

LETTER FROM THE ASSOCIATE DEAN OF RESEARCH
DR. KEN PHILLIPS

Dear Colleagues,

We have just completed our Sixth Annual Summer Research Camp (June 11-13, 2012). We were delighted at the good attendance of students, faculty, and our partners from community healthcare agencies and our colleagues from other college and universities. We look forward to bringing you the highlights from the Summer Camp in the July Issue of the Research Newsletter.

This summer is an exciting time for the University of Tennessee College of Nursing as our scholarly output grows. Heartfelt congratulations to our DNP graduates and recently appointed faculty! *Thank you, Ken*

APPOINTMENT / INDUCTION

Tami Wyatt — Induction to the National League for Nursing
2012 Academy of Nursing Education Fellows

The NLN established the Academy of Nursing Education to foster excellence in nursing education by recognizing and capitalizing on the wisdom of outstanding nurse educators. Fellows support the mission and core values of the NLN, assist in the work required to prepare graduates from all types of nursing programs, and serve as resources for new educators and those in clinical practice who hope to someday enter the ranks of nurse faculty.

Fellows of the NLN Academy of Nursing Education to be inducted at the 2012 NLN Education Summit at a ceremony and banquet on Friday, September 21.

RESEARCH RESOURCE SPOTLIGHT

Are you in search of.... DATA??

The National Longitudinal Study of Adolescent Health (Add Health) is a national study of adolescents in grades 7-12 in the United States.

This same cohort has been tracked through adulthood from 1994 to 2008.

**Need a data
source for your
next research
project?**

Add Health combines longitudinal survey data on respondents' social, economic, psychological and physical well-being with contextual data on the family, neighborhood, community, school, friendships, peer groups, and romantic relationships, providing unique opportunities to study how social environments and behaviors in adolescence are linked to health and achievement outcomes in young adulthood.

The most current wave of the study (2008) included the collection of biological data (e.g., DNA). Public-use and restricted use versions of this data are available for research.

If interested, contact the Carolina Population Center at <http://www.cpc.unc.edu/projects/addhealth>.
