Co-Authorship Agreement

This agreement is made between Deeksha Mehta and Emily H. Chaisson (hereafter referred to as "the Authors") regarding shared use of the following document:

“The Influence of Mixed Chain Lipids on Membrane Phase Behavior and Nanodomain Formation”

1) **Purpose**
   The Authors agree that the above-mentioned document may be included, in part or in whole, in both of their respective doctoral dissertations.

2) **Acknowledgment of Contributions**
   The Authors affirm that the content of the document truthfully reflects their respective contributions to the work. Each Author shall clearly indicate in their dissertation the portions of the work they contributed to, in accordance with institutional guidelines. The contributions are clearly stated at the beginning of each of the Authors’ chapters and are mutually agreed upon.

3) **Use and Attribution**
   Both Authors may use the document in their dissertations and academic submissions, provided that proper attribution is given to the co-author in each case.

4) **Agreement**
   By signing below, both Authors confirm their mutual consent to the terms of this agreement and assert that the information presented is an honest and accurate representation of their collaborative work, along with their P.I., Fred Heberle.
