged to follow state practice and hold that a diversity action had not been commenced until the summons had been served. After *Hanna*, this case might have come out the other way. Rather than apply *Erie*'s substance/procedure test, the Court could have applied the REA test to Rule 3, which says that an action is "commenced" when the complaint is filed. If the Rule passed the REA's "really regulates procedure" test, it would control even in diversity cases and there would be no need for an unguided *Erie* analysis.⁶¹

In the first two phases of *Erie*, the Court swung between two poles, first favoring state law, then federal. What emerged, however, was a reasonably clear framework of federal supremacy tempered by the federalism of the RDA—or at least, it was reasonably clear after John Hart Ely explained it.⁶² In addition, the first two phases shared one overriding feature: in every case, the federal courts were told *either* to follow their normal federal practices, even in diversity

⁵⁹ *Ragan v. Merchants Transfer & Warehouse Co.*, 337 U.S. 530, 533 (1949).

⁶⁰ *Guaranty Trust Co. v. York*, 326 U.S. 99, 110 (1945).

⁶¹ *Guaranty Trust*, *Ragan*, and *Hanna* all deal with rules that affect a statute of limitations. While it makes some sense for them all to come out the same way, there has to be a dividing line somewhere in the gradual transition between substance and procedure. Moreover, any discrepancy between *Guaranty Trust* and reverse-*Ragan* is ameliorated by considering the purpose that "commencement" of the action serves. The state law in *Ragan* required service before the end of the limitations period, presumably so the defendant would receive notice within that period. This approach is compatible with the fact that many state courts will allow a complaint to languish for years without being served before it will be dismissed for failure to prosecute. In federal court, however, service is generally required within 120 days of filing, which would ameliorate the concerns that presumably motivated the state law in *Ragan*. See Fed. R. Civ. Proc. 4(m). Nonetheless, the Supreme Court reaffirmed *Ragan* after *Hanna*. See *Walker v. Armco Steel Corp.*, 446 U.S. 740 (1980). Having already lived with the dual interpretation of Rule 3 for three decades, the court chose not to overrule *Ragan*.

⁶² See Ely, *supra* note 1.

cases, *or* to apply a particular rule of state law. In each case, the choice between these two options and the content of the rule to be applied flowed directly from federal laws, such as the REA, or from state laws, made binding on diversity courts by virtue of the RDA.

C. Phase Three: A Third Way to Nowhere

After swinging once to each extreme—over-zealous deference to state law, then aggressive implementation of the Federal Rules—one would hope that the Supreme Court would retreat to a happy medium. Instead, however, in *Gasperini* and *Semtek*, the Court unveiled a new approach to *Erie* problems in which, instead of choosing between state and federal practice, the Court made up its own rule that conformed to neither.⁶³ Then in *Shady Grove*, the Court splintered: Four dissenters would have continued down the new path, while a four-justice plurality rejected it.⁶⁴ The ninth, Justice Stevens, appeared to lean toward the dissenters' theoretical approach but disagreed with the application and so voted with the plurality.⁶⁵

Robert Condlin has observed that *Gasperini* is “the type of precedent that, in retrospect, often turns out to be either the harbinger of a new doctrinal order, or an analytical wild card never heard from again.”⁶⁶ Only time will tell “whether *Gasperini* becomes an integral part of a new *Erie/Hanna* overview, or is forgotten as a doctrinal frolic and detour.”⁶⁷ Two decisions later, the outcome is still unclear, especially because Justice Stevens, now retired, was the swing vote

⁶³ *Gasperini v. Ctr. for Humanities*, 518 U.S. 415 (1996) (discussed *infra*, part I.C.1); *Semtek Int'l Inc. v. Lockheed Martin Corp.*, 531 U.S. 497 (2001) (discussed *infra*, part I.C.2).

in *Shady Grove*.⁶⁸ This Article aims to demonstrate that we should nonetheless hope for an end to the Third Phase. Phase Three of *Erie* is characterized by creative interpretation that constitutes inappropriate freelancing by a Court that is supposed to be making a *choice* of law.

1. *Gasperini v. Center for the Humanities*

William Gasperini was a photographer who lent several hundred of his transparencies to the Center for the Humanities.⁶⁹ The Center lost the negatives, and Gasperini sued for compensation. Sitting in diversity, the federal jury awarded \$450,000, and the trial judge denied the Center's motion to remit the verdict.⁷⁰ On appeal, the Center argued that the Second Circuit should review the reasonableness of the verdict pursuant to a New York tort reform statute.⁷¹ The statute directed intermediate courts of appeal to determine whether a jury verdict "materially deviates from what would be reasonable compensation."⁷² The Center argued that this statute reflected substantive policy in the State of New York. The Rules of Decision Act therefore required the federal courts to follow New York law in place of ordinary federal practice, in which appellate review of jury verdicts is limited by historic practices under the common law. The Second Circuit agreed and ordered that the verdict be reduced.⁷³

In the Supreme Court, Gasperini argued that the New York statute conflicted with the Seventh Amendment.⁷⁴ The Supreme

⁶⁸ Even the *Shady Grove* plurality, however, joined in the Phase Three decision in *Semtek*. Indeed, Justice Scalia authored both *Semtek* and the *Shady Grove* plurality opinion.

⁶⁹ *Gasperini v. Ctr. for Humanities*, 518 U.S. 415, 419 (1996).

⁷⁰ *Gasperini*, 518 U.S. at 419-20.

⁷¹ *Gasperini*, 518 U.S. at 421.

⁷² *Gasperini*, 518 U.S. at 421 (quoting N.Y. Civ. Prac. L. & Rules § 5501(c)).

⁷³ *Gasperini*, 518 U.S. at 421.

⁷⁴ *Gasperini*, 518 U.S. at 426. The *Gasperini* dissent also argued that the New York law was displaced by Federal Rule 59. The majority responded to this argument in a footnote, indicating that the majority disagreed with Justice Scalia about the scope of the Rules. For purposes of this Article, issues involving the

Court appeared to agree, ruling that federal appellate courts cannot apply the New York standard.⁷⁵ Under prior *Erie* doctrine, that would have been the end of the matter. Because there is valid federal law on point, it preempts the state statute; federal courts obviously cannot rely on the RDA as grounds for ignoring the Seventh Amendment. Indeed, in *Byrd v. Blue Ridge Electric*, the mere shadow of the Seventh Amendment was enough to push the Court to declare the division of labor between judge and jury to be a matter of procedure, governed by federal law even in diversity cases.⁷⁶

In *Gasperini*, however, the Court, did not stop there. Although it adhered to its view that federal law controlled, it changed federal law by inventing a new procedure to accommodate what it saw as New York's substantive concerns. Although the Seventh Amendment barred the Court of Appeals from reviewing the reasonableness of the jury verdict, the Court held that the trial court *could* perform that review, under the standard set by the statute.⁷⁷ The result was “a pastiche of federal and state law, but neither the one nor the other.”⁷⁸

2. *Semtek v. Lockheed*

Semtek also involved the Court crafting a federal alternative rather than simply choosing state law or ordinary federal practice. *Semtek* is a confusing case, in part because of the knotty procedural

applicability of a Federal Rule are adequately presented by *Semtek* and *Shady Grove*, so I follow the Court in passing lightly over that issue in *Gasperini*. See *Gasperini*, 518 U.S. at 467-68 (Scalia, J., dissenting); *id.* at 438, n. 22 (majority response).

⁷⁵ *Gasperini*, 518 U.S. at 439.

⁷⁶ *Byrd v. Blue Ridge Rural Elec. Coop.*, 356 U.S. 525, 539 (1958) (stating that the Court's decision was made “under the influence—if not the command—of the Seventh Amendment” and noting in a footnote that the Court was not deciding the Seventh Amendment question).

⁷⁷ *Gasperini*, 518 U.S. at 436. The preceding paragraphs describe the New York law at issue as it is described in the opening paragraph of *Gasperini* and as it has generally been treated in commentary on that case. A more precise description of New York law, and a discussion of the ramifications of that description, can be found *infra*, part III.B.

⁷⁸ Dudley & Rutherglen, *supra* note 10, at 707.

problem at its center: the claim-preclusive effect of a dismissal for failure to meet the statute of limitations.⁷⁹ When a state court issues such a dismissal, state law governs the preclusive consequences.⁸⁰ In California, where *Semtek* started, statute of limitations dismissals are not preclusive, so the plaintiff remains free to re-file in a state with a more generous limitations period.⁸¹ The extra twist was that the dismissal in *Semtek* was by a federal court sitting in diversity. In federal court, statute of limitations dismissals are usually preclusive.⁸²

The Supreme Court first asked whether the usual federal practice was controlling. Lockheed argued that the case was governed by Rule 41(b), which states:

Involuntary Dismissal: Effect Thereof. ... Unless the court in its order for dismissal otherwise specifies, a dismissal under this subdivision and any dismissal not provided for in this rule, other than a dismissal for lack of jurisdiction, for improper venue, or for failure to join a party under Rule 19, operates as an adjudication upon the merits.⁸³

Before *Semtek*, this Rule was widely understood to instruct that all dismissals other than those listed are claim preclusive as a matter of federal law.⁸⁴ In *Semtek*, however, the Court continued the

⁷⁹ *Semtek Int'l Inc. v. Lockheed Martin Corp.*, 531 U.S. 497, 509 (2001) (“This case presents the question whether the claim preclusive effect of a federal judgment dismissing a diversity action on statute-of-limitations grounds is determined by the law of the State in which the federal court sits.”).

⁸⁰ 28 U.S.C. § 1738 (“[J]udicial proceedings ... shall have the same full faith and credit in every court within the United States ... as they have by law or usage in courts of such State ... from which they are taken.”); *Marrese v. Amer. Acad. of Orthopaedic Surgeons*, 470 U.S. 373 (1985).

CIN. L. REV. 527, 577 (2003) (“It is not surprising that [Rule

unfortunate practice, begun in *Ragan*, of reading a Federal Rule to mean something different in diversity cases than in federal question cases. Rule 41(b), said the Court, does not speak to claim preclusion at all. Rather, it merely bars the plaintiff from re-filing the case *in the same court*.⁸⁵ The Court's stated reason for this absurd reading of Rule 41(b) was the fear that the Rule as written was too substantive. That is, the Court suggested that the natural reading of the Rule might run afoul of the REA because it would modify or abridge the substantive right to bring the claim.⁸⁶

Having disposed of Rule 41(b), the Court was left with an unguided *Erie* choice: should it deem this matter substantive and apply state law or procedural and governed by some federal law? The twin aims of *Erie* favored applying state law.⁸⁷ Moreover, the Court had just suggested that the preclusion question was "too substantive" to be covered by the Federal Rules. Nonetheless, the Court insisted, with virtually no explanation, that federal law must control the preclusive effects of diversity judgments. The only stated reason for this insistence was concern for the federal courts' ability to use dismissal of a case as a sanction.⁸⁸ What if, posited the Court, a state did not recognize such a dismissal as preclusive? As discussed below, this concern was a red herring.⁸⁹ For the Court, however, it was the sole justification for declaring that the Court itself had inherent power over a matter it had just deemed too substantive for a Federal Rule.

In a final twist, the Court reverted to *Erie* principles to decide what the federal common law rule should be.⁹⁰ Rather than choose a uniform rule of federal law, the Court held that federal common law

41] was the only Federal Rule that was understood to expressly address preclusion prior to *Semtek*.")

would adopt the rule of the forum state unless, on a case-by-case basis, there was an important federal reason to choose a different rule.⁹¹

3. *Shady Grove v. Allstate*

The most recent installment of the Third Phase is *Shady Grove v. Allstate*.⁹² At issue in *Shady Grove* was another New York tort reform statute. This one prohibits class actions to recover “penalties,” such as statutory interest.⁹³ The New York statute conflicts with the ordinary understanding of Rule 23, which sets the conditions under which class actions are appropriate in federal court.⁹⁴

Allstate, seeking to avoid a \$500,000 class action when the lead plaintiff would only be entitled to \$500, argued that Rule 23 should be read more finely.⁹⁵ The Supreme Court decision was splintered. Justice Ginsberg, writing for the four dissenters, followed the path of *Ragan*, agreeing with Allstate that Rule 23 should be read to come into play only if the substantive law itself authorized class actions.⁹⁶ Justice Ginsburg did not pretend that this reading of Rule 23 was natural. Rather, she argued that courts should consciously read the Rule to avoid conflict with the state’s substantive policy goals: they should “interpret the Federal Rules in light of a State’s regulatory policy.”⁹⁷

The plurality, in an opinion by Justice Scalia, rejected this argument that an individual state’s policy should influence the interpretation of federal law.⁹⁸ Justice Scalia wrote that Rule 23

⁹⁸ *Shady Grove*, 130 S.Ct. at 1440-41.

should be given its natural meaning as long as that meaning “really regulates procedure” and is thus valid under the REA.⁹⁹ His plurality maintained that as long as a Rule “really regulates procedure” in a general sense, it trumps any conflicting state law, regardless of whether the state enacted the law for substantive policy purposes rather than procedural ones.¹⁰⁰ Justice Stevens, the fifth vote for rejecting the application of state law in *Shady Grove* itself, wrote separately to hold out the possibility that a Federal Rule of Civil Procedure could be invalid as applied in a rare case.¹⁰¹ A Rule that, in general, “really regulates procedure” might create such a disruption in state substantive policy that it would be invalid for abridging, enlarging, or modifying a substantive right.¹⁰² However, Justice Stevens concluded that *Shady Grove* was not such a case, so he voted not to apply the state law.¹⁰³

The split in *Shady Grove* highlights an important debate over how to determine the validity of Federal Rules. The current test is that a Rule is valid if it “really regulates procedure.”¹⁰⁴ This generous standard comes from subpart (a) of the REA, which authorizes regulation of “practice and procedure and rules of evidence.”¹⁰⁵ Academics have long bemoaned the Supreme Court’s neglect of subpart (b), which many interpret as an independent limit on the Rules.¹⁰⁶ That is, even a Rule that “really regulates procedure” might be invalid if it *also* “abridge[s], enlarge[s], or modif[ies] any

REV. 1015, 1108 (1982) (arguing that § 2072(b) does not have independent effect distinct from the effect of § 2072(a)).

substantive right.”¹⁰⁷ *Shady Grove* exposed a split between those who would apply subpart (b) on a case-by-case, “retail” basis and those who would determine the validity of Federal Rules strictly at the “wholesale” level.¹⁰⁸ Justice Scalia’s plurality in *Shady Grove* took the “wholesale” approach. Rule 23 was evaluated on its own terms and was found to be targeted at the regulation of procedure.¹⁰⁹ While the plurality inquired in a general sense whether the Rule regulated substantive matters, it did so without reference to the particular state law at issue.¹¹⁰ The dissent, and to a lesser extent Justice Stevens, would determine the validity of the Federal Rule, as applied, with reference to the state law.¹¹¹ If the state law is understood to serve substantive aims but uses a procedural mechanism to achieve them, the Federal Rule may have to give way.¹¹² For example, John Hart Ely explained that whether a state prohibition on court-ordered medical exams applied in federal court would depend on the reason for the state ban.¹¹³ If the ban was part of a general scheme of limited discovery, it would be deemed procedural and thus trumped by the federal practice.¹¹⁴ If, however, the state enacted the ban as substantive protection for the right to personal privacy, federal courts would have to honor it in diversity cases.¹¹⁵ In *Shady Grove*, the dissent argued that the state’s restriction on class actions served the substantive goal of limiting

¹⁰⁷ 28 U.S.C. § 2072(b).

¹⁰⁸ In addition to the *Shady Grove* opinions, compare Ely, *supra* note 1, at 733-34 (advocating case-by-case determination of whether a state’s interest in its laws is substantive or procedural) with Dudley & Rutherglen, *supra* note 10, at 727 (“The cautionary example of what has happened in the related field of conflicts of laws, where case-by-case balancing of interests has threatened to destabilize the entire field, should lead the Supreme Court to reinforce rather than retreat from a uniform interpretation of general rules of procedure.”).

¹¹⁵ Ely, *supra* note 1 at 734.

liability under penalty clauses and was thus inapplicable in the particular circumstances of the case, even if Rule 23 is generally valid as a regulation of procedure.¹¹⁶

The retail side of the wholesale/retail debate is the first step toward the ad hoc, discretionary approach that characterizes Phase Three. In *Shady Grove*, the dissent would have adopted an ad hoc interpretation of Rule 23 designed to accommodate a particular state law. This form of accommodation is a step away from *Gasperini* and *Semtek*, in which the Court created its own procedures that combined elements of state and federal law. The degree of judicial discretion is greater in the latter two cases, but the willingness to strain federal law is the same and is still in keeping with Phase Three.

II. WHAT'S WRONG WITH THE THIRD WAY

Gasperini and *Semtek* have been extensively analyzed and criticized, and the same fate surely awaits *Shady Grove*. With the third installment, however, we can now see the pattern of discretionary shifting between substance and procedure that earns these cases the designation of Phase Three of *Erie*. As this pattern threatens to become entrenched, it is worth considering the Court's rationale and authority for the new approach. Part II.B, below, argues that the Court lacks authority for exercising the discretion that characterizes Phase Three. Part II.C refutes the primary theoretical justification for that discretion: While the Court has adopted a pose of vindicating federalism by accommodating state policies, the Phase Three approach is neither required nor even necessarily helpful for protecting the results of democratic processes in the states.

A. The Chorus of Criticism

Erie's Third Phase has been criticized from several quarters for being confusing and for failing to give adequate guidance to the lower courts.¹¹⁷

¹¹⁶ *Shady Grove*, 130 S.Ct. at 1468 (Ginsburg, J., dissenting).

¹¹⁷ See Thomas D. Rowe, *Not Bad for Government Work: Does Anyone Else Think the Supreme Court is Doing a Halfway Decent Job in Its Erie-Hanna Jurisprudence?*, 73 NOTRE DAME L. REV. 963, 963-66 (1998) (summarizing criticism of *Gasperini*); Dudley & Rutherglen, *supra* note 10, at 708 (describing a

Kevin Claremont, for example, offers mild praise for the *Shady Grove* plurality for bringing greater clarity to *Erie* doctrine while backing off from what I am calling the Phase Three approach.¹¹⁸ The most common specific complaint about *Semtek* and the *Shady Grove* dissent is their return to the practice of creating dual readings for Federal Rules: *Semtek* and the *Shady Grove* dissent both accepted strained, implausible interpretations of Federal Rules to be used only in diversity cases, with the more natural interpretation continuing to prevail in federal question cases.¹¹⁹ The creative textualism of *Semtek*'s Rule 41 and the *Shady Grove* dissent's Rule 23 is perhaps to be admired as a matter of lawyerly semantic skill, but it should not be embraced by courts.¹²⁰

Commentators have also noted that the ad hoc approach of the Third Phase is in tension with *Erie* itself. Earl Dudley and George Rutherglen observe that "federal district courts today arguably possess greater freedom to reach desired results in diversity cases than they had under *Swift v. Tyson*."¹²¹ Douglas Floyd similarly complains that *Gasperini*'s open-ended interest balancing will lead to

"chorus of academic criticism" for *Gasperini* and *Semtek*); see also Geoffrey C. Hazard, *Has the Erie Doctrine Been Repealed by Congress?*, 156 U. PA. L. REV. 1629, 1635 (2008) (calling *Gasperini* "pitiful").

¹¹⁸ Kevin M. Clermont, *The Repressible Myth of Shady Grove*, SSRN (2010).

¹¹⁹ See, e.g., Dudley & Rutherglen, *supra* note 10, at 708-09 (summarizing the authors' criticisms of *Gasperini* and *Semtek*); J. Benjamin King, *Clarification and Disruption: The Effect of Gasperini v. Center for Humanities, Inc. on the Erie Doctrine*, 83 CORNELL L. REV. 161, 164 (1997) (arguing that *Gasperini* undermines reliance on apparently applicable Federal Rules).

¹²⁰ One reason for rejecting such unnatural readings in order to reach a result in a particular case is that potential for unforeseen consequences in other cases is substantial. For example, the *Shady Grove* dissent would separate the "substantive" question of whether class remedies are available on a particular cause of action from the "procedural" questions addressed by Rule 23. While perhaps a clever resolution of the case before it, such a holding would have opened the door to litigation over whether class remedies are "available" as to every cause of action, effectively creating a whole new field of law. See comment by Edward A. Hartnett on civil procedure professors' listserv, 3/31/10 (on file with author).

¹²¹ Dudley-Rutherglen, *supra* note 10, at 744-45. Interestingly, the lower courts do not seem as interested in exercising this freedom as does the Supreme Court. See *infra*, Part III.A.

“unwarranted subordination of substantive state objectives to ad hoc judicial perceptions of amorphous federal procedural ‘interests.’”¹²²

Other commentators have praised both *Gasperini* and *Semtek*. Stephen Burbank claims responsibility for most of *Semtek*, although he parts ways with the Court over its dual reading of Rule 41(b).¹²³ Praise for *Gasperini* has come from those, like Thomas Rowe and Richard Freer, who applaud the effort to accommodate state law and to give independent, retail-level meaning to part (b) of the REA.¹²⁴ Professor Freer, however, is critical of the Court’s application *Erie*’s twin aims,¹²⁵ and Professor Rowe’s praise was in part contingent on the Court’s continued production of solid majority opinions, a record that was broken by the splintered decision in *Shady Grove*.¹²⁶

This Article joins with the critics of the discretion exercised by the Supreme Court in *Gasperini* and the dissent in *Shady Grove*. It adds, in part II.B.1, that *Semtek* is of the same mold and, in part II.C, that democracy in the states may actually be better served by abandoning the Phase Three approach.

¹²² C. Douglas Floyd, *Erie Awry: A Comment on Gasperini v. Center for Humanities, Inc.*, 1997 B.Y.U. L. Rev. 267, 269-70. Floyd also argues that *Gasperini* should have either applied state law at both the trial and appellate or applied federal law at both levels. The latter argument, however, appears to overlook the Seventh Amendment aspect of *Gasperini*.

¹²³ Stephen B. Burbank, *Semtek, Forum Shopping, and Federal Common Law*, 77 NOTRE DAME L. REV. 1027, 1038, 1039-47 (2002).

¹²⁴ Richard D. Freer, *Some Thoughts on the State of Erie After Gasperini*, 76 TEX. L. REV. 1637 (1998); Rowe, *supra* note 117. Professor Rowe supports allowing states to override Federal Rules of Civil Procedure, on substantive policy grounds, arguing that such overrides will be rare and could always be trumped by Congress.

¹²⁵ Freer, *supra* note 124, at 1654-57.

¹²⁶ Rowe, *supra* note 117, at 1014-15. *Shady Grove* also dashed Rowe’s hope that the *Gasperini* dissenters were driven primarily by Seventh Amendment concerns and would join the rest of the Court’s deferential interpretive approach in future cases.

B. The Supreme Court Exceeds Its Authority When It Freelances on *Erie* Questions

This section argues that the Supreme Court's freelancing on choice-of-law questions exceeds its authority under the Constitution, the REA, and the RDA. In *Semtek*, the Court announced its creation of federal common law to govern the preclusive effect of federal diversity judgments, refusing to apply either Rule 41 or state law. Under the terms of *Semtek* itself, the Court's authority for creating common law was suspect, and the Court offered no justification for its claim of power. In *Gasperini*, the Court presented itself as creatively seeking an accommodation of its own devising between state and federal law, effectively creating a federal common law of New York remedies. This, too, the Court failed to justify. In both cases, the Court lacked authority for the freelancing that characterizes the Third Phase.

1. The Trouble With *Semtek*: The Court's Inherent Powers Cannot Logically Exceed the Power of the Court and Congress Acting Together.

Semtek's reasoning is worse than circular; it is more like a mobius strip. The question presented starts out as a seemingly procedural one regarding the effect of Federal Rule 41(b).¹²⁷ But no, says the Court, the question is substantive and therefore not reachable by the Federal Rules.¹²⁸ Turn the page again, however, and it is once again procedural—at least, procedural enough to be subject to the inherent powers of the federal courts.¹²⁹ This chain of reasoning constitutes a wrongful arrogation of power. If preclusion is “too substantive” to be regulated by the Supreme Court and Congress acting together through the REA, then the courts lack authority to regulate it pursuant to their inherent power to regulate procedure.

¹²⁷ *Semtek Int'l Inc. v. Lockheed Martin Corp.*, 531 U.S. 497, 501 (2001).

¹²⁸ *Semtek*, 531 U.S. at 503-04.

¹²⁹ *Semtek*, 531 U.S. at 508.

The usual rule is that the preclusive effect of a judgment is governed by the law of the court that rendered the judgment.¹³⁰ This rule allows the parties to make reasonable predictions of potential preclusive effects and to behave accordingly; it also vindicates the procedural interests of the forum, which uses future preclusive effects as tools for controlling the parties' behavior over the course of the litigation.¹³¹ Because the source of the law that will govern future preclusive effects should be ascertainable at the time the first judgment is rendered, we can imagine that every judgment contains an invisible footnote specifying the preclusion law that applies. A California judgment, for example, will contain an invisible footnote summarizing California preclusion law. When that judgment is presented as a defense to litigation in a Maryland court, the Maryland court applies the decisions embodied in the judgment and the California rules of preclusion to the allegations made in the Maryland action. From these elements, it determines whether the Maryland action is precluded. The question in *Semtek* was: When a federal court in California sits in diversity, does the invisible footnote to its judgment contain California preclusion law or federal preclusion law?

As described above, the defendant in *Semtek* first argued that federal law controlled because Rule 41(b) made the California judgment preclusive.¹³² According to the first part of the opinion, however, the Court adopted a convoluted reading of Rule 41(b) because preclusion was dangerously substantive, even for REA purposes.¹³³ The Court warned that reading Rule 41(b) to govern preclusive effect “would arguably violate the jurisdictional limitation of the Rules Enabling Act: that the Rules ‘shall not abridge, enlarge or modify any substantive right.’”¹³⁴ This argument suggests that the

¹³⁰ See Howard M. Erichson, *Interjurisdictional Preclusion*, 96 MICH. L. REV. 945, 1002 (1998). Courts sometimes apply the preclusion law of the law-supplying jurisdiction from the first case. *Id.* Either way, preclusive effects are predictable, since they do not depend on the law of the enforcing jurisdiction.

¹³¹ See Erichson, *supra* note 130, at 1002-03.

¹³² *Semtek*, 531 U.S. at 501.

¹³³ *Semtek*, 531 U.S. at 503-04.

¹³⁴ *Semtek*, 531 U.S. at 1026 (quoting 28 U.S.C. §2072(b)).

preclusion question in *Semtek* falls on the substance side of the spectrum, indicated here by the star:

Semtek thus argues, as a justification for its narrow reading of Rule 41(b), that preclusion is “too substantive” for the REA.¹³⁵

According to our diagram, even the possibility of being “too substantive” for the REA should mean that preclusion is substantive for *Erie* purposes as well. Under the RDA, the federal courts would therefore be required to follow state law. The invisible footnote of a diversity judgment would contain state law, and the preclusive effect of the judgment of a federal court sitting in diversity would be governed by the preclusion law of the state that provided the substantive law.

And indeed, the Court initially suggested that this outcome would be required, for it stated that applying the federal Rule would “in many cases violate the federalism principles of *Erie*”¹³⁶ Citing *Hanna*, *Guaranty Trust*, and *Walker v. Armco Steel*,¹³⁷ the Court argued that giving force to the federal rule would result in substantial variation in outcomes between state and federal court, leading to the inequities and forum shopping that the “twin aims” test is meant to prevent.¹³⁸ So far, preclusion is clearly substantive for *Erie* purposes, and substantive enough for REA purposes that a Rule

¹³⁵ One could read *Semtek* as addressing not preclusion generally but preclusive effect in the context of statute of limitations dismissals. This reading is discussed *infra*, text accompanying note part III.B, as an option for limiting *Semtek*’s effect, but it is not the most natural reading of the opinion, which speaks as if to questions of preclusion generally.

¹³⁶ *Semtek*, 531 U.S. at 504.

¹³⁷ 446 U.S. 740 (1980).

¹³⁸ *Semtek*, 531 U.S. at 504.

treading the ground of preclusion should be drained of life. This analysis ought to mean that the federal courts are required by the RDA to follow state law.

In the second half of *Semtek*, however, the Court reversed course, deciding that the preclusive effect of diversity judgments would instead be governed by federal common law.¹³⁹ As support, the Court cited cases suggesting that federal law controlled the preclusive effect of federal judgments, but it conflated federal question cases with diversity cases and conflated the obligation to give full faith and credit to federal judgments with the determination of what such faith required.¹⁴⁰ The Court also relied heavily on a pre-REA case that it had already said no longer controlled.¹⁴¹ The justification for making federal common law takes up barely more than a page in the *United States Reports*, and nowhere does it identify the source of the Court's authority.¹⁴²

Commentators have suggested that *Semtek* was based on the Supreme Court's inherent authority to govern procedural matters in the federal courts.¹⁴³ Although the Court is generally obliged to follow congressional commands even in the realm of procedure, it is usually thought to be free to develop rules of practice and procedure, in the absence of congressional action or a governing Rule.¹⁴⁴ Its

¹⁴³ See Woolley, *supra* note 84, at 537 (“While the court did not identify the source of authority for a federal common law of preclusion, it would appear that statutes creating the federal courts and bestowing jurisdiction upon them provide an adequate basis—albeit and implicit one—for the development of common law rules in this area.”).

¹⁴⁴ Joseph J. Anclien, *Broader Is Better: The Inherent Powers of Federal Courts*, 64 N.Y.U. ANN. SURV. AM. L., 37, 41 (2008) (describing the predominant view that inherent powers exist only in “cases of indispensable necessity” and arguing for a broader view); Robert J. Pushaw, *The Inherent Powers of Federal Courts and the Structural Constitution*, 86 IOWA L. REV. 735, 743 (2001) (“As the early Justices recognized but the modern Court has forgotten, the Necessary and Proper

authority to do so comes either from Article III’s establishment of the judicial branch or from Congress’s creation of lower courts and conferral of jurisdiction to decide cases.¹⁴⁵ The problem with relying on this inherent power to explain *Semtek* is that before turning to the inherent power, the *Semtek* Court had deemed the matter at issue to be substantive.¹⁴⁶ Of course, the location of the substance—procedure line may vary according to the legal context, and we have already said that it is different for the REA than for the RDA. The line could certainly lie in yet another location for purposes of inherent power. However, if preclusion is substantive for REA and RDA purposes, but procedural for inherent power purposes, then *Semtek* requires us to place a third arrow even further to the left, marking the limit of the “procedure” category when the Court’s inherent power is at stake. With the star still indicating the location of preclusion law, we have the following:

one branch of government are at their strongest when that branch acts in concert with another branch.¹⁴⁹ It makes no sense to say that the Court's inherent power to make procedural law exceeds its power to do the same when buttressed by congressional authority.¹⁵⁰ As Elizabeth Lear has explained,

The Rules Enabling Act and the Rules of Decision Act are ... relevant to the scope of the Court's inherent power, representing efforts by Congress to minimize friction between the federal courts and Congress, and the federal courts and the States, respectively. Together they form the outer limits of judicial innovation on the procedural front. ... While Congress may enact substantive or procedural statutes that displace the substantive law of the States, the Rules of Decision Act prohibits the Court from doing so under the guise of the inherent power.¹⁵¹

authorization of Congress, his authority is at its maximum, for it includes all that he possesses in his own right plus all that Congress can delegate.”).

¹⁴⁹ Cf. Craig Green, *Repressing Erie's Myth*, 96 CAL. L. REV. 595, 598-99 (2008) (“Federal common law could be analogized to Justice Jackson’s discussion of presidential authority in *Youngstown Sheet & Tube Co. v. Sawyer*. Jackson’s opinion explains the basic interaction between Congress and a branch with largely derivative constitutional authority. I suggest that those dynamics work similarly whether one considers Congress and the President (*Youngstown*), or Congress and the Judiciary (federal common law).”).

¹⁵⁰ Cf. Elizabeth T. Lear, *Congress, the Federal Courts, and Forum Non Conveniens: Friction on the Frontier of the Inherent Power*, 91 IOWA L. REV. 1147, 1184 (2006) (“[I]t would be very odd indeed if the Court could evade this restriction simply by relying on its inherent power.... The Rules of Decision Act represents the congressional vision of the appropriate balance between state law and inherent power lawmaking by the federal courts.”).

¹⁵¹ Lear, *supra* note 150, at 1180-81; see also Wendy Collins Perdue, *The Sources and Scope of Federal Procedural Common Law: Some Reflections on Erie and Gasperini*, 46 U. KAN. L. REV. 751, 760 (1998) (“The Rules Enabling Act may constrain courts, even where they are not directly interpreting a Federal Rule of Civil Procedure but are instead creating a federal common law rule of ‘practice and procedure. As Professors Westen and Lehman argue, ‘the statutory prohibition on rules that abridge ‘substantive rights’ must be deemed to apply to judge-made rules too; otherwise, judges could do through common law adjudication what they cannot do through the carefully circumscribed and safeguarded mechanisms used to create the federal rule of civil procedure.’”).

For these reasons, the “inherent power” mark should, at a minimum, lie somewhere to the right of the REA mark. Because preclusion is substantive for RDA purposes, either the Federal Rule validly applies and controls, or else state law controls. Depending on whether the *Semtek* Court was correct in the first half of its opinion (calling preclusion substantive, for both REA and RDA purposes) or the second half (treating it as procedural), either the Court wrongly usurped the states’ substantive power or it lawlessly ignored, through convoluted interpretation, its own prior promulgation of Rule 41(b).

There are two defenses that one could make of the Court’s analysis in *Semtek*, but each ultimately fails. First, perhaps my diagram is misleadingly linear. The relationships among the RDA, the REA, and inherent power may be multidimensional. There might then be a way to justify the Court’s use of inherent power along a different axis. Second, perhaps preclusion truly is substantive: *Semtek* is justified not by the Court’s inherent power *over procedure* but by substantive power to make federal common law.

The first defense would draw on the long-neglected part (b) of § 2072, which prohibits a Federal Rule from abridging, enlarging, or modifying a substantive right.¹⁵² Commentators have long complained that the Court’s “really regulates procedure” test for validity under the REA implements only § 2072(a), authorizing the Court to promulgate rules of practice and procedure.¹⁵³ Many believe that some further constraint is needed in order to fulfill § 2072(b)’s command not to alter substantive rights.¹⁵⁴ Preclusion is a classic example of a body of law that is “procedural” in a sense but can also reasonably be understood to alter substantive rights.¹⁵⁵ It might then

¹⁵² 28 U.S.C. § 2072(b).

¹⁵³ See, e.g., Ely, *supra* note 1, at 719-20; Kelleher, *supra* note 106, at 48 (collecting citations);

¹⁵⁴ But see Stephen B. Burbank, *supra* note 106, at 1108 (arguing that § 2072(b) does not have independent effect distinct from the effect of § 2072(a)).

¹⁵⁵ See Barrett, *supra* note 14, at 830-31 (treating preclusion as a matter of procedural common law but noting that its “status as ‘procedural’ is ... open to doubt”).

validly lie within the Court's inherent power over procedure while still being "too substantive" for the REA.

The problem with this first defense of *Semtek* is the RDA. Surely, if preclusion law alters substantive rights, it is substantive not just under the REA but also under *Erie/Hanna/RDA*. The RDA thus directs the federal courts to apply state law. The *Semtek* decision offers no justification for why state law does not "apply," and thus control, under the terms of the RDA. Analogy to Justice Jackson's *Steel Seizure* framework is again useful here¹⁵⁶: While the Court's power over procedure is at its maximum when it acts in conjunction with Congress, as under the REA, the Court's power is minimal when it acts contrary to congressional command.¹⁵⁷ The adoption of federal common law contrary to Congress's policy of following state law can be justified under the inherent power only to protect the core ability of the federal courts to perform their judicial function.¹⁵⁸ That is a heavy burden, which the *Semtek* Court did not even attempt to meet.

Similarly, any legal rule that would be deemed "procedural" for *Erie* purposes is also sufficiently procedural to be within the scope of the REA. Our diagram is thus correct in showing a linear, progressive transition from substance to procedure, with the REA and RDA tests marking different points along that line.¹⁵⁹ The test for inherent powers over procedure can, at most, be no further to the left than the REA mark, and it is not possible for a matter to be "too

¹⁵⁶ See *supra*, note 149 (discussing *Steel Seizure*).

¹⁵⁷ See *Youngstown Sheet & Tube Co. v. Sawyer*, 343 U.S. 579, 637-38 (1952) (Jackson, J., concurring) ("When the President takes measures incompatible with the expressed or implied will of Congress, his power is at its lowest ebb, for then he can rely only upon his own constitutional powers minus any constitutional powers of Congress over the matter.").

¹⁵⁸ See *supra*, part II.B.1 (discussing the scope of inherent power relative to power under the REA).

¹⁵⁹ This discussion assumes that a Federal Rule is either valid or invalid under the REA, ignoring the possibility that a Rule might be generally valid but invalid as applied to displace a particular state practice that serves substantive goals. See *infra* part II.C. (discussing reasons why Rules should not be invalidated as applied).

substantive” for the REA yet within the scope of inherent power. The first defense therefore fails.

The second defense is that preclusion is, indeed, substantive, and that the authority claimed in *Semtek* was not the inherent power over procedure but common law-making power such as the Court exercises over maritime law or suits to which the United States is a party.¹⁶⁰ In order to make federal common law, however, the Court is supposed to identify some federal interest that is at stake.¹⁶¹ There are only two federal interests that are conceivably at stake in the preclusive effect of a diversity judgment: First, there is an interest in ensuring that federal judgments receive full faith and credit. That interest, however, does not speak to the content of the preclusion rules that apply to the judgment, only to their being followed. Second, there is a federal interest in the conduct of the initial litigation, which will be affected by the anticipated preclusive effects of the judgment.¹⁶² That, however, is a procedural interest, and to justify federal common law on that basis *without* invoking the federal courts’ power to regulate their own proceedings would be too fine a cut.

The *Semtek* Court did describe one situation in which such a federal procedural interest would exist and would require a federal rule to control preclusive effect.¹⁶³ That one situation was the possibility that a state’s courts might not give preclusive effect to dismissal as a sanction.¹⁶⁴ This policy would conflict with a federal court’s interest in making its sanction stick. The *Semtek* Court

¹⁶⁰ See Barrett, *supra* note 14, at 831-32 (“In *Semtek*, the Supreme Court hinted that its power to formulate federal rules of preclusion rests on the same ground as its power to formulate substantive common law: the lack of congressional guidance in an area of clearly federal concern.”). However, Barrett also points out that the Court did not elaborate on this justification in *Semtek* and that its other preclusion cases have been silent on the source of power. *Id.* at 832.

¹⁶¹ See Barrett, *supra* note 14, at 832 (identifying the grounds for judicial power to formulate substantive common law).

¹⁶² Erichson, *supra* note 130, at 1002-03 (discussing the forum’s interest in the preclusion rules that would later be applied to a judgment).

¹⁶³ *Semtek Int’l Inc. v. Lockheed Martin Corp.*, 531 U.S. 497, 509 (2001).

¹⁶⁴ *Semtek*, 531 U.S. at 509.

seemed to fear that, having intimated that preclusion was substantive under the REA and flat-out stated that it was substantive under *Erie*, it would be forced to live with the whims of states that impose only ineffective sanctions on misbehaving litigants. This example is an unconvincing basis for replacing state preclusion law with federal common law if preclusion is, indeed, properly understood as substantive for REA and RDA purposes. State courts, like federal courts, prefer their sanctions to be meaningful, so it seems unlikely that a state would adopt such a self-defeating policy as the *Semtek* Court imagined. Moreover, there is no need to contort either preclusion law or *Erie* doctrine to deal with that slight possibility. A federal court certainly has the power to deprive a misbehaving party of property as a sanction, whether that property takes the form of cash or a cause of action.¹⁶⁵ That hardly means that that we need a federal common law of property. Moreover, *Byrd* already permits case-by-case balancing of state and federal interests, so that a matter that would otherwise be controlled by state law can be federalized because of compelling federal concerns in a particular situation.¹⁶⁶ If the Supreme Court truly believes that preclusion is an otherwise substantive matter, the dismissal-as-sanction example at best warrants federal common law only as an exception, not as the general rule.

The outcome reached in *Semtek* has intuitive appeal: preclusion has a substantive feel, especially in the context of a statute-of-limitations dismissal, yet an equally strong intuition says that federal courts must retain control over the enforcement of their judgments. As discussed below, these concerns could be addressed without the free-wheeling approach to judicial authority on display in *Semtek*.¹⁶⁷ The Supreme Court cannot shake off the yoke of the REA by hinting that a matter is substantive while simultaneously claiming inherent procedural authority to regulate the matter on its own.

¹⁶⁵ See *Chambers v. Nasco, Inc.*, 501 U.S. 32, 52 (1991) (holding that *Erie* did not prevent a federal court from using its inherent power to sanction a litigant, even where the state court might not have imposed a similar sanction).

¹⁶⁶ See *Byrd v. Blue Ridge Rural Elec. Coop.*, 356 U.S. 525 (1958) (allowing courts to balance *Erie* concerns against countervailing federal interests).

¹⁶⁷ See *infra*, part II.C.

2. The Trouble With *Gasperini*: The RDA Does Not Authorize a Body of Federal Common Law.

Other than the Supreme Court's inherent power over procedure, there is only one possible source of authority for making a federal common law of preclusion for diversity cases. It is also the only possible source of authority for making a federal common law of New York tort damages in *Gasperini*. That source is the RDA itself. The point of *Erie*, however, was that neither the RDA nor any other provision of federal law authorizes federal courts to create general common law.¹⁶⁸ To the extent that the *Gasperini* Court perceived itself as creatively accommodating state law to the requirements of federal constitutional procedure, it reached beyond its authority, as it did in *Semtek*.

Congress's grant of diversity jurisdiction to the federal courts could, in theory, be understood to include a grant of lawmaking power.¹⁶⁹ In the course of hearing common law claims, the federal courts would make the law to apply to those claims. However, the RDA, as interpreted in *Erie*, rejects that approach.¹⁷⁰ Rather than authorizing federal courts to make substantive law, it directs them to take the applicable state law as they find it.

In *Gasperini*, the Court seemed to think it was trapped between the RDA's command that it follow the state's substantive policy and the Seventh Amendment's demand to respect the jury's verdict. Of course, in a conflict between a state statute and the Constitution, it is clear which one prevails. Nonetheless, the Court felt the force of *Erie* policy to be so strong that it sought out a resolution that would enforce state policy without offending the Seventh Amendment, perhaps distorting its Seventh

¹⁶⁸ *Erie R.R. v. Tompkins*, 304 U.S. 64, 78 (1938).

¹⁶⁹ See Martha A. Field, *Sources of Law: The Scope of Federal Common Law*, 99 HARV. L. REV. 881, 915-16 (1986) (noting this possibility and its rejection in *Erie*); Jay Tidmarsh & Brian J. Murray, *A Theory of Federal Common Law*, 100 NW. U. L. REV. 585, 623 (2006) (noting that *Semtek* involved federal common lawmaking based solely on the existence of diversity jurisdiction).

¹⁷⁰ See Field, *supra* note 169, at 915-16.

Amendment analysis to get there.¹⁷¹ The RDA, however, says that the federal courts should follow state law, where it applies, not that they should devise new laws in order to serve the policy goals they believe to have been articulated by the states. The Court's freelancing in *Gasperini* took it exactly where *Erie* meant it should not go: rather than simply apply state law, the Court had to discern what policies New York legislators meant to pursue, balance those state policies with federal interests, and devise a practice that the Court believed would appropriately accommodate those interests.

Like in *Semtek*, in *Gasperini* the Court took upon itself the authority to formulate the law that would apply to a diversity case. In *Semtek*, the Court appears to have done so on the basis of its inherent powers. As shown in Part II.A., however, inherent powers were inapplicable in light of the Court's rationale for rejecting the applicability of Rule 41(b). In *Gasperini*, the Court did not offer even a hint of its authority for developing policy to accommodate state interests, rather than simply applying (or not applying) state law. The RDA rejects such a role for the federal courts. In both *Semtek* and *Gasperini*, the Court's rhetoric of discretionary formulation of policy by federal courts is beyond its legitimate scope of inquiry.

C. The REA and the Scope of State Legislative Authority

When the Court exceeded its authority in *Semtek* and *Gasperini*, it did so with the best of intentions. The Court seemed to see itself as serving the goals of *Erie* and the RDA by accommodating state law, yet retaining federal supremacy where necessary. In this Part, I argue that the Court's good intentions toward the states were misplaced. Its efforts to forge creative compromises between state and federal practices greatly magnify judicial discretion, which is contrary to both the federalism and the separation of powers aspects of *Erie* and the REA. Moreover, the Court's justification for increasing its own

¹⁷¹ See LAURENCE H. TRIBE, *AMERICAN CONSTITUTIONAL LAW* 629 (2000) (sharply criticizing *Gasperini*'s treatment of the Seventh Amendment, calling it "aberrant" and not worthy of deference as a matter of stare decisis).

discretion—greater accommodation of state law—is flawed. Paradoxically, federalism and respect for state authority over substantive law could be equally well served by a wholesale approach that adheres to valid federal Rules regardless of the states' idiosyncratic use of procedure to serve substantive goals. This is so because a uniformly applied set of Federal Rules would put state lawmakers on notice of the procedures to be used in diversity cases and allow them to formulate their substantive law accordingly. This approach would have the beneficial effect of increasing democratic transparency in the states.

1. Echoes of the First Two Phases

The Court's choice-of-law decisions in Phase Three echo some of the themes from Phases One and Two, and are thus subject to the same critiques. While Phase Two had its excesses, its conceptual framework was sound; part of the problem with Phase Three is the re-introduction of mistakes from Phase One. Following the lead of the *Shady Grove* plurality, the Court should abandon these mistakes and return to a moderated version of Phase Two.

Before *Hanna*, the Supreme Court inaugurated the practice of adopting implausibly narrow readings of Federal Rules in order to apply state law instead.¹⁷² This practice has returned in Phase Three.¹⁷³ The practice is especially pernicious when a more natural reading of the Rule continues to be applied in federal question cases, so that the same language in the same Rule means two different things, depending on the basis for federal jurisdiction. Even Justice Stevens's "retail" approach in *Shady Grove* would be an improvement, if it entailed frank acknowledgement that the Rule was being found invalid as-applied, rather than disingenuously distorted.¹⁷⁴

¹⁷² See, e.g., *Ragan v. Merchants Transfer & Warehouse Co.*, 337 U.S. 530 (1949).

¹⁷³ See *supra*, parts I.C.2 and I.C.3 (discussing *Semtek* and *Shady Grove*).

¹⁷⁴ See *Shady Grove Orthopedic Assoc. v. Allstate Insur. Co.*, ___ U.S. ___, 130 S.Ct. 1431, 1448 (2010) (Stevens, J., concurring in part and concurring in the judgment).

This conceptual improvement, however, would not solve the problem of excessive discretion by the federal courts. The retail approach means having federal judges decide in every case whether a state's true motive for its law is substantive or procedural, a more difficult task than the already-difficult one of classifying an actual rule or law as such. Each case would also involve a *Byrd*-like weighing of the strength of those state interests, as compared to any federal interests at stake. In contrast, the approach of the *Shady Grove* plurality could mark the end of Phase Three and a return to the conceptual structure of Phase Two, although ideally with a less aggressive approach to defining the sweep of Federal Rules. As discussed below, this return would best be served by taking the wholesale, rather than the retail, approach to the Rules themselves.

2. Separating Substance and Procedure to Improve State Lawmaking

While Phase Two may have gone too far, it was conceptually the right approach, and the *Shady Grove* plurality is right about how the validity of Rules should be evaluated. Many of the pros and cons of the “wholesale” and “retail” approaches have been debated elsewhere.¹⁷⁵ Here, I focus on one argument for the “wholesale” approach that has been neglected and that directly answers one of the main concerns of those on the “retail” side.

A primary theoretical argument on the retail side is respect for democratic enactments in the states. In this section, I show that adhering to federal procedures can be beneficial to state-level democracy, because it forces state lawmakers to make their policy preferences clear through the substantive law, rather than masking preferences through specialized procedure. This justification for wholesale, rather than retail, federal procedure gains support from the observations of several theorists who have, from a variety of perspectives, analyzed the relationship between substance and

¹⁷⁵ See Ely, *supra* note 1, at 733-34 (outlining and endorsing the retail approach); *Shady Grove*, 130 S.Ct. at 1440-47 (endorsing the wholesale approach and criticizing the retail approach used by the dissent and concurrence).

procedure in light of democratic norms.¹⁷⁶ Moreover, at least in recent years, this justification is consistent with congressional action manifesting a desire to maintain the federal courts as a procedurally independent forum for litigating state law claims.¹⁷⁷

A wholesale approach to the Federal Rules has the potential to improve state lawmaking by forcing state lawmakers to be more open and transparent with respect to substantive goals. The fact that state law claims will be adjudicated under federal procedures reduces the ability of state lawmakers to say, with Representative Dingell, ““I’ll let you write the substance ... you let me write the procedure, and I’ll screw you every time.””¹⁷⁸ Dingell’s statement reflects the fact that a substantive goal can easily be undermined by imposing procedural hurdles. Substantive entitlements are visible to the public when it assesses the government’s work, while procedural mechanisms are more arcane, difficult to understand, and usually trans-substantive. When lawmakers tinker with procedure on a substance-specific basis, they often do so in order to modify substantive rights *de facto*, even if the substantive right remains formally unchanged.

Many will regard the lawmaker’s ability to fine-tune substantive rights through procedural mechanisms as a good thing. Legislatures retain ultimate control over many aspects of procedure in part because of the close connection between substance and procedure. Indeed, the notion of a dichotomy between the two categories is relatively recent.¹⁷⁹ Nonetheless, that dichotomy now lies at the root of the litigation framework that has been created by Congress and that is contemplated by diversity jurisdiction, the RDA as interpreted

¹⁷⁶ See *infra*, text accompanying notes 182-206.

¹⁷⁷ See *infra*, text accompanying notes 217-20.

¹⁷⁸ Regulatory Reform Act: Hearing on H.R. 2327. Before the Subcomm. on Admin. Law and Governmental Regulations of the House Comm. on the Judiciary, 98th Cong. 312 (1983) (statement of Rep. John Dingell).

¹⁷⁹ Thomas O. Main, *The Procedural Foundation of Substantive Law*, 87 WASH. U. L. REV. 801, 804-10 (2010) (describing how the concept of substance and procedure as a dichotomy emerged along with the convergence of law and equity and coincided with the early development of courts in the United States).

in *Erie* and its progeny, and the REA. Here, I argue only that maintaining that dichotomy is not necessarily a usurpation of state legislative prerogatives but instead can enhance the democratic legitimacy of state substantive law. While substance and procedure may be inextricably intertwined, there is still value in trying to separate them.

Other commentators have argued that separating substance from procedure can promote democratic values.¹⁸⁰ Their analyses have focused on concerns that some of the Federal Rules are “too substantive” and thus improperly alter substantive rights under state and federal law alike.¹⁸¹ This Article takes no position on where the substance—procedure line should be drawn for purposes of the REA, except that the line should be drawn wholesale rather than retail. However, the democratic problems created by an over-reaching judiciary that uses procedure improperly to affect substance are similar in kind to that of a legislature that does the same. The same theoretical points thus support the idea that adherence to the Federal Rules in federal court is no insult to the democratic processes of the states.

Martin Redish’s work contains the most explicit and extensive discussion of the democratic implications of manipulating procedure in order to affect substance in the context of purely federal law.¹⁸² Redish argues that a legislature has a duty to be forthright about the substantive rights it enacts into law. As part of that duty, the

¹⁸⁰ See *infra*, text accompanying notes 182-96, 200-06 (discussing work by Martin Redish and JoEllen Lind).

¹⁸¹ See, e.g., Martin H. Redish, *Class Actions and the Democratic Difficulty: Rethinking the Intersection of Private Litigation and Public Goals*, 2003 U. CHI. L. F. 71 (hereinafter Redish, *Class Actions*); Lind, *supra* note 25.

¹⁸² See Redish, *Class Actions*, *supra* note 181; Martin H. Redish & Christopher R. Pudelski, *Legislative Deception, Separation of Powers, and the Democratic Process: Harnessing the Political Theory of United States v. Klein*, 100 NW. U. L. REV. 437 (2006) (hereinafter Redish & Pudelski, *Legislative Deception*); Martin H. Redish, *Federal Judicial Independence: Constitutional and Political Perspectives*, 46 MERCER L. REV. 697 (1995) (hereinafter Redish, *Federal Judicial Independence*).

legislature cannot create opaque procedural requirements that in effect undermine the rights proclaimed by the substantive law:

For example, in formally adopting “standard A” as a general rule of decision, while simultaneously requiring the federal courts to reach decisions that effectively amount to adoption of “standard B” or “standard ‘not A,’” Congress has substantially subverted the representational democratic process.¹⁸³

Redish argues that this sort of legislative deception could violate both the procedural due process rights of litigants and the separation of powers.¹⁸⁴

An example where procedural rights might be violated is Title VII of the Civil Rights Act. Deborah Brake and Joanna Grossman have demonstrated that the remedial scheme established under Title VII is so burdensome on claimants, so unforgiving about its short deadlines, and so poorly designed as a response to the real-life experience of discrimination, that Congress has failed to protect the substantive rights purportedly created by Title VII.¹⁸⁵ While Congress may not have been under a duty to create those substantive rights, it claims to have created them and reaps the political benefit of having done so. If it has encumbered those substantive rights with such a defective enforcement mechanism that they effectively do not exist for a substantial portion of people, then perhaps, under Redish’s theory, Congress has violated the due process clause by purporting to create a substantive right but then making it overly burdensome to vindicate that right.

¹⁸³ Redish, *Federal Judicial Independence*, *supra* note 182, at 715-16.

¹⁸⁴ Redish, *Federal Judicial Independence*, *supra* note 182, at 716.

¹⁸⁵ Deborah L. Brake & Joanna L. Grossman, *The Failure of Title VII as a Rights-Claiming System*, 86 N.C. L. Rev. 859 (2008). That Brake & Grossman’s thesis is an example of Redish’s point is pointed out in Howard M. Wasserman, *Jurisdiction, Merits, and Procedure: Thoughts on a Trichotomy*, 102 Nw. U. L. Rev. 1547, 1557-58 (2008).

Separation of powers is a more salient concern when Congress forces the courts to employ Orwellian double-speak. Redish, with Christopher Pudelski, argues that the Supreme Court implicitly recognized this problem in *United States v. Klein*.¹⁸⁶ *Klein* involved the ability of southerners to reclaim property lost during the Civil War.¹⁸⁷ To prevail, a claimant had to have remained loyal to the United States.¹⁸⁸ The Supreme Court had held that receipt of a presidential pardon constituted proof of loyalty.¹⁸⁹ Congress had sought to reverse that presumption, declaring that a pardon should instead be taken as proof of *disloyalty*.¹⁹⁰ In *Klein*, the Supreme Court struck down the presumption, but the precise reason for doing so is not clear from the opinion. The statute drew into question not only the independence of the judiciary in determining the evidentiary significance of a particular fact but also the scope of the president's pardon power.¹⁹¹ Redish and Pudelski make a convincing argument that concerns about legislative deception were part of the mix.¹⁹² Redish has argued that the same concerns should have led to a different outcome in *Michael H. v. Gerald G.*, in which the Supreme Court upheld California's marital presumption of paternity, rejecting the parental claims of the genetic father in favor of the mother's husband.¹⁹³ Having promised the public that "loyal" southerners would reclaim their property and that "fathers" would have legal rights as parents, the legislature could not require the courts to make a mockery of language by following presumptions that forced the opposite conclusions. Redish argues, "Under separation-of-powers principles, this congressional action is defective, because it effectively enlists the federal judiciary in a scheme to bring about voter confusion."¹⁹⁴

¹⁹³ Redish, *Federal Judicial Independence*, *supra* note 182, at 716-17.

¹⁹⁴ Redish, *Federal Judicial Independence*, *supra* note 182, at 716.

Redish's argument is a difficult one where the deceptive procedural requirement is created by the same legislature that has power over the substantive law. Even opaque procedural statutes are public and open to inspection. And lawyers, at least, are accustomed to the occasional counter-intuitive presumption or definition. If "substance" and "procedure" are merely labels that attach to conclusions, why not "father" and "loyal"? Moreover, in each of Redish's examples, the legislative presumption is reasonably defensible. Pardons are usually granted to people who have, in fact, done something wrong, and an admission of guilt is sometimes required. Congress may have been justifiably outraged that pardons were being used to deem people "loyal" for purposes of its compensation scheme. Similarly, marriage to a child's mother has historically been the crux of legal and social of fatherhood.¹⁹⁵ The marital presumption in *Michael H.* could be mocked only because of fairly recent technology allowing for the identification of a genetic father. It is difficult to know when a legislative presumption would become so absurd that it would violate the separation of powers to force the courts to speak in the legislature's terms.

Redish acknowledges that it would be difficult to say when a procedural statute goes so far in deceiving the public about the substantive content of the law that a court should strike it down.¹⁹⁶ For purposes of my claim, however, that line need not be drawn. I do not suggest that state laws be struck down as unconstitutional for intermingling substance and procedure. Rather, I argue that federal courts should recognize that adhering to a uniform system of federal procedure can benefit democratic process in the states, even when displacing state procedure affects substantive outcomes. Protecting

¹⁹⁵ Nancy E. Dowd, *From Genes, Marriage and Money to Nurture: Redefining Fatherhood*, 10 *CARDOZO WOMEN'S L.J.* 132, 132 (2003) ("Largely in the name of gender equality and to some extent in the name of children's rights, we have moved from a legal definition of fatherhood linked to marriage towards a legal definition of fatherhood linked to genes.").

¹⁹⁶ Redish & Pudelski, *Legislative Deception*, *supra* note 182, at 457-58 (describing five difficult questions about the model of legislative deception, including "[I]f it is conceded that all procedural and evidentiary rules may in some sense impact the substantive rights being enforced, why disapprove of such a connection only in certain contexts?").

procedure from the legislature prevents lawmakers from engaging in the sort of deception that Redish criticizes.

In a similar vein, Linda Mullenix has argued that maintaining independent procedures is necessary for a well-functioning independent judiciary.¹⁹⁷ Her focus was on Congress's increasingly frequent interventions in federal procedure in the last thirty years.¹⁹⁸ Mullenix decries the resulting politicization of federal procedure as it is created through legislative rather than judicial institutions.¹⁹⁹ The same phenomenon can occur at the state level. If it does, state courts, drawing on either Redish's or Mullenix's ideas, might decide that their prerogatives have been invaded and strike down excessive legislative interference with procedure as a matter of state separation of powers. Even without such drastic action, however, the existence of federal diversity jurisdiction can check the ability of state legislators to manipulate substance through procedure.

Redish's theory described above is concerned with legislators using procedure to subvert substance. Redish and others have also expressed concern about judges doing the same thing.²⁰⁰ JoEllen Lind terms this phenomenon "procedural *Swift*" and accuses the federal courts, jointly with Congress, of manipulating procedure to undermine state substantive law.²⁰¹ Redish has also argued that courts wrongly use procedure to transform substantive law.²⁰² Interestingly, Lind and Redish both point to class action procedure as a prime example, but with opposite perspectives. Lind argues that the

²⁰⁰ See, e.g., Redish, *Federal Judicial Independence*, *supra* note 182; Lind, *supra* note 25; Lear, *supra* note 150, at 1152 ("This Article takes the position that the Court must abandon the forum non conveniens doctrine as an unconstitutional usurpation of congressional power.").

²⁰¹ Lind, *supra* note 25, at 719 ("Procedural Swift ... is the strategy of creating federal tort law through the guise of regulating procedure.").

²⁰² See Redish, *Class Actions*, *supra* note 181.

Class Action Fairness Act of 2005²⁰³ and stringent federal standards for certification permit defendants to remove to federal court and thereby avoid legitimate enforcement of state law through class mechanisms.²⁰⁴ Congress, she argues, should not “use complex litigation to hide law reform that could not gain public approval if its consequences were better known.”²⁰⁵ Redish, in contrast, argues that the judicial invention and liberalization of class actions to make certain claims feasible that would not otherwise be brought is an illegitimate departure from legislative expectations.²⁰⁶

This difference between Lind and Redish on class actions is a matter of baselines. As David Shapiro has pointed out, the availability or non-availability of class actions affects enforcement of substantive law, but this fact does not tell us what the default rule should be.²⁰⁷ More generally, Thomas Main argues that substantive law is always premised on the procedural system that legislators assume will be used to enforce it.²⁰⁸ Any change in procedures will affect the balance of deterrence contemplated when the law was enacted.²⁰⁹ Main concludes with two proposed solutions to the problem of “mismatch” between procedures when a court applies foreign law: first, when a court applies foreign law, it should apply as much of foreign law, both substantive and procedural, as possible;

²⁰³ Pub. L. No. 109-2, 119 Stat. 4 (2005) (making several changes to class action procedure, including provisions making it much easier for defendants to remove large class actions to federal court).

²⁰⁴ See Lind, *supra* note 25, at 754 (suggesting that the goal of various federal procedural reforms “is to curtail mass tort class actions altogether by redirecting them to the federal forum where they will be obstructed so profoundly that defendants’ overall liability will be reduced.”).

²⁰⁷ David L. Shapiro, *Class Actions: The Class as Party and Client*, 73 NOTRE DAME L. REV. 913, 957 (1998) (“[E]ven one who takes a broader view than I do of the scope of judicial rulemaking power should, I believe, balk at the use of that power either to endorse or to reject the entity theory [of class actions] advanced here.”).

²⁰⁸ Main, *supra* note 179.

²⁰⁹ Main, *supra* note 179 at 823-25.

second, at the policy level, we should strive to harmonize procedure across jurisdictions.²¹⁰

In the domestic choice-of-law context in federal courts, both administrative and theoretical considerations favor Main's second solution over his first. Administratively, federal courts should not be required to adopt large chunks of the procedural devices of the fifty states, as *Erie* doctrine and the REA have long recognized. Moreover, procedure changes over time, and fidelity to Main's goal of fulfilling legislative expectations would require courts to discover and apply the procedures that existed at the time each substantive rule was adopted. Theoretically, as discussed above, uniform procedure requires legislatures to pursue their substantive goals more transparently.

In addition, Main's claim that changes in procedure wrongly interfere with legislative expectations rests heavily on a deterrence theory of lawmaking.²¹¹ While some or most lawmakers may operate from that perspective, the public may expect the substantive law to mean what it says in every case, not just as a matter of probabilities and enforcement rates. Only people who have been through at least one year of law school are likely to be comfortable answering the question "Isn't that illegal?" with "Yes, but nothing is meant to be done about it."

The approach advocated here puts some burden on state lawmakers to be familiar with judicial procedures and perhaps even to amend substantive law occasionally to keep pace with evolving procedural law. As long as we are satisfied that "procedural law," as embodied in the Federal Rules and in the courts' use of inherent authority, is sufficiently procedural, this is not too much to ask of legislators. Congress unquestionably has the power to determine

²¹⁰ Main, *supra* note 179 at 838-40. Main also advises courts to be humble and skeptical about their ability to apply foreign law. *Id.* at 838.

²¹¹ See Main, *supra* note 179, at 823-25 (describing legislation as calibrated to achieve a particular level of deterrence).

federal procedure and to confer diversity jurisdiction.²¹² By following uniform, trans-substantive procedure, the federal courts may deprive state lawmakers of the ability to modify their own substantive creations through substance-specific procedures. Democratic theory suggests that this result may not be a bad thing.

Consider the contrary assumption that has animated the Supreme Court's jurisprudence in Phase Three. In *Gasperini*, the Court seemed almost to feel guilty about the existence of the Seventh Amendment as a constraint on federal courts.²¹³ It reasoned as if state legislators enact their laws in a state-only bubble and the entire burden of figuring out how to carry out their wishes in diversity cases must fall on the federal courts. State legislators, however, should be assumed to be aware of diversity jurisdiction, and there is nothing wrong with expecting them to take it into account. If Congress had considered a statute similar to the New York law at issue in *Gasperini*, the Seventh Amendment would surely have been a topic of discussion; New York legislators should have had the same conversation.

Consider also the state laws at issue in *Shady Grove*. The substantive law proclaimed that insurance companies would be liable for a 2% penalty if they failed to pay claims in a timely fashion.²¹⁴ Perhaps, when this law was enacted, legislators and insurers alike knew full well that it would almost never be enforced in individual actions, since the cost of litigation would almost always outweigh the potential recovery.²¹⁵ The procedural innovations of class actions changed that, leading to far more efficient enforcement of the substantive right proclaimed on the face of the statute. Now, perhaps, as a matter of regulatory policy, this outcome over-deters: it makes

²¹² *Erie R.R. v. Tompkins*, 304 U.S. 64, 91-92 (1938) (Reed, J., dissenting) (“[N]o one doubts federal power over procedure.”).

²¹³ *See supra*, part I.C.1 (describing the Supreme Court's accommodation of state law in *Gasperini*).

²¹⁴ *Shady Grove Orthopedic Assoc. v. Allstate Insur. Co.*, ___ U.S. ___, 130 S.Ct. 1431, 1436 (2010).

²¹⁵ *Cf. Main*, *supra* note 179, at 823-25 (arguing that legislators enact substantive law against a backdrop of procedures they assume will apply).

insurance companies rush their payments too much, or it imposes liability out of proportion to their moral culpability, or it makes too many campaign contributors unhappy. If that is so, it is time to change the substantive law, not keep the same law—promising ordinary citizens that they are protected by this penalty—but disable the courts from enforcing it. If the legislature says that insurance companies should pay 2% penalties, courts are entitled to assume that the legislature actually wants this to happen. They should adopt procedures that achieve this result in as “just, speedy, and inexpensive” a fashion as possible.²¹⁶ Separating substance from procedure, artificial as it may be in some senses, has the virtue of requiring the legislature to speak as clearly as possible in the substantive law.

This separation of substance and procedure is also consistent with congressional action from the REA to the present. Although Congress initially recognized the importance of state substantive law by enacting the RDA, it has regularly expressed a preference for independent federal procedure.²¹⁷ That preference has become so pronounced in a recent years that it prompted Geoffrey Hazard to ask, “Has the *Erie* doctrine been repealed by Congress?”²¹⁸ Hazard argues that the judicial system envisioned by Congress is best described as follows:

State law is the substantive basis of the American legal system, displaced only selectively by federal substantive law. The federal court system, however, provides the premier American model of the judiciary and, as such, is called upon to administer its form of justice in legal disputes.²¹⁹

²¹⁶ Fed. R. Civ. Proc. 1.

²¹⁷ Hazard, *supra* note 117, at 1639 (describing a “long history of interaction between state and federal courts in which different procedures have applied and in which federal procedure has often trumped that of the state”).

²¹⁸ Hazard, *supra* note 117, at 1629 (title).

²¹⁹ Hazard, *supra* note 117, at 1630.

In statutes like the Class Action Fairness Act, Congress has expressed its view that, “in certain types of cases, the judicious administration of state law is better entrusted to federal courts.”²²⁰

The dichotomy between substance and procedure may be artificial and thus difficult to define and maintain. It is nonetheless a dichotomy that Congress has placed at the foundation of the federal judicial system and that serves important functions in that system. In *Erie*'s Third Phase, a plurality of the Supreme Court has begun to break down that dichotomy, apparently in the name of state democratic processes. State-level democracy, however, does not need this solicitude. Just as the courts are frequently at pains to ascertain and apply state substantive law, state lawmakers can reasonably be expected to ascertain federal procedural law, and to plan accordingly. If they do so, uniform federal procedure will not stand in the way of their substantive goals. Moreover, state law would gain in democratic legitimacy and transparency because lawmakers would be prevented from manipulating procedure in ways that undermine the apparent goals of substantive law.

III. ENDING PHASE THREE

Phase Three of *Erie* is characterized by discretionary lawmaking for which the federal courts lack authority. It is undertaken for the seemingly self-effacing purpose of accommodating state policies. As it turns out, however, state-level lawmaking would likely fare just as well or better in the face of uniform federal procedure. Fortunately, Phase Three is so far strictly a Supreme Court phenomenon, and the decisions in *Gasperini* and *Semtek* can and should be contained. This section sketches a plan for construing those cases narrowly and bringing an end to Phase Three of *Erie*.

²²⁰ Hazard, *supra* note 117, at 1629; *see supra*, note 203 (describing the Class Action Fairness Act).

A. The Third Phase Has No Traction in the Lower Courts

Lower federal courts have routinely cited *Gasperini* and *Semtek* as the Supreme Court's most recent articulation of *Erie* principles. The lower courts have not, however, emulated the Supreme Court's Phase Three approach by creating their own accommodations of state policy. Instead, they have continued to give "yes" or "no" answers to *Erie* questions. Phase Three can therefore be contained, as a Supreme Court frolic that has not yet taken root in general federal practice.

Lower courts are presumably more sensitive than the Supreme Court to the dangers of inviting litigants not only to argue for or against the application of state law but also to suggest novel accommodations of the interests embodied in each. Perhaps for this reason, I have found only one lower court decision that even considered following the Phase Three strategy. In *Houben v. Telular*, the Seventh Circuit reviewed the leading *Erie* cases in detail and then commented, "It seems possible to us, in light of the substantive policy ... and in keeping with *Gasperini*'s approach, that state substantive interests and federal procedural rules might be capable of accommodation."²²¹ After a short discussion of that possibility, however, the court concluded that the accommodation was "too much of a strain" and decided not to apply state law at all.²²² This reluctance to follow the *Gasperini* path bodes well for ending the Third Phase before it takes hold beyond the Supreme Court.

B. Containing *Semtek*

In *Semtek*, the Supreme Court may have had a legitimate reason for creating federal common law based on its inherent power over procedure in the federal courts. The Court, however, was neither honest nor logical about how it got there. The best way of limiting its effect in the future is to confine its holding to the particular circumstances of the case—the preclusive effect of a dismissal on

²²¹ *Houben v. Telular Corp.*, 309 F.3d 1028, 1038 (7th Cir. 2002).

²²² *Houben*, 309 F.3d at 1039.

statute-of-limitations grounds—rather than to construe it as a general statement about preclusion.

The most serious problem with *Semtek* was its suggestion that preclusion is, as a general matter, a substantive realm that is beyond the reach of the REA.²²³ Other Federal Rules regulate matters that bear on preclusion, such as permissive and compulsory joinder.²²⁴ If read to deal generally with preclusion, *Semtek* calls into question the validity of those Rules.²²⁵ Instead, *Semtek* should be construed as primarily a statute of limitations case, rather than a preclusion case. At the next opportunity, the Court should clarify that matters such as joinder are well within the scope of the REA, including the preclusive effects of failing to join a compulsory claim.

While this approach is, admittedly, not the best reading of the *Semtek* decision, it is at least plausible. Patrick Woolley has already shown how to “save” federal preclusion rules from *Semtek* using the back door that the Court left open for ensuring the preclusive effect of dismissal as a sanction.²²⁶ Recall *Semtek*’s holding: the preclusive effect of a diversity judgment is governed by federal common law; to determine the content of that federal common law, courts should borrow from the preclusion law of the forum state, unless federal interests demand a different rule.²²⁷ The stated reason for the final caveat was the remote possibility of a state failing to accord preclusive effect to dismissals that sanction a party.²²⁸ Woolley, however, points out that strong federal interests are also at stake in a variety of other aspects of the preclusion analysis, such as joinder, whether claims are compulsory, and when a judgment becomes

²²³ *Semtek Int’l Inc. v. Lockheed Martin Corp.*, 531 U.S. 497 (2001).

²²⁴ *See* Fed. R. Civ. Proc. 13.

²²⁵ *See* Dudley & Rutherglen, *supra* note 10, at 724 (*Semtek* “preserves the validity of Rule 41(b), but only at the expense of casting doubt on other Federal Rules, notably Rule 13(a) on compulsory counterclaims and Rule 23 on class actions, which presumably determine the preclusive effect of any resulting judgment.”).

²²⁶ Woolley, *supra* note 84.

²²⁷ *Semtek*, 531 U.S. at 508-09.

²²⁸ *Semtek*, 531 U.S. at 509.

final.²²⁹ Again, all of these federal interests are *procedural* interest, properly governed through the REA and/or the inherent powers of the courts. In Woolley's assessment, only statutes of limitations and questions of privity fail to trigger sufficient federal interests to warrant uniform federal treatment.²³⁰

This re-reading of *Semtek* remains possible because the *Semtek* Court did not firmly commit itself to the position that Rule 41(b) would be invalid if construed to have preclusive effect.²³¹ Its suggestion of that possibility should be read in the context of a statute of limitations analysis. Statutes of limitation have a unique place in *Erie* jurisprudence. It was a statute of limitations that first drove the Court, in *Guaranty Trust*, to try to articulate a test for when state law controlled in a diversity case.²³² Once established, federal respect for state statutes of limitations contributed to the

²²⁹ Woolley, *supra* note 84, at 532; *see also* Erichson, *supra* note 130, at 1003 (pointing out that “nearly all preclusion rules are transsubstantive”). Although I agree with Woolley about this strategy for reclaiming federal control over preclusion as a procedural matter, I disagree with his further conclusion about the content of the preclusion law that should govern federal judgments. Rather than ordinary rules of preclusion, Woolley suggests reading *Semtek* as establishing a policy of non-interference with state-law claims, in which a federal judgment is never given more preclusive effect, *as to state claims*, than a state judgment would have. Woolley, *supra* note 84, at 553-54. For example, he hypothesizes a state that would treat a Title VII claim and a related tort claim for emotional distress as separate causes of action for preclusion purposes. Under the *Semtek* approach, a diverse plaintiff could split the claims if she brought the state law claim first, since state preclusion law would not bar the Title VII claim, but an initial claim under Title VII would bar a later claim under state tort law. *Id.* at 553. Woolley argues instead for reading *Semtek* to embody a policy of litigant equality that would “seek to preserve the plaintiff’s ability to bring a second suit on state law grounds, when the law of the state” would so allow. *Id.* at 554. Thus, Woolley would apply his *Erie* policy even to the preclusive effect of a federal judgment in a federal question case. Rather than pursue such a radical change in both preclusion law and *Erie* doctrine, it is preferable to treat *Semtek* as specific to the context of statute of limitations dismissals, rather than as establishing any general principles at all.

²³⁰ Woolley, *supra* note 84, at 529, 532 (arguing that “neither the *Erie* policy nor the REA prevents recognition of the very strong federal interest in uniform federal rules of preclusion with respect to all but a handful of issues”).

²³¹ *See Semtek*, 531 U.S. at 506.

²³² *Guaranty Trust Co. v. York*, 326 U.S. 99 (1945).

excess of the First Phase when the Court in *Ragan* adopted a dual reading of Rule 3 in order to bring state tolling rules into federal court.²³³ *Semtek* should be seen as part of this pattern rather than as establishing a general rule for preclusion questions.

Under this approach, *Semtek* becomes the exception to a general rule that the preclusive effect of a federal judgment is a matter of federal procedural law. Rules of preclusion “really regulate procedure” and are thus properly addressed in the Federal Rules. However, a few aspects of preclusion law—statutes of limitations, perhaps privity—are sufficiently substantive to warrant restrained interpretation of the Rules, and are substantive for *Erie* purposes, so that state law applies if the Federal Rules do not. Importantly, the conclusion that these issues are substantive is a wholesale, not a retail, determination. One can say that “joinder” is properly deemed procedural and governed by the law of the court that hears the case, while “privity” or “statutes of limitations” are best governed by the law-supplying state without inquiring into what laws any particular state has adopted in these matters.²³⁴

²³³ *Ragan v. Merchants Transfer & Warehouse Co.*, 337 U.S. 530 (1949).

²³⁴ The one major problem not addressed by this reading of *Semtek* is that even the new reading retains the dual interpretation of Rule 41(b). The Rule means little or nothing in diversity cases but is still understood to govern preclusion in federal question cases. The problem of dual interpretations originated in Phase Two, not in *Semtek*. One way of dealing with this problem is to distinguish true interpretations of the Rules from judicial “glosses” on the Rules, in which the courts feel in the interstices of the Rules. A true interpretation would govern in a diversity case, but a “gloss” might give way to state law if it were substantive for RDA purposes. *See supra*, note 39 (discussing this strategy for dealing with the dual interpretation cases). Short of flat-out overruling all the cases in which it has occurred, the best thing that the Court can do is to just stop doing it, as it could have done in *Semtek*: The most natural way to read Rule 41(b) is as a default rule for determining whether a federal court’s judgment was intended to be on the merits. A simple way out of the *Semtek* problem would have been to hold that the plaintiff should have requested that the judgment be issued “without prejudice” because California law, made applicable through the RDA, required as much. The district court’s refusal to do so could have been addressed on direct appeal. The Supreme Court’s decision in *Semtek* acknowledged this possible sequence of events in footnotes but oddly suggested that the plaintiff’s failure to pursue the matter on direct appeal required that it be dealt with in the subsequent case, rather than simply being defaulted.

In the alternative, the Court could adhere to the view suggested in *Semtek* that preclusion is, in general, too substantive even under the REA. The problem with *Semtek*, of course, is that the Supreme Court adhered to that view only for the first half of the opinion. To be consistent, the Court should have refrained from claiming inherent power over a matter it had already cast as too substantive for the REA. The Court therefore should have held that it was bound to follow state preclusion law not by federal common law of its own creation but by the RDA. While I believe it would be preferable to recognize most questions of preclusion as procedural for REA purposes,²³⁵ what is untenable is for the Court to claim inherent procedural power while at the same time declaring the matter beyond the reach of the REA.

C. Containing *Gasperini*

The flaws in *Gasperini* are easier to confine to the circumstances of that case. The *Gasperini* Court wrongly approached the case as if it could formulate, not merely apply or not apply, New York law. More specifically, the Court indulged two errors in its approach. First, the *Gasperini* Court forgot the original point of *Erie*: that state common law rules are, like state statutes, “laws” under the RDA. Second, faced with what it deemed a substantive New York law in conflict with the federal Constitution, the Court should have used ordinary severability analysis (rather than its own discretionary balancing of state and federal interests) to determine what law to apply.

First, the description of *Gasperini* in Part I.C.1, above, follows the Court and most commentators in describing the issue as whether the New York statute on appellate review of damages applied in federal court. The Supreme Court felt the statute was sufficiently

²³⁵ See generally Erichson, *supra* note 130, at 1002-03 (arguing that the best rule is to apply the preclusion law of the jurisdiction that rendered to original judgment); Tobias Barrington Wolff, *Preclusion in Class Action Litigation*, 105 COLUM. L. REV. 717, 760 (2005) (explaining that the rendering court can have great influence on future preclusive application of its judgment, even though it cannot purport to declare the judgment’s applicability to future hypothetical cases).

substantive to warrant application under *Erie*, but also that it conflicted with the Seventh Amendment obligations of the federal courts. To read the body of the Court's opinion, the Syllabus, and many other synopses of the holding, one would think that the Supreme Court itself came up with the compromise of accommodating state policy by having the trial court, rather than the appellate court, perform the damages review.²³⁶

The problem with this description is that not one but two New York laws were relevant in *Gasperini*. The first was the statute, which required damages review by appellate courts.²³⁷ Second, as the Court briefly acknowledged in its background section but then ignored for the rest of the opinion, the common law of New York required damages review by trial courts under the same standard.²³⁸ *Erie* says that both the statute and the common law are "laws."²³⁹ While the New York statute conflicted with the Seventh Amendment and therefore could not apply in federal court, the common law did not conflict with the Seventh Amendment and could therefore apply.²⁴⁰ There was no need for creativity, accommodation, or other interest-balancing by the Supreme Court.

Unfortunately, the *Gasperini* Court ignored the state's common law rule and treated only the statute as "law" that might apply in federal court.²⁴¹ This raises the question: what if the common law

²³⁶ *Gasperini v. Ctr. for Humanities*, 518 U.S. 415, 419 (1996) (majority opinion) (holding that "New York's law ... can be given effect without detriment to the Seventh Amendment, is the review standard set out in CPLR § 5501(c) is applied by the federal trial court judge"); *id.* at 415 (Syllabus by the clerk of court) (stating the same); Dudley & Rutherglen, *supra* note 10, at 707.

²³⁷ *Gasperini*, 518 U.S. at 423 n. 4 (quoting the statute).

²³⁸ *Gasperini*, 518 U.S. at 425 (noting that the "deviates materially" standard, as construed by New York's courts, instructs state trial judges as well). Whether this rule is considered pure common law or a judicial expansion of the statute, the fact remains that the Supreme Court's analysis ignored the judicial opinions as a controlling source of state law.

²³⁹ *Erie R.R. v. Tompkins*, 304 U.S. 64, 77-78 (1938).

²⁴⁰ *Gasperini*, 518 U.S. at 431-33.

²⁴¹ *Gasperini*, 518 U.S. at 426-31 (discussing the case as if only the statutory direction to appellate courts were at issue).

rule had been different? That is, New York must have *some* legal standard for when a trial court can revise a jury verdict. If that standard had happened to differ from the standard prescribed by statute for appellate courts, the Supreme Court's freelancing on how to "accommodate" the statute would have ended up paradoxically displacing another state law. *Gasperini* did not call for the Supreme Court to make up a federal common law of New York damages because New York already had a common law of damages.

Second, in formulating its own accommodation of the statute, the Supreme Court was so wrapped up in creative *Erie* analysis that it ignored the ordinary task of a court faced with a law that is constitutional in part. Once the Court determined that the New York statute represented a substantive policy choice under *Erie*, the next step was to apply the statute. Faced with a Seventh Amendment barrier, it should have done just what a New York court would have done, if the Seventh Amendment had the same effect in state court: asked if the statute was entirely unconstitutional or if some part of it could be saved by a severability analysis. The severability analysis—under *New York* severability rules, of course—may well have yielded the resolution that the Court reached on its own. Whether it did or not, the decision would have been better because reached by the ordinary tools of statutory interpretation rather than the Court's own creative process. The correct question was not "What kind of accommodation can we make between state and federal interests?" but "What would a New York court do, faced with this statute and a constitutional barrier to applying it in full?"

An approach that focused on statutory interpretation would also be superior because it would have a better chance of revealing the actual legislative intent, which is likely to bear on the initial classification of the law as substantive or procedural. When legislatures enact tort reform measures that implicate procedure, there is nothing wrong with expecting them to know that state tort cases are litigated in both state and federal courts. New laws must therefore be consistent with federal requirements for there to be a chance that they will be fully enforced. Thus, there was no reason for the Supreme Court to feel guilty, as it seemed to feel, about the inconvenient fact of the Seventh Amendment. Moreover, if the Court had conceptualized the problem as one of statutory interpretation, it would

have realized that New York's highest court would never be presented with this particular problem, making certification of the question appropriate.

In contrast to the Court's dual interpretations of Federal Rules in *Erie* cases like *Ragan* and *Semtek*, there is nothing incongruous about the New York statute producing different results in state and federal cases. That difference is a function not of the substance/procedure distinction but of the Seventh Amendment's status as one of a very few unincorporated rights.²⁴² The New York legislature can anticipate the operation of the federal Constitution in federal court just as well as it can anticipate the operation of the state constitution in state court. Although the statute was apparently consistent with New York constitutional requirements, there is nothing wrong with expecting New York legislators to anticipate the Seventh Amendment problems as well. If those legislators believed they were enacting substantive policy that would apply in federal court, they should have accommodated federal constitutional constraints. On the other hand, a severability analysis grounded in legislative intent might have uncovered that the legislature's concern was with excessive or widely varying verdicts in local trials presided over by local, elected judges. There may have been little concern about federal juries under federal judges. Since the Supreme Court saw the statute itself as sounding in both substance and procedure, it would be worth asking at this point whether the legislature's goal was to change the substantive law applied in all courts or to correct for procedural biases in the state court system.²⁴³

²⁴² Most provisions of the first eight amendments to the federal Constitution are incorporated against the states through the due process clause of the Fourteenth Amendment. The restrictions on appellate review of jury verdicts that were at issue in *Gasperini* are among the few exceptions. See Morris B. Hoffman, *The Court Says No to "Incorporation Rebound,"* 61 BAYLOR L. REV. 818, 831-32 (2009) (reviewing the state of incorporation at that time).

²⁴³ Here, I am taking as given the *Gasperini* Court's conclusion that the New York law at issue was substantive for RDA purposes and that no Federal Rule applied; the Seventh Amendment is the only federal law in play. In the course of attempting to apply a state law conceded to be substantive, it is of course appropriate to consider legislative intent. Doing so does not conflict with taking a wholesale approach to the validity of the Federal Rules.

It is unfortunate that the Court approached *Gasperini* as if its task were to create a federal common law of New York tort damages. The Court likely would have reached the same result by respecting New York common law as much as it respected the New York statute, or even by performing a severability analysis, but it would have kept the lines of authority clear. State substantive policy should be implemented through state law, properly interpreted, not by unauthorized federal common law.

CONCLUSION

Semtek and *Gasperini* each resulted in the unnecessary and unwarranted exercise of federal judicial discretion rather than a straightforward choice between state and federal law. However, the Supreme Court's creative energy on *Erie* questions has not yet infected the lower courts, and both *Semtek* and *Gasperini* can still be confined to their fairly narrow circumstances. The split in *Shady Grove* indicates that the Supreme Court remains poised between two paths: either ending Phase Three and returning to the conceptual structure of Phase Two, or else continuing with Phase Three's pattern of idiosyncratic accommodation of idiosyncratic state policies. This Article has shown that the Phase Three approach is both improper and unnecessary on its own terms. The Supreme Court is authorized neither to create a federal common law of state tort policy, as it appeared to do in *Gasperini*, nor to use its inherent power over procedure to circumvent the REA, as it appeared to do in *Semtek*. Moreover, the Court's decisions in Phase Three appear to be motivated largely by a sense that special accommodations are necessary to protect substantive state policy interests, the very interests that *Erie* itself vindicated. This motivation is misplaced. Case-by-case modification of federal procedural law is not necessary to protect state's democratically chosen policies. Rather, uniform federal procedure will allow states to formulate substantive policy with knowledge of the procedures through which they will be enforced and will encourage state lawmakers to act openly through the substantive law rather than manipulate outcomes with special procedures. *Shady Grove* should therefore mark the end of *Erie*'s Third Phase.
