NSSPI faculty and staff at Texas A&M established a model for educating technical safeguards and security experts at the university level, which has been, in large part, replicated worldwide. In addition to conventional classroom lectures, NSSPI faculty: (1) provide practical experiences; (2) advise students on valuable research projects that contribute substantially to the nuclear nonproliferation, safeguards, and security arenas; and (3) engage with experts from several similar international academic and research institutes in activities and research that benefit Texas A&M students. NSSPI also helps international institutions develop their own programs in nuclear security and nonproliferation[2].
