The publications in this collection represent the historical publishing record of the UT Agricultural Experiment Station and do not necessarily reflect current scientific knowledge or recommendations. Current information about UT Ag Research can be found at the [UT Ag Research website](#). This CAFO Factsheet is brought to you for free and open access by the UT Extension Publications at Trace: Tennessee Research and Creative Exchange. It has been accepted for inclusion in Animals/Livestock by an authorized administrator of Trace: Tennessee Research and Creative Exchange. For more information, please contact trace@utk.edu.

Livestock Waste Management and Conservation

Transferring Manure, Litter or Wastewater to a Third Party (Class I & II – Large and Medium CAFOs)

Tennessee CAFO Factsheet #5

*Kristy M. Hill, Extension Dairy Specialist
Animal Science Department*

If a CAFO transfers more than 100 tons of manure, litter or process wastewater to a third party, the CAFO must provide the recipient of the waste with the most current nutrient analysis. The CAFO must also ensure the third party signs an Agreement for the Removal of Litter, Manure and/or Process Wastewater from a CAFO form (Tennessee CAFO Factsheet Appendix A).

Additionally, the CAFO must retain the records of the date, recipient's name and address, and approximate amount of manure, litter or process wastewater transferred to a third party for a minimum of five years (Tennessee CAFO Factsheet Appendix B).
