Haslam College of Business - Supply Chain Management - Supply Chain Management Major, BS in Business Administration - International Business Concentration

2025-2026 UG Revise Program

General Catalog Information

College* Haslam College of Business

Department* Supply Chain Management

Program Name* Supply Chain Management Major, BS in Business Administration - International Business Concentration

Degree Type* Bachelor of Science in Business Administration

Program Type* Concentration

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Supply chain management has responsibility for the movement of raw materials and component parts into and within a business firm and to the distribution of finished products and services to customers.

Because having products and/or services in the right place at the right time is critical for success in any business, supply chain management plays a critical role in a firm's comprehensive supply chain. A career in supply chain management offers students the opportunity to make a significant contribution to corporate effectiveness in this area.

The internationally recognized Supply Chain Management program at the University of Tennessee is currently regarded as one of the most comprehensive and contemporary programs in the nation. The program offers a fundamental yet innovative curriculum. Students develop important skills required of supply chain management professionals as well as learn how supply chain management helps solve business supply chain management problems.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Knoxville

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Must be completed by the end of the First Year.

Chosen from the Volunteer Core list.

Students who have already completed MATH 132* with a C or better may substitute that for MATH 141*.

Students admitted to Smith Global Leadership Scholars will complete the honors versions of these courses: ACCT 208, BUAD 337, BUAD 338, BUAD 457*, ECON 218*, FINC 308, and STAT 207*.

Any courses not already required for the major. Students admitted to Smith Global Leadership Scholars will fulfill 10 hours of electives with the following courses – BUAD 217, BUAD 317*, BUAD 417, BUAD 427, and BUAD 497.

Twelve hours chosen from IB 407, IB 409, IB 429, IB 439, IB 449, IB 492, IB 499; BUAD 400* or MGT 472; and IB 489.

Students admitted to Smith Global Leadership Scholars will not take these courses due to content being covered elsewhere in their curriculum.

First-semester freshmen should take BUAD 100; transfer students should take BUAD 210.

At least three hours from courses among the Volunteer Core Applied Arts and Humanities (AAH), Arts and Humanities (AH), Global Citizenship - International (GCI), Global Citizenship - United States (GCUS), or Social Sciences (SS) lists.

* Meets Volunteer Core Requirements.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* –

Two new courses approved for the Ethics requirement were added to the showcase and schema as course options.

Financial Impact* None.

Impact on Other Units* None.

Rationale* A new course proposal addressing the emerging issue of system approach in feeding the world population. Systems perspective in food (viewing the entire food system) will address the current challenges of sustainability, equity, and health and nutrition. Sustainable food systems will discover the interactions amongst the individual components of food systems including food production, processing, handling and transport, marketing, consumption, and waste utilization. Further, the social aspect of food systems including food access, equity, religion, and policy will be discussed.

Impact on Other Units* None (potential impact for either Social Science or Engaged Inquiries Vol Core once approved)

Financial Impact* None to minimal (existing Herbert faculty will teach a portion of the class)

Comments

Registration Restriction(s) Minimum student level – sophomore.

Registration Permission

Equivalency* Same as ANSC 360. we are changing the course number from 360 to 260. OC Vol Core Subcommittee and Vol Core Committee Chair has been notified.

Rationale* Provides an opportunity for increased enrollment with students who do not come from a show/judging background but are interested in learning the basics. Taking this course as a sophomore will allow them to take the new proposed ANSC 362 in the Junior Year and, if selected from that course, still participate in a full year of Livestock Judging Team or in other competitive teams before graduating. Also aligns better with transferred-in similar courses that are often lower-division.

Impact on Other Units* May draw in more non-ANSC students, particularly from ALEC or AREC

Financial Impact* none. The same instructor that taught ANS 360 will teach 260.

Have you consulted with all programs/departments that will be impacted by this change?* ○ Yes ○ No ◉ Minor changes only/Not Applicable

Arts and Sciences Originators Only

Rationale* AREC 203 Managerial Controls for Agribusiness is a new course in the 2023-24 catalog and provides coverage of topics related to financial controls needed for successful completion of this course.

Impact on Other Units* Potentially reduced enrollment in ACCT 200. These impacts were discussed with Haslam College of Business leadership prior to the approval of the new course proposal in 23-24 academic year.

Impact Report for AREC 342

Description

Advisor

Beasley, Colclasure, Granberry, Stripling, Lay

The Agricultural Leadership, Education, and Communications major is designed for students who want a broad, general background in agriculture and wish to develop their leadership and communication skills to pursue careers in business and industry, agricultural education, agricultural extension education and agricultural communications. The agricultural education concentration leads to teacher licensure in agricultural sciences in the State of Tennessee.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

AREC 201* (4) or ECON 201* (4) or ECON 207* (4) satisfies the Volunteer Core – Social Sciences requirement and the major requirement for economics. If the student transfers ECON LD for 3 credits, it will satisfy the major requirement but will not satisfy the Volunteer Core – Social Sciences requirement. In these cases, the student should take two courses from the Social Sciences list.

Select sequence (8 hours) from BIOL 101*-BIOL 102*, BIOL 113*-BIOL 114*-BIOL 115, BIOL 150*-BIOL 160*-BIOL 159*, or BIOL 158*-BIOL 168*-BIOL 167*.

Chosen from the Volunteer Core list.

Any course not already required for the major.

Students who have earned the A.S. degree in agriculture or related field of study from a Tennessee community college or university may apply A.S. coursework to meet this requirement.

* Meets Volunteer Core Requirement.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale*

- Add Colclasure to catalog.
- Add ESM 250 as an OR alongside MATH 115
- Add FDSC 101 as an OR with FDSC 241

Remove FDSC 100

Financial Impact* minimal impact

Impact on Other Units* minimal impact

Have you consulted with all programs/departments that will be impacted by this change?* ○ Yes ◉ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Footnotes

Chosen from the Volunteer Core list.

AREC 201* (4) or ECON 201* (4) or ECON 207* (4) satisfies the Volunteer Core – Social Sciences requirement and the major requirement for economics. If the student transfers ECON LD for 3 credits, it will satisfy the major requirement but will not satisfy the Volunteer Core – Social Sciences requirement. In these cases, the student should take two courses from the Social Sciences list.

Select sequence (8 hours) from BIOL 101*-BIOL 102*, BIOL 150*-BIOL 160*-BIOL 159*, or BIOL 158*-BIOL 168*-BIOL 167*.

The Agricultural Sciences and Natural Resources electives may be selected from any courses in the college not already required for the major.

JMED 333, JMED 360, JMED 390, or JMED 446.

Any course not already required for the major.

Students who have earned the A.S. degree in agriculture or related field of study from a Tennessee community college or university may apply A.S. coursework to meet this requirement.

* Meets Volunteer Core requirement.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale*

- Add Ruth to catalog.
- Replace 3 hours of "Unrestricted Electives" with "Herbert Electives" (mirroring language from CELD) and limiting those to Herbert course options. List out all the prefixes with 1*** through 4*** for all HCA (Term 6)
- Change “select one” of ALEC 442 and ALEC 443 to require both ALEC 443 (Term 8)
- Remove “Choose one of JREM 451 Environmental Writing or JREM 456 Science Writing as Literature JMED 456".
- Amend ALEC 492 to only 3 hours
- Add ALEC 492 or 499 or AGNR 491for 3 hours

Financial Impact* minimal impact

Impact on Other Units* minimal impact

Have you consulted with all programs/departments that will be impacted by this change?* ○ Yes ◉ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Advisors

Richards, Stephens, West, Lay

The Agricultural Leadership, Education, and Communications major is designed for students who want a broad, general background in agriculture and wish to develop their leadership and communication skills to pursue careers in business and industry, agricultural education, agricultural extension education, and agricultural communications. The community engagement and leadership development concentration is designed for students who want to develop leadership skills and pursue careers in extension, government, community or youth organizations, business/industry, or international environments.

Graduates who plan to enter careers in Extension must have a minimum cumulative grade point average of 2.7 on a 4.0 point scale, a minimum of 3.0 during their senior year of undergraduate study, or must have earned a Masters degree.

Students who have an Associate of Science or Associate of Science in Teaching degree from a Tennessee Board of Regents (TBR) community college or have completed 6-credit hours and have a 2.0 GPA may complete the Community Engagement and Leadership Development Concentration as an ALEC Distance Education student.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Footnotes

Knoxville campus students interested in pursuing a career as an agriculture and natural resources Extension agent should complete 18 hours in one Herbert College of Agriculture department (not ALEC). Students are strongly encouraged to declare a minor in that department; however, if the minor requires less than 18 hours, students will need to take additional hours within the same department. Distance education students can select any course in the Herbert College of Agriculture not already required in the major.
Chosen from the Volunteer Core list.
Any course not already required for the major
Select sequence (8 hours) from BIOL 101*-BIOL 102*, BIOL 150*-BIOL 160*-BIOL 159*, or BIOL 158*-BIOL 168*-BIOL 167*.
Community Engagement elective chosen from PLSC 122, PLSC 411, PLSC 412, PLSC 413, AFST 325, AGNR 491, ANTH 130, AREC 395, COUN 460, EDPY 210, EDPY 310, ELPS 1** - ELPS 499, HDFS 1** - HDFS 499, IEC 320, PSYC 110, PSYC 473, RSM 326, RSM 426, SOCI 120, SOWK 200, ALEC 325*, ALEC 483, ALEC 485*; HDFS 210*, HDFS 213, HDFS 220*, HDFS 240, HDFS 320*, or HDFS 360; COUN 333*, or COUN 480*; CSE 300*; PSYC 235, PSYC 335, PSYC 409, PSYC 450, PSYC 454, PSYC 459, PSYC 461, PSYC 470, PSYC 471*, PSYC 472, PSYC 475, or PSYC 481*; PUBH 201*, PUBH 315, PUBH 401, or PUBH 430; SOCI 342, SOCI 360*, SOCI 363*, or SOCI 375; WGS 200* or WGS 370*. Distance Education students may select alternative courses in consultation with their academic advisor.
Distance Education students who have earned the A.S. degree from a Tennessee community college or university can apply A.S. coursework to meet this requirement. Distance Education students who have earned an A. S. degree from a regionally accredited community college or university and have met the Volunteer

Core requirements can apply A.S coursework to meet this requirement.
Distance Education students can satisfy the ALEC 431 requirement by substituting ALEC 493.
Distance Education students who have earned the A.S. degree from a Tennessee community college or university or from a regionally accredited community college can apply A.S. coursework to meet this requirement.
Knoxville campus students interested in pursuing a career in family and consumer sciences Extension should select 18 hours from HDFS 210*, HDFS 213, HDFS 220*, HDFS 240, HDFS 320*, HDFS 360; HTM 101, HTM 341; NUTR 100*, NUTR 302; PUBH 201*, and PUBH 315.
Any approved Engaged Inquiries (EI) elective except those with an ALEC prefix.

* Meets Volunteer Core Requirement.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale*

- Add ALEC 499 as an OR for ALEC 492 for 6 credit hours
- Add ALEC 210 as an OR for ALEC 240
- Add “or ESS 130” to Natural Science Elective (term 1)
- Add “or EPP 135” to Natural Science Elective (term 2)
- Add “PLSC 122, PLSC 411, PLSC 412, PLSC 413, AFST 325, AGNR 491, ANTH 130, AREC 395, COUN 460, EDPY 210, EDPY 310, ELPS 1** - ELPS 499, HDFS 1** - HDFS 499, IEC 320, PSYC 110, PSYC 473, RSM 326, RSM 426, SOCI 120, SOWK 200” to courses as possible “community engagement” electives

Financial Impact* minimal

Impact on Other Units* minimal

Have you consulted with all programs/departments that will be impacted by this change?* ○ Yes ◉ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Description

Advisors

West, Lay

The Agricultural Leadership, Education, and Communications major is designed for students who want a broad, general background in agriculture and wish to develop their leadership and communication skills to pursue careers in business and industry, agricultural education, agricultural extension education, and agricultural communications. The Interdisciplinary Agriculture concentration is designed for students who want to develop leadership and communication skills and pursue careers in or related to agriculture.

Students who have an Associate of Science or Associate of Science in Teaching degree from a Tennessee Board of Regents (TBR) community college or have completed 6-credit hours and have a 2.0 GPA may complete the Interdisciplinary Agriculture Concentration as an ALEC Distance Education student.

Students are encouraged to utilize stackable credentials (e.g., certificate programs) and minors in the Herbert College of Agriculture to complete the agricultural core electives.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Footnotes

One Quantitative Reasoning Elective must be MATH 115* or STAT 201* or STAT 207*. MATH 123* is recommended but not required.
A minor in Agricultural Extension, Agricultural and Natural Resource Communication, Food and Agricultural Business, Business Administration, Communication Studies, Information Sciences, Journalism and Media Minor, or other discipline with approval of the Animal Science Undergraduate Committee is required.
STEM elective chosen from AGNR 101*; ANSC 362, ANSC 420, ANSC 430, ANSC 431, ANSC 461, ANSC 462, ANSC 463, ANSC 464, ANSC 470, ANSC 480*, ANSC 481*, ANSC 482, ANSC 483, ANSC 484, ANSC 485, ANSC 486, ANSC 489, ANSC 493, ANSC 499, or PLSC 435 (after major requirement and Capstone Course requirement has been met, and a maximum of one of ANSC 480*, ANSC 481*, ANSC 482, ANSC 483, ANSC 485, ANSC 486, or ANSC 489 may be taken to satisfy the STEM elective requirement); ANTH 110*, ANTH 117*; ASTR 151*, ASTR 152*, ASTR 153*, ASTR 154*, ASTR 217*, ASTR 218*; BAS (any); BCMB (any except BCMB 320); BIOL (any after major requirements are met); BME (any); BSE (221 and above); CBE (any); CE (210 and above); CHEM (any after major requirements are met); CLAS 273; COSC (any); CSM (any); ECE (any); EEB (any); EF (any); EPP (any); ESS 231, ESS 232, ESS 334, ESS 424*, ESS 434, ESS 442, ESS 444, ESS 454, ESS 462*; FDSC 100, FDSC 110, FDSC 241, FDSC 341*, FDSC 410, FDSC 415*, FDSC 418, FDSC 419*, FDSC 421, FDSC 428, FDSC 429, FDSC 445; FORS 214, FORS 215, FORS 217, FORS 331, FORS 337, FORS 414; FWF 212, FWF 250*, FWF 313, FWF 315, FWF 320*, FWF 430; GEOG 131*, GEOG 132*, GEOG 137*; GEOL (any); IE (any); KNS 480*; MATH (any above 110 after Quantitative Reasoning requirements are met); ME (any); MICR (any); MSE (201 and above); NE (any); NUTR 100*, NUTR 302, NUTR 311, NUTR 314, NUTR 321-NUTR 322; PHYS (any); PLSC 210*, PLSC 250*, PLSC 320, PLSC 330*, PLSC 331, PLSC 410*, PLSC 415*, PLSC 421, PLSC 434, PLSC 438, PLSC 441, PLSC 442, PLSC 452, PLSC 461; PSYC 301, PSYC 370, PSYC 385, PSYC 445, PSYC 450, PSYC 459, PSYC 461; PUBH 201*, PUBH 202, PUBH 420; STAT (any); WFS (340 and above). At least 6 hours must be from HCA courses.
Capstone Courses: Select two courses from ANSC 420, ANSC 430, ANSC 431, ANSC 480*, ANSC 481*, ANSC 482, ANSC 483, ANSC 484, ANSC 485, ANSC 486, ANSC 489, or PLSC 435. At least one course must be ANSC 420, ANSC 480*, ANSC 481*, ANSC 482, ANSC 483, ANSC 484, ANSC 485, or ANSC 486.
Chosen from the Volunteer Core list. One course must also be designated as Written Communications (WC).
Any courses not already required for the major.

* Meets Volunteer Core Requirement. Nine hours of Engaged Inquiries electives from at least 2 course prefixes are required.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* Adding new courses ANSC 362, 462, 463 and 464 to STEM elective list in footnotes

Financial Impact* none

Impact on Other Units* none

Have you consulted with all programs/departments that will be impacted by this change?* ○ Yes ◉ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?
- ☐ Arts and Humanities
- ☐ Natural Sciences
- ☐ Social Sciences

ADMINISTRATIVE USE ONLY

Impact Level
- ☑ Low
- ☐ Mid
- ☐ High

- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description To remain in the major, students must maintain at least a 2.0 cumulative GPA in ANSC courses by the end of semester three. Students must complete ANSC 100, ANSC 120* (Fall 2024 onwards) or ANSC 150* (prior to Fall 2024), and ANSC 220 with minimum grades of C, C, and C– respectively to remain in the Animal Science Major.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

For qualified students, the Department of Animal Science offers a Five-Year BS/MS accelerated degree program with a BS major in Animal Science and a thesis-based MS major in Animal Science. Central to this program is that a qualified student may take up to nine hours of graduate level courses for their senior undergraduate electives and have them count toward both the BS degree and the MS degree. Students are typically considered for conditional admission to the program during, or immediately following, their third year of undergraduate study at the University of Tennessee, Knoxville. Because the MS program requires that a student write a thesis based on original research, efforts related to developing and starting a research-based project in consultation with a graduate advisory committee (that meets MS committee requirements) is required immediately following their third year of undergraduate studies.

To be considered for conditional admission to the program:

- A student must be a declared Animal Science major with a minimum GPA of 3.4, must have completed at least 15 hours of credit in Animal Science, and must have completed at least 90 hours of the 120 hours of coursework required for the BS degree with a major in Animal Science.
- A student must provide three letters of recommendation and complete a personal interview with individuals comprising the Graduate and Undergraduate Committees in the Department of Animal Science.
- A student must obtain a commitment from an Animal Science graduate research faculty member to serve as his/her graduate mentor-advisor (i.e., major professor) and at least two other graduate research faculty members to serve on his/her graduate advisory committee.

Applicants are required to have completed at least six credit hours from the following Animal Science core courses (i.e., ANSC 320, ANSC 330, ANSC 340, ANSC 380, or their Honors counterparts). The department may consider other relevant factors such as an applicant's work experience and level of maturity before conditionally admitting a student to the BS/MS program. Conditional admission of a student into the Five-Year BS/MS program must be approved by the Department of Animal Science, and the Graduate School. Students will be typically informed of the outcome of their application before the beginning of their fourth year of undergraduate study.

Any graduate course that is to be counted towards both the BS degree and the MS degree must be approved by the student's graduate advisory committee, the departmental Graduate Director, and by the Graduate School. These courses must be identified in consultation with the graduate advisory committee members. The form "Animal Science Conditional Admission Five-Year BS-MS" is available from the Graduate Director and must be completed, signed by the student, the student's graduate advisory committee and the Graduate Director, and the Undergraduate Coordinator before submitting to the Graduate School for approval and processing."

A student that is conditionally admitted to the BS/MS program may complete up to nine credit hours of graduate level coursework during the student's undergraduate study, and apply those nine credit hours to satisfy both the BS degree requirements and the MS degree requirements, provided that these graduate credit hours were approved by both the Department and by the Graduate School. To receive graduate credit for up to the 9 credit hours listed on the Animal Science Conditional Application form and approved by their graduate advisory committee, and others granting approval by signing that form, the student must complete and submit the Senior Requesting Graduate Credit Form to the Graduate School. If courses are to be taken during different semesters, the student will need to submit this form before the start of each relevant semester.

Conditional admission into the BS/MS program does not guarantee acceptance into either the Graduate School or the MS program. Students in the BS/MS program must apply for admission to the Graduate School and to the MS program during their fourth year of undergraduate study, following the same procedures that all other student applicants follow. Students will be fully admitted to the MS program after they have been accepted both by the Graduate School and by the Animal Science MS program. Students will not be eligible for graduate assistantships until they are enrolled as graduate students in the Graduate School.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

One Quantitative Reasoning Elective* must be MATH 115* or STAT 201* or STAT 207*. MATH 123* is recommended but not required.
Science/Technology/Engineering/Mathematics (STEM) Electives. At least 8 hours upper division (300-400 level) or graduate (500-600 level) courses. Chosen from AGNR 101*; ANSC 260*, ANSC 362, ANSC 420, ANSC 430, ANSC 431, ANSC 461, ANSC 462, ANSC 463, ANSC 464, ANSC 470, ANSC 480*, ANSC 481*, ANSC 482, ANSC 483, ANSC 484, ANSC 485, ANSC 486, ANSC 489, or PLSC 435 (after major requirement and Capstone Course requirement has been met, and a maximum of one of ANSC 480*, ANSC 481*, ANSC 482, ANSC 483, ANSC 485, ANSC 486, or ANSC 489 ANSC 493, ANSC 499, may be taken to satisfy the STEM elective requirement); ANTH 110*, ANTH 117*; ASTR 151*, ASTR 152*, ASTR 153*, ASTR 154*; BAS (any); BCMB (any except BCMB 320); BIOL (any after major requirements are met); BME (any); BSE (221 and above); BSET (any); CBE (any); CE (210 and above); CHEM (any after major requirements are met); CLAS 273; COSC (any); ECE (any); EEB (any); EF (any); EPP (any); ESS 231, ESS 232, ESS 334, ESS 424*, ESS 434, ESS 442, ESS 444, ESS 454, ESS 462*; FDSC 100, FDSC 110, FDSC 241, FDSC 341*, FDSC 410, FDSC 415*, FDSC 418, FDSC 419*, FDSC 421, FDSC 428, FDSC 429, FDSC 445; FORS 214, FORS 215, FORS 217, FORS 331, FORS 337, FORS 414; FWF 212, FWF 250*, FWF 313, FWF 315, FWF 320*, FWF 430; GEOG 131*, GEOG 132*, GEOG 137*; GEOL (any); IE (any); KNS 480*; MATH (any above 110 after Quantitative Reasoning requirements are met); ME (any) MICR (any); MSE (201 and above); NE (any); NUTR 100*, NUTR 302, NUTR 311, NUTR 314, NUTR 321-NUTR 322; PHYS (any); PLSC 210*, PLSC 250*, PLSC 320, PLSC 330*, PLSC 331, PLSC 410*, PLSC 415*, PLSC 421, PLSC 434, PLSC 438, PLSC 441, PLSC 442, PLSC 452, PLSC 461; PSYC 370, PSYC 385, PSYC 445, PSYC 450, PSYC 459, PSYC 461; PUBH 201*, PUBH 202, PUBH 420; STAT (any); WFS (340 and above). At least 6 hours must be from HCA courses.
Business and Communications Electives chosen from ACCT 200, ACCT 207; ADVT 250*; ALEC 102*, ALEC 202*, ALEC 240*, ALEC 330*, ALEC 340*, ALEC 440*, ALEC 441; ANSC 361; ANSC 471, AREC 212, AREC 270*, AREC 313 or above; BULW 301; CMST 240* (if not used to satisfy OC); ECON (any course above 201); ENGL 295*; FDSC 390; FINC 300; JMED 450*; MARK 300; MGT 201, MGT 300; PHIL 244*, and STAT 201*.
Capstone Courses: Select two courses from ANSC 420, ANSC 430, ANSC 480*, ANSC 481*, ANSC 482, ANSC 483, ANSC 484, ANSC 485, ANSC 486, ANSC 489, and PLSC 435. At least one course must be ANSC 420, ANSC 480*, ANSC 481*, ANSC 482, ANSC 483, ANSC 484, ANSC 485 or ANSC 486.
Chosen from the Volunteer Core list. One course must also be designated as writing intensive (WC).
Any courses not already required for the major.

* Meets Volunteer Core Requirement. Nine hours of Engaged Inquiries electives are required from at least two course prefixes.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* STEM list in footnotes: replaced ANSC 360 with new ANSC 260, added new ANSC 461, 462, 463 and 464

Financial Impact* none

Impact on Other Units* none

Have you consulted with all programs/departments that will be impacted by this change?* ○ Yes ◉ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Notes

Herbert College of Agriculture - Animal Science - Animal Science Major, BS in Animal Science - Veterinary Science Concentration

2025-2026 UG Revise Program

General Catalog Information

College* Herbert College of Agriculture

Department* Animal Science

Program Name* Animal Science Major, BS in Animal Science - Veterinary Science Concentration

Degree Type* Bachelor of Science in Animal Science

Program Type* Concentration

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Veeterinary Science – Stage I is a two-year plan for students seeking to progress to the Veterinary Science-Phase II or Veterinary Science 3+1 concentrations. Students must apply for entry into the Veterinary Science-Stage II or Veterinary Science 3+1 concentration after completion of 60 total credit hours with a minimum of 15 credit hours taken at UTK. Students must have a minimum cumulative UTK GPA of 3.0. Courses listed below must be completed with a minimum grade of C (or an S for AP courses):

BIOL 101*-BIOL 102*-BIOL 160* or BIOL 150*-BIOL 159*-BIOL 160*; CHEM 122*-CHEM 123*-CHEM 132*-CHEM 133*; MATH 125* or MATH 132* or MATH 141* or MATH 151*; ANSC 220.

If a student does not meet the above criteria after completion of 60 total credit hours with a minimum of 15 credit hours taken at UTK, the student cannot progress into STAGE II or 3+1 and must meet with their advisor to discuss changing concentrations or majors. A student may only apply once to progress to STAGE II or 3+1. If a Pre-Veterinary Medicine Stage I student receives a C– in ANSC 220, the student cannot progress into STAGE II or 3+1 and must meet with their advisor to discuss changing concentrations or majors. If a student in any concentration receives less than a C– in ANSC 220, they cannot progress in the major. Students must complete ANSC 100, ANSC 120 (or ANSC 150* if taken prior to Fall 2024), and ANSC 220 with minimum grades of C, C, and C– respectively to remain in the Animal Science Major.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Term 1 (Stage I)

Volunteer Core Elective 3 *Credit Hours* *

ANSC 100 Orientation to Animal Science
ANSC 150 Global Animal Agriculture Systems and Society
[Right] *
CHEM 122 General Chemistry I
[Right] *
CHEM 123 General Chemistry I Laboratory
[Right] *
ENGL 101 English Composition I
[Right] *
[Right] (or equivalent)
[After]
[Before]Select one course:
BIOL 101 Introduction to Biology: Cells, Genetics, and Physiology
[Right] *
BIOL 150 Organismal and Ecological Biology
[Right] *

Credit Hours 18-19

Term 1 Milestone Notes

3.0 cumulative GPA

[Before]3.0 GPA in ANSC required courses:
BIOL 101 Introduction to Biology: Cells, Genetics, and Physiology
[Right] * and
BIOL 102 Introduction to Biology: Biodiversity and Ecology
[Right] * and
BIOL 160 Cellular and Molecular Biology
[Right] *
[After] or
BIOL 150 Organismal and Ecological Biology
[Right] * and
BIOL 159 Skills of Biological Investigation
[Right] * and
[After] BIOL 160 - Cellular and Molecular Biology 3 *Credit Hours* *

[After] and
CHEM 122 General Chemistry I
[Right] * and
CHEM 123 General Chemistry I Laboratory
[Right] *
[After] or
CHEM 128 Honors: General Chemistry I
[Right] *

Term 2 (Stage I)

[1,5] Quantitative Reasoning Elective 3-4 *Credit Hours* *

ENGL 102 English Composition II
[Right] *
CHEM 132 General Chemistry II
[Right] *
CHEM 133 General Chemistry II Laboratory
[Right] *
BIOL 160 Cellular and Molecular Biology
[Right] *
[After]
[Before]Select one course:
BIOL 102 Introduction to Biology: Biodiversity and Ecology
[Right] *
BIOL 159 Skills of Biological Investigation
[Right] *

Credit Hours 15-18

Term 2 Milestone Notes

One Volunteer Core Elective 3 *Credit Hours* *

Term 3 (Stage I)

[5] Volunteer Core Elective 3 *Credit Hours* *

[1,5] Quantitative Reasoning Elective 3-4 *Credit Hours* *

ANSC 250 Introduction to Animal Handling and Management
CHEM 260 Foundations of Organic Chemistry
CHEM 269 Foundations of Organic Chemistry Laboratory
[After]
[Before]Select one course:
ALEC 240 Effective Oral Communication
[Right] *
ANSC 360 Equine and Food Animal Evaluation
[Right] *
CMST 210 Public Speaking
[Right] *
CMST 240 Business and Professional Communication
[Right] *
PHIL 244 Professional Responsibility
[Right] *

Credit Hours 17-18

Term 3 Milestone Notes

[Before]One course from:
ANSC 120 Modern Animal Agriculture in the U.S.
[After] or
ANSC 150 Global Animal Agriculture Systems and Society
[After] (if taken prior to Fall 2024)
[Right] *
ANSC 250 Introduction to Animal Handling and Management
[After] Natural Sciences Elective 3-4 *Credit Hours* *

[After] Quantitative Reasoning Elective 3-4 *Credit Hours* *

Term 4 (Stage I)

[5] Volunteer Core Elective 3 *Credit Hours* *

ANSC 220 Animal Anatomy and Physiology
CHEM 359 In-depth Organic Chemistry Laboratory
CHEM 360 In-depth Organic Chemistry
[After]
[Before]Select one course:
AREC 201 Economics of the Global Food and Fiber System
[Right] *
ECON 201 Introductory Economics: A Survey Course
[Right] *
ECON 207 Honors: Introductory Economics
[Right] *
ECON 211 Principles of Microeconomics
[Right] *

Credit Hours 13-14

Term 4 Milestone Notes

Two additional Volunteer Core Electives *

Term 5 (Stage II)

Term 5 (Stage II)

[2] STEM Elective **3** *Credit Hours*

ANSC 330 Comparative Animal Nutrition
ANSC 380 Animal Health Management
ANSC 395 Careers in Animal Agriculture
PHYS 221 Elements of Physics I
[Right] *

Credit Hours 14

Term 5 Milestone Notes

[Before]One course from:
ANSC 150 Global Animal Agriculture Systems and Society
[Right] *
ANSC 250 Introduction to Animal Handling and Management
[After]
[Before]Complete with a grade of C or better:
ANSC 220 Animal Anatomy and Physiology
CHEM 122 General Chemistry I
[Right] *
CHEM 123 General Chemistry I Laboratory
[Right] *
CHEM 132 General Chemistry II
[Right] *
CHEM 133 General Chemistry II Laboratory
[Right] *
MATH 125 Basic Calculus
[Right] *
[After]
[Before]Complete one series of courses with a grade of C or better:
BIOL 101 Introduction to Biology: Cells, Genetics, and Physiology
[Right] * and
BIOL 102 Introduction to Biology: Biodiversity and Ecology
[Right] * and
[After] BIOL 160 - Cellular and Molecular Biology **3** *Credit Hours* *

[After] or
BIOL 150 Organismal and Ecological Biology
[Right] * and
BIOL 159 Skills of Biological Investigation
[Right] * and
BIOL 160 Cellular and Molecular Biology
[Right] *

Term 6 (Stage II)

[3] **Business and Communications Electives 5** *Credit Hours*

ANSC 320 Reproductive Physiology and Lactation
ANSC 340 Animal Breeding and Genetics
PHYS 222 Elements of Physics II
[Right] *

Credit Hours 15

Term 6 Milestone Notes

No milestones

Term 7 (Stage II)

[4] **Capstone Course 3** *Credit Hours*

[2] **STEM Elective 3** *Credit Hours*

[5] **Volunteer Core Elective 3** *Credit Hours* *

ANSC 495 Ethics in Animal Agriculture
[Right] *
[After]
[Before]Select one course:
BCMB 401 Biochemistry I
ANSC 431 Comparative Nutritional Biochemistry and Metabolism

Credit Hours 14

Term 7 Milestone Notes

Apply to graduate

Term 8 (Stage II)

[4] Capstone Course **3** *Credit Hours*

[2] STEM Elective **3** *Credit Hours*

[6] Unrestricted Electives **0-7** *Credit Hours*

[5] Volunteer Core Elective **3** *Credit Hours* *

Credit Hours 9-16

Term 8 Milestone Notes

No milestones

Total Credit Hours 120

Footnotes

One Quantitative Reasoning Elective must be MATH 125*, MATH 132*, MATH 141*, or MATH 151*; MATH 115* or STAT 201* is required as a prerequisite for ANSC 340; may be taken to satisfy QR, STEM or (for STAT 201*) Business and Communication Elective requirements.
At least three hours of STEM electives must be from BIOL, EEB, BCMB, or MICRO. Other STEM electives chosen from AGNR 101*, ANSC 260*, ANSC 362, ANSC 420, ANSC 430, ANSC 431, ANSC 461, ANSC 462, ANSC 463, ANSC 464ANSC 470, ANSC 480, ANSC 481*, ANSC 482, ANSC 483, ANSC 484, ANSC 485, ANSC 486, ANSC 489, ANSC 493, ANSC 499, or PLSC 435 (after major requirement and Capstone Course requirement has been met, and a maximum of one of ANSC 480, ANSC 481*, ANSC 482, ANSC 483, ANSC 485, ANSC 486, or ANSC 489 may be taken to satisfy the STEM elective requirement); ANTH 110*, ANTH 117*; ASTR 151*, ASTR 152*, ASTR 153*, ASTR 154*; BAS (any); BCMB (any except BCMB 320); BIOL (any after major requirements are met); BME (any); BSE (221 and above); CBE (any); CE (210 and above); CHEM (any after major requirements are met); CLAS 273, COSC (any); CSM (any); ECE (any); EEB (any); EF (any); EPP (any); ESS 231, ESS 232, ESS 334, ESS 424*, ESS 434, ESS 442, ESS 444, ESS 454, ESS 462*; FDSC100, FDSC 110, FDSC 241, FDSC 341*, FDSC 410, FDSC 415*, FDSC 418, FDSC 419*, FDSC 421, FDSC 428, FDSC 429, FDSC 445; FORS 214, FORS 215, FORS 217, FORS 331, FORS 337, FORS 414; FWF 212, FWF 250*, FWF 313, FWF 315, FWF 320*, FWF 430; GEOG 131*, GEOG 132*, GEOG 137*; GEOL (any); IE (any); KNS 480*; MATH (any above 110 after Quantitative Reasoning requirements are met); ME (any); MICR (any); MSE (201 and above); NE (any); NUTR 100*, NUTR 302, NUTR 311, NUTR 314, NUTR 321-NUTR 322; PHYS (any); PLSC 210*, PLSC 250*, PLSC 320, PLSC 330*, PLSC 331, PLSC 410*, PLSC 415*, PLSC 421, PLSC 434, PLSC 438, PLSC 441, PLSC 442, PLSC 452, PLSC 461; PSYC 301, PSYC 370, PSYC 385, PSYC 445, PSYC 450, PSYC 459, PSYC 461; PUBH 201*, PUBH 202, PUBH 420; STAT (any); WFS (340 and above).
Business and Communications Electives chosen from ACCT 200, ACCT 207; ADVT 250*; ALEC 102*, ALEC 202*, ALEC 240*, ALEC 330*, ALEC 340*, ALEC 440*, ALEC 441; ANSC 361, ANSC 471; AREC 212, AREC 270*, AREC 313 or above; BULW 301; CMST 240* (if not used to satisfy OC); ECON (any course above 201); ENGL 295*; FDSC 390; FINC 300; MARK 300; MGT 201, MGT 300; PHIL 244* and STAT 201*.
Capstone Courses: Select two courses from ANSC 420, ANSC 480, ANSC 481*, ANSC 482, ANSC 483, ANSC 484, ANSC 485, ANSC 486, and PLSC 435. At least one course must be ANSC 420, ANSC 480, ANSC 481*, ANSC 482, ANSC 483, ANSC 484, ANSC 485 or ANSC 486.
Chosen from the Volunteer Core requirements. One course must also be designated as Written Communication (WC).
Any courses not already required for the major.

* Meets Volunteer Core Requirement. Nine hours of Engaged Inquiries (EI) electives are required from two different course prefixes.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* for STEM electives: replaced ANSC 360 with new ANSC 260, added new ANSC 462, 463, 464.

Course Description This course introduces students to the intersection of agricultural science, environmental sciences, and bioinformatics, emphasizing the importance of data analysis in modern agriculture and ecology. It provides an overview of bioinformatics applications in agriculture, including genomics, proteomics, metabolomics, and big data approaches in ecology and climate-smart agriculture. Students will be introduced to basic computational tools and databases used in agricultural research.

Statement about Crosslistings:

Rationale* As agriculture and ecosystem health face global challenges like climate change, food security, and sustainability, the integration of big data and advanced analytics has become crucial. This course equips students with foundational knowledge of how bioinformatics and data-driven approaches are transforming modern agriculture, enhancing crop yields, optimizing resource use, and promoting sustainable farming practices and environmental health. By understanding these cutting-edge applications, students will be better prepared for future careers in agriculture, environmental science, and related fields.

Impact on Other Units* None, there is no equivalent existing course.

Financial Impact* None, sufficient faculty and facility resources are available to teach this course.

Rationale* The modern fields of agriculture and environmental sciences are increasingly driven by data and computational methods. This course provides a foundational understanding of Python programming, enabling students to analyze, interpret, and visualize biological data effectively. By bridging biological data with programming, the course equips students with essential computational skills to tackle interdisciplinary challenges, prepares them for advanced studies in bioinformatics and data science, and fosters critical thinking in a data-driven scientific landscape.

Impact on Other Units* None, there are no other similar courses focused on bioinformatics of agricultural and environmental science data.

Financial Impact* None, sufficient faculty and facility resources are available to teach this course.

Rationale* This course equips students with foundational knowledge in Python-based data structures, enabling them to analyze biological data and address challenges in agricultural and environmental sciences. In the modern era of big data, biological research generates vast and complex datasets that require efficient computational tools for analysis. By focusing on Python, a widely adopted programming language in bioinformatics, this course provides students with the skills necessary to manipulate, analyze, and derive insights from biological data effectively. By combining theoretical knowledge with practical applications, students gain the tools to solve real-world problems and prepare for advanced computational biology work.

Impact on Other Units* None

Financial Impact* None, sufficient faculty and facility resources are available to teach this course.

Course Description This course introduces students to fundamental algorithms used in bioinformatics, with a focus on their implementation in Python and applications in agriculture and environmental sciences. Students will learn about key computational approaches used to analyze biological data, including sequence alignment, phylogenetic tree construction, and genome assembly. The course emphasizes both the theoretical foundations of these algorithms and their practical application through hands-on coding exercises and projects. Students will gain experience in implementing, optimizing, and applying these algorithms to real biological datasets in agriculture and environmental sciences.

Rationale* This course is designed to provide students with both the theoretical foundations and practical skills required to analyze biological data using computational tools. As the biological sciences increasingly generate large-scale data (e.g., genomic sequences, evolutionary relationships), there is a growing need for professionals who can design and implement algorithms to derive insights from such datasets. By focusing on Python as the implementation language, this course leverages one of the most widely used programming tools in bioinformatics, ensuring that students gain practical, transferable skills for academia, research, and industry.

Rationale* This course addresses a critical need in modern bioinformatics education by focusing on the essential skills required for conducting transparent and reproducible research. As the field of bioinformatics continues to evolve rapidly, the ability to create reproducible analyses has become paramount for ensuring scientific integrity and facilitating collaboration. This course fills a crucial gap in the curriculum by providing students with hands-on experience in version control, environment management, workflow systems, and containerization - all key components of reproducible research. By emphasizing practical skills and ethical considerations in data sharing, the course prepares students for the challenges they will face in academic and industry settings, where reproducibility is increasingly valued. Furthermore, the course's structure, which combines theoretical knowledge with extensive practical sessions, ensures that students not only understand the principles of reproducibility but can also apply them effectively in real-world scenarios.

Course Description This seminar-style course provides undergraduate students with a comprehensive overview of career opportunities in bioinformatics within agriculture and environmental sciences. Students will engage with professionals from academia, industry, and government who will share their career experiences, insights into emerging trends, and the skills necessary to succeed in bioinformatics roles that intersect with agriculture, food production, sustainability, biotechnology and environmetal health. Students will explore career prospects in research, data science, agricultural genomics, precision farming, plant biotechnology, and environmental monitoring. This course is designed to help students make informed decisions about career paths and prepare them for future professional opportunities in the growing field of bioinformatics within sectors of agriculture and environmental sciences.

Rationale* The growing intersection between bioinformatics and agriculture and environmental sciences is creating new career pathways that demand a blend of computational expertise, biological knowledge, and practical understanding of agricultural systems. As global challenges such as food security, climate change, sustainable agriculture, and environmental health continue to grow, the demand for professionals who can leverage bioinformatics to address these issues is increasing. Bioinformatics in agriculture and environmental sciences encompasses a wide range of applications including genomic sequencing, data analysis for precision farming, plant and animal breeding, environmental monitoring, and biotechnology development. These fields are poised for rapid growth, with bioinformatics playing a pivotal role in advancing agricultural technologies, optimizing crop yields, and ensuring sustainable food production systems. However, many students may lack awareness of how bioinformatics tools and techniques can be applied to real-world agricultural and environmental sciences problems and may not fully understand how the industry is evolving. This course is designed to address this gap by providing students with direct exposure to professionals working in these fields and how these professionals leverage bioinformatics in their profession. Through interactions with industry experts, students will gain firsthand knowledge of the skills, technologies, and career paths available to those interested in pursuing careers at the intersection of agriculture, environmental sciences, technology, and data science.

Rationale* This course addresses a critical need in modern agricultural education by bridging the gap between traditional farming practices and innovative artificial intelligence technologies. As agriculture faces increasing challenges from climate change, resource scarcity, and growing global food demand, the integration of machine learning offers powerful tools for optimizing crop yields, improving resource management, and enhancing sustainability. This course provides students with a unique blend of theoretical knowledge and practical skills, enabling them to apply machine learning algorithms to real-world agricultural problems. By focusing on hands-on projects with actual agricultural datasets, the course prepares students to become innovators in the rapidly evolving field of precision agriculture. Furthermore, the curriculum's emphasis on ethical considerations and future trends ensures that students are equipped to address the complex challenges facing global agriculture in a responsible and forward-thinking manner, ultimately contributing to more efficient, sustainable, and resilient farming practices.

Credit Hours* 3

Course Description This course is designed to introduce students to the principles and techniques of data visualization in the context of genomics and bioinformatics. Students will learn to effectively communicate complex biological data through visually appealing and informative graphics. The course will cover both theoretical concepts and hands-on practical experience using a variety of tools and techniques.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all courses in this crosslisting relationship and note whether primary or secondary.

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Rationale* Exploding data in the field of genomics and bioinformatics has made data visualization essential to gain novel biological insights. Traditional methods of data visualization fall short in capturing the complexity and nuances of genomic data. Thus, this course will fill that gap and teach students to use state-of-the art data visualization tools to explore, interpret, and communicate biological insights.

Impact on Other Units* None

Financial Impact* None, faculty and facility resources are sufficient to teach this course.

Course Description This course provides a comprehensive introduction to metagenomics and microbiome analysis, focusing on the study of microbial communities in various environments, including insect and plant-associated microbiomes. Students will learn theoretical concepts and practical skills in experimental design, sequencing technologies, bioinformatics, and data interpretation. The course emphasizes hands-on experience with cutting-edge tools and techniques used in microbiome research.

Rationale* Metagenomics is revolutionizing our understanding of microbial communities and their impacts on hosts and ecosystems, including those of agricultural environmental sciences significance. This course aims to equip students with the knowledge and skills necessary to conduct and interpret metagenomic studies, with a focus on their applications to agricultural ecosystems. The course will prepare students for careers in academia, government agencies, or industry related to microbiome research.

Course Description This course provides students with the opportunity to apply bioinformatics tools and techniques to address challenges in agriculture and environmental sciences. Students will engage in hands-on projects that integrate biological data analysis, computational modeling, and problem-solving to optimize agricultural productivity and study environmental systems. Through interdisciplinary collaboration and experiential learning, students will develop skills in programming, data visualization, and statistical analysis while exploring real-world applications in areas such as crop improvement, microbial interactions, and ecosystem management. This course prepares students for careers in bioinformatics, sustainable agriculture, and environmental research.

Rationale* An internship in bioinformatics focusing on agriculture and environmental sciences provides students with hands-on experience in applying computational and analytical tools to solve real-world challenges. It bridges the gap between theoretical knowledge and practical applications by allowing students to analyze biological data, model ecosystems, optimize crop productivity, and study microbial interactions. As agriculture and environmental sciences increasingly rely on data-driven approaches to address food security, climate change, and sustainable resource management, this internship equips students with critical skills in data analysis, programming, and problem-solving. Moreover, it fosters interdisciplinary collaboration and prepares students for careers at the forefront of innovation in agricultural technology and environmental stewardship.

Description

Advisor

Burk, Pigg

Many human activities adversely impact soil, water, and environmental quality; and there is a constant need for experts in the technologies required to collect sound information and to provide food, fiber, and shelter in an environmentally-sound manner. The Bachelor of Science in Environmental Science provides students with a strong grounding in basic sciences to prepare them for a broad range of possible careers.

This program provides the main degree program in Environmental Sceince and two concentrations: Soil Science and Conservation Agriculture and Environmental Sustainability. All provide a very strong basis in the natural sciences, as well as applied areas such as ecology, soil sciences, and natural resource policy. Students also build expertise with modern technologies such as geographical information systems, global positioning systems, and computer applications in natural resource management. Graduates are prepared to work in a wide variety of interesting and challenging career paths and to work with a broad variety of other professionals to solve complex problems. Examples of potential careers include soil and environmental specialists and scientists; state and federal regulatory agency work; private consulting in environmental and agricultural areas; and working with non-governmental organizations with interests in agriculture, environment, and natural resources. Students receiving this degree are also very competitive for placement in graduate programs in environmental and agricultural sciences and technology, as well as law school.

The environmental science base program is a blended mix of science and technology that provides a strong, broad background in the natural sciences. The plan of study emphasizes human impacts on the long-term use and productivity of land and water resources. Emphasis is also placed on the tools used in the management of these resources. The curriculum provides a good foundation in the collection and analysis of the information required to characterize resource conservation problems and to make good resource use decisions. Directed technical electives allow the students to concentrate in an area of interest. Students in this program will gain the practical knowledge necessary to compete for career opportunities in government, environmental consulting firms, public health services, environmental research laboratories, and agricultural production, while also gaining the theoretical training necessary for continuing on for advanced degrees in a variety of environmentally related fields.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Must be from a program other than ESS.

* Meets Volunteer Core Requirements.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ○ Yes
- ◉ No

For new majors: indicate the type of change
- ◉ New major name and new CIP code (requires THEC approval)
- ○ New major name and keeping the same CIP code

For new majors: have you or will you be submitting THEC paperwork?
- ◉ Yes
- ○ No

CIP Code (if available) 01.03.0104.00

Rationale*

Efforts to change the Environmental and Soil Sciences program to an Environmental Sciences program began several years ago in response to the following three factors:

1) input from the ESS Program Advisory Council and graduating seniors that the program name is confusing for incoming students. They think that they know what is meant by Environmental Science, but have no idea what is meant by the Soil Science modifier;

2) a study by an external marketing firm (Hanover Research, report in Appendix C), which pointed to great job growth in the Environmental Science area, and strong interest among incoming students in that knowledge base;

3) commitment by the Herbert College of Agriculture to support a stronger thrust in Environmental Science, including hiring a full-time Lecturer to teach classes in that area. It is expected that the growth of resources for this program will follow the growth in student numbers, allowing increased program strength.

Financial Impact*

This is the renaming of an existing program, with one course addition that will be taught by a faculty member hired specifically to expand this program

Impact on Other Units*

No signficant change in course or course demands.

We have contacted the Associate Deans of the colleges with somewhat similar programs to inform them of this change

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Description

Advisors

Burk, Eash

Many human activities adversely impact soil, water, and environmental quality; and there is a constant need for experts in the technologies required to collect sound information and to provide food, fiber, and shelter in an environmentally-sound manner. The Bachelor of Science in Environmental Science provides students with a strong grounding in basic sciences to prepare them for a broad range of possible careers.

This has a base Environmentals Scicne program and two concentrations: Soil Science, and Conservation Agriculture and Environmental Sustainability. All provide a very strong basis in the natural sciences, as well as applied areas such as ecology, soil sciences, and natural resource policy. Students also build expertise with modern technologies such as geographical information systems, global positioning systems, and computer applications in natural resource management. Graduates are prepared to work in a wide variety of interesting and challenging career paths and to work with a broad variety of other professionals to solve complex problems. Examples of potential careers include soil and environmental specialists and scientists; state and federal regulatory agency work; private consulting in environmental and agricultural areas; and working with non-governmental organizations with interests in agriculture, environment, and natural resources. Students receiving this degree are also very competitive for placement in graduate programs in environmental and agricultural sciences and technology, as well as law school.

The conservation agriculture and environmental sustainability concentration is a multidisciplinary program for students interested in conservation of natural resources and sustainability of agricultural systems. This degree provides students with a wide array of skills and scientific training in identifying and understanding important issues in environmental sustainability. The focus will be on both the micro-scale and macro-scale of food production, as well as providing a solid introduction to technical skills such as surveying and machinery operations needed to fulfill current and future food demands. An undergraduate degree in this field is also a first step towards certification as a Professional Soil Scientist.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Description

Advisors

Burk, Pigg

Many human activities adversely impact soil, water, and environmental quality; and there is a constant need for experts in the technologies required to collect sound information and to provide food, fiber, and shelter in an environmentally-sound manner. The Bachelor of Science in Environmental and Soil Sciences provides students with a strong grounding in basic sciences or engineering technology to prepare them for a broad range of possible careers.

This program provides a base Environmentals Science porgram and two concentrations: Soil Science, and Conservation Agriculture and Environmental Sustainability. All provide a very strong basis in the natural sciences, as well as applied areas such as ecology, soil sciences, and natural resource policy. Students also build expertise with modern technologies such as geographical information systems, global positioning systems, and computer applications in natural resource management. Graduates are prepared to work in a wide variety of interesting and challenging career paths and to work with a broad variety of other professionals to solve complex problems. Examples of potential careers include soil and environmental specialists and scientists; state and federal regulatory agency work; private consulting in environmental and agricultural areas; and working with non-governmental organizations with interests in agriculture, environment, and natural resources. Students receiving this degree are also very competitive for placement in graduate programs in environmental and agricultural sciences and technology, as well as law school.

The soil science concentration is a rigorous, science-based program for students interested in the field of soil science. The curriculum emphasizes soils and their long-term use and productivity, as well as surface and sub-surface water resources. Students will understand natural resource problems and their management, including soil and water conservation issues, land use problems, waste disposal, and reclamation of disturbed lands. Other areas of interest can be addressed through the appropriate selection of technical electives in the program. Students in this program will gain the practical knowledge necessary to compete for career opportunities in government, environmental consulting firms, public health services, environmental research laboratories, and agricultural production, while also gaining the theoretical training necessary for continuing on for advanced degrees in a number of environmentally related fields. An undergraduate degree in this field is the first step towards certification as a Professional Soil Scientist.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours* 3

Course Description Senior level course which results in a culminating experience where a student integrates information and derives skills from courses in the construction science curriculum. Students are exposed to real-life aspects of a construction enterprise and will generate a strategic construction business plan. This course emphasizes professional written and oral communication skills in the submission of the end project.

Equivalency

Rationale* Change to a lecture/lab format is being proposed to accommodate growing numbers of students that need this course to graduate. In order to effectively allocate instructor time and ensure that all students get equal access to lecture opportunities and opportunities to work with the teaching faculty, the split lab and lecture method is being proposed. This will allow for lectures to be a space to welcome in guests and teach to the course as a whole without having to provide equivalent lectures to multiple sessions and make it more possible to get industry experts in front of the class. The lab sections will allow for more individual interactions and smaller student to teacher ratios so that students have better access to the instructor. This also provides extra time for students to work and practice things like presentations or proposals in front of a group without that being limited by many groups/individuals needing to present. The lab/lecture split also allows for greater scaling of the course as necessary to meet student enrollment demands, as we can keep a single lecture section and have as many lab sessions as are necessary throughout the week.

Impact on Other Units* None; not used by any other programs

Financial Impact* None: same instructor and total contact hours

Course Description This course provides an in-depth exploration of the molecular and cellular processes underlying interactions between plants and microbes, encompassing both beneficial and pathogenic relationships. Through a combination of lectures, hands-on activities, and critical discussions, students will investigate historical and modern advancements in Molecular Plant-Microbe Interactions (MPMI) research. The course covers fundamental concepts such as pathogen virulence mechanisms, plant immune responses, and beneficial symbioses, as well as cutting-edge tools and applications in agriculture. Key topics include microbial effectors, host-pathogen co-evolution, plant defense signaling, and the role of beneficial microbes in promoting plant growth and nutrient acquisition. Students will gain practical experience in molecular and bioinformatics techniques, such as genome sequencing, bioinformatics in genome editing, and protein interaction studies, which are vital for characterizing MPMI. The course also emphasizes the translation of MPMI knowledge into agricultural innovations, such as engineering disease-resistant crops and developing biofertilizers.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

Rationale* The interactions between plants and microbes are critical to understanding plant health, disease management, and agricultural sustainability. The advent of molecular biology and genomics has transformed our ability to study these interactions, providing insights into the mechanisms governing pathogen infection, host resistance, and beneficial symbioses. A course on MPMI is essential to equip students with the foundational knowledge and practical skills necessary to address key challenges in agriculture, plant biology, and microbiology. This course focuses on the molecular mechanisms that drive plant-pathogen interactions, including the role of effector proteins, signal transduction pathways, and the plant immune system. It also explores the dynamics of beneficial plant-microbe associations, such as rhizobium-legume symbiosis and plant growth-promoting rhizobacteria. By integrating molecular biology, genomics, and bioinformatics, students will gain a comprehensive understanding of how to study and manipulate plant-microbe systems for improved crop productivity and resilience. The course bridges the gap between fundamental molecular biology and applied plant sciences, making it highly relevant for students pursuing careers in plant pathology, molecular genetics, biotechnology, and sustainable agriculture.

Course Description This course explores the intricate world of plant defense mechanisms, from their historical discovery to cutting-edge applications. Students will delve into the molecular and cellular components of plant immune systems, analyzing how plants recognize and respond to pathogens. The course covers the genomic architecture of immunity genes and the evolutionary processes shaping plant-pathogen interactions. By examining traditional and modern disease resistance approaches, students will gain practical insights into crop improvement strategies. This interdisciplinary course equips learners with the knowledge to understand complex immune networks and apply this understanding to enhance agricultural sustainability and food security.

Rationale* This comprehensive course on Plant Immunity is structured to provide a logical progression from fundamental concepts to practical applications, serving multiple educational objectives. The course will enable students to develop an understanding of the complex world of plant immunity and help appreciate its significance in agriculture and the environmental sciences. The course structure ensures students develop both comprehensive theoretical knowledge and practical skills necessary for careers in plant pathology, breeding, or biotechnology.

Course Description This field-based course is designed to provide students with practical knowledge and skills in entomology related to public health. Students will learn to collect and identify vector species, understand vector-borne diseases, and gain hands-on experience in screening vectors for different pathogens for developing vector and vector-borne disease surveillance programs. This course integrates fieldwork with laboratory work and minimal classroom lectures, to provide real-world applications and exposure to challenges faced in public health entomology.

Rationale* Public health entomology is a crucial area of study that focuses on the role of vectors in pathogen transmission, prevention, and vector control. The rationale for offering a field-based course in public health entomology stems from the need to bridge theoretical knowledge with practical, real-world applications. A field-based approach enables students to engage directly with the ecological, behavioral, and environmental aspects of insect vectors that cannot be fully understood through classroom instruction alone. This course will also provide (1) hands-on learning and real-world application, (2) understanding the ecological and environmental context of vectors, (3) exposure to vector control strategies in practice, (4) developing problem-solving and critical thinking skills, (5) enhancing student engagement and motivation, (6) building communication and collaboration skills, and (7) bridging the gap between academic learning and career opportunities.

Impact on Other Units* None, there is no existing equivalent course.

Financial Impact* None, faculty and facility resources are sufficient to teach this course.

Course Description This course provides an in-depth exploration of the physiological processes underlying the functioning of insects. We will examine insect anatomy, metabolism, reproduction, sensory and nervous systems, and how these physiological processes enable insects to thrive in diverse environments. Special attention will be given to the adaptations that allow insects to survive in extreme conditions, their ecological roles, and the implications of insect physiology for pest control and human health.

Rationale* An undergraduate course in insect physiology is essential for providing foundational knowledge about the most diverse group of organisms on Earth, with applications in agriculture, biotechnology, and public health. Understanding insect physiological processes, such as development, metabolism, and immune response, can inform sustainable pest management, conservation strategies, and innovations in medicine and biomimetics. The course prepares students for careers in entomology, agriculture, and environmental sciences while fostering critical thinking and research skills. Furthermore, it addresses pressing ecological challenges, such as the global decline in insect populations, and aligns with institutional goals to promote interdisciplinary education and STEM advancements.

Rationale* Insects and microbes form intricate associations that have significant impacts on agricultural and environmental ecosystems. The emergence of modern bioinformatics tools has rapidly advanced our knowledge of these associations, many of which are otherwise difficult to study using classical microbiological methods. Understanding insect-microbe interactions is crucial for developing strategies in pest management, disease control, and conservation. This course aims to equip students with the bioinformatics skills necessary to investigate these relationships at the molecular level, preparing them for careers in research, biotechnology, and pest management.

Rationale* The Environmental and Soil Science major (ESS) does not currently offer a 100-level course in Environmental Science that introduces students to the principles of environmental science. The ESS program has been in place since 2001, and currently has concentrations in Conservational Agriculture and Environmental Sustainability, Environmental Science, and Soil Science. The Environmental Science concentration is by far the largest of these, with about two-thirds of the total students. We would like to grow the program based on expected recruiting benefits resulting from offering this course.

Impact on Other Units* None

Financial Impact* The new course will be taught using existing departmental resources. This includes a recently-hired full-time lecturer brought on-board specifically to help strengthen the ESS-Environmental Science Concentration after the retirement of a program senior faculty member who retired several years ago.

Herbert College of Agriculture - Entomology and Plant Pathology - Bioinformatics Major, Bachelor of Science in Bioinformatics

2025-2026 UG Add Program

General Catalog Information

College* Herbert College of Agriculture

Department* Entomology and Plant Pathology

Program Name* Bioinformatics Major, Bachelor of Science in Bioinformatics

Learning Outcomes Students will be able to:

1. Demonstrate fundamental knowledge of biological, agricultural, and environmental sciences principles and concepts.
2. Demonstrate mastery of data science, computational science, responsible management of big data, statistics, and bioinformatics principles and concepts.
3. Demonstrate ability to apply critical thinking and problem-solving skills and integrate fundamental and data science knowledge to solve challenges in agriculture and environmental sciences, from hypothesis formulation, through experimental design, data acquisition, and statistical data analyses, to data interpretation and final written output.
4. Demonstrate the ability to communicate scientific concepts and results orally and in writing, collaborate with multidisciplinary teams, and apply bioinformatic skills responsibly in a professional environment.
5. Explain the global implications of bioinformatics in agriculture and environmental sciences, and understand its role in addressing global challenges, such as food security, environmental health, climate change and resilience, and sustainable agriculture.

Degree Type* Bachelor of Science in Bioinformatics

Program Type* Undergrad (Major)

Campus code*

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description Bioinformatics is the interdisciplinary application of computer-based technologies to analyze and interpret complex datasets, or "big data." This innovative undergraduate major focuses on leveraging bioinformatics to address agricultural and environmental challenges. Housed in the Department of Entomology and Plant Pathology within the Herbert College of Agriculture, the program aligns with the college's mission and the Land Grant tradition by emphasizing practical solutions to pressing global issues. Students will gain hands-on experience with cutting-edge computational tools and techniques to tackle critical problems in food security, ecosystem health, and sustainable agriculture. Through a combination of coursework, research opportunities, and experiential learning, graduates will be well-prepared for careers at the intersection of biology, data science, and agriculture, contributing to advancements in sustainable food systems and environmental resilience.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

* Satisfies Volunteer Core Requirements

Rationale*

The Bioinformatics undergraduate program focused on agriculture and environmental sciences offers a unique and important educational opportunity that is not offered at the university or in Tennessee. Increased global travel and trade spread pests and diseases worldwide, reducing crop and livestock production and raising input costs. This diminishes food security at household, national, and global levels and negatively impacts the agriculture sector, a primary income source for rural communities. Additionally, global climate change is altering entire ecosystems, and the growing global population is increasing the need to produce greater quantities of nutritious food with diminishing land resources. To meet these challenges, interdisciplinary and innovative technologies, built on strengths in fundamental and applied agriculture, genomics, and computational sciences have created a need for an undergraduate bioinformatics program addressing the grand challenges of food security and environmental health. For example, bioinformatics and genomics enable the analysis of rapidly accumulating datasets to identify key adaptive climate-resilient traits. These data provide tools for plant breeders to tailor crops to their environments, using advanced selection or genome editing methods. Identifying essential climate-resilient traits such as tolerance to drought, flood, extreme temperatures, or salinity is crucial. Isolating and utilizing the adaptive genetic variants underpinning these traits will safeguard crop security. In addition, modern machine learning (ML) methods in bioinformatics have achieved unprecedented performance on a variety of tasks, from high-throughput phenotyping to fine-scale, reduced cost, genomic variant profiling, to increased efficiency in breeding strategies. Despite these advances, ML approaches have not been widely adopted in plant or livestock production. This is a missed opportunity as agricultural systems offer unique prospects to optimize these technologies for maximizing yield, increasing nutrition, minimizing costly inputs, and reducing environmental impacts. This program will also train students in applying ML to solve problems across the entire agricultural system, encompassing breeding, production, and harvest/distribution.

Financial Impact*

This program uses some courses from other units. Most are foundational STEM courses. Administrators of the different colleges and departments were contacted and we received approval from them to include their courses in the new program. In addition, the suggested courses for Vol Core are not restricted to specific academic programs. Please see the attachment, "Financial Impact - Approval of including courses from other units," for their consent.

Impact on Other Units*

There are several units and courses affected by this proposal. They are the following.

- College of Collaborating and Emerging Studies (BINF 201)
- Arts and Sciences - Natural Sciences (BCMB 412, BIOL 150, BIOL 159, BIOL 160, BIOL 240, BIOL 260, CHEM 122, CHEM 123, CHEM 132, CHEM 133, EEB 451, MATH 151, MATH 152, PHYS 221, PHYS 222, STAT 201)
- Arts and Sciences - Arts and Humanities (ENGL 101, ENGL 102)
- Herbert College of Agriculture (AGNR 100, AGNR 220, ALEC 150, ALEC 325, PLSC 415).

Some of the departments involved are partners in an approved faculty cluster hire led by Entomology and Plant Pathology. Development of a new undergraduate program focused on bioinformatics was a component of the proposal. Our departmental partners include Microbiology, Plant Sciences, and Electrical Engineering and Computer Science. The faculty cluster hire has resulted in hiring several new faculty to teach the proposed courses.

Have you consulted with all programs/departments that will be impacted by this change?*

- (•) Yes
- ( ) No

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

For qualified students, the Department of Food Science offers a Five-Year BS/MS accelerated degree program with a BS major in Food Science and a thesis-based MS major in Food Science. Central to this program is that a qualified student may take up to nine hours of approved graduate courses for their senior undergraduate electives and have them count toward both the BS degree and the MS degree. Students will be considered for conditional admission to the program by the end of their junior year of undergraduate study at the University of Tennessee, Knoxville. Because the MS program requires that students write a thesis based on their original research, students in the BS/MS program must start working on their research project no later than starting the senior year of undergraduate studies. For each student in the program, a graduate advisory committee composed of a minimum of three faculty members must be established before completion of the BS degree.

To be considered for conditional admission to the program:

- A student must be a declared Food Science major, Science concentration, with a minimum GPA of 3.4, must have completed at least 15 hours of credit in Food Science, and must have completed at least 90 hours of the 120 hours of coursework required for the BS degree with a major in Food Science.
- A student must provide three letters of recommendation and complete a personal interview with individuals comprising the Graduate and Undergraduate Committees in the Department of Food Science.
- A student must obtain a commitment from a Food Science graduate research faculty member to serve as his/her graduate mentor-advisor (i.e., major professor) and at least two other graduate research faculty members to serve on his/her graduate advisory committee.

Applicants are required to have completed FDSC 241 - Food Preservation and Packaging. The Department may consider other relevant factors such as an applicant's work experience and level of maturity before conditionally admitting a student to the BS/MS program. Conditional admission of a student into the Five-Year BS/MS program must be approved by both the Department of Food Science and the Graduate School. Students will be typically informed of the outcome of their application by the end of their junior year of undergraduate study.

Any course taken for graduate credit before satisfying all requirements for the BS degree must be approved by the student's graduate advisory committee, the Graduate Director and the Graduate School. These courses must be identified in advance, in consultation with the undergraduate advisor, and the graduate advisory committee. The form "Food Science Conditional Admission Five-Year BS-MS" is available from the Graduate Director and must be completed and signed by the undergraduate advisor, undergraduate coordinator, and graduate advisory committee at least two months before the end of the junior year. After review by the Department, the form will be signed by the Graduate Director and submitted to the Graduate School for approval and processing.

Conditional admission into the BS/MS program does not guarantee acceptance into either the Graduate School or the MS program. Students in the BS/MS program must apply for admission to the Graduate School and to the MS program during their senior year of undergraduate study for the term immediately following the completion of their undergraduate study following the same procedures that all other student applicants follow. A GRE score must be submitted as part of the application for admission into any graduate program in the Department of Food Science. Students will be fully admitted to the MS program after they have been accepted both by the Graduate School and by the Food Science program. Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Total Credit Hours 120-122

Footnotes

Mathematics placement depends on high school courses and grades and ACT scores.
Any courses not already required for the major.
Chosen from: AGNR 101*, AGNR 180*, AGNR 480; ALEC 102*, ALEC 150, ALEC 202*, ALEC 211*, ALEC 240*, ALEC 303*, ALEC 340*, ALEC 440*, ALEC 441, ALEC 485*; AREC 201*, AREC 212; EPP 123*; ESS 110*, ESS 120*, ESS 220*, ESS 326, ESS 434, ESS 462*; FORS 100, FORS 321*, FORS 335, FORS 345, FORS 420; FWF 250*, FWF 320*, FWF 324, FWF 420*; PLSC 115*, PLSC 210*, PLSC 226, PLSC 230, PLSC 233, PLSC 250*, PLSC 275, PLSC 280.
Choose from: ASTR 151*, ASTR 152*; BCMB (any); BIOL (any after major requirements are met); HDFS 210*, HDFS 211, HDFS 213, HDFS 240; CHEM (any after major requirements are met); COSC (any); CSM (any); ECE (any); EEB (any); EF (any); GEOG 131*, GEOG 132*, GEOG 137*; GEOL (any); HTM (any); IE (any); KNS (any above 100-level); MATH (any above MATH 125* after Quantitative Reasoning requirements are met); ME (any); MICR (any except MICR 210*); MSE (MSE 201 and above); NE (any); NUTR (any except NUTR 100*, NUTR 311); PHYS (any except PHYS 221*); PSYC 301, PSYC 370, PSYC 385, PSYC 445, PSYC 450, PSYC 459, PSYC 461; PUBH 202, PUBH 315, PUBH 401, PUBH 420; STAT (any except STAT 201*).
ALEC 211 or ALEC 325 or ANSC 185 or any Arts and Humanities Elective
ALEC 421 or ALEC 450(S) or AREC 270 or FWF 320 or any or Social Science Elective
ALEC 210 or ALEC 240 or any Oral Communication Elective
AGNR 180 or ALEC 150 or ALEC 201 or ALEC 325 or ALEC 330 or ALEC 340 or ALEC 421 or ALEC 450(S) or ALEC 485 or AREC 201 or AREC 270 or EPP 123 or ESS 120 or ESS 220 or FDSC 110 or FWF 320 or FWF 420 or PLSC 115 or any Expanded Perspective Elective
ALEC 440 or FORS 321 or WFS 401 or any Writing Communication Elective
Choose from FDSC 101*, FDSC 110*, FDSC 210, FDSC 310, FDSC 442, FDSC 450

*** Meets Volunteer Core Requirements.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*

1. **Term 4.** Replacing FDSC 442 with Food Science Electives. This will give more flexibility with our students in meeting their CPOS requirements and the our department has developed new courses as potential electives over the past two years.

2. **Term 5.** Replacing FDSC 442 with Food Science Electives. This will give more flexibility with our students in meeting their CPOS requirements and the our department has developed new courses as potential electives over the past two years.

3. **Term 7.** Adding FDSC 391 Food Product Development Concepts (1 cr). A new course proposal that will allow Food Science – Science concentration major to generate food product concepts and plan on how to develop and manufacture a novel food product.

4. **Term 8.** Replacing FDSC 442 with Food Science Electives and changing the credit hour from 3 to 2. This will give more flexibility with our students in meeting their CPOS requirements and the our department has developed new courses as potential electives over the past two years. The change in credit hour from 3 to 2 is to balance the addition of the new course FDSC 391 (1 cr) in Term 7.

5. Add the following in the footnotes list to highlight Herbert College of Agriculture Vol Core classes and FDSC Elective courses.

[5]ALEC 211 or ALEC 325 or ANSC 185 or any Arts and Humanities Elective

[6]ALEC 421 or ALEC 450(S) or AREC 270 or FWF 320 or any or Social Science Elective

[7]ALEC 210 or ALEC 240 or any Oral Communication Elective

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The programs in pre-dental, pre-medicine, pre-pharmacy, and pre-veterinary medicine allow students to be awarded a Bachelor of Science in Food Science with a major in food science after three years and the successful completion of the first year (two semesters) in UT-Memphis dental or medical programs or the University of Tennessee College of Veterinary Medicine. The last 30 hours of the three-year curriculum must be taken at the University of Tennessee, Knoxville. A total of 120 hours must be completed by the end of the first year in professional school. No later than December 31 of the student's first year in professional school (s)he should contact the Department of Food Science to check on graduation procedures for this program.

Although a Bachelor of Science degree is not required for admission to the Colleges of Dentistry or Medicine, most of the students accepted into these programs have the baccalaureate degree before admission. Therefore, students are encouraged to plan to complete all requirements for Bachelor of Science degree before enrolling in either of these colleges. A Bachelor of Science degree can be obtained before enrolling in a Doctor of Pharmacy (PharmD) program.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Credit Hours 18

Term 6 Milestone Notes

No milestones

This curriculum can meet the requirements for entrance to the UT professional programs in Memphis or UT Pre-Vet program. After the first successful year in the professional school, obtaining a minimum of 120 hours of college credit, the student will be awarded a Bachelor of Science in Food Science with a major in food science. Should the student not gain admittance after the junior year, the student will complete the requirements during the senior year for a major in food science with a pre-professional concentration.

Term 7

UT - Professional School

Term 7 Milestone Notes

Apply to graduate

Term 8

UT - Professional School

Term 8 Milestone Notes

No milestones

Total Credit Hours 120

Footnotes

Mathematics placement depends on high school courses and grades and ACT scores.
Chosen from courses that meet pre-professional requirements for UT-Memphis or UT-Vet School. These may include BCMB 230, BCMB 401, BCMB 402; BIOL 240; CLAS 273; EEB 250 and EEB 251; PHYS 221* and PHYS 222* should be taken for pre-professional programs that require one or both courses. Other courses that may also be selected include FDSC 150, FDSC 341*, FDSC 390, FDSC 415*, FDSC 430*, FDSC 442, FDSC 445, FDSC 495, FDSC 493 (maximum of 3 hours) or FDSC 499 (maximum 3 hours).
Chosen from the following: FDSC 341 *, FDSC 415 *, FDSC 430 *.
ALEC 421 or ALEC 450(S) or AREC 270 or FWF 320 or any or Social Science Elective
AGNR 180 or ALEC 150 or ALEC 201 or ALEC 325 or ALEC 330 or ALEC 340 or ALEC 421 or ALEC 450(S) or ALEC 485 or AREC 201 or AREC 270 or EPP 123 or ESS 120 or ESS 220 or FDSC 110 or FWF 320 or FWF 420 or PLSC 115 or any Expanded Perspective Elective
ALEC 211 or ALEC 325 or ANSC 185 or any Arts and Humanities Elective
ALEC 210 or ALEC 240 or any Oral Communication Elective
ALEC 440 or FORS 321 or WFS 401 or any Writing Communication Elective

* Meets Volunteer Core Requirements.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*

1. **Term 1.** Adding MATH 151 or MATH 152 in the mathemathics requirements. This will allow easy transfer of students from biological sciences to Pre-Professional Food Science major.

2. Adding the following footnotes to highlight Herbert College of Agriculture Vol Core courses:

[4]ALEC 421 or ALEC 450(S) or AREC 270 or FWF 320 or any or Social Science Elective

5AGNR 180 or ALEC 150 or ALEC 201 or ALEC 325 or ALEC 330 or ALEC 340 or ALEC 421 or ALEC 450(S) or ALEC 485 or AREC 201 or AREC 270 or EPP 123 or ESS 120 or ESS 220 or FDSC 110 or FWF 320 or FWF 420 or PLSC 115 or any Expanded Perspective Elective

6ALEC 211 or ALEC 325 or ANSC 185 or any Arts and Humanities Elective

[7]ALEC 210 or ALEC 240 or any Oral Communication Elective

[8]ALEC 440 or FORS 321 or WFS 401 or any Writing Communication Elective

Financial Impact* None

Impact on Other Units* None

Have you consulted with all programs/departments that will be impacted by this change?*
- ( ) Yes
- (•) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The programs in pre-dental, pre-medicine, pre-pharmacy, and pre-veterinary medicine allow students to be awarded a Bachelor of Science in Food Science with a major in food science after three years and the successful completion of the first year (two semesters) in UT-Memphis dental or medical programs or the University of Tennessee College of Veterinary Medicine. The last 30 hours of the three-year curriculum must be taken at the University of Tennessee, Knoxville. A total of 120 hours must be completed by the end of the first year in professional school. No later than December 31 of the student's first year in professional school (s)he should contact the Department of Food Science to check on graduation procedures for this program.

Although a Bachelor of Science degree is not required for admission to the Colleges of Dentistry or Medicine, most of the students accepted into these programs have the baccalaureate degree before admission. Therefore, students are encouraged to plan to complete all requirements for Bachelor of Science degree before enrolling in either of these colleges. A Bachelor of Science degree can be obtained before enrolling in a Doctor of Pharmacy (PharmD) program.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Mathematics placement depends on high school courses and grades and ACT scores.
Any courses not already required for the major.
Chosen from courses that meet pre-professional requirements for UT-Memphis or UT-Vet School. These may include BCMB 230, BCMB 401, BCMB 402; BIOL 240; CLAS 273; EEB 250 and EEB 251; PHYS 221* and PHYS 222* should be taken for pre-professional programs that require one or both courses. Other courses that may also be selected include FDSC 150, FDSC 341*, FDSC 390, FDSC 415*, FDSC 430*, FDSC 442, FDSC 445, FDSC 493 or FDSC 495 (maximum of 3 hours).
Chosen from, FDSC 341*, FDSC 390, FDSC 415*, FDSC 430*, FDSC 442, FDSC 445, FDSC 493 (maximum of 3 hours) or FDSC 495 or FDSC 499 (maximum of 3 hours).
Chosen from the following: FDSC 341*, FDSC 415*, FDSC 430*.
ALEC 421* or ALEC 450(S)* or AREC 270* or FWF 320* or any Social Science Elective
AGNR 180* or ALEC 150* or ALEC 201* or ALEC 325* or ALEC 330* or ALEC 340* or ALEC 421* or ALEC 450(S)* or ALEC 485* or AREC 201* or AREC 270* or EPP 123* or ESS 120* or ESS 220* or FDSC 110* or FWF 320* or FWF 420* or PLSC 115* or any Expanded Perspective Elective
ALEC 211* or ALEC 325* or ANSC 185* or any Arts and Humanities
ALEC 210* or ALEC 240* or any Oral Communication
ALEC 440* or FORS 321* or WFS 401* or any Written Communication

* Meets Volunteer Core Requirements.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale*

1. **Term 1.** Adding MATH 151 or MATH 152 as options for Mathematics requirements. This will allow easy transfer of students from biological sciences to Pre-Professional Food Science major.

2.Adding the following footnotes to highlight Herbert College of Agriculture Vol Core Courses:

[6]ALEC 421* or ALEC 450(S)* or AREC 270* or FWF 320* or any Social Science Elective

[7]AGNR 180* or ALEC 150* or ALEC 201* or ALEC 325* or ALEC 330* or ALEC 340* or ALEC 421* or ALEC 450(S)* or ALEC 485* or AREC 201* or AREC 270* or EPP 123* or ESS 120* or ESS 220* or FDSC 110* or FWF 320* or FWF 420* or PLSC 115* or any Expanded Perspective Elective

[8]ALEC 211* or ALEC 325* or ANSC 185* or any Arts and Humanities

[9]ALEC 210* or ALEC 240* or any Oral Communication

[10]ALEC 440* or FORS 321* or WFS 401* or any Written Communication

Financial Impact* None

Chosen from: AGNR 101*, AGNR 180*, AGNR 480; ALEC 102*, ALEC 150, ALEC 202*, ALEC 211*, ALEC 240*, ALEC 303*, ALEC 340*, ALEC 440*, ALEC 441, ALEC 485*; AREC 201*, AREC 212; EPP 123*; ESS 110*, ESS 120*, ESS 220*, ESS 326, ESS 434, ESS 462*; FORS 100, FORS 321*, FORS 335, FORS 345, FORS 420; FWF 250*, FWF 320*, FWF 324, FWF 420*; PLSC 115*, PLSC 210*, PLSC 226, PLSC 230, PLSC 233, PLSC 250*, PLSC 275, PLSC 280.
Choose from: ASTR 151*, ASTR 152*; BCMB (any); BIOL (any after major requirements are met); HDFS 210*, HDFS 211, HDFS 213, HDFS 240; CHEM (any after major requirements are met); COSC (any); CSM (any); ECE (any); EEB (any); EF (any); GEOG 131*, GEOG 132*, GEOG 137*; GEOL (any); HTM (any); IE (any); KNS (any above 100-level); MATH (any above MATH 125* after Quantitative Reasoning requirements are met); ME (any); MICR (any except MICR 210*); MSE (MSE 201 and above); NE (any); NUTR (any except NUTR 100*, NUTR 311); PHYS (any except PHYS 221*); PSYC 301, PSYC 370, PSYC 385, PSYC 445, PSYC 450, PSYC 459, PSYC 461; PUBH 202, PUBH 315, PUBH 401, PUBH 420; STAT (any except STAT 201*.
ALEC 211* or ALEC 325* or ANSC 185* or any Arts and Humanities Elective
ALEC 421* or ALEC 450(S)* or AREC 270* or FWF 320* or any Social Science Elective
AGNR 180* or ALEC 150* or ALEC 201* or ALEC 325* or ALEC 330* or ALEC 340* or ALEC 421* or ALEC 450(S)* or ALEC 485* or AREC 201* or AREC 270* or EPP 123* or ESS 120* or ESS 220* or FDSC 110* or FWF 320* or FWF 420* or PLSC 115* or any Expanded Perspective Elective
ALEC 210* or ALEC 240* or any Oral Communication
ALEC 440* or FORS 321* or WFS 401* or any Written Communication
Choose from FDSC 101*, FDSC 110*, FDSC 210, FDSC 310, FDSC 450

* Meets Volunteer Core Requirements.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program? *
- ○ Yes
- ◉ No

Rationale*

1. **Term 6.** Replacing FDSC 442 with Food Science Electives. This will give more flexibility with our students in meeting their CPOS requirements and our department has developed new courses as potential electives over the past two years.

2. **Term 7.** Replacing FDSC 442 with Food Science Electives and changing the credit hour from 2 to 1. This will give more flexibility with our students in meeting their CPOS requirements and our department has developed new courses as potential electives over the past two years. The change in credit hour from 3 to 2 is to balance the addition of the new course FDSC 391 (1 cr) in Term 7.

3. **Term 7.** Adding FDSC 391 Food Product Development Concepts (1 cr). A new course proposal that will allow Food Science – Science concentration major to generate food product concepts and plan on how to develop and manufacture a novel food product.

4. **Term 8.** Replacing FDSC 442 with Food Science Electives. This will give more flexibility with our students in meeting their CPOS requirements and the our department has developed new courses as potential electives over the past two years.

5. Adding the following footnotes to highlight Herbert College of Agriculture Vol Core courses and FDSC Elective courses:

[5]ALEC 211* or ALEC 325* or ANSC 185* or any Arts and Humanities Elective

[6]ALEC 421* or ALEC 450(S)* or AREC 270* or FWF 320* or any Social Science Elective

[7]AGNR 180* or ALEC 150* or ALEC 201* or ALEC 325* or ALEC 330* or ALEC 340* or ALEC 421* or ALEC 450(S)* or ALEC 485* or AREC 201* or AREC 270* or EPP 123* or ESS 120* or ESS 220* or FDSC 110* or FWF 320* or FWF 420* or PLSC 115* or any Expanded Perspective Elective

[8]ALEC 210* or ALEC 240* or any Oral Communication

[9]ALEC 440* or FORS 321* or WFS 401* or any Written Communication

[10]Choose from FDSC 101*, FDSC 110*, FDSC 210, FDSC 310, FDSC 450

Credit Hours* 3

Course Description Sport fishing continues as a driving force in outdoor recreation. It provides anglers an intimate connection with nature, an ever-growing desire to learn more about fish ecology and hydrology, an environment that requires you to be present, a thrill when hooked up and fighting a prized fish, and a simple and meaningful way to connect with fellow anglers. Economically, sport fishing in the US alone has a $129 billion annual output. Students completing this course will gain a deeper understanding of sport fish recreation by exploring sport fish biology and ecology, conservation, and management; and attain skills in guiding, business and client management, and safety.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all courses in this crosslisting relationship and note whether primary or secondary.

Statement about Vol Core:

Course Description Introduction to the foundational principles and applications of biotechnology, emphasizing the molecular mechanisms that underpin genetic engineering. Covers fundamental concepts in genetics that include classical and modern principles of heredity. meiosis and transmission genetics; molecular genetics and gene expression. Covers concepts in cell and molecular biology, applying these to modern biotechnological techniques such as gene cloning, genetic transformation, and genome editing. Examines ethical considerations, biosafety, and the societal impact of biotechnology. Through lectures, discussions, and projects, students will gain a foundational understanding of biotechnology and its influence on medical, agricultural, environmental, and industrial fields.

Herbert College of Agriculture - PLSC - 431

2025-2026 UG Add Course

General Catalog Information

College* Herbert College of Agriculture

Department (Acalog Hierarchy)* Plant Sciences

Subject/Prefix (choose from list)* PLSC

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 431

Course Title (max 100 characters)* Field Crop Production

Experience Learning Designation
- ○ N (Internship)
- ○ R (Research)
- ○ S (Service Learning)

For N/R/S base courses, should this course be:
- ○ Active
- ○ Archived
- ○ N/A

Variable Title?*
- ○ Yes
- ◉ No

Credit Hours* 3

Course Description Introduction to basic and applied principles and concepts of field crop production from an agronomic perspective. Review of the physiology of plant growth as relevant to production of field crops. Description of the agricultural production and management of important field crops, and emerging topics associated with field crop production.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all courses in this crosslisting relationship and note whether primary or secondary.

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Instructional Method* Lab, Lecture

Contact Hour Distribution (if more than one instructional method) 2 hours lecture and one 2-hour lab

Grading Restriction

Repeatability

Credit Restriction Students may not receive credit for both PLSC 431 and PLSC 531

Registration Enforced (RE) Prerequisite(s):

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s):

Recommended Background Working knowledge and familiarity with plant anatomy and basic soil science

Comments Typically offered spring semester in years ending with an odd number

Registration Restriction(s)

Registration Permission

Equivalency

Rationale* Increased course content in field crop production is needed to facilitate departmental program in crop science.

Impact on Other Units* N/A

Financial Impact* For the first time the course is offered, it will be taught by an existing faculty member with a modified appointment. Instructor in subsequent offerings (offered every two years) is to be determined.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?

Notes

Herbert College of Agriculture - PLSC - 435

2025-2026 UG Revise Course

General Catalog Information

College* Herbert College of Agriculture

Department (Acalog Hierarchy)* Plant Sciences

Subject/Prefix (choose from list)* PLSC

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 435

Course Title (max 100 characters)* Forage Crops

For N/R/S base courses, should this course be:
- ○ Active
- ○ Archived
- ○ N/A

Variable Title?
- ○ Yes
- ○ No

Credit Hours* 3

Course Description Agronomic principles of forage crop production, with a focus on establishing and managing forage species for livestock and wildlife. Forage species characteristics, including physiology, morphology, and the impact of these traits on management practices such as fertilization, grazing, and preservation. Emphasizing sustainable agriculture, the course also covers the role of forage species and management in ecologically and economically viable livestock systems.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Impact Report for FWF 250.

Source: WORKING 2025-2026 Undergraduate Catalog	
(RE) Prerequisite(s):	EEB 432 - Conservation Genomics
	WFS 305 - Prescribed Fire Management
	WFS 324 - Wildlife Habitat Evaluation
	WFS 340 - Wetlands Ecology and Management
	WFS 345 - Conservation Aquaculture
	WFS 352 - R Programming for Natural Resources
	WFS 353 - Wildlife and Fisheries Education and Outreach
	WFS 423 - Fisheries Data Collection and Management
	WFS 435 - Wildlife Research Design
	WFS 440 - Wildlife Techniques
	WFS 442 - Fisheries Techniques
Programs	Agricultural Sciences and Natural Resources Exploratory Program
	Animal Science Major, BS in Animal Science - Animal Industries Concentration
	Animal Science Major, BS in Animal Science - Bioscience Concentration
	Animal Science Major, BS in Animal Science - Five-Year BS/MS Program
	Animal Science Major, BS in Animal Science - Veterinary Science Concentration
	Biological Sciences Major, BS - Ecology and Evolutionary Biology Concentration
	Ecology and Evolutionary Biology Minor
	Engaged Inquiries (EI)
	Engineering for Sustainability Minor
	Environmental Studies Minor
	Food Science Major, BS in Food Science - Five-Year BS/MS Program
	Food Science Major, BS in Food Science - Science Concentration
	Forestry Major, BS in Forestry - Restoration and Conservation Science Concentration
	Forestry Minor
	General Education Requirements for 2021-2022 or earlier
	Geology and Environmental Studies Major, BS - Environmental Studies Concentration
	Mathematics Major, BS - Math Biology Concentration
	Natural Resource and Environmental Economics Major, BS in Agricultural and Resource Economics
	Natural Resource and Environmental Economics Major, BS in Agricultural and Resource Economics - Five-Year BS/MS in Agricultural and Resource Economics - Natural Resource Economics
	Natural Resource and Environmental Economics Major, BS in Agricultural and Resource Economics - Sustainable Supply Chain Management
	Natural Sciences (NS)
	Nutrition Major, BS in Health and Human Sciences - Community Nutrition Concentration
	Nutrition Major, BS in Health and Human Sciences - Community Nutrition Concentration - Five-Year BS/MS
	Sustainability Major, BA
	Sustainability Major, BA (uTrack Requirements)

Notes

Herbert College of Agriculture - SNR - 310

2025-2026 UG Change Course Number / Subject / Department

General Catalog Information

Important Note:

This Change Course Number / Subject / Department form is to be used for changing the course number, subject code, and/or the department where the course is offered. Other regular revisions to course requirements can be included in this form.

College* Herbert College of Agriculture

Department (Acalog Hierarchy)* School of Natural Resources

Subject/Prefix (choose from list)* SNR

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 310

Course Title (max 100 characters)* Wildland Fire Behavior and Management

For N/R/S base courses, should this course be:
- ○ Active
- ○ Archived
- ○ N/A

Variable Title?
- ○ Yes
- ○ No

Credit Hours* 1

Course Description An introduction to wildland fire management, covering the fundamentals of fire behavior, fire weather, equipment, and safety.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Instructional Method* Lecture

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Herbert College of Agriculture - SNR - 325

2025-2026 UG Change Course Number / Subject / Department

General Catalog Information

Important Note:

This Change Course Number / Subject / Department form is to be used for changing the course number, subject code, and/or the department where the course is offered. Other regular revisions to course requirements can be included in this form.

College* Herbert College of Agriculture

Department (Acalog Hierarchy)* School of Natural Resources

Subject/Prefix (choose from list)* SNR

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 325

Course Title (max 100 characters)* Wildlife Vegetation and Habitat

For N/R/S base courses, should this course be:
- ( ) Active
- ( ) Archived
- ( ) N/A

Variable Title?
- ( ) Yes
- ( ) No

Credit Hours* 3

Course Description Introduction to interactions between plants and wildlife, including species of conservation concern. Emphasis is on plant species that comprise east Tennessee's primary wildlife habitats, and the utility of vegetation data in management. Students will be required to participate in at least one day-long field trip.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Instructional Method* Lecture

Contact Hour Distribution (if more than one instructional method) 2 hour lecture and 1 hour lab.

Notes

Herbert College of Agriculture - SNR - 427

2025-2026 UG Change Course Number / Subject / Department

General Catalog Information

Important Note:

This Change Course Number / Subject / Department form is to be used for changing the course number, subject code, and/or the department where the course is offered. Other regular revisions to course requirements can be included in this form.

College* Herbert College of Agriculture

Department (Acalog Hierarchy)* School of Natural Resources

Subject/Prefix (choose from list)* SNR

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 427

Course Title (max 100 characters)* Honors International Natural Resource Issues

For N/R/S base courses, should this course be:
- ○ Active
- ○ Archived
- ○ N/A

Variable Title?
- ○ Yes
- ○ No

Credit Hours* 3

Course Description Identification and analyses of issues regarding forestry, wildlife, fisheries, and associated natural resources beyond U.S. borders. Biophysical, economic, and cultural elements impacting natural resources at the international level. Cases — Northern Europe, Latin America, Indonesia, and Africa.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Instructional Method* Lecture

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability

Credit Restriction Students may not receive credit for both FWF 427* and FWF 420* or FWF 520 (see graduate catalog for course description).

Registration Enforced (RE) Prerequisite(s)

Department Enforced (DE) Prerequisite(s)

Herbert College of Agriculture - School of Natural Resources - Forest Industry Minor

2025-2026 UG Revise Program

General Catalog Information

College* Herbert College of Agriculture

Department* School of Natural Resources

Program Name* Forest Industry Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description Forest industry offers a number of employment opportunities for graduates from forestry, engineering, and other STEM degree programs. The forest industry minor is designed to prepare students in these disciplines with an introduction to the industry and skill set required to be competitive in this arena.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Minor Requirements

The minor consists of **15-16 credit hours**. Prerequisities will not be waived.

Complete:

FORS 331 Wood Science
FORS 332 Forest Products Industry
BSE 464 Data Analytics in Agricultural and Ecological Systems

Select one course from the following:

FORS 329 Forest Resource Inventory
IE 200 Engineering Statistics
STAT 251 Probability and Statistics for Scientists and Engineers

Select one from the following:

AREC 324 Quantitative Methods
BAS 310 Analytic Models for Decision Optimization
IE 300 Quality Control and Management

Select one from the following:

FORS 420 Forest Resource Management
IE 405 Engineering Economic Analysis

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale* BAS 464 Operation Analytics is being replaced with BSE 464: Data Analytics in Agricultural and Ecological Systems. The incorrect course was added when the minor was originally prepared.

Financial Impact* None

Impact on Other Units* None

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?

2025-2026 UG Revise Program

General Catalog Information

College* Herbert College of Agriculture

Department* School of Natural Resources

Program Name* Forestry Major, BS in Forestry - Forest Resources Management Concentration

Degree Type* Bachelor of Science in Forestry

Program Type* Concentration

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The profession of forestry is the science, the art, and the practice of managing and using for human benefit the natural resources that occur on and in association with forest lands. Benefits are derived from the multiple resources of the forest – wood, water, wildlife, recreation, forage, and environmental amenities. Foresters are managers of these resources. Thus, our principal instructional objective is to provide the broad education needed to deal effectively with the complex of forest resources.

The forest resources management concentration provides an opportunity to obtain an education related to the management of the broad spectrum of wildland resources. In addition to the core of required courses, there are about 6 elective credit hours for broad studies or specialized training in one or more areas of forestry. These areas and examples of related fields of study are forest biology including plant physiology and morphology, ecology, genetics, tree nutrition, forest soils; forest business management including economics, accounting, finance, marketing, management science; forest economics including economics, business administration, social science; forest inventory including mathematics, statistics, computer science; wildland recreation including natural and social sciences; and wildlife management including ecology and botany.

The university has over 21,000 acres of forest land available for teaching, research, and demonstration. The Tennessee Valley Authority, Great Smoky Mountains National Park, and Cherokee National Forest provide additional land and facilities available to the teaching program. Contained within these areas is a wide variety of tree species and forest types ranging from elements of the boreal forest to southern pines and hardwoods.

Lumber, pulp and paper, and other wood-using industries cooperate in conducting tours and demonstrating industrial processes.

To remain in the Forest Resources Management concentration, students must maintain a 2.5 cumulative GPA and earn no less than a C grade in FWF 212. If a student does not meet the aforementioned criteria, the student will be removed from the Forest Resources Management concentration, and the student must meet with their advisor to identify an alternative major.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Wise management of the nation's natural and recreational resources provides significant ecological, economic, and cultural benefits to the American citizenry. Use of these spaces for outdoor recreation can results in life enriching experiences for individuals and communities alike. Balancing use and protection of these valuable resources is challenging and requires the best efforts of dedicated professionals. The Outdoor Recreation and Park Management (ORPM) concentration will provide the highest level of professional training for students seeking employment in the park management field and those interested in tapping into the growing outdoor recreation economy.

The ORPM curriculum prepares students for careers as professionals in a variety of natural resource management agencies, non-profits, and small business operations. Many employment opportunities are in the public sector, including such agencies as the National Park Service, the U.S. Army Corps of Engineers, the U.S. Fish and Wildlife Service, the USDA Forest Service, state park departments, and city and county park and recreation departments. Students may also seek employment with non-profits such as the Nature Conservancy, Wilderness Society, and the Sierra Club. Additionally, the ORPM major will provide student will the necessary skills to be a part of the outdoor recreation economy through entrepreneurial training.

Graduates are employed as park managers, rangers, conservation officers, planners, naturalists, agency and unit directors, program specialists, outfitter owners/managers, small business owners and in other areas of outdoor recreation.

The university has over 21,000 acres of forest land available for teaching, research, and demonstration for ORPM majors. The Tennessee Valley Authority, Great Smoky Mountains National Park, Big South Fork National River and Recreation Area, Tennessee State Parks, Cherokee National Forest, and several areas within Knoxville (e.g. Ijams, Urban Wilderness, Tennessee Riverline) provide additional land, water and facilities available to the teaching program.

To remain in the ORPM concentration, students must maintain a 2.5 cumulative GPA and earn no less than a C grade in FORS 321. If a student does not meet the criteria, the student will be removed from the ORPM concentration, and the student must meet with their advisor to identify an alternative major.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The profession of forestry is the science, the art, and the practice of managing and using for human benefit the natural resources that occur on and in association with forest lands. Benefits are derived from the multiple resources of the forest – wood, water, wildlife, recreation, forage, and environmental amenities. Foresters are managers of these resources. Thus, our principal instructional objective is to provide the broad education needed to deal effectively with the complex of forest resources.

The conservation and restoration concentration is an interdisciplinary program emphasizing forestry, ecology, soil and waters, and wildlife. In addition to the general education courses, the conservation and restoration curriculum includes core courses in the traditional forestry discipline. The curriculum is designed to prepare graduates who can evaluate terrestrial ecosystems and plan for the conservation of healthy ecosystems, the improvement of degraded ones, and the reclamation or restoration of severely disturbed land. Students may choose from a broad range of technical courses, or may choose to focus their program on a particular aspect of restoring or conserving ecosystems such as wildlife habitat, watersheds, ecosystem construction, or ecology and biodiversity.

Students prepare for professional positions in the planning, development, and implementation of projects to maintain, improve, or restore ecosystem function and health on private and public lands. Foresters work closely with the public and private sector, so the development of excellent personnel management and communication skill is encouraged. In addition to the completion of courses, students are required to complete a six to ten week professional internship experience to address specific learning objectives established by the instructor and field supervisor.

To remain in the Forest Resources Management concentration, students must maintain a 2.5 cumulative GPA and earn no less than a C grade in FWF 212. If a student does not meet the aforementioned criteria, the student will be removed from the Forest Resources Management concentration, and the student must meet with their advisor to identify an alternative major.

Herbert College of Agriculture - School of Natural Resources - Forestry Major, BS in Forestry - Wildland Recreation Concentration

2025-2026 UG End Program

General Catalog Information

College* Herbert College of Agriculture

Department* School of Natural Resources

Program Name* Forestry Major, BS in Forestry - Wildland Recreation Concentration

Instructions:

This form is intended to end (drop) the following programs: Major, Minor, Certificate, or Concentration.

Degree Type* Bachelor of Science in Forestry

Program Type* Concentration

Description

The profession of forestry is the science, the art, and the practice of managing and using for human benefit the natural resources that occur on and in association with forest lands. Benefits are derived from the multiple resources of the forest – wood, water, wildlife, recreation, forage, and environmental amenities. Foresters are managers of these resources. Thus, our principal instructional objective is to provide the broad education needed to deal effectively with the complex of forest resources.

The wildland recreation concentration is an interdisciplinary program that prepares students to work in natural resource based recreation settings on private and public lands, including local, state, and national parks, and other state and federal agencies, and private or non-profit organizations providing outdoor recreational opportunities.

Students prepare for professional positions in the planning, development, interpretation, and management of private and public lands for recreational purposes. Students also learn the basic philosophy and principles associated with the use of leisure time and the relationship of natural resources to the constructive use of leisure time.

Elective credits may be used to obtain specializations in complementary areas such as education, cultural and natural history interpretation, forestry, wildlife, fisheries, communication and public relations, agricultural extension education, ornamental horticulture and landscape design, business and public administration; and the natural sciences, including ecology and geology, as well as recreation and leisure studies.

Ten weeks of professional internship experience (6 credits) are required during the final 45 hours of credit in the program. The internship is a highly structured field experience guided by specific learning objectives pre-approved by the instructor and the field supervisor. The student receives one credit per two weeks of full-time field experience. Preparations for the internship should be made well in advance of actual placement. Summer employment or volunteer work in a related field prior to the internship is highly encouraged.

To remain in the Wildland Recreation concentration, students must maintain a 2.5 cumulative GPA and earn no less than a C grade in FWF 212. If a student does not meet the aforementioned criteria, the student will be removed from the Wildland Recreation concentration, and the student must meet with their advisor to identify an alternative major.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Fisheries management is the science and art of maintaining populations of fish at levels consistent with the best interests of wild species and of the public. Management goals may be aesthetic, economic, or ecological. Success depends upon fisheries biologists providing assistance; scholarly application of scientific information and methods to these goals; ecological perspective; and execution of programs to maintain past successes, to prevent repetition of past failures, and to prepare for future needs.

To remain in the Fisheries Science Management concentration, students must maintain a 2.5 cumulative GPA; 2.5 major GPA, starting in Term 4; and earn no less than a B grade in FWF 250* and no less than a C grade in FWF 212. If a student does not meet the aforementioned criteria, the student will be removed from the Wildlfie and Fisheries Science major, and the student must meet with their advisor to identify an alternative major. Courses to be counted towards the major GPA are all 300-level and above courses in WFS, FOR, and FWF.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Herbert College of Agriculture - School of Natural Resources - Wildlife and Fisheries Science Major, BS in Wildlife and Fisheries Science - Wildlife Management Concentration

2025-2026 UG Revise Program

General Catalog Information

College* Herbert College of Agriculture

Department* School of Natural Resources

Program Name* Wildlife and Fisheries Science Major, BS in Wildlife and Fisheries Science - Wildlife Management Concentration

Degree Type* Bachelor of Science in Wildlife and Fisheries Science

Program Type* Concentration

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Wildlife management is the science and art of maintaining populations of wild animals at levels consistent with the best interests of wild species and of the public. Management goals may be aesthetic, economic, or ecological. Success depends upon wildlife biologists providing assistance; scholarly application of scientific information and methods to these goals; ecological perspective; and execution of programs to maintain past successes, to prevent repetition of past failures, and to prepare for future needs.

To remain in the Wildlife Management concentration, students must maintain a 2.5 cumulative GPA; 2.5 major GPA, starting in Term 4; and earn no less than a B grade in FWF 250* and no less than a C grade in FWF 212. If a student does not meet the aforementioned criteria, the student will be removed from the Wildlife and Fisheries Science major, and the student must meet with their advisor to identify an alternative major. Courses to be counted towards the major GPA are all 300-level and above courses in WFS, FOR, and FWF.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Knoxville

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Credit Hours* 3

Course Description

Many crucial issues in ecology involve outbreaks of harmful diseases. Research on the ecology of infectious diseases has increased tremendously in recent years, fueled by challenges to global human health and ecological conservation as well as advances in theory and molecular technologies. This course will be broken into two parts. The first will focus on the functional and taxonomic diversity of parasites, transmission routes of parasites, mathematical models for the population dynamics of disease, the effects of parasitism on individual hosts and populations, and disease dynamics in host communities. Part II of this course will link the conceptual grounding developed in part I to optimal surveillance strategies for pathogens, cutting edge diagnostic tools in infectious disease, the prevention of zoonotic emergence, and a One Health approach to wildlife health.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary WFS 405 (Primary), EEB 402 (Secondary)

Statement about Vol Core:

Rationale* We are proposing to change the title of the course. Last year, when the course was proposed and discussed in curriculum committee, we responded to a concern by adding "Introduction to" to the title. The course is a 400-level course, and the phrase "introduction to" does not appropriately describe the level of course content.

Impact on Other Units* The course title change does not affect other units.

Financial Impact* none

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No ( ) Minor changes only/Not Applicable

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?
- [ ] Arts and Humanities

- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Students must complete one concentration with a 2.5 GPA or higher. Students may choose to take multiple concentrations. For students planning on advanced study a 3.0 GPA or higher is recommended. For students pursuing the 4+1 option with the Masters of Public Administration (MPA) or Masters of Public Policy (MPP) a 3.4 GPA or higher is required. Other courses to complete a concentration may be accepted upon approval by the Director of Undergraduate Studies.

Some courses may have additional prerequisites. Students are encouraged to meet with advising staff to ensure they have all the required coursework to successfully complete the identified concentration. Where available, students in University Honors should enroll in the honors version of the concentration course.

Concentrations are available:

- Agricultural Policy Concentration
- Economic and Community Development Concentration
- Energy Policy Concentration
- Environmental Policy Concentration
- Government Relations Concentration
- Health Policy Concentration
- Law and Policy Concentration
- National Security Concentration
- Nuclear Policy Concentration
- Policy Analytics Concentration
- Political Communication Concentration
- Public Management Concentration

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*

This proposal is necessary to update the "shared core" list of concentrations to include the newly proposed agricultural policy concentration and the nuclear policy concentration.

We also alphabetized the list.

Financial Impact*

The new concentration proposals contain answers to the financial impact. This proposal is to update the shared core contingent on the approval of the new concentration proposals.

Agricultural Policy Concentration proposal: https://utk.curriculog.com/proposal:6336/form

Nuclear Policy Concentration: https://utk.curriculog.com/proposal:6337/form

Impact on Other Units*

The new concentration proposals contain answers to the financial impact. This proposal is to update the shared core contingent on the approval of the new concentration proposals.

Knoxville

Undergraduate Certificate Type

Add-On

Stand-Alone

Admission Standards/Procedures

Students seeking admission to the Undergraduate Certificate must meet the admissions standards established by the Undergraduate Council.

Academic Standards

Students must complete all courses from this list with a 2.5 GPA or higher for the National Security Certificate.

Prerequisites

Students who are currently degree-seeking undergraduates must have a minimum of 2.5 GPA to enter the certificate program. Students who have earned their bachelor degree or who are currently enrolled at another accredited four-year institution are recommended to have completed at least an introductory course in American Government with a C grade or better.

Required Courses

HBS 452 U.S. National Security
[After]
[Before]Select three of the following courses:
HBS 454 Nuclear Security
HBS 456 Introduction to Nuclear Policy and Deterrence
HBS 459 Hybrid Warfare
IAC 413 The Military in American Democracy
IAC 313 War and Peace

Non-Course Requirements

Students may pursue this Undergraduate Certificate on a full-time or part-time basis. They must earn all hours of this program at the University of Tennessee.

* Meets Volunteer Core Requirement.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*
We are adding a course, IAC 313 War and Peace as an option. The class is new and was not available when the initial proposal was submitted.

Financial Impact*
none. The additional course is offered by the IAC, which is affiliated with the Baker School. IAC faculty approved its inclusion as part of the college-level approval process.

Impact on Other Units*
none.

Have you consulted with all programs/departments that will be impacted by this change?*
- (•) Yes
- ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA.

uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Chosen from the Volunteer Core* list.
Students should select courses based on concentration. Some courses may be included in multiple concentrations. Some courses may have prerequisites or be prerequisites for other courses in the concentration. Students are encouraged to meet with advising staff to ensure they have all the required coursework to successfully complete the identified concentration. Any course may be substituted by permission from the Director of Undergraduate Studies.
Students should ensure all Volunteer Core Requirements have been met before taking unrestricted electives.

* Meets Volunteer Core Requirements.

Concentrations

Students must complete one of the following concentrations with a 2.5 GPA or higher. For students planning on advanced study a 3.0 GPA or higher is recommended. For students pursuing the 4+1 option with the Masters of Public Administration (MPA) or Masters of Public Policy (MPP) a 3.4 GPA or higher is required. *Other courses to complete a concentration may be accepted upon approval by the Director of Undergraduate Studies.*

Some courses may have additional prerequisites. Students are encouraged to meet with advising staff to ensure they have all the required coursework to successfully complete the identified concentration. Students may choose to take multiple concentrations. Where available, students in University Honors should enroll in the honors version of the concentration course.

Policy Analytics Concentration

For the Policy Analytics concentration, students must complete 12 credit hours listed below with a 2.5 GPA or higher. Students are also recommended to take an additional math course beyond the 6 credit Vol Core otherwise listed in the uTrack Requirements.

ECON 311 Intermediate Microeconomics
[Right] ***(prerequisite to ECON 381)***
ECON 381 Introduction to Econometrics

GEOG 206 Sustainability Principles and Practices
[Right] *
EEPS 206 Sustainability Principles and Practices
[Right] *

Energy Policy Concentration

For the Energy Policy concentration, students must complete 12 credit hours listed below with a 2.5 GPA or higher.

ECON 362 Environmental and Natural Resource Policy
GEOG 346 Energy, Governance, and Sustainability
HBS 424 Energy Markets and Economics
HBS 443 Energy Transitions

National Security Concentration

For the National Security concentration, students must complete 12 credit hours listed below with a 2.5 GPA or higher.

POLS 366 United States Foreign Policy Process
PHIL 441 Global Justice and Human Rights
[Right] *
IAC 413 The Military in American Democracy
HBS 452 U.S. National Security

Economic and Community Development Concentration

For the Economic & Community Development concentration, students must complete 12 credit hours listed below with a 2.5 GPA or higher.

ECON 311 Intermediate Microeconomics
[Right] *(prerequisite for ECON 471, ECON 472)*
ECON 471 Public Finance: Expenditure Analysis
ECON 472 Public Finance: Taxation and Fiscal Federalism
HBS 461 Tools for Economic Development

Health Policy Concentration

For the Health Policy concentration, students must complete 12 credit hours listed below with a 2.5 GPA. Students are also recommended to take an additional 3 credit hours (PUBH 201*), which is Vol Core, Engaged Inquiry course related to this concentration.

ECON 311 Intermediate Microeconomics
[Before]*(prerequisite for ECON 436)*
ECON 436 Economics of Health and Health Care
PUBH 400 Comparative Healthcare Systems
PUBH 420 Environmental Public Health
[Before]Recommended unrestricted elective:
PUBH 201 Introduction to Public Health
[Right] *

Nuclear Policy Concentration

For the Nuclear Policy concentration, students must complete 12 credit hours listed below with a 2.5 GPA.

HBS 452 U.S. National Security
HBS 454 Nuclear Security in an Age of Emerging Technologies
HBS 455 Nuclear Weapons
HBS 456 Introduction to Nuclear Policy and Deterrence

Agricultural Policy

For the Agricultural Policy concentration, students must complete 12 credit hours listed below with a 2.5 GPA. Students are also recommended to take an additional 3 credits (AREC 212) related to this concentration.

AREC 313 Agricultural Law
AREC 331 Agricultural Commodity Policy
AREC 332 Food Policy
[Right] *

AREC 350 The Food and Agricultural Marketing System
[Right] *

[Before]Recommended Unrestricted Elective

AREC 212 Introduction to Agribusiness Management

Public Affairs Major – Five-Year Bachelor/Master Program

The Baker School offers a five-year bachelor and master program for qualified students. Students may apply for admission to the Master of Public Administration (MPA) or Master of Public Policy (MPP) degrees as part of the accelerated program. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their master's degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the bachelor's degree. Significant components of the program are:

- Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 90 hours of required coursework with a minimum overall GPA of 3.4 in required coursework.
- Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. Students must submit the form titled "Baker School Admission for MPA/MPP Accelerated Program" form and have it approved by their undergraduate advisor, the Baker School's Director of Graduate Studies, and the Graduate School.
- All courses taken for graduate credit must be approved by the Baker School's Director of Graduate Studies. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit.
- Students admitted to the program must also follow the normal procedure for admission to the Graduate School.
- Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program? * ○ Yes

◉ No

Rationale* This revise program proposal makes several small changes to the uTrack page based on our experience with DARS and the first year administering the program.

- Add Math 125 as option in UTrack Term 1
- Delete FYS in uTrack Term 1 footnote 2
- Delete PHIL 252 as the "required" AH VolCore from Term 4

It also aligns the major to include the references to the newly proposed and revised concentrations:

- Add concentration: Nuclear Policy
- Add concentration: Agricultural Policy
- Revise concentration: Environmental Policy
- Revise concentration: Energy Policy

Financial Impact* The department of Agricultural and Resource Economics has been a partner in creating the Agricultural Policy concentration and revising the Environmental Policy and Energy Policy concentrations. An email thread indicating the collaboration is attached.

Impact on Other Units* The department of Agricultural and Resource Economics has been a partner in creating the Agricultural Policy concentration and revising the Environmental Policy and Energy Policy concentrations. An email thread indicating the collaboration is attached.

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The Bachelors of Science in Public Affairs (BSPAF) is a degree program designed to prepare students to be part of the solution through professional careers or advanced study in public administration, public policy, data analytics, or political communication. The program aspires to produce graduates who are literate in the field of public affairs and possess the foundational skills to pursue careers as effective public servants and creative problem solvers. Beyond prerequisites, the major consists of 45 hours, which includes 30 hours of core courses, 12 hours in a concentration, and a minimum of 3 hours in professional development.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Admissions Standards and Procedures

Applicants for admission to the program must complete the required prerequisites and pre-major core courses with a 2.5 GPA or higher.

Prerequisites (18 credit hours)

Students must complete all courses from this list with a 2.5 GPA or higher for admission to the major. For students planning on graduate study, a 3.0 GPA or higher is recommended. For students pursuing the 4+1 option with the Masters of Public Administration (MPA) or Masters of Public Policy (MPP) a 3.4 GPA or higher is required. Where available, students in University Honors should enroll in the honors version of the prerequisite course.

Footnotes

Chosen from the Volunteer Core list.

Students in the Howard Baker School (HBS) Living Learning Community (LLC) must enroll in the Baker School FYS 101 section.

Students should select courses based on concentration. Some courses may be included in multiple concentrations. Some courses may have prerequisites or be prerequisites for other courses in the concentration. Students are encouraged to meet with advising staff to ensure they have all the required coursework to successfully complete the identified concentration. Any course may be substituted by permission from the Director of Undergraduate Studies.

Students should ensure all Volunteer Core Requirements have been met before taking unrestricted electives.

*** Meets Volunteer Core Requirement.**

Concentrations available under Public Affairs Major, BS in Public Affairs

Students must complete one concentration with a 2.5 GPA or higher. Students may choose to take multiple concentrations. For students planning on advanced study a 3.0 GPA or higher is recommended. For students pursuing the 4+1 option with the Masters of Public Administration (MPA) or Masters of Public Policy (MPP) a 3.4 GPA or higher is required. Other courses to complete a concentration may be accepted upon approval by the Director of Undergraduate Studies.

Some courses may have additional prerequisites. Students are encouraged to meet with advising staff to ensure they have all the required coursework to successfully complete the identified concentration. Where available, students in University Honors should enroll in the honors version of the concentration course.

Concentrations are available:

Policy Analytics Concentration

Public Management Concentration

Political Communication Concentration

Government Relations Concentration

Law and Policy Concentration

Environmental Policy Concentration

Energy Policy Concentration

National Security Concentration

Economic & Community Development Concentration

Health Policy Concentration

Public Affairs Major – Five-Year Bachelor/Master Program

The Baker School offers a five-year bachelor and master program for qualified students. Students may apply for admission to the Master of Public Administration (MPA) or Master of Public Policy (MPP) degrees as part of the accelerated program. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their master's degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the bachelor's degree. Significant components of the program are:

Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 90 hours of required coursework with a minimum overall GPA of 3.4 in required coursework.

Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. Students must submit the form titled "Baker School Admission for MPA/MPP Accelerated Program" form and have it approved by their undergraduate advisor, the Baker School's Director of Graduate Studies, and the Graduate School.

All courses taken for graduate credit must be approved by the Baker School's Director of Graduate Studies. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit.

Students admitted to the program must also follow the normal procedure for admission to the Graduate School.

Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Rationale* We are proposing to add a concentration in agricultural policy. We consulted with the AREC department to create the concentration.

Financial Impact* The department of Agricultural and Resource Economics has been a partner in creating the Agricultural Policy concentration and revising the Energy Policy concentrations. An email thread indicating the collaboration is attached.

Impact on Other Units* The department of Agricultural and Resource Economics has been a partner in creating the Agricultural Policy concentration and revising the Energy Policy concentrations. An email thread indicating the collaboration is attached.

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Footnotes

Chosen from the Volunteer Core list.

Students in the Howard Baker School (HBS) Living Learning Community (LLC) must enroll in the Baker School FYS 101 section.

Students should select courses based on concentration. Some courses may be included in multiple concentrations. Some courses may have prerequisites or be prerequisites for other courses in the concentration. Students are encouraged to meet with advising staff to ensure they have all the required coursework to successfully complete the identified concentration. Any course may be substituted by permission from the Director of Undergraduate Studies.

Students should ensure all Volunteer Core Requirements have been met before taking unrestricted electives.

* Meets Volunteer Core Requirement.

Concentrations available under Public Affairs Major, BS in Public Affairs

Students must complete one concentration with a 2.5 GPA or higher. Students may choose to take multiple concentrations. For students planning on advanced study a 3.0 GPA or higher is recommended. For students pursuing the 4+1 option with the Masters of Public Administration (MPA) or Masters of Public Policy (MPP) a 3.4 GPA or higher is required. Other courses to complete a concentration may be accepted upon approval by the Director of Undergraduate Studies.

Some courses may have additional prerequisites. Students are encouraged to meet with advising staff to ensure they have all the required coursework to successfully complete the identified concentration. Where available, students in University Honors should enroll in the honors version of the concentration course.

Concentrations are available:

Policy Analytics Concentration

Public Management Concentration

Political Communication Concentration

Government Relations Concentration

Law and Policy Concentration

Environmental Policy Concentration

Energy Policy Concentration

National Security Concentration

Economic & Community Development Concentration

Health Policy Concentration

Public Affairs Major – Five-Year Bachelor/Master Program

The Baker School offers a five-year bachelor and master program for qualified students. Students may apply for admission to the Master of Public Administration (MPA) or Master of Public Policy (MPP) degrees as part of the accelerated program. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their master's degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the bachelor's degree. Significant components of the program are:

Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 90 hours of required coursework with a minimum overall GPA of 3.4 in required coursework.

Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. Students must submit the form titled "Baker School Admission for MPA/MPP Accelerated Program" form and have it approved by their undergraduate advisor, the Baker School's Director of Graduate Studies, and the Graduate School.

All courses taken for graduate credit must be approved by the Baker School's Director of Graduate Studies. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit.

Students admitted to the program must also follow the normal procedure for admission to the Graduate School.

Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* After meeting with the department of Agricultural and Resource Economics, we opted to include AREC 345 as a required class in the concentration and move our two courses HBS 424 and HBS 443 to be options for the concentration requirement.

Financial Impact* AREC department was consulted to ensure the ability to accomodate students from our major.

Impact on Other Units* AREC department indicated ability to offer the course AREC 345 to support the energy policy concentration.

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Public Affairs Major – Five-Year Bachelor/Master Program

The Baker School offers a five-year bachelor and master program for qualified students. Students may apply for admission to the Master of Public Administration (MPA) or Master of Public Policy (MPP) degrees as part of the accelerated program. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their master's degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the bachelor's degree. Significant components of the program are:

Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 90 hours of required coursework with a minimum overall GPA of 3.4 in required coursework.

Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. Students must submit the form titled "Baker School Admission for MPA/MPP Accelerated Program" form and have it approved by their undergraduate advisor, the Baker School's Director of Graduate Studies, and the Graduate School.

All courses taken for graduate credit must be approved by the Baker School's Director of Graduate Studies. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit.

Students admitted to the program must also follow the normal procedure for admission to the Graduate School.

Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* We are seeking to revise the list of courses required of this concentration to add greater focus on national security. We have replaced a course from philosophy with a course we will offer, HBS 459 Hybrid Warfare. We also added an option due to the irregular offering of IAC 413. Students can now take either IAC 313 War and Peace or IAC 413 The Military in American Democracy.

Financial Impact* One course in philosophy PHIL 441 Global Justice and Human Rights was removed from the requirements of the concentration. No students have yet taken that course as part of this program, so the historical enrollment data for the course will be unaffected.

Impact on Other Units* One class from the department of Philosophy was removed as a requirement from this concentration.

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Term 1

[1] Natural Sciences Elective 3-4 *Credit Hours* * (at least one NS elective must have a lab)

[Left] 1

Footnotes

Chosen from the Volunteer Core list.
Students should select courses based on concentration. Some courses may be included in multiple concentrations. Some courses may have prerequisites or be prerequisites for other courses in the concentration. Students are encouraged to meet with advising staff to ensure they have all the required coursework to successfully complete the identified concentration. Any course may be substituted by permission from the Director of Undergraduate Studies.
Students should ensure all Volunteer Core Requirements have been met before taking unrestricted electives.

* Meets Volunteer Core Requirement.

Concentrations available under Public Affairs Major, BS in Public Affairs

Students must complete one concentration with a 2.5 GPA or higher. Students may choose to take multiple concentrations. For students planning on advanced study a 3.0 GPA or higher is recommended. For students pursuing the 4+1 option with the Masters of Public Administration (MPA) or Masters of Public Policy (MPP) a 3.4 GPA or higher is required. Other courses to complete a concentration may be accepted upon approval by the Director of Undergraduate Studies.

Some courses may have additional prerequisites. Students are encouraged to meet with advising staff to ensure they have all the required coursework to successfully complete the identified concentration. Where available, students in University Honors should enroll in the honors version of the concentration course.

Concentrations are available:

Policy Analytics Concentration

Public Management Concentration

Political Communication Concentration

Government Relations Concentration

Law and Policy Concentration

Environmental Policy Concentration

Energy Policy Concentration

National Security Concentration

Economic & Community Development Concentration

Health Policy Concentration

Public Affairs Major – Five-Year Bachelor/Master Program

The Baker School offers a five-year bachelor and master program for qualified students. Students may apply for admission to the Master of Public Administration (MPA) or Master of Public Policy (MPP) degrees as part of the accelerated program. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their master's degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the bachelor's degree. Significant components of the program are:

Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 90 hours of required coursework with a minimum overall GPA of 3.4 in required coursework.

Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. Students must submit the form titled "Baker School Admission for MPA/MPP Accelerated Program" form and have it approved by their undergraduate advisor, the Baker School's Director of Graduate Studies, and the Graduate School.

All courses taken for graduate credit must be approved by the Baker School's Director of Graduate Studies. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit.

Students admitted to the program must also follow the normal procedure for admission to the Graduate School.

Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Rationale*

The concentration is designed and hosted by the Center for National Security & Foreign Affairs (NSFA), a research center at the Baker School of Public Policy & Public Affairs that specializes in national security and nuclear policy. The center has expert faculty who teach courses in these two topics. The Baker School has a partnership with Oak Ridge National Laboratory (ORNL), which will provide guest lecturers and adjunct faculty to teach lectures, modules, or whole courses in the program.

There were two primary reasons for creating the certificate program. First, based on the strengths of NSFA as a research center – national security and nuclear policy – we determined that teaching courses based on our expertise, aligned with the research center priorities would make sense at the undergraduate and graduate levels. We also determined that there is a workforce development need, especially in our particular region and in the state of Tennessee due to the close proximity of ORNL, Y-12 Consolidate Nuclear Services, and almost 200 nuclear related private companies based in the state of Tennessee. As part of our partnership with ORNL, they are hoping that the University of Tennessee can provide training for undergraduate students in the field of nuclear policy for their workforce needs and needs of other national labs across the country, as well as other nuclear related entities in the state and federal government and private sector. There is a national need for young adults well trained in nuclear policy and national security due to mass retirements in the federal government.

Financial Impact*

None, all courses in the concentration are Baker School courses.

Impact on Other Units*

None, all courses in the concentration are Baker School courses.

Have you consulted with all programs/departments that will be impacted by this change?*

Click here to add Academic Policy ( ) Yes
(•) No

Information* The College of Arts and Sciences would like to request to reactivate course EEB 485 as well as request to make an exception for the February 1 deadline for submission for the Fall 2025 semester.

Rationale The EEB department reached out on Wednesday, February 5 to the CAS Curriculum Coordinator to inquire about course EEB 485 being inactive for the Fall 2025 semester. Upon inquiry, EEB 485 was noted to be on the "Not taught in 4 years list" from the Fall 2024 semester, and was listed by the faculty as "Archived" rather than "Dropped."

The EEB Department indicated on 2/5 that they would like to request the course be reactivated since they just learned that the faculty who teaches EEB 485 had been on research leave and on a Fullbright and had plans to return for the Fall 2025.

The Department and College realizes that the deadline was February 1 for this request, but is asking for a one-time exception since the time table requests are not due until 2/7/25, so they just realized this course was mistakenly archived, and there is a UG Curriculum Committee meeting on 2/18.

Rationale* MUBS 303 underscores the popular career role of a Music Supervisor in both entertainment (Film, TV, Games) and corporate use (Music Programming). The role of a Music Supervisor merges the creative and administrative while curating and clearing music rights for its use when synchronized to AV. Offering this course accentuates our ability to be relevant to the evolution of roles throughout the industry while meeting expectations of students immersed in researching realistic career paths.

Credit Hours* 3

Course Description Overview of the field of Music Therapy, as an allied health profession, and in the context of the history of the profession. Examines various diagnoses within populations served by music therapists and details how music therapy is utilized within each population. Addresses current research in music therapy as a means to objectively support the field of music therapy and its evidence-based practices.

Equivalency

Rationale* Change variable credit designation from 1-3 variable to 3. Workload is not adjusted for any students, and some students are mistakenly signing up for the default 1-credit setting (in 1-3 variable). This was likely set up 1-3 with scholarship impacts in mind that no longer apply.

Course Description Study of music festivals, and regional, national and global celebrations showcasing live or recorded musical performances. Consideration of how these events offer spaces for people of different ethnic, racial, and cultural backgrounds to engage in productive intercultural exchanges. Investigation of how festivals give force to the commodification, marketing, and dissemination of musical events and phenomena as profitable objects. Includes engagement with locally organized music festivals in Knoxville or East Tennessee, such as Big Ears, Dogwood Arts, Hola, Knox Asian, or Bonnaroo, and research projects employing ethnographic methods.

Equivalency N/A

Rationale* The ubiquity of music festivals in the first two decades of the twenty-first century is a testament to their significance. These vibrant musical events not only bring people from near and far together but also reflect and shape the distinct character of their hosting communities. In addition, they directly contribute to the cultural, economic, and political growth of a community while advancing the hosting community's global profile. As such, they have increasingly become the subject of scholarly probe in various academic disciplines. The exponential increase in the number of publications on festivals in recent years shows that festival studies is an emerging interdisciplinary academic field. Knoxville and other towns and cities in East Tennessee have been host to a wide range of live musical events and festivities since the early 2000s. Further, new faculty in the College of Music have expertise and interests in this subject. An academic course on music festivals can bring students closer to cultural activities of the broader community of Knoxville and Tennessee. This class can attract undergraduate and graduate students from a wide range of disciplines, including musicology, music business, music journalism and media, anthropology, hospitality and tourism management, political science, and global studies. Current discussions include plans to include this course in several of these curricula.

Rationale* The title change and description change reflect the fact that this ensemble has expanded to involve multiple bands of varying sizes and emphasizes different music styles (rather than a single band). We are expressing greater breadth and possibility for participation.

The previous title “Appalachian String Band Ensemble” is also a bit long, and contains a possible redundancy (band and ensemble). The proposed shorter title removes this redundancy; it also is more convenient and catchier for branding.

Recommended Background

Comments Students with no keyboard experience should take MUKB 100 before taking this course.

Registration Restriction(s) BA Music Business Administration, BA Music Advertising and Public Relations, and BA Journalism and Media

Registration Permission

Equivalency

Rationale* Needed to pair correctly with Music Business theory sequence. In semester 2 they take MUTH 115 (Harmony and Analysis Through Popular Music), in semester 3 they take MUKB 115. These students do not take Music Theory 1, which is a co-req with Class Piano 1.

In MUKB 115 - focus on teaching pop chords and improvised melodies. Does not cover traditional/classical rules of voice-leading, harmonization with two hand accompaniment, performing solo pieces, harmonizing with roman numeral numbers as in Class Piano 1/Theory 1.

For sightreading: Business class will focus on lead sheet sightreading, Class Piano 1 teaches hymn style reading, two-to-four voices based on the chord progeression they have learned, and use alberti bass that they have learned in the class.

Included in 3 new Music Business Showcases - BA: Music Business Administration Concentration, BA: Music Advertising and Public Relations Concentration, BA: Music Journalism & Media Concentration

Rationale* Outside of studio lessons, we have no formal course to teach students scientifically based practice strategies. This course will fill that gap in our degree program and provide an advantage to our students with regard to efficient practice habits. This course will support applied lessons, freeing up time for applied faculty to focus on technique and repertoire.

Rationale* This is a new course in the College of Music catalog. Geared toward anyone—music or non-music majors—interested in Taylor Swift's music, the course provides an overview of the musical components required to analyze and discuss music in public-facing discourse, such as a podcast or YouTube video, creating viability for another Applied Oral Communication VolCore course within our catalog. As an online, asynchronous course, it also provides another academic music offering within the growing catalog of online classes, an instructional avenue the University is currently seeking to expand and develop.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

1. **Performance Elective: Select from any MUEN credits, any MUPF credits, MUSC 101, MUSC 111, MUSC 112, MUSC 113, and MUVC 110. Students taking MUPF must be accepted into a studio through an audition. MUPF and MUSC 101 courses are not guaranteed in every applied area.**
   Important note: students can also use Performance Elective credits to fulfill many Volunteer Core requirements. Please meet with your advisor to help select Volunteer Core courses as needed.
2. **Academic Music Electives: Any additional MUCO course, MUTC 320, MUTC 325, MUTC 330, MUTC 340, MUTC 390*, MUTC 450, MUTC 493 any MUTC course; MUJZ 110, MUJZ 411, any additional MUTH course, MUTH 451, MUTH 493, MUBS 301, MUBS 302, MUBS 305, MUBS 405.**
   Important note: students can also use Academic Music Elective credits to fulfill many Volunteer Core requirements. Please meet with your advisor to help select Volunteer Core courses as needed.
   See Natalie L. Haslam College of Music Discovery Module Requirement.

*** Meets Volunteer Core Requirement.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ○ Yes
- ◉ No

Rationale*
To align this concentration with more Music business centric courses relating to Music Advertising/PR in the professional field (Music publishing/Music Supervision/Live Music Industry/Non-Profit Music). Changes add new courses to the curriculum with the hire of a music business specific faculty member.

Financial Impact*
N/A

Impact on Other Units*
N/A

Have you consulted with all programs/departments that will be impacted by this change?*
- ◉ Yes
- ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Footnotes

1. Performance Electives: Select from any MUEN credits, any MUPF credits, MUSC 101, MUSC 111, MUSC 112, MUSC 113, and MUVC 110. Students taking MUPF must be accepted into a studio through an audition. MUPF and MUSC 101 courses are not guaranteed in every applied area. MUJZ 130, MUJZ 140, MUTH 110, 120, 210, 220 or any 300- or 400- level.
   Important note: students can also use Performance Elective credits to fulfill many Volunteer Core requirements. Please meet with your advisor to help select Volunteer Core courses as needed.
   Academic Music Electives: Any additional MUCO course, any MUTC course, MUJZ 110 or MUJZ 411, any additional MUTH course, additional MUBS course chosen from MUBS 302, MUBS 303, MUBS 304, MUBS 305, or MUBS 405.
   Important note: students can also use Academic Music Elective credits to fulfill many Volunteer Core requirements. Please meet with your advisor to help select

Volunteer Core courses as needed.
See Natalie L. Haslam College of Music Discovery Module requirement.
* Meets Volunteer Core Requirement.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*
The revision offers a more balanced curr experience with the addition of music business courses relating to media/journalism (music publishing, music supervision/electives) and a robust selection of academic electives poiting to studies in media, cinema, graphic designing, theater and business management. Changes add new courses to the curriculum with the hire of a music business specific faculty member.

Financial Impact*
N/A

Impact on Other Units*
N/A

Have you consulted with all programs/departments that will be impacted by this change?*
(•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Footnotes

Completion of appropriate sequence through one of: ARAB 222; ASL 212; ASST 262; CHIN 232; FREN 212, FREN 218 (honors), FREN 223 (intensive); GERM 212, GERM 223 (intensive); CLAS 264 (Greek), CLAS 252 (Latin); HEBR 242; ITAL 212; JAPA 252; PORT 212; REST 222 (Biblical Hebrew); RUSS 202; SPAN 212, SPAN 218 (honors), SPAN 223 (intensive).

Students with previous language experience may demonstrate competence via a departmental placement or proficiency examination, or by AP or CLEP credit.

Students whose native language is not English may satisfy the requirement with ENGL 131 AND ENGL 132, plus any two of the following courses: AFST 225*, AFST 226*, AFST 233*; CLAS 253*; ENGL 201*, ENGL 202*, ENGL 206*, ENGL 207*, ENGL 208*, ENGL 209*, ENGL 221*, ENGL 222*, ENGL 225*, ENGL 226*, ENGL 231*, ENGL 232*, ENGL 233*, ENGL 237*, ENGL 238*, ENGL 247*, ENGL 248*, ENGL 251*, ENGL 252*, ENGL 253*, ENGL 254*, ENGL 258*; ITAL 401*; JAPA 313, JAPA 314; JST 312*; LAC 315; MRST 261, MRST 262, MRST 401; PORT 315; REST 312*; RUSS 221*, RUSS 222*; WLC 300*.
Select from AFST 201*, AFST 202*, AFST 225*, AFST 226*, AFST 235*, AFST 236*, AFST 335*, AFST 336*; CLAS 384*; ENGL 225*, ENGL 226*, ENGL 335*, ENGL 336*; GEOG 320*, GEOG 372*, GEOG 374*, GEOG 375*, GEOG 445*; GLBS 250*; HILA 255*, HILA 256*; HIME 366*, HIME 369*; LAC 430*, LAC 456*; PUBH 201*; REST 101*, REST 222*, REST 232*, REST 280*, REST 320*; SOCI 260*, SOCI 344*, SOCI 345*, SOCI 350*, SOCI 353*, SOCI 360*, SOCI 453*, SOCI 456*, SOCI 465*; SOWK 200*, SOWK 250*.
Select from MUEN 303 (Small Jazz), MUEN 304 (Jazz), MUEN 311 (African Diasporic Percussion), MUEN 312 (Balinese Gamelan); MUEN 316 (Electro Acoustic), MUEN 322 (Gospel Choir); MUEN 323 (UT Appalachian Strings); MUEN 326 (R&B)
Select from MUEN 303, MUEN 310, MUEN 311, MUEN 312*, MUEN 315, MUEN 316, MUEN 320, MUEN 322, MUEN 323, MUEN 326, MUEN 330*, MUEN 340*, MUEN 350*, MUEN 352*, MUEN 353*, MUEN 370*, MUEN 380*, MUEN 383*, MUEN 389*
Students may satisfy the Connections requirement in one of four ways:

- Completion of nine credit hours of study abroad coursework or six credit hours of study abroad coursework and completing one additional upper level course from the approved Global Citizenship-International (GCI) list. These hours may, if appropriate, be applied to non-Connections degree requirements.
- Completion of a minor, a second concentration, or a second major. The minor or second major may be in the College of Music or in another college.
- Completion of nine credit hours drawn from a Connections Package. The nine credit hours must be drawn from at least two different departments. Three of the nine credit hours may be applied toward a student's major requirements. Connections Packages are topically oriented collections of upper-division courses that have been designed by faculty to focus students' attention on questions that have substantial multidisciplinary character.
- Completion of all Air Force or Army ROTC program requirements.

* Meets Volunteer Core Requirement.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* CPOS Revision - add CAS-style Connections package, particularly to provide opportunities for minors and double majors.

Financial Impact* N/A

Impact on Other Units* N/A

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Requirements

There is no audition requirement for this minor. The Artificial Intelligence and Music Technology Minor consists of 15 credit hours.

Minor:

[Before]Required:
AI 101 Introduction to the World of AI
[After]
[Before]Select one course:
AI 102 Natural Language-based Programming Techniques
AI 201 AI, Ethics, and Legal Frameworks
AI 202 Human-AI Interaction and Experience Design
AI 301 Natural Language Processing and Conversational AI
AI 401 Exploring the World of AI
[After]
[Before]Required:
CECS 399 Interdisciplinary Capstone Course 1
[After]
[Before]Select two courses:
MUTC 320 Film Scoring
MUTC 325 Commercial Scoring for Media
MUTC 330 Virtual Audio Modeling
MUTC 335 Interactive Game Audio
MUTC 340 Introduction to Computer Music Transcription
MUTC 390 Sound Synthesis Techniques
MUTC 450 Computer Projects
MUTC 451 Special Topics in Music Technology

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale* Prefix Change. CECS dropped AI399 and is replacing it with CECS399. The only reason for the change is to consolidate the existing CECS capstone courses under one prefix. No changes are being made to the content or delivery methods of the course.

Financial Impact* N/A

Impact on Other Units* N/A

Have you consulted with all programs/departments that will be impacted by this change?*
- (•) Yes
- ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Description

Discovery Modules

Some programs in the College of Music include a Discovery Module requirement. This offers a compact approach to discovering new passions, interests, or literacies through connected curricular themes. Students in programs with this requirement may satisfy it in one of four ways:

1. Complete a six-credit Discovery Module
2. Completion of six credit hours of study abroad coursework + one GCI course. The GCI course is in addition to their Vol Core requirement.
3. Completion of a minor, a second concentration, certificate program, or a second major. The minor or second major may be in the College of Music or in another college.
4. Completion of all Air Force or Army ROTC program requirements.

Discovery Module courses may not overlap with other program of study requirements.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

New Subject Code: Applied Computing (AC)

New Prefix/Subject Code (Undergraduate)

General Catalog Information

College* College of Emerging and Collaborative Studies

Department* College of Emerging and Collaborative Studies

Title of Proposal* New Subject Code: Applied Computing (AC)

Instructions for Subject Changes

Changing a subject code requires full approval. ***New subject codes will be temporarily available in Curriculog before full approval, and will only be permanently available after full approval.***

A new subject code must be verified for use before it can be used for new courses. This is done by completing the New Prefix/Subject Code form. The Curriculum and Catalog Management team (CCM) will research the availability of subject codes, suggest alternatives if necessary, and create a new subject code in the system for use on course forms.
Fill out Drop Course forms for courses that will no longer be active under either subject code.
Fill out Add Course forms for new courses to be active under the new subject code.
Include equivalent courses in this form's equivalency table *and* in each applicable "Change Course Number/Subject/Department" form.
If the course that is being dropped carries a Vol Core designation, the department must submit a proposal to the Vol Core Committee asking that the equivalent course carry the same designation. *Approval is not automatic.*
If the old course had attached fees, then the fees for the new course will need to be approved by the Office of Budget and Finance. Please contact the CCM or the Bursar's Office with any questions about these fees. *Approval of fees is not automatic.*
If cross-listed courses are included, all departments affected by the change must be informed so they may update their own courses. New course numbers for secondary cross-listed courses are NOT needed, however, both primary and secondary courses should be updated appropriately.

New Prefix/Subject Code* AC

Full name of New Prefix/Subject Code* Applied Computing

Equivalency Table* N/A

Rationale We are launching new undergraduate programs in Applied Computing.

Impact on other Units None.

New Subject Code: Applied Engineering and Technology (AET)

New Prefix/Subject Code (Undergraduate)

General Catalog Information

College* Tickle College of Engineering

Department* Applied Engineering and Technology

Title of Proposal* New Subject Code: Applied Engineering and Technology (AET)

Instructions for Subject Changes

Changing a subject code requires full approval. *New subject codes will be temporarily available in Curriculog before full approval, and will only be permanently available after full approval.*

A new subject code must be verified for use before it can be used for new courses. This is done by completing the New Prefix/Subject Code form. The Curriculum and Catalog Management team (CCM) will research the availability of subject codes, suggest alternatives if necessary, and create a new subject code in the system for use on course forms.
Fill out Drop Course forms for courses that will no longer be active under either subject code.
Fill out Add Course forms for new courses to be active under the new subject code.
Include equivalent courses in this form's equivalency table *and* in each applicable "Change Course Number/Subject/Department" form.
If the course that is being dropped carries a Vol Core designation, the department must submit a proposal to the Vol Core Committee asking that the equivalent course carry the same designation. *Approval is not automatic.*
If the old course had attached fees, then the fees for the new course will need to be approved by the Office of Budget and Finance. Please contact the CCM or the Bursar's Office with any questions about these fees. *Approval of fees is not automatic.*
If cross-listed courses are included, all departments affected by the change must be informed so they may update their own courses. New course numbers for secondary cross-listed courses are NOT needed, however, both primary and secondary courses should be updated appropriately.

New Prefix/Subject Code* AET

Full name of New Prefix/Subject Code* Applied Engineering and Technology

Equivalency Table* None required

Rationale New department. Need new prefix so I can enter courses for FY25 review to get into AY25-26 catalog.

Impact on other Units None

Arts and Sciences Originators Only

If cross-listed courses are included, all departments affected by the change must be informed so they may update their own courses. New course numbers for secondary cross-listed courses are NOT needed, however, both primary and secondary courses should be updated appropriately.

New Prefix/Subject Code* BAES

Full name of New Prefix/Subject Code* Bioinformatics: Agriculture and Environmental Sciences

Equivalency Table* not applicable

Rationale This is a new subject code for a new undergraduate program in Bioinformatics: Agriculture and Environmental Sciences. The CIP Code for Bioinformatics is 26.1103. The Letter of Notification for the proposed program, various external and internal letters of support for the new program, and letters of support from departments that offer courses that will be required in the new program, as well as sample plans of study are attached.

No existing courses, but 15 new courses are being proposed with the proposed BAES prefix. These are: BAES 111 - Introduction to Bioinformatics in Agriculture and Environmental Sciences; BAES 202 - Fundamentals in Python Programming in Agriculture and Environmental Sciences; BAES 203 - Data Structures for Bioinformatics; BAES 204 - Data Algorithms for Bioinformatics; BAES 330 - Data Analysis Reproducibility; BAES 405 - BioAg Careers: Growing Futures in Bioinformatics; BAES 415 - Scientific Writing Essentials; BAES 422 - Agricultural Computational Genomics and Bioinformatics; BAES 430 - Machine Learning in Agriculture and Environmental Sciences; BAES 440 - Precision Agriculture Technologies; BAES 450 - Data Visualization in Genomics and Bioinformatics; BAES 460 - Metagenomics and Microbiome Analyses; BAES 492 - Internship in Bioinformatics in Agriculture and Environmental Sciences; BAES 495 - Senior Seminar: Perspectives in Bioinformatics; and BAES 499 - Senior Capstone in Bioinformatics in Agriculture and Environmental Sciences

Impact on other Units None

Arts and Sciences Originators Only

Fill out Add Course forms for new courses to be active under the new subject code.
Include equivalent courses in this form's equivalency table *and* in each applicable "Change Course Number/Subject/Department" form.
If the course that is being dropped carries a Vol Core designation, the department must submit a proposal to the Vol Core Committee asking that the equivalent course carry the same designation. *Approval is not automatic.*
If the old course had attached fees, then the fees for the new course will need to be approved by the Office of Budget and Finance. Please contact the CCM or the Bursar's Office with any questions about these fees. *Approval of fees is not automatic.*
If cross-listed courses are included, all departments affected by the change must be informed so they may update their own courses. New course numbers for secondary cross-listed courses are NOT needed, however, both primary and secondary courses should be updated appropriately.

New Prefix/Subject Code* COAD

Full name of New Prefix/Subject Code* College of Architecture and Design Interdisciplinary

Equivalency Table*

Current Courses Design (SDGN)	Equivalent Courses Effective Fall 2023 College of Architecture and Design (COAD)
130	130
430	430
431	431

Rationale We are adding this new subject code for future courses that are interdisciplinary in nature and that may be staffed by faculty in any school in the College of Architecture and Design.

Impact on other Units The School of Interior Architecture traditionally staffs DSGN 130 and 430. SoIA faculty reviewed the proposal on November 11 and voted to approve.

DSGN 130 and 430 are included in various majors and minors in the Tickle College of Engineering and the College of Emerging and Collaborative Studies. Department heads and program chairs have been notified of the subject code change.

Arts and Sciences Originators Only

- ☐ Old courses added as new courses in Banner. New courses should be equivalent to old courses based on equivalency table.

New Subject Code: Interdisciplinary Engineering Studies (IES)

New Prefix/Subject Code (Undergraduate)

General Catalog Information

College* Tickle College of Engineering

Department* Engineering Fundamentals Program

Title of Proposal* New Subject Code: Interdisciplinary Engineering Studies (IES)

Instructions for Subject Changes

Changing a subject code requires full approval. ***New subject codes will be temporarily available in Curriculog before full approval, and will only be permanently available after full approval.***

A new subject code must be verified for use before it can be used for new courses. This is done by completing the New Prefix/Subject Code form. The Curriculum and Catalog Management team (CCM) will research the availability of subject codes, suggest alternatives if necessary, and create a new subject code in the system for use on course forms.
Fill out Drop Course forms for courses that will no longer be active under either subject code.
Fill out Add Course forms for new courses to be active under the new subject code.
Include equivalent courses in this form's equivalency table *and* in each applicable "Change Course Number/Subject/Department" form.
If the course that is being dropped carries a Vol Core designation, the department must submit a proposal to the Vol Core Committee asking that the equivalent course carry the same designation. *Approval is not automatic.*
If the old course had attached fees, then the fees for the new course will need to be approved by the Office of Budget and Finance. Please contact the CCM or the Bursar's Office with any questions about these fees. *Approval of fees is not automatic.*
If cross-listed courses are included, all departments affected by the change must be informed so they may update their own courses. New course numbers for secondary cross-listed courses are NOT needed, however, both primary and secondary courses should be updated appropriately.

New Prefix/Subject Code* IES

Full name of New Prefix/Subject Code* Interdisciplinary Engineering Studies

Equivalency Table*

Course equivalency table

Current courses Engineering Fundamentals (EF)	Equivalent courses effective fall 2025 Interdisciplinary Engineering Studies (IES)
130	130
203	203
303	303
400	400
403	403
437	437
438	438

Rationale

1. Courses EF 437 and 438 serve as a capstone to IBEP and were developed as approved substitutes for senior project courses across the Tickle College of Engineering.
    1. Senior projects courses typically satisfy VolCore requirements such as Oral Communications (OC), Applied Oral Communications (AOC), and in the case of Industrial Engineering (IE 404) and Nuclear Engineering (NE 472), Engaged Inquiries (EI).
    2. Since all engineering students gain 8 of the required 9 EI credits in the EF physics sequence (either EF 151/152 or EF 157/158), and not all EI credits can be obtained from courses from the same prefix, students from ISE and NE departments either have to i) complete an additional course to satisfy EI requirements or ii) not participate in IBEP or EF 437/438. Changing the course prefix to IES will resolve this constraint.
2. The EF course prefix aligns well with core engineering first and second-year courses such as engineering physics 1 and 2.
3. The IES course prefix aligns with the themes of courses created to support the Heath Integrated Business and Engineering Program, the Leadership, Entrepreneurship and Innovation Program, and the Engineering Entrepreneurship minor.

Impact on other Units N/A

New Subject Code: Music Business (MUBS)

New Prefix/Subject Code (Undergraduate)

General Catalog Information

College* Natalie L. Haslam College of Music

Department* Natalie L. Haslam College of Music

Title of Proposal* New Subject Code: Music Business (MUBS)

Instructions for Subject Changes

Changing a subject code requires full approval. *New subject codes will be temporarily available in Curriculog before full approval, and will only be permanently available after full approval.*

A new subject code must be verified for use before it can be used for new courses. This is done by completing the New Prefix/Subject Code form. The Curriculum and Catalog Management team (CCM) will research the availability of subject codes, suggest alternatives if necessary, and create a new subject code in the system for use on course forms.
Fill out Drop Course forms for courses that will no longer be active under either subject code.
Fill out Add Course forms for new courses to be active under the new subject code.
Include equivalent courses in this form's equivalency table *and* in each applicable "Change Course Number/Subject/Department" form.
If the course that is being dropped carries a Vol Core designation, the department must submit a proposal to the Vol Core Committee asking that the equivalent course carry the same designation. *Approval is not automatic.*
If the old course had attached fees, then the fees for the new course will need to be approved by the Office of Budget and Finance. Please contact the CCM or the Bursar's Office with any questions about these fees. *Approval of fees is not automatic.*
If cross-listed courses are included, all departments affected by the change must be informed so they may update their own courses. New course numbers for secondary cross-listed courses are NOT needed, however, both primary and secondary courses should be updated appropriately.

New Prefix/Subject Code* MUBS

Full name of New Prefix/Subject Code* Music Business

Equivalency Table* N/A

Rationale With our growing music business administration program enrollment and our Director of Music Business & Communications' goals, we request a new prefix for specific music business courses to differentiate them from applied and theoretical coursework.

New Prefix/Subject Code* SNR

Full name of New Prefix/Subject Code* School of Natural Resources

Equivalency Table*

Current Courses Forestry, Wildlife, Fisheries (FWF)	Equivalent Courses Effective Fall 2025 School of Natural Resources (SNR)
212	212
250	250
310	310
312	312
313	313
315	315
320	320
324	324
325S	325S
415	415
416	416
420	420
422R	422R
427	427
430	430
432	432
490	490
499	499

Rationale Change from the Department of Forestry, Wildlife and Fisheries to the School of Natural Resources warrents a change in the prefix to reflect this new status and to aligh the course prefix with the school name.

2025-2026 UG Add Course

General Catalog Information

College* Tickle College of Engineering

Department (Acalog Hierarchy)* Applied Engineering and Technology

Subject/Prefix (choose from list)* AET

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 220

Course Title (max 100 characters)* Professional Topics for Applied Engineers

Experience Learning Designation
- ○ N (Internship)
- ○ R (Research)
- ○ S (Service Learning)

For N/R/S base courses, should this course be:
- ○ Active
- ○ Archived
- ◉ N/A

Variable Title?*
- ○ Yes
- ◉ No

Credit Hours* 3

Course Description Topics relating to professional responsibility, communications, and organization. Oral presentations will be required by each student on engineering topics using credible evidence and effective communication skills for a variety of audiences.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all courses in this crosslisting relationship and note whether primary or secondary.

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Instructional Method* Lecture

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability

Credit Restriction

Registration Enforced (RE) Prerequisite(s):

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s):

Recommended Background

Comments

Registration Restriction(s) Registration restriction of Tickle College of Engineering majors or Biosystems Engineering majors.

Registration Permission

Equivalency

Rationale* This new course will be common across all AET concentrations and provide the necessary professional topics for practicing engineers.

Impact on Other Units* None

Financial Impact* New course common to all concentrations in the new AET department.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?
- ☐ Arts and Humanities
- ☐ Natural Sciences
- ☐ Social Sciences

Social Sciences

Should this course be considered for Connections?
- ○ Yes
- ○ No

If yes, which Connections category?
- ☐ Ancient Mediterranean Studies
- ☐ Biodiversity and Humans
- ☐ Cultural and Artistic Achievement: Arts in the United States
- ☐ Cultures and Societies
- ☐ Emerging Asia

College of Communication and Information - School of Communication Studies - Communication Studies Major, BA in Communication

2025-2026 UG Revise Program

General Catalog Information

College* College of Communication and Information

Department* School of Communication Studies

Program Name* Communication Studies Major, BA in Communication

Degree Type* Bachelor of Arts in Communication

Program Type* Undergrad (Major)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Campus

Knoxville

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Choose from the Natural Sciences (NS) Volunteer Core list. At least one of the courses must be a 4-credit hour lab sciences.
Choose from the Quantitative Reasoning (QR) Volunteer Core list.
Choose from any courses not already reqired for the major.
Choose from the Volunteer Core Curriculum Requirements, Applied Arts and Humanities (AAH), Social Sciences (SS), Global Citizenship - United States (GCUS), and Global Citizenship - International (GCI) Volunteer Core lists.
Choose from the Volunteer Core Curriculum Requirements Volunteer Core list.
Select two of the three speaking-emphasis classes listed.
Choose one course from the following: Global Citizenship - United States (GCUS) and Global Citizenship - International (GCI), Volunteer Core Curriculum Requirements Volunteer Core lists.
Six hours of the same Foreign Language (Intermediate Level).
Choose from Written Communication (WC) Volunteer Core list. Sample options include ENGL 255*, or ENGL 257*, ENGL 295*, ENGL 355* or ENGL 357*, ENGL 360*, ENGL 455*; JMED 200* among others.
Choose two courses (6 hours) from advertising, advertising and public relations, communication and information, communication studies, information sciences, journalism and electronic media, and/or public relations.
Four courses (12 hours, at least 6 hours must be at the 300-400 level). These courses may be used to complete a minor or may be a combination of classes from all departments except Advertising, Advertising and Public Relations, Communication and Information, Communication Studies, Counselor Education, First Year Studies, Information Sciences, Journalism and Electronic Media, Physical Education, and Public Relations.
Select three courses from CMST 300, CMST 400, CMST 410, CMST 412, CMST 414, CMST 415, CMST 416, CMST 419, CMST 426, CMST 429, CMST 442, CMST 444, CMST 446, CMST 449, and CMST 491. No more than 3 hours each of CMST 300 and CMST 491 may be counted toward the major; additional hours beyond the required 9 hours may be counted as College Electives or Unrestricted Electives.
Choose from the Engaged Inquiries (EI) Volunteer Core list.

*** Meets Volunteer Core Requirements.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ○ Yes
- ◉ No

Rationale*

Change #1: Communication Studies majors previously had to demonstrate competence through the intermediate sequence of a foreign language. This proposal is to expand the options for students, such that students will now "demonstrate competence through (a) the intermediate sequence of a foreign language or (b) two additional global citizenship classes beyond the two they take for VolCore, allowing students to choose between GCI and GCUS for each of them." The Communication Studies faculty voted to expand their curricular requirements to allow a wider range of options to develop intercultural understanding and skills.

Change #2: The School of Communication Studies previously added CMST 415 (Intercultural Communication) to its list of 400-level offerings. The Communication Studies faculty have now voted in favor of allowing CMST 415 to count toward the nine credit hours of upper-division CMST electives. This current proposal has therefore added CMST 415 to the list of approved courses in Footnote 12 of our curriculum.

Change #3: The College of Communication and Information has adopted a three one-credit hour professional development series.

Financial Impact*

Change #1: Tuition dollars from students taking these courses will now be spread across any unit that offers an intermediate sequence of a foreign language, a GCI course, or a GCUS course, depending on which specific courses students choose to enroll in.

Change #2: No financial impact is anticipated from this change.

Change #3: The financial impact of this change is limited to CCI.

Impact on Other Units*

Change #1: The Department of World Languages and Cultures may see fewer Communication Studies students in their classes (and as a result fewer tuition dollars) as some students choose option (b) listed above and take two additional GCI or GCUS courses in other departments. Dr. Julie Longmire informed Dr. Luis Cano (Head of the Department of World Languages and Cultures) and Dr. Liem Tran (College of Arts and Sciences Associate Dean) of this change via email. The email correspondence is included as an attachment to this proposal.

Change #2: No impact on other units is anticipated from this change.

Change #3: No impact on other units is anticipated from this change.

Have you consulted with all programs/departments that will be impacted by this change?*
- ◉ Yes
- ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Notes

Tickle College of Engineering - AET - 361

2025-2026 UG Add Course

General Catalog Information

College* Tickle College of Engineering

Department (Acalog Hierarchy)* Applied Engineering and Technology

Subject/Prefix (choose from list)* AET

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 361

Course Title (max 100 characters)* Junior Practicum: Propulsion System and Testing

Experience Learning Designation
- ○ N (Internship)
- ○ R (Research)
- ○ S (Service Learning)

For N/R/S base courses, should this course be:
- ○ Active
- ○ Archived
- ◉ N/A

Variable Title?*
- ○ Yes
- ◉ No

Credit Hours* 3

Course Description Concepts from thermodynamics, fluid and gas dynamics, and heat transfer are applied to airbreathing and rocket propulsion. Testing of these systems is also covered.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all courses in this crosslisting relationship and note whether primary or secondary.

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Instructional Method* Lecture

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Credit Hours* 3

Course Description Flow characterization is important in testing aerospace components and systems. Flow diagnostics covered include: temperature sensitive paint, pressure sensitive paints, shadowgraphy, schlieren imaging, particle image velocimetry (PIV), and focused laser differential interferometry (FLDI). Data acquisition using these systems is also covered.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all courses in this crosslisting relationship and note whether primary or secondary.

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Instructional Method* Lecture

Tickle College of Engineering - Applied Engineering and Technology - Applied Engineering Major, BS in Applied Engineering - Applied Aerospace Concentration

2025-2026 UG Add Program

General Catalog Information

College* Tickle College of Engineering

Department* Applied Engineering and Technology

Program Name* Applied Engineering Major, BS in Applied Engineering - Applied Aerospace Concentration

Learning Outcomes The BS Applied Engineering program is designed around experiential, hands-on learning and industry engagement outcomes. The program curriculum will embed innovations in current and emerging industries, ensuring graduates are well-equipped to join the workforce. The learning outcomes focus on (i) creating hands-on and applied learning environment that bridges theoretical concepts in engineering with tangible applications, preparing students to tackle real-world engineering challenges; (ii) providing students with invaluable exposure to ensure a seamless transition to industry by establishing robust partnerships and reflecting the dynamic needs of industries, ensuring that graduates are always at the forefront of engineering advancements; and (iii) engaging in community outreach to foster a vibrant exchange with regional industries towards innovation, shared growth, and mutual benefit.

Degree Type* Bachelor of Science in Applied Engineering

Program Type* Concentration

Campus code* ☑ Knoxville Campus ☐ Distance Ed ☐ Nashville Campus ☐ UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The BS in Applied Engineering program is structured to address the dynamic needs of modern industries in TN, offering four concentrations in manufacturing, aerospace, energy conversion and storage, and computer science. This program, which consists of over 120 credit hours, includes Vol Core requirements, engineering fundamental courses, soft skills, project-based practicum courses, and engineering courses emphasizing hands-on training to attain learning outcomes. Designed to be more accessible and practical, the curriculum reduces the traditional calculus requirement, opting instead to build calculus competency through project work, simulations, experimentation, and practice. This innovative approach ensures that students acquire essential mathematical skills in a context that directly relates to engineering applications. The program will be delivered face-to-face to provide students with the essential hands-on training necessary for applied engineering.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Knoxville

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Term 1

MATH 131 Calculus 1A Infused with Precalculus

Term 8

ME 484 Introduction to Maintainability Engineering
AET 402 Senior Capstone II
[After] Expanded Perspectives Elective *

AET 431 Flow Diagnostics and Characterization
AET 441 Wind Tunnels Laboratory

Credit Hours 15

Term 8 Milestone Notes

No milestones

Total Credit Hours 121

Footnotes

Timing of Co-op can be changed to accommodate schedule. AET will offer "in-house" co-ops for those unable to find external co-ops.
This track can earn the Reliability and Maintainability Engineering Minor with STAT 251, IE 300, IE 340, ME 483, and ME 484
*** Meets Volunteer Core Requirements.**

Rationale*
The Bachelor of Science in Applied Engineering program is designed to bridge the gap between traditional engineering education and the practical, hands-on training demands of modern industries. As TN continues to experience significant growth in sectors such as manufacturing, automotive, aerospace, and energy, there is an increasing demand for skilled professionals with hands-on experience. The BS in Applied Engineering program aims to fulfill this demand by offering a curriculum that is not just extensive, but also adaptable to the evolving needs of the industry. The program will emphasize experiential learning, ensuring that students are well-versed in engineering principles and adept at applying them to solve real-world problems using state-of-the-art laboratories, working on collaborative projects, and engaging with industry partners. The program's adaptability is further demonstrated by its strong connections with local industries, enabling students to engage in internships, co-op programs, and collaborative industry-sponsored projects. These opportunities will provide students with practical insights into industry and the latest technological advancements, enhancing their readiness to contribute effectively upon entering the workforce. We will align the curriculum with industry needs and trends to ensure graduates have the skills and knowledge to drive innovation and efficiency. In addition to technical proficiency, the program will emphasize developing essential soft skills such as teamwork, communication, and leadership. These skills are critical for success in today's collaborative work environments and will enable graduates to excel in multidisciplinary teams and leadership roles.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Term 1

MATH 131 Calculus 1A Infused with Precalculus
EF 141 Introduction to Physics and Modeling for Engineers I
ENGL 101 English Composition I
[Right] * (or equivalent)

COSC 101 Introduction to Programming
[After]
[After] Social Sciences (SS) Elective *

Credit Hours 16

Term 1 Milestone Notes

[Before] One course from:

MATH 130 Precalculus I
MATH 131 Calculus 1A Infused with Precalculus
[After]
higher Math course

[After]
Arts and Humanities (AH) Elective *

[After]
Global Citizenship - United States (GCUS) Elective *

Global Citizenship - International (GCI) Elective *

[After]
Social Sciences (SS) Elective *

Term 2

MATH 132 Calculus 1B Infused with Precalculus
[Right] *

EF 142 Introduction to Physics and Modeling for Engineers II
[Right] *

ENGL 102 English Composition II
[Right] * (or equivalent)

COSC 102 Introduction to Computer Science
[After] Arts and Humanities (AH) Elective *

Credit Hours 16

Term 2 Milestone Notes

[Before] One course from:

MATH 130 Precalculus I
MATH 131 Calculus 1A Infused with Precalculus
[After]
higher Math course

Term 3

AET 200 Advanced Math for Applied Engineers
[After] Natural Sciences (NS) with Laboratory *

AET 220 Professional Topics for Applied Engineers
COSC 202 Data Structures
[After] Expanded Perspectives Elective *

Credit Hours 17

Term 3 Milestone Notes

[Before]Complete both courses:

EF 141 Introduction to Physics and Modeling for Engineers I
[Right] *

EF 142 Introduction to Physics and Modeling for Engineers II
[Right] *

[After] Or one course from:

EF 151 Physics for Engineers I
[Right] *

EF 157 Honors: Physics for Engineers I
[Right] *

PHYS 135 Introduction to Physics for Physical Science and Mathematics Majors I
[Right] *

PHYS 137 Honors: Fundamentals of Physics for Physics Majors I
[Right] *

Term 4

STAT 251 Probability and Statistics for Scientists and Engineers
[Before]Expanded Perspectives Elective *

COSC 230 Computer Organization
COSC 302 Algorithms
AET 250 Deductive Logic and Debugging

Credit Hours 16

Term 4 Milestone Notes

[Before]One course from:

AET 101 Introduction to Manufacturing Laboratory
COSC 111 Computational Thinking and the Art of Programming
[Right] *

Term 5

[Before]ACS Elective

COSC 340 Software Engineering
IE 340 Design of Experiments
COSC 366 Introduction to Cybersecurity
AET 322 Mobile/Web Development I

Credit Hours 15

Term 5 Milestone Notes

[Before]One course from:

CBE 201 Material and Energy Balances
COSC 101 Introduction to Programming
COSC 102 Introduction to Computer Science
COSC 111 Computational Thinking and the Art of Programming
[Right] *

ME 202 Engineering Mechanics
MSE 201 Introduction to Materials Science and Engineering

Term 6

IE 300 Quality Control and Management
[After] ACS Elective

[After] Global Citizenship - United States (GCUS) Elective *

EF 333 Co-op/Intern Experience in Engineering
[Right] or

AET 333 Internal Co-Op/Intern Experience in Engineering
[After]
AET 422 Mobile/Web Development II

Credit Hours 15

Term 6 Milestone Notes

No milestones

Term 7

ME 483 Introduction to Reliability Engineering
AET 401 Senior Capstone I
[After] ACS Elective

AET 450 Development Operations
[After] Global Citizenship - International (GCI) Elective *

Credit Hours 15

Term 7 Milestone Notes

No milestones

Term 8

ME 484 Introduction to Maintainability Engineering
AET 402 Senior Capstone II
[After] ACS Elective

AET 460 OS and Cloud Architecture

Credit Hours 12

Term 8 Milestone Notes

No milestones

Total Credit Hours 122

Footnotes

This track can also earn the Reliability and Maintainability Minor with STAT 251, IE 300, IE 340, ME 483, ME 484
AET will offer "in-house" co-ops for those unable to find external co-ops.

ACS Electives:

BAS 320 – Regression Modeling (3) BAS 474 – Data Mining and Business Analytics (3) BAS 475 – Applied Time Series and Forecasting (3) BAS 476 – Data Engineering and Visualization (3)

BCMB 422 – Computational Biology and Bioinformatics (3) [COMP 422 – Programming for Statistical and Graphical Analysis of Biological Data]

COSC 420 – Biologically-Inspired Computation (3) COSC 445 – Fundamentals of Digital Archelogy (3) COSC 452 – Computer Graphics (3) COSC 466 - Software Security (3) COSC 469 – Human Factors in Cybersecurity (3) COSC 483 – Applied Cryptography (3)

EF 333 – Co-op/Intern Experience in Engineering (1-3)

IE 465 - Applied Data Science

INSC 311 – User Centered Design (3) INSC 380 – Information Management in Organizations (3) [VolCore AOC] INSC 430 – Foundations of User Experience (3) INSC 435 – Usability Testing and Methods (3) INSC 436 – Analytics and Metrics for User Experience (3) INSC 439 – Interfaces and Interaction Design (3) INSC 384- Database Design (3) INSC 484 – Database Applications (3) [INSC 384 is required for program and COSC 202 should count for INSC 260 Pre-req] INSC 489 – Information Visualization (3) [COSC 202 should count for INSC 260 Pre-req]

GEOG 311 – Geovisualization and Geographic Information Science (3) GEOG 411 – Intermediate Geographic Information Science (3) GEOG 414 – Spatial Data Management (3) GEOG 422 – Geographic Sofware Design (3)

*** Meets Volunteer Core Requirements.**

Rationale* The Bachelor of Science in Applied Engineering program is designed to bridge the gap between traditional engineering education and the practical, hands-on training demands of modern industries. As TN continues to experience significant growth in sectors such as manufacturing, automotive, aerospace, and energy, there is an increasing demand for skilled professionals with hands-on experience. The BS in Applied Engineering program aims to fulfill this demand by offering a curriculum that is not just extensive, but also adaptable to the evolving needs of the industry. The program will emphasize experiential learning, ensuring that students are well-versed in engineering principles and adept at applying them to solve real-world problems using state-of-the-art laboratories, working on collaborative projects, and engaging with industry partners. The program's adaptability is further demonstrated by its strong connections with local industries, enabling students to engage in internships, co-op programs, and collaborative industry-sponsored projects. These opportunities will provide students with practical insights into industry and the latest technological advancements, enhancing their readiness to contribute effectively upon entering the workforce. We will align the curriculum with industry needs and trends to ensure graduates have the skills and knowledge to drive innovation and efficiency. In addition to technical proficiency, the program will emphasize developing essential soft skills such as teamwork, communication, and leadership. These skills are critical for success in today's collaborative work environments and will enable graduates to excel in multidisciplinary teams and leadership roles.

Financial Impact* Yes

Tickle College of Engineering - Applied Engineering and Technology - Applied Engineering Major, BS in Applied Engineering - Applied Manufacturing Concentration

2025-2026 UG Add Program

General Catalog Information

College* Tickle College of Engineering

Department* Applied Engineering and Technology

Program Name* Applied Engineering Major, BS in Applied Engineering - Applied Manufacturing Concentration

Learning Outcomes The BS Applied Engineering program is designed around experiential, hands-on learning and industry engagement outcomes. The program curriculum will embed innovations in current and emerging industries, ensuring graduates are well-equipped to join the workforce. The learning outcomes focus on (i) creating hands-on and applied learning environment that bridges theoretical concepts in engineering with tangible applications, preparing students to tackle real-world engineering challenges; (ii) providing students with invaluable exposure to ensure a seamless transition to industry by establishing robust partnerships and reflecting the dynamic needs of industries, ensuring that graduates are always at the forefront of engineering advancements; and (iii) engaging in community outreach to foster a vibrant exchange with regional industries towards innovation, shared growth, and mutual benefit.

Degree Type* Bachelor of Science in Applied Engineering

Program Type* Concentration

Campus code* ☑ Knoxville Campus ☐ Distance Ed ☐ Nashville Campus ☐ UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The BS in Applied Engineering program is structured to address the dynamic needs of modern industries in TN, offering four concentrations in manufacturing, aerospace, energy conversion and storage, and computer science. This program, which consists of over 120 credit hours, includes Vol Core requirements, engineering fundamental courses, soft skills, project-based practicum courses, and engineering courses emphasizing hands-on training to attain learning outcomes. Designed to be more accessible and practical, the curriculum reduces the traditional calculus requirement, opting instead to build calculus competency through project work, simulations, experimentation, and practice. This innovative approach ensures that students acquire essential mathematical skills in a context that directly relates to engineering applications. The program will be delivered face-to-face to provide students with the essential hands-on training necessary for applied engineering.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Tickle College of Engineering - Applied Engineering and Technology - Energy Policy for Engineers Certificate

2025-2026 UG Add Program

General Catalog Information

College* Tickle College of Engineering

Department* Applied Engineering and Technology

Program Name* Energy Policy for Engineers Certificate

Learning Outcomes The learning outcomes for an undergraduate certificate in Energy Policy for Engineers program focuses on (i) providing the tools to understand and analyze energy policy based on the legal, economic, and regulatory frameworks that govern energy policy at local, national, and global levels, with a focus on their implications for engineering practice; (ii) integrating technical and policy knowledge by demonstrating the ability to integrate engineering principles with energy policy considerations, enabling graduates to design and assess energy systems and technologies that are compliant with current regulations and contribute to sustainable development; and (iii) building the capacity to communicate energy policy issues by developing the skills to effectively communicate energy policy issues to a range of stakeholders, including policymakers, industry professionals, and the general public.

Degree Type* Undergraduate Certificate

Program Type* Undergraduate Certificate

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The undergraduate certificate in Energy Policy for Engineers would provide more advanced undergraduate students with coursework on energy markets, the economics of climate change, the fundamentals of U.S. energy policy, and the role of technology in facilitating the energy transition. With this training, undergraduate engineering students would be prepared to use systems integration thinking to consider how policy and market forces shape the viability and application of engineering technologies. Students with this training would be more competitive for strategy and leadership roles in energy-focused companies in the private sector and for the increasingly broad set of public sector careers tied to energy policy and the energy transition.

The Energy Policy for Engineers Certificate consists of 12 credit hours of coursework and is coordinated through a partnership between the Tickle College of Engineering and the Baker School of Public Policy and Public Affairs.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Credit Hours

The Energy Policy for Engineers Certificate consists of 12 credit hours of coursework and is coordinated through a partnership between the Tickle College of Engineering and the Baker School of Public Policy and Public Affairs.

Required Courses

Select 4 courses from the following:

AREC 345 Climate Change and Renewable Energy Economics
EF 305 Engineering Approaches to Sustainability
HBS 424 Energy Markets and Economics
HBS 443 Energy Transitions
MSE 455 Materials for Energy

Rationale* The rapidly evolving landscape of energy production, distribution, and consumption necessitates a deep understanding of not only the technical aspects but also the policy frameworks that govern these systems. The Energy Policy for Engineers program is designed to bridge the gap between engineering and policy, equipping students with the knowledge and skills needed to navigate and influence the complex regulatory environments that impact energy projects. As engineers increasingly find themselves at the forefront of addressing global challenges such as climate change, energy security, energy transition, and sustainable development, the ability to integrate policy considerations into technical decision-making is essential. This program provides a comprehensive education that prepares engineering students to become leaders in the energy sector, capable of designing innovative solutions that are both technically sound and align with current and future energy policies.

Financial Impact* No

Impact on Other Units* Yes. The impacted units are MSE, Engineering Fundamentals, and Baker School, and the Department of Agricultural and Resource Economics. These units will offer the courses in the program.

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

CIP Code (if available) CIP Code 03.0209

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Notes

Tickle College of Engineering - Applied Engineering and Technology - Reliability and Maintainability Engineering Minor

2025-2026 UG Change Program Name / Department

General Catalog Information

Important Note:

This Change Program Name / Department form is to be used for changing the name of a program (major, concentration, minor, or certificate) and/or changing the department where the program is offered. Other regular revisions to program requirements can be included in this form.

College* Tickle College of Engineering

Department* Applied Engineering and Technology

Program Name* Reliability and Maintainability Engineering Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

Description A coursework program leading to a minor in reliability and maintainability engineering is offered by the Tickle College of Engineering. The grade in each of the required classes must be at least a C. Students should consult with their advisor for the appropriate elective courses in their major.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Minor Requirements

The minor consists of 15 hours.

Select 3 hours:

CBE 483 Introduction to Reliability Engineering
IE 483 Introduction to Reliability Engineering
ME 483 Introduction to Reliability Engineering
MSE 483 Introduction to Reliability Engineering
NE 483 Introduction to Reliability Engineering

Select 3 hours:

CBE 484 Introduction to Maintainability Engineering
IE 484 Introduction to Maintainability Engineering
ME 484 Introduction to Maintainability Engineering
MSE 484 Introduction to Maintainability Engineering
NE 484 Introduction to Maintainability Engineering

Select 3 hours:

CBE 301 Application of Numerical and Statistical Techniques in Chemical Engineering
[Before]
ECE 313 Probability and Random Variables
[After] or
ECE 317 Honors: Probability and Random Variables
[After]
IE 200 Engineering Statistics
MATH 323 Probability and Statistics
MSE 301 Applied Statistics and Numerical Methods for Materials Scientists and Engineers
STAT 251 Probability and Statistics for Scientists and Engineers

Select 6 hours:

CBE 350 Chemical and Bioengineering Reactor Fundamentals
CBE 360 Process Dynamics and Control
ECE 315 Signals and Systems I
ECE 471 Introduction to Pattern Recognition (inactivated 202340)
IE 300 Quality Control and Management
ME 345 Mechanical Engineering Instrumentation and Measurement
[Right] *
[Before]
ME 363 System Dynamics
[After] or
ME 367 Honors: System Dynamics
[After]
MSE 250 Introduction to Materials Kinetics and Transport Phenomena
MSE 302 Mechanical Behavior of Materials I
[Before]
NE 351 Nuclear System Dynamics, Instrumentation, and Controls
[After] or
NE 357 Honors: Nuclear System Dynamics and Control
[After]
NE 401 Radiological Engineering Laboratory
[After]
[Right] *
IE 340 Design of Experiments
[After] or
BAS 340 Experimental Methods and Process Improvement
[After]
[After] * Meets Volunteer Core Requirements.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ○ Yes
- ◉ No

For new majors: indicate the type of change
- ○ New major name and new CIP code (requires THEC approval)
- ○ New major name and keeping the same CIP code

For new majors: have you or will you be submitting THEC paperwork?
- ○ Yes
- ○ No

CIP Code (if available) CIP Code 14.9999

Rationale*

Moving our Reliability and Maintainability Engineering Minor to the Department of Applied Engineering Technology will provide more capacity for integrating theoretical principles with practical applications. This field requires a deep understanding of engineering fundamentals combined with a strong emphasis on technology and real-world problem-solving. The AET department is uniquely positioned to offer this integration, as it emphasizes hands-on experience, industry partnerships, and practical training. Students in the AET department will benefit from access to state-of-the-art facilities and equipment, opportunities for industry collaboration, and coursework that reflects current technological advancements and industry needs. Thus, situating the RME minor within this department will better prepare students to address complex issues related to system reliability, maintenance strategies, etc, all within a framework that aligns with industry practices and technological innovations. This alignment ensures that graduates acquire the practical skills necessary to implement effective reliability and maintainability solutions in real-world settings.

Financial Impact* No

Impact on Other Units* Yes. The impacted units are CBE, IE, EECS, MABE, MSE, and NE. These are the units offering the RME Minor courses. The RME Minor courses will stay in their respective units. The proposal is to move the program from the RME center to the AET department, not the courses.

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?
- [ ] Arts and Humanities
- [ ] Natural Sciences
- [ ] Social Sciences

ADMINISTRATIVE USE ONLY

Impact Level
- [x] Low
- [ ] Mid
- [ ] High

2025-2026 UG Change Course Number / Subject / Department

General Catalog Information

Important Note:

This Change Course Number / Subject / Department form is to be used for changing the course number, subject code, and/or the department where the course is offered. Other regular revisions to course requirements can be included in this form.

College* Tickle College of Engineering

Department (Acalog Hierarchy)* Biomedical Engineering

Subject/Prefix (choose from list)* BME

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 367

Course Title (max 100 characters)* Honors: System Dynamics

For N/R/S base courses, should this course be:
- ○ Active
- ○ Archived
- ○ N/A

Variable Title?
- ○ Yes
- ○ No

Credit Hours* 3

Course Description

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Instructional Method* Lecture

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability

This Change Course Number / Subject / Department form is to be used for changing the course number, subject code, and/or the department where the course is offered. Other regular revisions to course requirements can be included in this form.

College* Tickle College of Engineering

Department (Acalog Hierarchy)* Biomedical Engineering

Subject/Prefix (choose from list)* BME

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 477

Course Title (max 100 characters)* Honors: Applied Biomechanics

For N/R/S base courses, should this course be: ○ Active ○ Archived ○ N/A

Variable Title? ○ Yes ○ No

Credit Hours* 3

Course Description Honors version of BME 473. Students will attend BME 473 classes with supplementary assignments.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Instructional Method* Lecture

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability

Credit Restriction

Registration Enforced (RE) Prerequisite(s) BIOL 160* or BIOL 168*, BME 205, and ME 231.

Department Enforced (DE) Prerequisite(s) EF 230.

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s)

Recommended Background

Comments

Registration Restriction(s) Aerospace, biomedical, or mechanical engineering major. Students in any honors program.

Registration Permission

Equivalency* NA

Rationale* Change to the Department of Biomedical Engineering

Impact on Other Units* NA

Financial Impact* NA

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No ○ Minor changes only/Not Applicable

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?
- [ ] Arts and Humanities
- [ ] Natural Sciences
- [ ] Social Sciences

Should this course be considered for Connections?
- ( ) Yes
- ( ) No

If yes, which Connections category?
- [ ] Ancient Mediterranean Studies
- [ ] Biodiversity and Humans

Tickle College of Engineering - Biomedical Engineering - Biomedical Engineering Major, BS in Biomedical Engineering

2025-2026 UG Change Program Name / Department

General Catalog Information

Important Note:

This Change Program Name / Department form is to be used for changing the name of a program (major, concentration, minor, or certificate) and/or changing the department where the program is offered. Other regular revisions to program requirements can be included in this form.

College* Tickle College of Engineering

Department* Biomedical Engineering

Program Name* Biomedical Engineering Major, BS in Biomedical Engineering

Degree Type* Bachelor of Science in Biomedical Engineering

Program Type* Undergrad (Major)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

Description

The biomedical engineering curriculum integrates selected engineering sciences and design methods with life science coursework. The program prepares students for careers in a variety of health care related professions including work for medical device manufacturers and regulatory governmental agencies. The course content of the biomedical engineering curriculum complements the departmental strengths in mechanical engineering and includes a comprehensive coverage of engineering materials and biomechanics applications. Elective courses are available to allow students to specialize their curriculum to areas of particular current interest in the marketplace such as cellular and tissue engineering applications. The biomedical engineering program also allows students to take medical school admission requirements with an appropriate selection of technical electives.

PROGRESSION POLICIES AND REQUIREMENTS

Progression

The first two years of the curriculum are considered to be lower-division and the two remaining years upper-division. Students must apply for progression to departmental upper-division courses, which depends on academic performance. Factors considered include overall grade point average, performance in selected lower-division courses and evidence of orderly progression through the prescribed curriculum.

Full Status

A lower-division student may apply for progression to upper-division after completing EF 152* or EF 158*, or CHEM 122* and CHEM 123* or CHEM 128*, MATH 231, ME 202, ME 231, and ME 321, with a grade of C or better in each, and an overall GPA of at least 2.4 in these courses. Students who have not satisfied the requirements for full status will be dropped from departmental class rolls in upper-division courses.

Provisional Status

Students who have completed EF 152* or EF 158*, CHEM 122* and CHEM 123* or CHEM 128*, MATH 231, ME 202, ME 231 and ME 321, with a grade of C or better and have a GPA between 2.0 and 2.4 in these courses may apply for provisional status. The granting of provisional status is based on the availability of space in departmental programs after full status students have been accommodated. Provisional status students are required to demonstrate their ability to perform satisfactorily in upper-division by attaining a minimum GPA of 2.0 in the first 12 hours of 300-level required engineering courses. Award of upper-division full status is dependent upon this performance. Students with a UTK GPA less than 2.0 will not be admitted to upper-division. Students who have not progressed to upper-division will be dropped from departmental class rolls in upper-division courses.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

For new majors: indicate the type of change
- ( ) New major name and new CIP code (requires THEC approval)
- ( ) New major name and keeping the same CIP code

For new majors: have you or will you be submitting THEC paperwork?
- ( ) Yes
- ( ) No

CIP Code (if available)

Rationale* Move program to the new Department of Biomedical Engineering.

Financial Impact* N/A

Impact on Other Units* N/A

Have you consulted with all (•) Yes ( ) No

programs/departments that will be impacted by this change?* ○ Yes ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Tickle College of Engineering - Biomedical Engineering - Biomedical Engineering Minor

2025-2026 UG Change Program Name / Department

General Catalog Information

Important Note:

This Change Program Name / Department form is to be used for changing the name of a program (major, concentration, minor, or certificate) and/or changing the department where the program is offered. Other regular revisions to program requirements can be included in this form.

College* Tickle College of Engineering

Department* Biomedical Engineering

Program Name* Biomedical Engineering Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

Description

The Tickle College of Engineering offers a minor in biomedical engineering to those undergraduate students whose academic history provides the prerequisites for the courses required by the minor. The minor requires the completion of a minimum of **18 credits**. Some of the courses used in the minor may also satisfy requirements for the student's major.

Students may enroll in the minor program by completing a form at the Department of Mechanical, Aerospace and Biomedical Engineering, 414 Dougherty Engineering Building. A copy of the completed enrollment form and information on the minor requirements will be forwarded to the student's home department advisor.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

For new majors: indicate the type of change
- ( ) New major name and new CIP code (requires THEC approval)
- ( ) New major name and keeping the same CIP code

For new majors: have you or will you be submitting THEC paperwork?
- ( ) Yes
- ( ) No

CIP Code (if available)

Rationale* Moving to the new Department of Biomedical Engineering

Financial Impact* N/A

Impact on Other Units* N/A

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?

Notes

Tickle College of Engineering - CBE - 415

2025-2026 UG Revise Course

General Catalog Information

College* Tickle College of Engineering

Department (Acalog Hierarchy)* Chemical and Biomolecular Engineering

Subject/Prefix (choose from list)* CBE

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 415

Course Title (max 100 characters)* Advanced Chemical and Biomolecular Engineering Laboratory

For N/R/S base courses, should this course be: ○ Active ○ Archived ○ N/A

Variable Title? ○ Yes ○ No

Credit Hours* 3

Course Description Solve open-ended problems in a chemical and biomolecular engineering laboratory environment. Incorporate principles of design of experiments and simulation tools in design and analysis.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement: (EI) (WC)

Instructional Method* Lab

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability

Credit Restriction

Registration Enforced (RE) Prerequisite(s) CBE 340; ENGL 102*, ENGL 112*, ENGL 132*, or ENGL 298*.

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s) CBE 301, CBE 350, and CBE 360

Department Enforced (DE) Corequisite(s)

Recommended Background

Comments

Registration Restriction(s) Chemical engineering major.

Registration Permission

Equivalency

Rationale* Due to other change, CBE 360 is being moved in our showcase to appear concomitantly with CBE 415. Background knowledge from 360 necessary for 415 is limited and can be addressed with minor modifications to lab instruction to account for the change in timing CBE 360 topic coverage over the semester.

Impact on Other Units* None

Tickle College of Engineering - Chemical and Biomolecular Engineering - Chemical Engineering Major, BS in Chemical Engineering

2025-2026 UG Revise Program

General Catalog Information

College* Tickle College of Engineering

Department* Chemical and Biomolecular Engineering

Program Name* Chemical Engineering Major, BS in Chemical Engineering

Degree Type* Bachelor of Science in Chemical Engineering

Program Type* Undergrad (Major)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

PROGRESSION POLICIES AND REQUIREMENTS

Progression to Upper-Division

Progression of students in the Department of Chemical and Biomolecular Engineering to departmental courses numbered 310 and above requires satisfactory performance in foundational lower division course work. Factors considered include overall grade point average, performance in selected lower-division courses, and evidence of satisfactory and orderly progress through the prescribed curriculum. Students must complete CBE 201, CBE 240, and CBE 250 with a grade of C- or better to register for upper division courses.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Campus

Knoxville

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Technical Electives: CHEM 210**, CHEM 219, CHEM 359, CHEM 360**, 370**, CHEM 379, CHEM 380**, CHEM 389, CHEM 490; BCMB 230, BCMB 311, BCMB 321, BCMB 333, BCMB 401, BCMB 402, BCMB 405, BCMB 415, BCMB 419, BCMB 422, BCMB 433, BCMB 440, BCMB 459, BCMB 461; BIOL 211, BIOL 220, BIOL 229, BIOL 240; MATH 251, MATH MATH 257, MATH 300, MATH 323, MATH 341, MATH 371, MATH 405, MATH 411, MATH 421, MATH 424, MATH 431, MATH 435; MICR 210, MICR 321, MICR 329, MICR 330, MICR 411, MICR 420, MICR 429, MICR 431, MICR 440; NUTR 311; PHYS 231**, PHYS 232**, PHYS 250, PHYS 311, PHYS 342, PHYS 405; STAT 251; any Tickle College of Engineering course 200-level or higher except AE 201, BME 201, CE/ENVE 205, ENVE 200, ME 331, ME 344.
CBE Electives: Any CBE course except CBE 457.
Engineering Elective: Any Tickle College of Engineering course 200-level or higher except AE 201, BME 201, CE/ENVE 205, ENVE 200, ME 331, ME 344, MSE 250, MSE 260.

* Meets Volunteer Core Requirements.

** Course cannot count for a both a Technical Elective and a Science Option (see Term 4) or Chemistry Option (see Term 5).

Chemical Engineering – Honors Concentration

In addition to satisfying the requirements for the chemical engineering major, candidates for the honors chemical engineering concentration must also complete the following requirements.

Maintain a 3.4 cumulative GPA and an average 3.4 GPA in all CBE courses.
Four 100- or 200-level honors courses*** (14 hours minimum, at least two courses must be from Materials Science and Engineering, Engineering Fundamentals, Physics, Math, Chemistry, Biology, Statistics, or MSE 117 - Honors: Materials Chemistry or MSE 207).
Two upper-division honors courses in chemical engineering (CBE 408, CBE 447, CBE 458, CBE 488*, CBE 498, or a CBE honors-by-contract course).
Satisfy the Breadth Requirements for the Cook Grand Challenge Honors Program.

* Meets Volunteer Core Requirements

*** While most students fulfill this requirement with 100- and 200-level courses, students may substitute upper level courses on approval of the Honors faculty.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale*

Student feedback from exit interviews and a recent focus group indicates a desire for more freedom to pursue elective tracks and/or additional concentrations within the BS program and to pursue minors or certificates. We therefore seek to modify the curriculum structure to create more flexibility and increase the technical elective units, which have gradually decreased over many years as other constraints and requirements have been added to the degree. These changes will allow easy mapping of CBE elective tracks and concentrations to be defined in the future onto the basic BS curriculum structure and will immediately allow students to customize their degree programs to pursue areas of elective interest, something that is difficult in the current structure. In addition, we are changing the sequence of some of our required core courses to improve the connection between some courses as they are being taught presently.

Changes can be summarized as follows:

1. Reorder the sequence of CBE 340, 350, 360, and 445 in the showcase. This will allow CBE 240 and 340 to be taught in back-to-back semesters, which is a more natural ordering for the topics covered in these courses. CBE 445 and CBE 350 appear earlier, which will benefit students in the two lab courses and our term 7 senior design course, where topics from these courses are applied.
2. Move CHEM 260 organic chemistry up to the sophomore year and replace CHEM 210 in the standard BS degree with an option of CHEM 210, 360, 370, or 380. Earlier CHEM 260 will benefit students in courses such as CBE 235, and providing options for an additional CHEM course will help flexibility for students wishing to develop their curricula to pursue different career paths.
3. Replace PHYS 231 with an option of PHYS 231, BIOL 240, or CHEM 360. PHYS 231 does not connect to subsequent required courses and serves a subset of our students with particular interests. Other students would be better served by taking other science courses as background to focus their studies in other areas.
4. Change CBE 240, 301, and 350 from 4 hr to 3 hr (course learning objectives will be adjusted). Incorporate existing Chem Option and Bio Option into Technical Electives (a broader selection of courses that include all existing Chem and Bio Option courses). These changes allow overall an increase from 9 to 18 cr-hr of technical electives, increasing flexbility and the ability to customize electives and elective tracks. To preserve depth, 6 cr-hr of these electives must be CBE and one additional course (3 cr-hr) must be in any engineering discipline.

Note: CBE courses changing from 4 to 3 cr-hr will be changed in subsequent catalog cycles (proposals submitted in 2025 for CBE 240 and 2026 for CBE 301 and 350) to avoid causing problems with current students graduating under the existing catalog.

Financial Impact*

None

Impact on Other Units*

CBE student enrollments in some previously required courses outside of CBE (e.g., PHYS 231 and CHEM 210) may be impacted, depending on what courses students choose as options and technical electives.

Have you consulted with all programs/departments that will be impacted by this change?*

○ Yes ◉ No

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

PROGRESSION POLICIES AND REQUIREMENTS

Progression to Upper-Division

Progression of students in the Department of Chemical and Biomolecular Engineering to departmental courses numbered 310 and above requires satisfactory performance in foundational lower division course work. Factors considered include overall grade point average, performance in selected lower-division courses, and evidence of satisfactory and orderly progress through the prescribed curriculum. Students must complete CBE 201, CBE 240, and CBE 250 with a grade of C- or better to register for upper division courses.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

*** Meets Volunteer Core Requirements.**

Biomolecular Engineering – Honors Concentration

In addition to satisfying the requirements for the chemical engineering major, candidates for the honors biomolecular engineering concentration must also complete the following requirements:

Maintain a 3.4 cumulative GPA and an average 3.4 GPA in all CBE courses.

Four 100- or 200-level honors courses (14 hours minimum, at least two courses must be from Materials Science and Engineering, Engineering Fundamentals, Physics, Math, Chemistry, Biology, Statistics, or MSE 117 - Honors: Materials Chemistry or MSE 207).**

Complete two upper-division honors courses in chemical engineering (CBE 408, CBE 447, CBE 458, CBE 488*, CBE 498, or a CBE honors-by-contract course).

Satisfy the Breadth Requirements for the Cook Grand Challenge Honors Program.

*	**Meets Volunteer Core Requirements.**
**	**While most students fulfill this requirement with 100- and 200-level courses, students may substitute upper level courses on approval of the Honors faculty.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale*

The proposed schema maps our existing biomolecular engineering concentration onto the accompanying proposed new structure of our BS degree without concentration.

Note: CBE courses changing from 4 to 3 cr-hr will be changed in subsequent catalog cycles (proposals submitted in 2025 for CBE 240 and 2026 for CBE 310 and 350) to avoid causing problems with current students graduating under the existing catalog.

Financial Impact*

None

Impact on Other Units*

CBE student enrollments in some previously required courses outside of CBE (e.g., PHYS 231 and CHEM 210) may be impacted, depending on what courses students choose as options and technical electives.

Have you consulted with all programs/departments that will be impacted by this change?* ○ Yes ◉ No

Course Title (max 100 characters)* Mobile and Embedded Systems Security

For N/R/S base courses, should this course be: ○ Active ○ Archived ○ N/A

Variable Title? ○ Yes ○ No

Credit Hours* 3

Course Description Introduction to vulnerabilities and threat vectors associated with mobile and embedded devices, such as smartphones, wearable devices, and IoT devices. Topics include security features and limitations of mobile operating systems, secure programming, mobile location and activity privacy, user/device authentication, IoT wireless security, side-channel attacks on mobile/wearable devices, and security and privacy breaches on smart home devices. Coursework focuses on improving knowledge and awareness of mobile and embedded systems' security issues, through individual homework assignments and an intensive group project involving hands-on research.

Credit Hours* 3

Course Description This course introduces foundational robotics concepts with a focus on sensing, planning, and learning. Students will explore how robots perceive their environment through various sensing technologies and apply this information to understand kinematics and dynamics for movement and design. The course covers motion planning techniques, such as pathfinding and trajectory generation, as well as feedback control systems for precise robotic manipulation and navigation. Additionally, students will learn basic methods for adaptive behavior through machine learning. Lectures and hands-on projects will help students develop the skills to design and implement key robotic systems and algorithms.

Registration Enforced (RE) Corequisite(s) EF 152* or EF 158*.

Department Enforced (DE) Corequisite(s)

Recommended Background

Comments

Registration Restriction(s)

Registration Permission

Equivalency

Rationale* Due to increases in enrollment we can no longer handle all incoming first-year students taking both EF 105 and EF 151 or EF 157 at the same time. To spread the number of section needed out over the course of the entire year, the co-requisite will be shifted from EF 151/EF 157 to EF 152 and EF 158 to allow EF to offer 50% of the necessary sections to serve the incoming population in both fall and spring semesters.

Impact on Other Units*

There will be no impact on other units as the first-year engineering students take a two course sequence before they move into their departmental courses and EF 105 is only a pre-requisite to EF 230, mainly taken in the second year by engineering students who are required to take the course per their major.

Impact Report for EF 105

Source: WORKING 2025-2026 Undergraduate Catalog

Recommended Background

Comments

Registration Restriction(s)

Registration Permission

Equivalency

Rationale* Added co-requisite of EF 105. Shifting co-requisite from EF157 to EF 158 in order to spread out course offerings of EF 105 over both Fall and Spring semesters instead of all sections having to be taught in the Fall alongside EF 151 and EF 157.

Impact on Other Units* There will be no impact on other units as the first-year engineering students take a two-course sequence before they move into their departmental courses and EF 105 is only a pre-requisite to EF 230, mainly taken in the second year by engineering students who are required to take the course per their major.

Financial Impact* As we are only moving the co-requisite to the second course in a two-course sequence and most engineering students are required to take the course there should be no financial impact for students or EF.

Have you consulted with all programs/departments that will be impacted by this change?* ( ) Yes ( ) No (•) Minor changes only/Not Applicable

Course Description Engineering Leadership: From Concept to Execution introduces engineering students to the concepts, theory, and practice of engineering leadership. Topics include emotional intelligence, communication, decision-making, conflict management, and team dynamics. Through a combination of theory, practical exercises, personal reflection, and real-world case studies, students will gain valuable insights into leadership principles and their application engineering contexts.

Rationale* TCE engineers now have an incoming 4.34 GPA with world-class faculty, facilities and resources to compete with any top program in academics.

We can further distinguish our engineers and prepare them for early career success through enhanced soft-skills, leadership and innovation curriculum with a cross-discipline focus area.

With a collaborative approach, we can build a best-in-class program.

This course will serve as the foundation for the proposed Leadership Entrepreneurship, and Innovation Program.

Credit Hours* 1

Course Description

Students will learn the fundamentals of computer aided manufacturing (CAM) using Fusion software and HAAS CNC milling machines. Classroom instruction will include topics such as design for machining, toolpath selection and generation, cutter tool selection and setup, and safety in machining. Lab sessions will instruct groups of 4 students in the hands-on use of a HAAS CNC mill to produce a set of parts, while learning the basics of safe machine operation, tool setup, and part fixturing. Students will also gain experience using various measuring tools and support equipment such as bandsaws, grinders, and drill presses.

Successfully completing EF 391 will prepare students to design components for CNC milling, which will be the focus in EF 392.

Course Description

Students will complete two projects that will guide them through the full prototype design cycle, from initial ideation to final hardware manufacturing. Classroom instruction will focus on design for manufacturing and assembly (DFMA) and advanced CAM topics. Lab sessions will focus on increasing familiarity with the HAAS CNC machines, culminating in machining and assembling components of the student's own design.

Students who complete EF 392 have the option to take EF 393 which will be a project focused design-and-build experience.

Rationale* The course was launched with 1 CH in Spring 2023 and continued in Spring 2024. The course has gain popularity with engineering seniors, who appreciate the advice and lifelong learnings that the course offers from recorded alumni and the course instructor. The course can now be expanded to a second credit hour for future offerings, to increase the amount of professional information available for dessimation to the students.

Impact on Other Units* The course increases the credit hour from 1 (current) to 2. The impact will be an additional hour of instruction each week that requires a classroom. The current course is offered for one hour. The plan forward would be to offer the course for one hour on two different days for a total of two hours.

Financial Impact* The proposal increases the EF 403 Credit Hours from 1 (current) to 2. The course already has an assigned instructor who has the availability to support the additional credit hour of instruction.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Students may choose from a wide spectrum of courses covering various aspects of computer engineering, computer science, electrical engineering, and related fields.

Progression Policies and Requirements

The department requires at least a C in every computer engineering, computer science, electrical engineering, and mathematics course used for the undergraduate degrees.

Progression of departmental undergraduate students to the upper-division programs of the department is competitive and is based on the space available in the department. Factors considered in the decision include overall grade point average, grades earned in courses required in the lower-division curricula of the department and Tickle College of Engineering, and seriousness of purpose and interest in departmental programs as exemplified by regular and orderly progress through the prescribed curriculum without abuse of withdrawal and course repeat privileges.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Term 1

Footnotes

Beginning students who have had high school computer science and/or who have had significant programming experience (e.g. summer institute study, special research projects, home laboratory) are invited to apply during the summer to the head of the department for permission to take a proficiency examination for COSC 101 - Introduction to Programming. If a satisfactory grade is made on the examination, credit will be allowed for COSC 101. The Department of Electrical Engineering and Computer Science also gives credit in COSC 101 to students who receive a score of 3 or better on the Computer Science Advanced Placement A Examination.
Chosen from the Volunteer Core list. Students should try to select courses that satisfy approved areas and Engaged Inquiries category. Students must have a minimum of 9 credit hours in at least two subject areas for Engaged Inquiries.
Among the computer engineering core electives, you must choose two courses from within the following list: COSC 325, COSC 340, COSC 361, COSC 366, ECE 362, ECE 433, ECE 453, ECE 455. Other courses not currently listed may count as core electives only with departmental approval.
Choose 9 credit hours of computer engineering senior electives with advisor's consent. Acceptable computer engineering senior electives are ECE 4xx and COSC 4xx courses that are not otherwise required, with the exception of COSC 422, which is not allowed.
500-level courses are mentioned here as suggestions to students admitted into the Five-Year BS/MS program. Up to three COSC 5XX or ECE 5XX courses may count as computer engineering core and/or senior electives.

* Meets Volunteer Core Requirements.

Computer Engineering – Honors Concentration

In addition to satisfying the requirements for the electrical engineering, computer engineering, or computer science major, candidates for the honors concentration must also complete the following requirements.

Maintain an overall GPA of 3.4.

Four 100- or 200-level honors courses* (14 hours minimum, at least two courses must be from Materials Science and Engineering, Engineering Fundamentals, Physics, Math, Chemistry, Biology, Statistics, or MSE 117 - Honors: Materials Chemistry or Materials Science and Engineering 207).

Two upper-division honors courses in computer science or electrical and computer engineering (COSC 307, COSC 317, COSC 367, COSC 377, COSC 427 or ECE 317, ECE 347, ECE 357, ECE 358, ECE 417, ECE 427, ECE 477, ECE 478, ECE 487).

Satisfy the Breadth Requirements for the Cook Grand Challenge Honors Program.

*	While most students fulfill this requirement with 100- and 200-level courses, students may substitute upper level courses on approval of the Honors faculty.

Computer Engineering Major – Five-Year BS/MS Program

The department offers a Five-Year BS-MS program for qualified students. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their Master of Science degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the Bachelor of Science degree. Significant components of the program are:

Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 64 hours of required coursework while full admission is granted after completing 96 hours of required coursework with a minimum overall GPA of 3.4.

Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. All courses taken for graduate credit must be approved by the departmental chair of the program. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit.

Students admitted to the program must also follow the normal procedure for admission to the Graduate School. Admission of students into this program must be approved by the department and the Graduate School.

Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* We are adding “ECE 362: Introduction to Cyber-Physical System Security” among the computer engineering core electives.

Financial Impact* NA

Impact on Other Units* NA

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal? ☐ Arts and Humanities ☐ Natural Sciences ☐ Social Sciences

ADMINISTRATIVE USE ONLY

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Students may choose from a wide spectrum of courses covering various aspects of computer science, computer engineering, and related fields. Students must meet the design, depth, and breadth requirements in the department in their selection of these courses. Students are encouraged to discuss an appropriate program with their advisors.

Progression Policies and Requirements

The department requires at least a C in every computer engineering, computer science, electrical engineering, and mathematics course used for the undergraduate degrees.

Progression of departmental undergraduate students to the upper-division programs of the department is competitive and is based on the space available in the department. Factors considered in the decision include overall grade point average, grades earned in courses required in the lower-division curricula of the department and Tickle College of Engineering, and seriousness of purpose and interest in departmental programs as exemplified by regular and orderly progress through the prescribed curriculum without abuse of withdrawal and course repeat privileges.

General Instructions for Requirements

Footnotes

Beginning students who have had high school computer science and/or who have had significant programming experience (e.g. summer institute study, special research projects, home laboratory) should apply during the summer to the head of the department for permission to take a proficiency examination for COSC 101 - Introduction to Programming, Introduction to Computer Science. If a satisfactory grade is made on the examination, credit will be allowed for COSC 101 allowing students to take COSC 102 their first term as a freshman. The Department of Electrical Engineering and Computer Science also gives credit in COSC 101 to students who receive a score of 3 or better on the Computer Science Advanced Placement A Examination. For students who lack this experience, they should take COSC 101 their first term, pushing back courses indicated with this footnote by one semester.
Chosen from Volunteer Core list. Students should try to select courses that satisfy approved areas and Engaged Inquiries category. Students must have a minimum of 9 credit hours in at least two subject areas for Engaged Inquiries.
Acceptable electives include any 3XX or 4XX COSC or ECE course not already used for completion of degree requirements, Math 231, Math 241, Math 371, Math 471, and Math 472. Up to three COSC 5XX or ECE 5XX courses may count as upper-division elections. COSC 422 does not count as an acceptable elective.

* Meets Volunteer Core Requirements.

Computer Science Major – Honors Concentration

In addition to satisfying the requirements for the electrical engineering, computer engineering, or computer science major, candidates for the honors concentration must also complete the following requirements.

Maintain an overall GPA of 3.4.

Four 100- or 200-level honors courses* (14 hours minimum, at least two courses must be from Materials Science and Engineering, Engineering Fundamentals, Physics, Math, Chemistry, Biology, Statistics, or MSE 117 - Honors: Materials Chemistry or MSE 207).

Two upper-division honors courses in computer science or electrical and computer engineering (COSC 307, COSC 317, COSC 367, COSC 377, COSC 427 or ECE 317, ECE 347, ECE 357, ECE 358, ECE 417, ECE 427, ECE 477, ECE 478, ECE 487).

Satisfy the Breadth Requirements for the Cook Grand Challenge Honors Program.

*	While most students fulfill this requirement with 100- and 200-level courses, students may substitute upper level courses on approval of the Honors faculty.

Computer Science Major – Five-Year BS/MS Program

The department offers a Five-Year BS-MS program for qualified students. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their Master of Science degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the Bachelor of Science degree. Significant components of the program are:

Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 64 hours of required coursework while full admission is granted after completing 96 hours of required coursework with a minimum overall GPA of 3.4.

Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. All courses taken for graduate credit must be approved by the departmental chair of the program. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit.

Students admitted to the program must also follow the normal procedure for admission to the Graduate School. Admission of students into this program must be

approved by the department and the Graduate School.

Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*
Updates footnotes to provide math courses as acceptable electives. Tickle College of Engineering - Electrical Engineering and Computer Science - Cybersecurity Engineering Minor

2025-2026 UG Add Program

General Catalog Information

College* Tickle College of Engineering

Department* Electrical Engineering and Computer Science

Program Name* Cybersecurity Engineering Minor

Learning Outcomes The minor in Cybersecurity Engineering prepares graduates in the cybersecurity of integrated cyber-physical systems (CPS). It is designed to provide students with the necessary skills to safeguard existing CPS systems from cyber threats and create resilient new systems. Students will acquire proficiency in the protection of critical infrastructures, such as power, transportation, communication, biomedical, and manufacturing systems.The students will work on cybersecurity principles to develop solutions that prevent, detect, and respond to cyberattacks in CPS based critical infrastructures.

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Requirements*

Campus

Knoxville

The minor requires the completion of a minimum of 22 credits. It includes thirteen hours of core curriculum and nine hours of electives.

Complete Core Curriculum (13 Hours)

COSC 102 Introduction to Computer Science
ECE 255 Introduction to Digital Logic Design
ECE 256 Computer System Interfaces
ECE 362 Introduction to Cyber-Physical System Security

Select Three Courses (9 Hours)

[Before]Choose At least One course (3 hours) among the following two courses:

ECE 459 Secure and Trustworthy Computer Hardware Design
[Before]or

[Before]
ECE 559 - Secure and Trustworthy Computer Hardware Design

[Before]
ECE 469 Mobile and Embedded Systems Security
[Before]or

[Before]
ECE 569 - Mobile and Embedded Systems Security

[Before]
[Before]No more than two courses (6 hours) can come from the following courses:

COSC 366 Introduction to Cybersecurity
ECE 489 Special Topics in Cybersecurity
[Before]
COSC 434 Network Security
[Right] or

[After]
COSC 534- Network Security

[Before]
COSC 466 Software Security
[After] or

[After]
COSC 566- Software Security

[Before]
COSC 469 Human Factors in Cybersecurity
[After] or

[After]
COSC 569-Human Factors in Cybersecurity

[Before]
COSC 483 Applied Cryptography
[After] or

[After]
COSC 583 - Applied Cryptography

[Before]
COSC 489 Special Topics in Cybersecurity
[After] or

[After]
COSC 589- Special Topics in Cybersecurity

Rationale*

There is an existing minor named Cybersecurity Minor in the EECS department that is targeted towards computer science students. We are proposing a new minor called "Cybersecurity Engineering" that will provide non computer science students (Electrical Engineering and Computer Engineering students) a cybersecurity minor focused on cybersecurity engineering targeted towards security of cyber-physical systems

Tickle College of Engineering - Electrical Engineering and Computer Science - Cybersecurity Minor

2025-2026 UG Revise Program

General Catalog Information

College* Tickle College of Engineering

Department* Electrical Engineering and Computer Science

Program Name* Cybersecurity Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The minor in Cybersecurity prepares graduates to be leaders in the protection of data assets. The curriculum focuses on the techniques, policies, operational procedures, and technologies that secure and defend the availability, integrity, authentication, confidentiality, and nonrepudiation of information and information systems, in local as well as more broadly based domains. The curriculum allows students to explore security of a variety of computing environments: embedded, mobile, server, datacenter, cloud, distributed, and special purpose (e.g. HPC). The minor helps prepare students for careers that address security in application design, information systems, infrastructure, system management, and policy.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Campus

Knoxville

Minor Requirements

The minor requires the completion of a minimum of 26 credits. It includes fourteen hours of core curriculum and twelve hours of electives.

Complete core curriculum (14 hours)

COSC 102 Introduction to Computer Science
COSC 202 Data Structures
COSC 230 Computer Organization
COSC 366 Introduction to Cybersecurity

Select four courses (12 hours):

COSC 434 Network Security
[Right] or
[After] COSC 534 - Network Security

[Before]
COSC 466 Software Security
[Right] or
[After]
COSC 566 - Software Security

[Before]
COSC 469 Human Factors in Cybersecurity
[Right] or
[After]
COSC 569 - Human Factors in Security

[Before]
COSC 483 Applied Cryptography
[Right] or
[After] COSC 583 - Applied Cryptography

COSC 489 Special Topics in Cybersecurity
[Right] or
[After] COSC 589 - Special Topics in Cybersecurity

[Before]

No more than two courses (6 hours) can come from the following:

ECE 362 Introduction to Cyber-Physical System Security
ECE 459 Secure and Trustworthy Computer Hardware Design
[Right] or
[After] ECE 559 - Secure and Trustworthy Computer Hardware Design

[Before]
ECE 469 Mobile and Embedded Systems Security
[Right] or

[After] ECE 569 - Mobile and Embedded Systems Security

ECE 489 Special Topics in Cybersecurity

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* The minor is updated to streamline it for Computer Science majors by listing what core courses need to be taken and what electives can be selected to fulfil the minor requirements.

Financial Impact* NA

Impact on Other Units* NA

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?
- ☐ Arts and Humanities
- ☐ Natural Sciences
- ☐ Social Sciences

ADMINISTRATIVE USE ONLY

Impact Level
- ☑ Low
- ☐ Mid
- ☐ High

ACALOG Program OID 34381

ACALOG Program Status
- ◉ Active-Visible
- ○ Inactive-Hidden

Notes

Tickle College of Engineering - Electrical Engineering and Computer Science - Electrical Engineering Major, BS in Electrical Engineering

2025-2026 UG Revise Program

General Catalog Information

College* Tickle College of Engineering

Department* Electrical Engineering and Computer Science

Program Name* Electrical Engineering Major, BS in Electrical Engineering

Degree Type* Bachelor of Science in Electrical Engineering

Program Type* Undergrad (Major)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Students in the senior year may choose from a wide spectrum of courses covering all aspects of electrical and computer engineering. Students must meet the design, depth, and breadth requirements of the department in their selection of these courses. The design requirement is met through a major engineering design experience in ECE 402*, Senior Design, and through the design process being integrated into specified courses throughout the program. Students are encouraged to discuss an appropriate senior program with their advisors.

Progression Policies and Requirements

The department requires at least a C in every computer engineering, computer science, electrical engineering, and mathematics course used for the undergraduate degrees.

Progression of departmental undergraduate students to the upper-division programs of the department is competitive and is based on the space available in the department. Factors considered in the decision include overall grade point average, grades earned in courses required in the lower-division curricula of the department and Tickle College of Engineering, and seriousness of purpose and interest in departmental programs as exemplified by regular and orderly progress through the prescribed curriculum without abuse of withdrawal and course repeat privileges.

Students who take ECE 202 will be evaluated during the semester they are registered for it. Transfer students for whom ECE 202 transfer credit is given may take 9 semester hours in departmental courses before progression evaluation. All students, whether or not they transfer in, who are not accepted into the upper-division program of the department will be put in either a temporary probationary status or a non-progressed status and will not be permitted to register for any upper-division courses within the department.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Term 1

Total Credit Hours 125-128

Footnotes

Beginning students who have had high school computer science and/or who have had significant programming experience (e.g. summer institute study, special research projects, home laboratory) are invited to apply during the summer to the head of the department for permission to take a proficiency examination for COSC 101 - Introduction to Programming. If a satisfactory grade is made on the examination, credit will be allowed for COSC 101. The Department of Electrical Engineering and Computer Science also gives credit in COSC 101 to students who receive a score of 5 or better on the Computer Science Advanced Placement A Examination.
Chosen from Volunteer Core list. Students should try to select courses that satisfy approved areas and Engaged Inquiries category. Students must have a minimum of 9 credit hours in at least two subject areas for Engaged Inquiries.
Choose 12 credit hours of Electrical Engineering senior electives with advisor's consent. Up to three COSC 5XX or ECE 5XX courses may count as upper-division electives. Acceptable electrical engineering senior electives are ECE 4xx courses that are not otherwise required.
Technical electives chosen from CHEM 132* or CHEM 133* or CHEM 138*; COSC 311, MATH 300 or MATH 307; COSC 370 or COSC 377; COSC 325; COSC 422; ECE 256, ECE 351, ECE 356 or ECE 358, ECE 362; EF 203, EF 303; IE 405, IE 457; ME 231, ME 321, ME 331, ME 363, ME 367; MSE 201 or MSE 207, MSE 410, MSE 460; NE301, NE 303, ECE 302, NE 342 or NE 347; PHYS 250.*

* Meets Volunteer Core Requirements.

Electrical Engineering – Honors Concentration

In addition to satisfying the requirements for the electrical engineering, computer engineering, or computer science major, candidates for the honors concentration must also complete the following requirements.

Maintain an overall GPA of 3.4.

Four 100- or 200-level honors courses* (14 hours minimum, at least two courses must be from Materials Science and Engineering, Engineering Fundamentals, Physics, Math, Chemistry, Biology, Statistics, or MSE 117 - Honors: Materials Chemistry or MSE 207).

Two upper-division honors courses in computer science or electrical and computer engineering (COSC 307, COSC 317, COSC 367, COSC 377, COSC 427 or ECE 317, ECE 347, ECE 357, ECE 358, ECE 417, ECE 427, ECE 477, ECE 478, ECE 487).

Satisfy the Breadth Requirements for the Cook Grand Challenge Honors Program.

*	While most students fulfill this requirement with 100- and 200-level courses, students may substitute upper level courses on approval of the Honors faculty.

Electrical Engineering Major – Five-Year BS/MS Program

The department offers a Five-Year BS-MS program for qualified students. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their Master of Science degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the Bachelor of Science degree. Significant components of the program are:

Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 64 hours of required coursework while full admission is granted after completing 96 hours of required coursework with a minimum overall GPA of 3.4.

Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. All courses taken for graduate credit must be approved by the departmental chair of the program. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit.

Students admitted to the program must also follow the normal procedure for admission to the Graduate School. Admission of students into this program must be approved by the department and the Graduate School. Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* Technical electives have been updated to include machine learning courses, cybersecurity courses and courses on minor in nuclear power engineering.

Financial Impact* NA

Impact on Other Units* NA

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The department offers a concentration for undergraduates who are interested in the fields of power system and power electronics. This concentration pulls together currently-offered courses to provide students with an in-depth focus towards control systems, operations, planning, system components, power electronics, and circuits.

Progression Policies and Requirements

The department requires at least a C in every computer engineering, computer science, electrical engineering, and mathematics course used for the undergraduate degrees.

Progression of departmental undergraduate students to the upper-division programs of the department is competitive and is based on the space available in the department. Factors considered in the decision include overall grade point average, grades earned in courses required in the lower-division curricula of the department and Tickle College of Engineering, and seriousness of purpose and interest in departmental programs as exemplified by regular and orderly progress through the prescribed curriculum without abuse of withdrawal and course repeat privileges.

Footnotes

Beginning students who have had high school computer science and/or who have had significant programming experience (e.g. summer institute study, special research projects, home laboratory) are invited to apply during the summer to the head of the department for permission to take a proficiency examination for COSC 101 - Introduction to Programming. If a satisfactory grade is made on the examination, credit will be allowed for COSC 101. The Department of Electrical Engineering and Computer Science also gives credit in COSC 101 to students who receive a score of 5 or better on the Computer Science Advanced Placement A Examination.
Chosen from Volunteer Core list. Students should try to select courses that satisfy approved areas and Engaged Inquiries (EI) category. Students must have a minimum of 9 credit hours in at least two subject areas for Engaged Inquiries (EI).
Select two courses (6 hours) from: ECE 415, ECE 421, ECE 422, ECE 481, ECE 482, ECE 521, ECE 522, ECE 523, ECE 525.
Technical electives chosen from CHEM 132* or CHEM 133* or CHEM 138*; COSC 311 or MATH 300 or MATH 307; COSC 370 or COSC 377, COSC 422 , COSC 325; ECE 256, ECE 351, ECE 362; EF 203, EF 303; IE 405; ME 231, ME 321, ME 331 ; MSE 201 or MSE 207, MSE 410, MSE 460; NE301, ECE302, NE303, NE 342 or NE 347; PHYS 250*.
Choose 6 credit hours of electrical engineering senior electives with advisor's consent. Up to two (2) COSC 5XX or ECE 5XX courses may count as upper-division electives. Acceptable senior electives are ECE 4xx courses that are not otherwise required.
Economic, Entrepreneurship, and Innovation Elective chosen from IE 405, IE 457 (or ME 457), IE 518, IE 557 (or ME 519), MGT 552, or MGT 560.

* Meets Volunteer Core Requirements.

Electrical Engineering – Power and Energy Systems – Honors Concentration

In addition to satisfying the requirements for the electrical engineering, computer engineering, or computer science major, candidates for the honors concentration must also complete the following requirements.

Maintain an overall GPA of 3.4.

Four 100- or 200-level honors courses* (14 hours minimum, at least two courses must be from Materials Science and Engineering, Engineering Fundamentals, Physics, Math, Chemistry, Biology, Statistics, or MSE 117 - Honors: Materials Chemistry or Materials Science and Engineering 207).

Two upper-division honors courses in computer science or electrical and computer engineering (COSC 307, COSC 317, COSC 367, COSC 377, COSC 427 or ECE 317, ECE 347, ECE 357, ECE 358, ECE 417, ECE 427, ECE 477, ECE 478, ECE 487).

Satisfy the Breadth Requirements for the Cook Grand Challenge Honors Program.

*	While most students fulfill this requirement with 100- and 200-level courses, students may substitute upper level courses on approval of the Honors faculty.

Electrical Engineering – Power and Energy Systems Concentration – Five-Year BS/MS Program

The department offers a Five-Year BS-MS program for qualified students. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their Master of Science degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the Bachelor of Science degree. Significant components of the program are:

Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 64 hours of required coursework while full admission is granted after completing 96 hours of required coursework with a minimum overall GPA of 3.4.

Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. All courses taken for graduate credit must be approved by the departmental chair of the program. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit.

Students admitted to the program must also follow the normal procedure for admission to the Graduate School. Admission of students into this program must be approved by the department and the Graduate School. Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* Technical electives have been updated to include machine learning courses, cybersecurity courses and courses on minor in nuclear power engineering.

Financial Impact* Updating the electives

Impact on Other Units* NA

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Tickle College of Engineering - Electrical Engineering and Computer Science - Machine Learning Minor

2025-2026 UG Revise Program

General Catalog Information

College* Tickle College of Engineering

Department* Electrical Engineering and Computer Science

Program Name* Machine Learning Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The minor in Machine Learning prepares graduates for careers or graduate study in the area of Machine Learning. As every industry, not limited to the computing industry, is adopting some sort of technology related to machine learning and artificial intelligence, this minor program allows undergraduates to master the core principles of this field.

The Machine Learning minor program is intended for students majoring in computer science, computer engineering, and electrical engineering.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Campus

Knoxville

Minor Requirements:

The minor consists of 15 credit hours as follows.

Complete core curriculum (3 hours)

COSC 325 Introduction to Machine Learning

Select four courses (12 hours):

COSC 420 Biologically-Inspired Computation
[After] or
[After] COSC 527 Biologically-Inspired Computation **3 Credit Hours**

[Before]
COSC 421 Computational Cognitive Neuroscience
[Before]
COSC 423 Introduction to Artificial Intelligence
[After] or

[Before]COSC 523 – Artificial Intelligence

[Before]
COSC 426 Introduction to Data Engineering
[After] or
[After]
COSC 526 Data Engineering **3 Credit Hours**

[Before]
COSC 424 Introduction to Deep Learning
[After] or
[After] COSC 525 Deep Learning **3 Credit Hours**

[After]
COSC 429 Special Topics in Artificial Intelligence and Machine Learning
[After]
ECE 414 Introduction to Reinforcement Learning
[After] or
[After] ECE 517 Reinforcement Learning **3 Credit Hours**

[Before]
COSC 445 Fundamentals of Digital Archeology
[After] or
[After] COSC 545 Fundamentals of Digital Archeology **3 Credit Hours**

[Before]
[After] COSC 524 - Natural Language Processing

[After] COSC 557 Visualization 3 Credit Hours

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* Minor is updated by removing courses not related to machine learning such as COSC 362: Introduction to Computer Networks. Machine learning aligned courses such as COSC 524: Natural Language processing is added to the minor.

Financial Impact* NA

Impact on Other Units* NA

Have you consulted with all programs/departments that will be impacted by this change?* ○ Yes ◉ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Tickle College of Engineering - Engineering Fundamentals Program - Engineering Leadership and Entrepreneurship Certificate

2025-2026 UG Add Program

General Catalog Information

College* Tickle College of Engineering

Department* Engineering Fundamentals Program

Program Name* Engineering Leadership and Entrepreneurship Certificate

Learning Outcomes

Upon completing the Engineering Leadership and Entrepreneurship certificate program, students will achieve the following learning outcomes:
Develop Entrepreneurial Mindsets
Students will learn to identify and evaluate opportunities for innovation, apply creative problem-solving, and develop viable business models around technological solutions.

Lead High-Performing Teams
Graduates will gain the leadership skills necessary to inspire, manage, and grow teams in entrepreneurial settings, including skills in communication, team dynamics, and strategic decision-making.

Apply Engineering Principles to Product Development
Participants will leverage their technical knowledge to design, prototype, and bring engineering solutions to market, understanding how to balance technological innovation with practical business needs.

Navigate the Startup Ecosystem
Graduates will gain insights into the entrepreneurial ecosystem, including startup funding, venture capital, and the regulatory environment, preparing them to successfully launch and scale new enterprises.

Degree Type* Undergraduate Certificate

Program Type* Undergraduate Certificate

IE 405 Engineering Economic Analysis
[After] * Satisfies Volunteer Core Requirements

Rationale*

TCE engineers now have an incoming 4.34 GPA with world-class faculty, facilities and resources to compete with any top program in academics. We can further distinguish our engineers and prepare them for early career success through enhanced soft-skills, leadership and innovation curriculum with a cross-discipline focus area. With a collaborative approach, leveraging the outstanding academic programs across campus, we can build a best-in-class program by offering students interdisciplinary certificate options in engineering leadership and entrepreneurship, engineering leadership and project management, and engineering leadership and public policy.

The Engineering Leadership and Entrepreneurship certificate program at the Tickle College of Engineering is designed to prepare engineers for leadership roles in entrepreneurial ventures and innovative industries.

This 12-credit interdisciplinary program focuses on equipping students with both technical and business acumen, empowering them to lead technology-based startups, manage product development, and foster innovation within existing companies.

Through a combination of engineering, leadership, and business-focused courses, students will learn how to identify market opportunities, develop business strategies, and lead teams that turn innovative ideas into viable products and services.

Graduates of this program will be well prepared for roles in innovation-based ventures such as:
Startup Founder or Co-Founder: Lead and launch technology-based companies, bringing innovative products and services to market.

Product Manager: Oversee the development, marketing, and scaling of new technologies or products within tech companies.

Venture Capital Analyst or Advisor: Evaluate technology startups for investment opportunities and guide entrepreneurs in refining their business strategies.

Engineering Consultant: Provide strategic advice to startups or growing companies on engineering design, prototyping, and business planning.

Tickle College of Engineering - Engineering Fundamentals Program - Engineering Leadership and Project Management Certificate

2025-2026 UG Add Program

General Catalog Information

College* Tickle College of Engineering

Department* Engineering Fundamentals Program

Program Name* Engineering Leadership and Project Management Certificate

Learning Outcomes

Upon completing the Engineering Leadership and Project Management certificate program, students will achieve the following learning outcomes::

Lead Multidisciplinary Teams
Graduates will develop leadership skills to manage and inspire diverse teams, ensuring collaboration and alignment across engineering, operations, and business functions.

Resource and Time Management
Students will learn how to efficiently allocate resources, manage project timelines, and optimize workflows, ensuring that projects stay on track and within budget.

Risk Management and Problem Solving
Participants will acquire skills in risk assessment, mitigation strategies, and problem-solving techniques, preparing them to handle project challenges and minimize disruptions.

Effective Communication and Stakeholder Engagement
Students will learn how to communicate clearly and persuasively with stakeholders, clients, and team members, ensuring transparency, alignment, and the successful delivery of project objectives.

Strategic Decision-Making
Graduates will be equipped to make data-driven decisions that optimize project outcomes, balancing technical and business considerations to achieve long-term success.

Sustainability and Ethical Project Leadership
Graduates will learn to incorporate sustainability and ethical decision-making into project plans, promoting responsible engineering practices that benefit society and the environment.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The Engineering Leadership and Project Management certificate program at the Tickle College of Engineering is designed to provide engineers with the leadership, organizational, and technical skills required to lead complex projects from inception to completion. This 12-credit program integrates key project management principles with engineering leadership, preparing students to effectively manage teams, resources, and timelines in both technical and cross-functional environments. The curriculum emphasizes the application of project management tools and methodologies, as well as the development of strategic leadership skills that enable engineers to oversee projects, mitigate risks, and ensure successful outcomes in a variety of industries.

Tickle College of Engineering - Engineering Fundamentals Program - Engineering Leadership and Public Policy Certificate

2025-2026 UG Add Program

General Catalog Information

College* Tickle College of Engineering

Department* Engineering Fundamentals Program

Program Name* Engineering Leadership and Public Policy Certificate

Learning Outcomes

Upon completing the Engineering Leadership and Public Policy certificate program, students will achieve the following learning outcomes:

1. Integrate Engineering and Public Policy Knowledge

Students will demonstrate the ability to analyze and apply engineering principles within the context of public policy frameworks, understanding how government regulations, legal standards, and public policy affect engineering decisions and innovation.

2. Develop Strategic Leadership Skills

Participants will cultivate leadership and decision-making skills, enabling them to lead cross-disciplinary teams, manage complex engineering projects, and influence policy development in technology-driven sectors.

3. Engage in Policy Advocacy and Communication

Graduates will be equipped to effectively communicate engineering challenges and technological innovations to policymakers, stakeholders, and the public. They will learn to advocate for evidence-based policy changes that support technological advancement.

4. Collaborate Across Disciplines

Students will develop the skills to work collaboratively with professionals in public policy, law, and other disciplines, ensuring that engineering projects align with broader societal goals and regulations.

These learning outcomes prepare engineers to lead in roles where technology and policy intersect, driving innovation in industries influenced by public policy and regulation.

Course Title (max 100 characters)* Leadership in Industrial Engineering

Credit Hours* 1

Change course status from active to:* (•) Dropped (Inactive-Hidden) ( ) Archived

Course Description Aspects of leadership in a professional environment will be studied from current literature reading and discussions. Industry professionals will periodically lead the class to enlighten students to aspects of the practice of industrial engineering. Regular submission of written papers on assigned and discussed topics will be critically reviewed to emphasize key aspects of professional level written communications including content, format, and referencing.

Satisfies Volunteer Core Requirement: (WC)

Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

Equivalency N/A

Rationale* Key topics from IE 250 course will be consolidated into the course content of IE 201 Introduction to Industrial and Systems Engineering.

IE 201 will also be revised to satisfy the Written Communication (WC) designation and this will be submitted to the Vol Core committe and the UG Curriculum Council. An IE 201 change proposal will also be submitted separately to MC Curriculum for the 2025-2026 Catalog.

Impact on Other Units* Source: WORKING 2025-2026 Undergraduate Catalog

(RE) Prerequisite(s):	IE 422 - Industrial Engineering Design II
Programs	Applied Oral Communication (AOC)
	General Education Requirements for 2021-2022 or earlier
	Industrial Engineering Major, BS in Industrial Engineering
	Written Communication (WC)

IE 250 is listed as a WC program, though not as an AOC program. IE 201 content will be revised and submitted through Vol Core Committee and UG Curriculum Council for WC designation in 2025-2026 Catalog, as well as a proposal in MC Curriculum to update the WC Vol Core requirement.

IE 422 will be submitted in MC Curriculum to remove the IE 250 pre-requisite.

Financial Impact* None. ISE Faculty will be realigned to accommodate teaching in other courses. There will be no impact to not having this class available for current Faculty.

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Arts and Sciences Originators Only

For N/R/S base courses, should this course be: ○ Active ○ Archived ○ N/A

Variable Title? ○ Yes ○ No

Credit Hours* 3

Course Description Current real-world problems will be drawn from local production and service organizations and presented by personnel from these organizations. Senior industrial engineering student teams will solve these real-world problems under the guidance of their instructor using industrial engineering methodology. These problems emphasize problem definitions, analysis, and presentation with considerations for engineering standards and realistic economic, environmental, ethical, safety, social, political, and other pertinent constraints.

Statement about Crosslistings:

Recommended Background

Comments

Registration Restriction(s)

Registration Permission

Equivalency

Rationale* A proposal has been submitted in MC Curriculum to drop IE 250. Therefore, IE 422 will no longer list this course as a pre-requisite. Furthermore, IE 250 is a 1 credit hour course. The dropped credit hour will be added to IE 422.

IE 422 should be a 3 credit hour course due to the amount of work required for students to complete. A 3 credit hour senior design II course matches similar requirements in other other TCE departments, as well as peer ISE programs outside of UTK.

Impact on Other Units* N/A

Financial Impact* The proposal increases the IE 422 Credit Hours from 2 (current) to 3. The course already has an assigned instructor who has the availability to support the additional credit hour of instruction.

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No ○ Minor changes only/Not Applicable

Credit Hours* 3

Course Description The objective is to introduce students to how business and engineering collaborate and develop focused critical problem-solving skills through a gated development process. Students are presented with industry-driven business problems from a systems perspective, allowing students to analyze a range of systems from simple entities to larger more complex systems such as organizations. Critical problem-solving skills include defining the right problem, understanding the current state of the system, detailing a solution that overcomes critical root causes or presents the best business opportunity, and presenting solutions and business cases to organizational stakeholders.

- ( ) Archived
- ( ) N/A

Variable Title?
- ( ) Yes
- ( ) No

Credit Hours* 3

Course Description

The first part of a two-course sequence where teams of consultants from both the Tickle College of Engineering and Haslam College of Business partner with industry sponsors to design and build authentic products and processes. Working closely with industry business and engineering liaisons and subject matter expert lead consultants (faculty), consultants gain practical experience in teamwork and communication, problem-solving and design, and develop leadership, management and people skills. Weekly workshop activities adapt lecture topics to individual projects. Consultants learn firsthand how to develop products and processes that meet customer requirements on time and within budget. The sequence is serving students in the Heath Integrated Business and Engineering Program (Heath IBEP) and others within the two colleges.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Instructional Method* Lecture

Recommended Background

Comments

Registration Restriction(s) Senior standing and consent of instructor.

Registration Permission

Equivalency* N/A

Exception has been allowed on 11/5/2024 to continue with this proposal without a Banner equivalency. This proposal effectively drops EF 437 and adds IES 437 but these not equivalent courses, as we intend IES 437 to not retain the WC designation.

Rationale*

1. Courses EF 437 and 438 serve as a capstone to IBEP and were developed as approved substitutes for senior project courses across the Tickle College of Engineering.
    1. Senior projects courses typically satisfy VolCore requirements such as Oral Communications (OC), Applied Oral Communications (AOC), and in the case of Industrial Engineering (IE 404) and Nuclear Engineering (NE 472), Engaged Inquiries (EI).
    2. Since all engineering students gain 8 of the required 9 EI credits in the EF physics sequence (either EF 151/152 or EF 157/158), and not all EI credits can be obtained from courses from the same prefix, students from ISE and NE departments either have to i) complete an additional course to satisfy EI requirements or ii) not participate in IBEP or EF 437/438. Changing the course prefix to IES will resolve this constraint.
2. The EF course prefix aligns well with core engineering first and second-year courses such as engineering physics 1 and 2.
3. The IES course prefix aligns with the themes of courses created to support the Heath Integrated Business and Engineering Program, the Leadership, Entrepreneurship and Innovation Program, and the Engineering Entrepreneurship minor.

Exception has been allowed on 11/5/2024 to continue with this proposal without a Banner equivalency. This proposal effectively drops EF 437 and adds IES 437 but these not equivalent courses, as we intend IES 437 to not retain the WC designation.

Rationale* Nuclear Engineering has created a new minor. Cross-listing this course within ME enables our majors to take this course within Departmental Electives and meet the minor requirements.

Impact on Other Units* This will support Nuclear Engineering adding students to their Nuclear Power Engineering minor.

Financial Impact* Minor - will add some Mechanical Engineering majors taking electives in courses taught by Nuclear Engineering.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

PROGRESSION POLICIES AND REQUIREMENTS

Graduation in materials science and engineering requires a minimum grade point average of 2.0 for all departmental courses taken at The University of Tennessee, Knoxville. No more than seven credit hours of materials science and engineering courses in which a C- or lower is the highest grade earned may be counted toward graduation. Students are strongly encouraged to meet with their advisor every semester.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Knoxville

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Chosen from Volunteer Core list.
Chosen from BCMB 230; BIOL 150* or BIOL 158*, BIOL 159*, BIOL 160*, BIOL 168*; BME 409; CHEM 260, CHEM 360; CBE 475; ECE 301; EF 333; ENGL 360*; EEPS 310*; MATH 475*; MSE 457, MSE 483, MSE 484, BME 485, MSE 486, any MSE course; other 300- or 400-level science or engineering courses as approved by academic advisor and department head.
Chosen from MSE 404, MSE 405, MSE 408, MSE 410, MSE 415, MSE 420, MSE 425, MSE 432, MSE 442, MSE 443, MSE 450, MSE 451, MSE 455, MSE 460, MSE 466, MSE 474, MSE 475, MSE 494, MSE 495, MSE 496R.

* Meets Volunteer Core Requirements.

Materials Science and Engineering Major – Honors Concentration

In addition to satisfying the requirements for the materials science and engineering major, candidates for the honors materials science and engineering concentration must also complete the following requirements.

Maintain an overall GPA of 3.4.
Four 100- or 200-level honors courses* (14 hours minimum, at least two courses must be from Engineering Fundamentals, Physics, Math, Chemistry, Biology, Statistics, or MSE 117 - Honors: Materials Chemistry or MSE 207 - Honors: Introduction to Materials Science and Engineering).
Two upper-division honors courses in materials science and engineering (from MSE 347, MSE 357, MSE 367, MSE 397).
Satisfy the Breadth Requirements for the Cook Grand Challenge Honors Program.

*	While most students fulfill this requirement with 100- and 200-level courses, students may substitute upper level courses on approval of the Honors faculty.

Materials Science and Engineering Major – Five-Year BS/MS Program

The department offers a Five-Year BS-MS program with a BS (major in materials science and engineering) and an MS (major in materials science and engineering) for qualified students. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their Master of Science degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the Bachelor of Science degree. Significant components of the program are:

Students must have an overall GPA of 3.4 in required coursework. Conditional admission to the five-year program may be granted after completion of 65 hours of required coursework, while full admission may be granted after the completion of 96 hours of required coursework with a minimum overall GPA of 3.4.

Students must at least be conditionally admitted to the program prior to taking graduate courses for both their bachelor's and master's degrees. All courses taken for graduate credit must be approved by the graduate program director. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit.

Students admitted to the program must also follow the normal procedure for admission to the Graduate School. Admission of students into this program must be approved by the department and the Graduate School. Students will not be eligible for assistantships until they are enrolled as graduate-level students in the Graduate School.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* Add MSE 404, a new course for AY 2024-2025, and MSE 420 and MSE 442, both being proposed for the AY 2025-2026 AY, to the list of acceptable Materials Science and Engineering electives.

Financial Impact* None

Impact on Other Units* None

Have you consulted with all programs/departments that will be impacted by this change?* ○ Yes ◉ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Compared to the base major, this concentration requires 15 hours of courses including MSE 120 or MSE 127, MSE 455, a senior design project (MSE 480 and MSE 489) related to sustainable energy, and a technical elective from the "Technical Track 2: Energy and Climate" of the Engineering Sustainability Minor or EF 305.

Progression Policies and Requirements

Graduation in materials science and engineering requires a minimum grade point average of 2.0 for all departmental courses taken at The University of Tennessee, Knoxville. No more than seven credit hours of materials science and engineering courses in which a C- or lower is the highest grade earned may be counted toward graduation. Students are strongly encouraged to meet with their advisor every semester.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Knoxville

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

A minor in materials science and engineering is offered through the Tickle College of Engineering to those undergraduate students who have met the prerequisites for the courses required by the minor. The minor requires completion of a minimum of 13 hours in coursework which develops a foundation in materials science and engineering and allows concentration in materials science and engineering areas to be selected by the students (e.g., metallurgy, polymers, ceramics, composites, or electronic materials). Some of the courses used for the materials science and engineering minor may also satisfy requirements for the student's major.

Students may enroll in the minor program by meeting and discussing their intent and plan with the Materials Science and Engineering Academic Advisor who will communicate with the student's major departmental advisor.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Tickle College of Engineering - Mechanical, Aerospace, and Biomedical Engineering - Aerospace Engineering Major, BS in Aerospace Engineering

2025-2026 UG Revise Program

General Catalog Information

College* Tickle College of Engineering

Department* Mechanical, Aerospace, and Biomedical Engineering

Program Name* Aerospace Engineering Major, BS in Aerospace Engineering

Degree Type* Bachelor of Science in Aerospace Engineering

Program Type* Undergrad (Major)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Aerospace engineering uses the basic sciences and mathematics to develop the foundation for the design, development, production, testing, and applied research associated with aerospace vehicles. These vehicles include aircraft, spacecraft, and missiles. Auxiliary and propulsion systems are also an integral part of this education. These include guidance, control, environmental, ramjet, rocket, turbo-jet, and piston engine systems. Emphasis in the senior year is directed toward these topics, and the program culminates in a major aerospace design project. The educational objectives of the aerospace engineering program are either to be an entrepreneur or to be employed in industry, government, academia or a nongovernmental organization, and to continue professional development by participating in structured professional activities and/or by obtaining professional registration or certification, post-graduate credits and/or graduate degrees.

PROGRESSION POLICIES AND REQUIREMENTS

Progression

The first two years of the curriculum are considered to be lower-division and the two remaining years upper-division. Students must apply for progression to departmental upper-division courses, which depends on academic performance. Factors considered include overall grade point average, performance in selected lower-division courses and evidence of orderly progression through the prescribed curriculum.

Full Status

A lower-division student may apply for progression to upper-division after completing EF 152* or EF 158*, CHEM 122* and CHEM 123* or CHEM 128*, MATH 231, ME 202, ME 231, and ME 321, with a grade of C or better in each, and an overall GPA of at least 2.4 in these courses. Students who have not satisfied the requirements for full status will be dropped from departmental class rolls in upper-division courses.

Provisional Status

Students who have completed EF 152* or EF 158*, CHEM 122* and CHEM 123* or CHEM 128*, MATH 231, ME 202, ME 231 and ME 321, with a grade of C or better and have a GPA between 2.0 and 2.4 in these courses may apply for provisional status. The granting of provisional status is based on the availability of space in departmental programs after full status students have been accommodated. Provisional status students are required to demonstrate their ability to perform satisfactorily in upper-division by attaining a minimum GPA of 2.0 in the first 12 hours of 300-level required engineering courses. Award of upper-division full status is dependent upon this performance. Students with a UTK GPA less than 2.0 will not be admitted to upper-division. Students who have not progressed to upper-division will be dropped from departmental class rolls in upper-division courses.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Choose from the Volunteer Core list.

Choose from: Any 400-level AE course not otherwise required for the major; ME 315, ME 365, ME 366, ME 405, ME 451, ME 463, ME 466, ME 470, ME 472, ME 475 or ME 477, ME 476, or ME 480. Other courses require prior approval by the department.

* Meets Volunteer Core Requirement.

Aerospace Engineering Major – Honors Concentration

In addition to satisfying the requirements for the aerospace engineering major, candidates for the honors aerospace engineering concentration must also complete the following requirements.

Maintain an overall GPA of 3.4.

Four 100- or 200-level honors courses* (14 hours minimum, at least two courses must be from Materials Science and Engineering, Engineering Fundamentals, Physics, Math, Chemistry, Biology, Statistics, or MSE 207).

Complete two upper-division honors courses in aerospace engineering (AE 347, AE 377).

Satisfy the Breadth Requirements for the Cook Grand Challenge Honors Program.

*	While most students fulfill this requirement with 100- and 200-level courses, students may substitute upper level courses on approval of the Honors faculty.

Aerospace Engineering Major – Five-Year BS/MS Program

The department offers a Five-Year BS-MS program for qualified students. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their Master of Science degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the Bachelor of Science degree. Significant components of the program are:

Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 64 hours of required coursework while full admission is granted after completing 96 hours of required coursework with a minimum overall GPA of 3.4 in required coursework.

Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. All courses taken for graduate credit must be approved by the departmental chair of the program. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit. Students admitted to the program must also follow the normal procedure for admission to the Graduate School.

Admission of students into this program must be approved by the department and the Graduate School.

Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* AE 450 has been approved as a Vol Core Oral Communication elective. The generic OC Elective requirement can therefore be removed as it no longer satisfies any degree requirement.

Financial Impact* Minor to any one unit since OC electives are taught among many units.

Impact on Other Units* Minor to any one unit since OC electives are taught among many units.

Have you consulted with all programs/departments that will be impacted by this change?* ○ Yes ◉ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Mechanical engineering involves the design, analysis, testing, and manufacture of mechanical and thermal systems. Mechanical engineers are employed in nearly every industry, from basic research through mass production of energy systems, computer software/hardware, robotics, and automobiles.

Mechanical engineering is a versatile and broadly based engineering discipline that also provides pathways into many exciting fields of specialization. Its foundation is in the basic sciences, but mechanical engineers must further understand such subject areas as mechanical design, solid and fluid mechanics, thermodynamics, heat transfer, vibrations, manufacturing processes, instrumentation and automatic control. Design projects throughout the curriculum develop student skills in handling practical real-world problems. Because of the broad engineering foundation and design training in this program, graduates are found in nearly every industry and at different levels of research, design, and management.

PROGRESSION POLICIES AND REQUIREMENTS

Progression

The first two years of the curriculum are considered to be lower-division and the two remaining years upper-division. Students must apply for progression to departmental upper-division courses, which depends on academic performance. Factors considered include overall grade point average, performance in selected lower-division courses and evidence of orderly progression through the prescribed curriculum.

Full Status

A lower-division student may apply for progression to upper-division after completing EF 152* or EF 158*, CHEM 122* and CHEM 123* or CHEM 128*, MATH 231, ME 202, ME 231, and ME 321, with a grade of C or better in each, and an overall GPA of at least 2.4 in these courses. Students who have not satisfied the requirements for full status will be dropped from departmental class rolls in upper-division courses.

Provisional Status

Students who have completed EF 152* or EF 158*, CHEM 132* and CHEM 133* or CHEM 138*, MATH 231, ME 202, ME 231 and ME 321, with a grade of C or better and have a GPA between 2.0 and 2.4 in these courses may apply for provisional status. The granting of provisional status is based on the availability of space in departmental programs after full status students have been accommodated. Provisional status students are required to demonstrate their ability to perform satisfactorily in upper-division by attaining a minimum GPA of 2.0 in the first 12 hours of 300-level required engineering courses. Award of upper-division full status is dependent upon this performance. Students with a UTK GPA less than 2.0 will not be admitted to upper-division. Students who have not progressed to upper-division will be dropped from departmental class rolls in upper-division courses.

Footnotes

Choose any course from the Volunteer Core list.

Any 300-level or above courses in aerospace, biomedical, or mechanical engineering that are not already required.

Must be pre-approved and petitioned by the advisor and department head.

* Meets Volunteer Core Requirements.

Mechanical Engineering – Honors Concentration

In addition to satisfying the requirements for the mechanical engineering major, candidates for the honors mechanical engineering concentration must also complete the following requirements.

Maintain an overall GPA of 3.4.

Four 100- or 200-level honors courses* (14 hours minimum, at least two courses must be from Materials Science and Engineering, Engineering Fundamentals, Physics, Math, Chemistry, Biology, Statistics, or MSE 207).

Complete two upper-division honors courses in mechanical engineering (ME 367, ME 397, ME 477).

Satisfy the Breadth Requirements for the Cook Grand Challenge Honors Program.

*	While most students fulfill this requirement with 100- and 200-level courses, students may substitute upper level courses on approval of the Honors faculty.

Mechanical Engineering – Five-Year BS/MS Program

The department offers a Five-Year BS-MS program for qualified students. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their Master of Science degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the Bachelor of Science degree. Significant components of the program are:

Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 64 hours of required course work while full admission is granted after completing 96 hours of required course work with a minimum overall GPA of 3.4 in required course work.

Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. All courses taken for graduate credit must be approved by the departmental chair of the program. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit. Students admitted to the program must also follow the normal procedure for admission to the Graduate School.

Admission of students into this program must be approved by the department and the Graduate School.

Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* ME 450 is now approved as a Vol Core Oral Communication (OC) course. The general OC requirement in Term 8 can therefore be removed as it serves no degree requirement.

Financial Impact* Minor to any one unit since many units offer OC courses.

Impact on Other Units* Minor to any one unit since many units offer OC courses.

Have you consulted with all programs/departments that will be impacted by this change?* ○ Yes ◉ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Course Description An introduction to the fundamentals of nuclear chemistry and its modern applications, particularly in nuclear medicine. This course provides a strong foundation for students pursuing studies in nuclear chemistry, radiochemistry, and related fields. By the end of the course, students will acquire the essential knowledge needed to understand and apply nuclear/radio chemistry in practical settings. This course is designed for undergraduate students only.

Rationale* Course has been developed as part of a state-funded minor in Nuclear Power Engineering.

Impact on Other Units* This is a new course available to other engineering departments. Students could pursue a minor in nuclear engineering starting with this course.

Financial Impact* Students from other engineering departments may choose to pursue a minor in nuclear engineering, thus increasing enrollment in these courses.

Arts and Sciences Originators Only

Credit Hours* 4

Course Description This course is tailored to provide hands-on experience with nuclear engineering instrumentation and advanced computational simulations. It is focused on understanding the integration of modern engineering tools in computational modeling and measurement capabilities as applied to small scale experiments for use in nuclear security, nonproliferation, advanced nuclear reactors, subcritical assemblies and medical physics. Fundamental concepts include radiation interactions and signal formation in different detector types, radiation counting and spectroscopy, neutron transport, and advanced computational techniques to process and analyze data.

Registration Permission

Equivalency

Rationale* This course will replace the two-course lab sequence (NE 401-NE 402). Given the recent rapid growth of the NE undergraduate program, consolidating these two courses helps to better manage resources (teachers, graduate teaching assistants, laboratory space & equipment). It will also be available fall and spring, which provides additional flexibility to all students, especially those on co-op.

WC VolCore designation to be proposed.

Impact on Other Units* None.

Financial Impact* NE 401 and NE 402 are being consolidated into a single laboratory course. The current 2-lab sequence is being replaced in the showcase curricula by this single lab and an additional department elective. This would reduce the number of credits by 1.

Registration Permission Consent of instructor.

Equivalency

Rationale* This course was originally the honors version of NE 402, which in recent years evolved into a summer study-abroad alternative to NE 402 held at the Czech Technical University with actual nuclear reactor facilities and experiments. The proposed change provides a broader opportunity for students to carry out nuclear reactor experiments anywhere where it may be arranged, and for students to be able to use this course as a new option and not "in lieu" of NE 402. Also, a concurrent change aims to combine our laboratory experiences in NE 401 and NE 402 into a single course, but students will also be able to take NE 427 for the reactor experiences. As the curriculum transitions to a single lab class, NE 403, this course will remain as a stand alone technical elective option for students.

Impact on Other Units*

Tickle College of Engineering - Nuclear Engineering - Nuclear Decommissioning and Environmental Management (NDandEM) Minor

2025-2026 UG Revise Program

General Catalog Information

College* Tickle College of Engineering

Department* Nuclear Engineering

Program Name* Nuclear Decommissioning and Environmental Management (NDandEM) Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description A coursework program leading to a minor in nuclear decommissioning and environmental management is offered by the Nuclear Engineering and Civil and Environmental Engineering Departments. Students must file their intent to complete the minor with the Department of Nuclear Engineering prior to graduation. The program is administered through the Nuclear Engineering Department. The grade in each of the courses used to fulfill minor requirements must be at least a C. Students should consult with their advisor for the appropriate elective courses in their major.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Campus

Knoxville

Minor Requirements:

The minor consists of 15 hours.

Complete:

CE 340 Construction Engineering and Management I
NE 404 Nuclear Fuel Cycle
[After] or
NE 447 Honors: Nuclear Fuel Cycle
NE 433 Principles of Health Physics
[After] or
NE 233 Introduction to Radiological Engineering

Select two courses:

CE 441 Construction Engineering and Management II
[After] CE 581 – Construction Estimating1

or

CE 582 – Construction Scheduling1

NE 406 Radiation Shielding
[After] or
NE 467 Honors: Radiation Shielding
[After] NE 542 Management of Radioactive Materials1

NE 552 Radiological Assessment and Dosimetry1

1	**Students who choose to take any of the 500-level courses should consult with their advisor to determine whether these courses will be applied as undergraduate or graduate credits.**

CE 485 Principles of Hydrogeology
CE 495 Hydrology
[Before] or

ENVE 495 Hydrology
CE 381 Environmental Engineering I
[Before] or

ENVE 381 Environmental Engineering I
NE 416 Introduction to Radiochemistry Lab
[Before] or

NE 516 Introduction to Radiochemistry Lab
ENVE 511 Environmental Chemistry

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* Current language is ambiguous because the minor includes both required and elective courses. Students must earn a C or better in all courses.

Civil and Environmental Engineering have added several courses as optional electives.

Financial Impact* None.

Impact on Other Units* Civil and Environmental Engineering should have a small boost of students taking this minor following the changes in electives.

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

PROGRESSION POLICIES AND REQUIREMENTS

Progression

The first two years of the curriculum are considered to be lower-division and the two remaining years upper-division. Students must apply for progression to departmental upper-division courses, which depends on academic performance. Factors considered include overall grade point average, performance in selected lower-division courses and evidence of orderly progression through the prescribed curriculum.

Full Status

A lower-division student may apply for progression to upper-division after completing CHEM 122* and CHEM 123* or CHEM 128*, MATH 132* or MATH 141* or MATH 147*, MATH 142* or MATH 148*, MATH 231 or MATH 237; EF 151* or EF 157*, EF 152* or EF 158*; and PHYS 231*, with a grade of C or better in each, and an overall GPA of at least 2.5.

Provisional Status

Students who have completed CHEM 122* and CHEM 123* or CHEM 128*, MATH 132* or MATH 141* or MATH 147*, MATH 142* or MATH 148*, MATH 231 or MATH 237; EF 151* or EF 157*, EF 152* or EF 158*, and PHYS 231* with a grade of C or better and have an overall GPA between 2.0 and 2.5 may apply for provisional status. The granting of provisional status is based on the availability of space in departmental programs after full status students have been accommodated. Provisional status students are required to demonstrate their ability to perform satisfactorily in upper-division by attaining a minimum GPA of 2.5 in the first 6 hours of required upper division nuclear engineering courses. Award of upper-division full status is dependent upon this performance. Students who have not progressed to upper-division will be dropped from departmental courses.

Nuclear Engineering Graduation Requirements

Students are strongly recommended to meet with their advisor every semester. Students are required to maintain a cumulative grade point of at least 2.0 in all nuclear engineering courses taken at the University of Tennessee, Knoxville, used to satisfy the graduation requirements. No more than four credit hours of required nuclear engineering courses in which a C- or lower is the highest grade earned may be counted toward graduation. This is in addition to the university's graduation requirements.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Campus

Knoxville

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Chosen from the Volunteer Core list.
Technical electives are selected from upper-division mathematics, chemistry, physics, and engineering courses and must be preapproved by the department. Courses in Nuclear Engineering, other than 500, 502 and 598, may also be used as technical electives.
Department electives are chosen from NE 3xx and 4xx courses not otherwise required for the major. 500-level courses in Nuclear Engineering, other than 500, 502 and 598, may also be used as department electives.

* Meets Volunteer Core Requirements.

Nuclear Engineering Major – Honors Program

In addition to satisfying the requirements described for the nuclear engineering major, candidates for the honors program in nuclear engineering must also complete the following requirements.

Maintain an overall GPA of 3.4.

Four 100- or 200-level honors courses** (14 hours minimum, at least two courses must be from Materials Science and Engineering, Engineering Fundamentals, Physics, Math, Chemistry, Biology, Statistics, or MSE 207).

Complete two upper-division honors courses in nuclear engineering (NE 347, NE 357, NE 367, NE 427, NE 447, or NE 467).

Satisfy the Breadth Requirements for the Cook Grand Challenge Honors Program.

*	Meets Volunteer Core Requirements.
**	While most students fulfill this requirement with 100- and 200-level courses, students may substitute upper level courses on approval of the Honors faculty.

Nuclear Engineering Major – Five-Year BS/MS Program

The department offers a Five-Year BS-MS program with a BS (major in nuclear engineering) and an MS (major in nuclear engineering) for qualified students. The primary component of the program is that qualified students may take up to 6 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their Master of Science degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the Bachelor of Science degree. Significant components of the program are:

Students must have an overall GPA of 3.4 in required coursework. Conditional admission to the five-year program may be granted after completion of 63 hours of required coursework, while full admission may be granted after the completion of 93 hours of required coursework with a minimum overall GPA of 3.4.

Students must at least be conditionally admitted to the program prior to taking graduate courses for both their bachelor's and master's degrees. All courses taken for graduate credit must be approved by the director of graduate studies. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit.

Students admitted to the program must also follow the normal procedure for admission to the Graduate School. Admission of students into this program must be approved by the department and the Graduate School. Students will not be eligible for assistantships until they are enrolled as graduate-level students in the Graduate School.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ○ Yes
- ◉ No

Rationale*

Summary of Changes to showcase curriculum:

Term 1

EF 105 is moving from Term 1 to Term 2.

Term 2

Remove Chem 132/133 OR Chem 138 (4 CH)

Add COSC 111 (3 CH)

(-1 Credit)

Term 3

Remove EF 230 (2 CH)

Add STAT 251 OR IE 200 (3 CH)

(+1 Credit)

Term 6

Remove NE 401 (4 CH)

Add NE 403 (4 CH)

Term 7

Remove NE 402 (4 CH)

Add Department Elective[3] (3 CH)

(-1 credit)

Net credit change (0 credits)

Email chains have been attached showing discussions involved with other departments.

NE 403 consolidating NE 401 and NE 402 laboratories into one is likely the biggest change to the showcase which will require us to transition students from 2 labs into 1 over several years. Our program's exponential growth in enrollment cannot support the 2 laboratory model so that we can manage our teaching and laboratory resources appropriately.

Financial Impact*

Some impact with Chemistry courses is expected. Some credits added while others reduced in our program.

Impact on Other Units*

Some impact with Chemistry courses is expected. Some credits added while others reduced in our program. Dropped CHEM 132/133 from program. Overall CH requirement dropped to 125 total hours.

Have you consulted with all programs/departments that will be impacted by this change?*
- ◉ Yes
- ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?
- ☐ Arts and Humanities
- ☐ Natural Sciences
- ☐ Social Sciences

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

PROGRESSION POLICIES AND REQUIREMENTS

Progression

The first two years of the curriculum are considered to be lower-division and the two remaining years upper-division. Students must apply for progression to departmental upper-division courses, which depends on academic performance. Factors considered include overall grade point average, performance in selected lower-division courses and evidence of orderly progression through the prescribed curriculum.

Full Status

A lower-division student may apply for progression to upper-division after completing CHEM 122* and CHEM 123* or CHEM 128*, MATH 132* or MATH 141* or MATH 147*, MATH 142* or MATH 148*, MATH 231 or MATH 237; EF 151* or EF 157*, EF 152* or EF 158*; and PHYS 231*, with a grade of C or better in each, and an overall GPA of at least 2.5.

Provisional Status

Students who have completed CHEM 122* and CHEM 123* or CHEM 128*, MATH 132* or MATH 141* or MATH 147*, MATH 142* or MATH 148*, MATH 231 or MATH 237; EF 151* or EF 157*, EF 152* or EF 158*, and PHYS 231* with a grade of C or better and have an overall GPA between 2.0 and 2.5 may apply for provisional status. The granting of provisional status is based on the availability of space in departmental programs after full status students have been accommodated. Provisional status students are required to demonstrate their ability to perform satisfactorily in upper-division by attaining a minimum GPA of 2.5 in the first 6 hours of required upper division nuclear engineering courses. Award of upper-division full status is dependent upon this performance. Students who have not progressed to upper-division will be dropped from departmental courses.

Nuclear Engineering Graduation Requirements

Students are strongly recommended to meet with their advisor every semester. Students are required to maintain a cumulative grade point of at least 2.0 in all nuclear engineering courses taken at the University of Tennessee, Knoxville, used to satisfy the graduation requirements. No more than four credit hours of required nuclear engineering courses in which a C- or lower is the highest grade earned may be counted toward graduation. This is in addition to the university's graduation requirements.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Campus

Knoxville

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Chosen from the Volunteer Core* list.
Technical electives are selected from upper-division mathematics, chemistry, physics, and engineering courses and must be preapproved by the department. Courses in Nuclear Engineering, other than NE 500, NE 502 and NE 598, may also be used as technical electives.
Department electives are chosen from NE 3xx and 4xx courses not otherwise required for the major. 500-level courses in Nuclear Engineering, other than 500, 502 and 598, may also be used as department electives.

* Meets Volunteer Core Requirements.

Nuclear Engineering Major – Radiological Engineering Concentration – Honors Program

In addition to satisfying the requirements described for the nuclear engineering major, candidates for the honors program in nuclear engineering must also complete the following requirements.

Maintain an overall GPA of 3.4.

Four 100- or 200-level honors courses** (14 hours minimum, at least two courses must be from Materials Science and Engineering, Engineering Fundamentals, Physics, Math, Chemistry, Biology, Statistics, or MSE 207).

Complete two upper-division honors courses in nuclear engineering (NE 347, NE 357, NE 367, NE 427, NE 447, or NE 467).

Satisfy the Breadth Requirements for the Cook Grand Challenge Honors Program.

*	Meets Volunteer Core Requirements.
**	While most students fulfill this requirement with 100- and 200-level courses, students may substitute upper level courses on approval of the Honors faculty.

Nuclear Engineering Major – Radiological Engineering Concentration – Five-Year BS/MS Program

The department offers a Five-Year BS/MS program with a BS (major in nuclear engineering) and an MS (major in nuclear engineering) for qualified students. The primary component of the program is that qualified students may take up to 6 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their Master of Science degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the Bachelor of Science degree. Significant components of the program are:

Students must have an overall GPA of 3.4 in required coursework. Conditional admission to the five-year program may be granted after completion of 63 hours of required coursework, while full admission may be granted after the completion of 93 hours of required coursework with a minimum overall GPA of 3.4.

Students must at least be conditionally admitted to the program prior to taking graduate courses for both their bachelor's and master's degrees. All courses taken for graduate credit must be approved by the director of graduate studies. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit.

Students admitted to the program must also follow the normal procedure for admission to the Graduate School. Admission of students into this program must be approved by the department and the Graduate School. Students will not be eligible for assistantships until they are enrolled as graduate-level students in the Graduate School.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* This showcase reflects the many changes to courses in NE and modified curriculum. Most notable is the addition of the NE 403 Laboratory which consolidates resources from the NE 401 and NE 402 laboratories.

Other changes are reflected by the emails attached with other programs and departments.

Financial Impact* None.

Impact on Other Units* Minor. Chemistry courses added but other removed.

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Tickle College of Engineering - Nuclear Engineering - Nuclear Power Engineering Minor

2025-2026 UG Change Program Name / Department

General Catalog Information

Important Note:

This Change Program Name / Department form is to be used for changing the name of a program (major, concentration, minor, or certificate) and/or changing the department where the program is offered. Other regular revisions to program requirements can be included in this form.

College* Tickle College of Engineering

Department* Nuclear Engineering

Program Name* Nuclear Power Engineering Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

Description

In nuclear power facilities, nuclear engineers make up only 15% of the engineering workforce; the remaining are largely mechanical, civil, chemical, electrical, and industrial and systems engineers, and cybersecurity specialists. The minor in Nuclear Power Engineering prepares students pursuing majors in other engineering disciplines for a career in the nuclear power industry.

The grade in each of the courses used to fulfill minor requirements must be at least a C. Students should consult with their advisor for the appropriate elective courses in their major. Some of the courses used for the nuclear power engineering minor may also satisfy requirements in the student's major. The minor consists of at least 15 credit hours.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The UT Department of Nuclear Engineering is developing a Center of Excellence in Nuclear Safety. At the Bachelor of Science Nuclear Engineering level, this includes a minor in Nuclear Safety. Students must file their intent to complete the minor with the Department of Nuclear Engineering prior to graduation. The program is administered through the Nuclear Engineering Department. The grade in each of the courses used to fulfill minor requirements must be at least a C. Students should consult with their advisor for the appropriate elective courses in their major.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The minor in Nuclear Security Policy for Engineers would provide nuclear engineering undergraduate students with coursework on nuclear security from a policy perspective, with a focus on international politics, organizations, and regulations as well as a technical and scientific perspective in terms of policy enforcement and compliance by engineers and scientists. With this training, undergraduate nuclear engineering students would be prepared to work at the intersection of policy and practice in the development and trade of nuclear capabilities for energy and defense. Students with this training would be more competitive for strategy and leadership roles in nuclear security-focused companies in the private sector and for the increasingly broad set of public sector careers tied to nuclear security policy.

The Nuclear Security Policy for Engineers Minor consists of 16 credit hours of coursework and is coordinated through a partnership between the Tickle College of Engineering and the Baker School of Public Policy and Public Affairs.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Requirements*

Campus

Knoxville

Required Courses (13 credit hours)

NE 401 Radiological Engineering Laboratory
[Right] or

NE 403 Nuclear and Radiological Engineering Laboratory
[After]
HBS 452 U.S. National Security Policy
[Before]or

HBS 552 U.S. National Security Policy
NE 430 Nuclear Security Science and Analysis
[Before]or

NE 530 Nuclear Security Science and Analysis
NE 431 Global Nuclear Security Culture
[Before]or

NE 531 Global Nuclear Security Culture

Choose one (3 credit hours)

HBS 454 Nuclear Security (in an Age of Emerging Technology)
[Before]or

HBS 554 Nuclear Security (in an Age of Emerging Technology)
HBS 456 Nuclear Policy and Deterrence
[Before]or

HBS 556 Nuclear Policy and Deterrence
HBS 455 Nuclear Weapons
[Before]or

HBS 555 Nuclear Weapons
[After] * Satisfies Volunteer Core Requirements

Rationale*

The Nuclear Security Policy for Engineers Minor consists of 16 credit hours of coursework and is coordinated through a partnership between the Tickle College of Engineering and the Baker School of Public Policy and Public Affairs.

Note that most of the required courses and electives are course being added in this cycle under the HBS and NE designations.

Financial Impact*

This minor should increase the number of HBS courses and credits taken.

Impact on Other Units*

Dropped CHEM 132/133 from program. Overall CH requirement dropped to 125 total hours

Have you consulted with all programs/departments that will be impacted by this change?*

- (•) Yes
- ( ) No

CIP Code (if available)

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

The library is everywhere you are. Research assistance (lib.utk.edu/askusnow) is available by walk-in, e-mail, phone, chat and text, and by appointment with the librarian who specializes in your discipline (lib.utk.edu/librarians). UT Libraries provides access to over 3.7 million titles, including print and electronic books, journals, and media. Even when you are not on campus or at the library, we are available to answer questions and help you find the resources you need. Visit library.utk.edu to chat with a librarian, find books and electronic resources, or watch a video tutorial about using the library.

The John C. Hodges Library in the heart of campus houses the majority of the UT Libraries' collections and many services. In the Commons, on the second floor of Hodges Library, students can get help with research, writing, and academic support, as well as access to technology. Students may check out equipment such as laptops and cameras; use group study rooms; attend online classes; create videos or multimedia projects in The Studio; experiment with gaming, virtual reality, and 3D printing; use a Practice Presentation Room; or visit the coffee shop and convenience store. Explore the University Libraries' outstanding spaces at lib.utk.edu/spaces. Visit lib.utk.edu/hours for the hours of library branches. departments, and online support.

Two branch libraries offer specialized collections, spaces, and services: the Webster C. Pendergrass Agriculture and Veterinary Medicine Library on the agriculture campus and the George F. DeVine Music Library in the Natalie L. Haslam Music Center. Other unique collections available to students include Special Collections (manuscripts and rare books) in Hodges Library and online digitized collections of some of the library's one-of-a-kind holdings at digital.lib.utk.edu.

The UT Libraries creates community with its inviting spaces and through hosting events such as the Lunch and Learn series that promotes belonging and engagement. Connect with us on Facebook, Instagram, Twitter, and YouTube (@utklibraries) to learn about library events, services, and resources.

Requested Content Changes for Catalog

Eric Lukosi, Head

The applied engineering and technology department will offer a transformative pathway to engineering education for TN students, particularly those who thrive on hands-on learning and seek tangible applications of theoretical knowledge. It provides a platform to channel their practical orientation into structured problem-solving directly relevant to industry. It will also offer opportunities to train students with an entrepreneurial mindset and there will be opportunities for students to participate and earn credits for an internship or co-op.

The applied engineering and technology department has four concentrations for the Bachelor of Science in Applied Engineering: energy conversion and storage, applied aerospace, applied manufacturing, and applied computer science. Students majoring in applied engineering will take courses relevant to their chosen concentration, which are designed to meet the needs of regional employers in growing workforce areas.

The AET department will emphasize hands-on learning, strong industry collaboration, and meaningful community engagement. The mission of the applied engineering and technology department is to:

- Develop industry-relevant programs and curricula that reflect the dynamic needs of industries, ensuring that graduates are always at the forefront of engineering advancements.
- Create a hands-on and applied learning environment that bridges theoretical concepts with tangible applications, preparing students to tackle real-world engineering challenges.
- Establish robust partnerships with leading industry stakeholders, providing students with invaluable exposure to ensure a seamless transition to industry.
- Engage in community outreach to foster a vibrant exchange with regional industries towards innovation, shared growth, and mutual benefit.

Rationale*

Information about the program needs to be added to the AY25-26 catalog for student reference.

The department offers a Bachelor of Science in Biomedical Engineering. The mission of the department is to provide a broad base integration of courses and experiences that prepare graduates to practice their profession successfully, to apply their skills to solve current engineering problems collaboratively, and to help advance the knowledge and engineering practice in their fields.

The Biomedical Engineering undergraduate program at the University of Tennessee, Knoxville is accredited by the **Engineering**

Accreditation Commission of ABET (http://www.abet.org), under the General Criteria and the Biomedical Engineering Program Criteria.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

PROGRESSION POLICIES AND REQUIREMENTS

Progression

The first two years of the curriculum are considered to be lower-division and the two remaining years upper-division. Students must apply for progression to departmental upper-division courses, which depends on academic performance. Factors considered include overall grade point average, performance in selected lower-division courses and evidence of orderly progression through the prescribed curriculum. CHEM 122* and CHEM 123*, or CHEM 128*; CHEM 132* and CHEM 133*, or CHEM 138*

Full Status

A lower-division student may apply for progression to upper-division after completing EF 152* or EF 158*, CHEM 122* and CHEM 123*, or CHEM 128*; MATH 231, ME 202, ME 231, and ME 321, with a grade of C or better in each, and an overall GPA of at least 2.4 in these courses. Students who have not satisfied the requirements for full status will be dropped from departmental class rolls in upper-division courses.

Provisional Status

Students who have completed EF 152* or EF 158*, CHEM 122* and CHEM 123*, or CHEM 128*; MATH 231, ME 202, ME 231, and ME 321, with a grade of C or better and have a GPA between 2.0 and 2.4 in these courses may apply for provisional status. The granting of provisional status is based on the availability of space in departmental programs after full status students have been accommodated. Provisional status students are required to demonstrate their ability to perform satisfactorily in upper-division by attaining a minimum GPA of 2.0 in the first 12 hours of 300-level required engineering courses. Award of upper-division full status is dependent upon this performance. Students with a UTK GPA less than 2.0 will not be admitted to the upper-division. Students who have not progressed to upper-division will be dropped from departmental class rolls in upper-division courses.

Transfer Students

Students transferring more than 26 hours from another institution are considered transfer students. Transfer students must meet the same criteria as non-transfer students, using transfer grades for acceptable substitutions.

Departmental Academic Standing

Faculty of the Department of Biomedical Engineering expect all students who enter to make progress toward graduation. To graduate from the department, a student must earn a minimum grade point average of 2.0 in all departmental courses counted toward the degree. Students not meeting the required departmental GPA may be dropped from their major.

In addition, the University Academic Good Standing Policies apply to all students.

Graduation Requirements

A minimum cumulative GPA of 2.0 in all departmental courses counted toward the degree taken at the University of Tennessee, Knoxville, is required for graduation. No more than two departmental courses in which a C– or lower is the highest grade earned may be counted toward graduation. This is in addition to the university's graduation requirements.

Five-Year BS/MS Program

The department offers a Five-Year BS-MS program for qualified students. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their Master of Science degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the Bachelor of Science degree. Significant components of the program are:

Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 64 hours of required coursework while full admission is granted after completing 96 hours of required coursework with a minimum overall GPA of 3.4 in required coursework.

Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. All courses taken for graduate credit must be approved by the departmental chair of the program. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit. Students admitted to

the program must also follow the normal procedure for admission to the Graduate School.

Admission of students into this program must be approved by the department and the Graduate School.

Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Rationale* Information about this new program needs to be added to the AY25-26 catalog for student reference and linked with previously submitted catalog changes for the program.

The department offers a Bachelor of Science in Mechanical Engineering and Aerospace Engineering. The mission of the department is to provide a broad base integration of courses and experiences that prepare graduates to practice their profession successfully, to apply their skills to solve current engineering problems collaboratively, and to help advance the knowledge and engineering practice in their fields.

The Mechanical Engineering undergraduate program at the University of Tennessee, Knoxville is accredited by the **Engineering Accreditation Commission of ABET** (http://www.abet.org), under the General Criteria and the Mechanical Engineering Program Criteria.

The Aerospace Engineering undergraduate program at the University of Tennessee, Knoxville is accredited by the **Engineering Accreditation Commission of ABET** (http://www.abet.org), under the General Criteria and the Aerospace Engineering Program Criteria.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

PROGRESSION POLICIES AND REQUIREMENTS

Progression

The first two years of the curriculum are considered to be lower-division and the two remaining years upper-division. Students must apply for progression to departmental upper-division courses, which depends on academic performance. Factors considered include overall grade point average, performance in selected lower-division courses and evidence of orderly progression through the prescribed curriculum. CHEM 122* and CHEM 123*, or CHEM 128*; CHEM 132* and CHEM 133*, or CHEM 138*

Full Status

A lower-division student may apply for progression to upper-division after completing EF 152* or EF 158*, CHEM 122* and CHEM 123*, or CHEM 128*; MATH 231, ME 202, ME 231, and ME 321, with a grade of C or better in each, and an overall GPA of at least 2.4 in these courses. Students who have not satisfied the requirements for full status will be dropped from departmental class rolls in upper-division courses.

Provisional Status

Students who have completed EF 152* or EF 158*, CHEM 122* and CHEM 123*, or CHEM 128*; MATH 231, ME 202, ME 231, and ME 321, with a grade of C or better and have a GPA between 2.0 and 2.4 in these courses may apply for provisional status. The granting of provisional status is based on the availability of space in departmental programs after full status students have been accommodated. Provisional status students are required to demonstrate their ability to perform satisfactorily in upper-division by attaining a minimum GPA of 2.0 in the first 12 hours of 300-level required engineering courses. Award of upper-division full status is dependent upon this performance. Students with a UTK GPA less than 2.0 will not be admitted to upper-division. Students who have not progressed to upper-division will be dropped from departmental class rolls in upper-division courses.

Transfer Students

Students transferring more than 26 hours from another institution are considered transfer students. Transfer students must meet the same criteria as non-transfer students, using transfer grades for acceptable substitutions.

Departmental Academic Standing

Faculty of the Department of Mechanical andAerospace Engineering expect all students who enter to make progress toward graduation. To graduate from the department, a student must earn a minimum grade point average of 2.0 in all departmental courses counted toward the degree. Students not meeting the required departmental GPA may be dropped from their major.

In addition, the University Academic Good Standing Policies apply to all students.

Graduation Requirements

A minimum cumulative GPA of 2.0 in all departmental courses counted toward the degree taken at the University of Tennessee, Knoxville, is required for graduation. No more than two departmental courses in which a C– or lower is the highest grade earned may be counted toward graduation. This is in addition to the university's graduation requirements.

Five-Year BS/MS Program

The department offers a Five-Year BS-MS program for qualified students. The primary component of the program is that qualified students may take up to 9 hours of approved graduate courses for their senior undergraduate electives and have them count toward both their bachelor's and master's degrees at the University of Tennessee. This program is designed for students attending the University of Tennessee for their Master of Science degree because other universities may not accept these courses for graduate credit since they were used to satisfy requirements for the Bachelor of Science degree. Significant components of the program are:

- Students must have an overall GPA of at least 3.4 to be admitted to the program. Conditional admission may be granted after completing 64 hours of required coursework while full admission is granted after completing 96 hours of required coursework with a minimum overall GPA of 3.4 in required coursework.
- Students must at least have conditional admission before taking graduate courses for both their bachelor's and master's degrees. All courses taken for graduate credit must be approved by the departmental chair of the program. Students admitted to the program must request permission from the Graduate School to take approved courses for graduate credit. Students admitted to the program must also follow the normal procedure for admission to the Graduate School.
- Admission of students into this program must be approved by the department and the Graduate School.
- Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

Rationale* Information about this revised program needs to be changed to the AY25-26 catalog for student reference and linked with previously submitted catalog changes for the program.

Smith, M., PhD – Drexel (Pennsylvania)

Biochemistry, cell biology, and molecular biology study the function of cells and organisms at the molecular level. The concentration includes the study of the structure and function of proteins, lipids, carbohydrates, DNA and RNA, as well as how these and other molecules control cellular and organismal function. The curriculum prepares students for a variety of careers in biological research, biotechnology, the health professions or education.

Students wishing to emphasize study in this area elect to major in biological sciences with a concentration in biochemistry and cellular and molecular biology. See the description of the major and concentration under Division of Biology for requirements.

VolsTeach Program

Students pursuing a major in selected programs in the College of Arts and Sciences are eligible to participate in the University's VolsTeach program (http://volsteach.utk.edu/). This 4-year program permits students to complete a major in mathematics or science while also receiving secondary education teaching licensure through completion of a VolsTeach minor. For more information about VolsTeach, including advising associated with teacher licensure requirements, contact https://cehhs.utk.edu/cehhsadvising/.

http://artsci.utk.edu/

The College of Arts and Sciences is home to a wide array of academic disciplines and interdisciplinary programs. The departments, schools, and special programs housed within the college stretch across several broad divisions: the arts and humanities, the natural sciences, and the social sciences. Although the faculty of the college have disciplinary interests that range across many diverse academic fields, the college faculty are united by a commitment to the goals and values of liberal education: unfettered intellectual inquiry, a dedication to the quest for knowledge as a worthwhile goal in and of itself, the development of a responsible and creative mind, and the cultivation of intellectual tolerance.

The liberally educated individual is characterized not so much by specific subject matter knowledge as by the habits of mind that are cultivated during a liberal education. A liberally educated person is thus one who is able to reason and communicate effectively, who values lifelong learning, and who can confront the uncertainties of human experience. A liberal education provides a strong foundation for research, scholarship, and teaching in a student's chosen academic discipline. It also provides an invaluable educational background for a student who enters business, industry, the professions, or government or public service. A liberal education offers all individuals the opportunity to share in a rich intellectual heritage, to enjoy the adventures of the mind, and to live an engaged and fulfilling life.

The faculty of the college are committed to cultivating the habits of mind of liberal education in all of the students they teach: both those students who are pursuing concentrated study in a field within the college and those students who enroll in the academic courses offered by the college to complete University-wide general education requirements. General education serves as the underpinning of liberal education, both by providing students with opportunities to master basic learning skills and by acquainting students with the "ways of knowing" that characterize diverse academic disciplines. General education thus prepares students to become engaged lifelong learners.

Students who pursue focused studies in the College of Arts and Sciences will join a community of teacher-scholars dedicated to the generation, transmission, and preservation of knowledge in the many fields that constitute the college. The faculty of the college maintain robust agendas of research, scholarship, and creative activity in their chosen fields, and they encourage undergraduate students to join them as partners in research and creative activity. Through faculty-directed independent study and participation in faculty members' research projects and creative activity, students hone their abilities to think critically and communicate effectively and learn how the frontiers of human knowledge are extended.

The great universities of the world are so labeled because their faculties have earned the reputation of being renowned scholars. The University of Tennessee, Knoxville, has earned such a reputation because of the quality of the research and creative activity of its faculty. To study with such a talented faculty is to experience the best education possible.

Arts and Sciences Advising Services

Mission

The mission of Arts and Sciences Advising Services is to guide our diverse undergraduate population in developing and implementing sound educational plans that are consistent with their values and their academic and career goals. Our purpose is to encourage students to become self-directed learners and decision-makers. Further, we serve as a resource to faculty and support their work with undergraduate students within the college. Finally, our efforts support the University of Tennessee's broader mission, specifically by encouraging student persistence towards graduation.

Academic Advising

Prior to enrolling for the first time at the university, all degree-seeking first-year students and transfer students are required to meet with an academic advisor. Readmitted students must also meet with an academic advisor prior to reenrolling. The following groups of students are required to meet with an advisor during each tracking semester (fall and spring):

- All students with fewer than 30 hours at UT Knoxville.
- Students following exploratory tracks.
- Students identified as "off track" by uTrack.
- Students on Academic Probation.

All other students are required to consult with an advisor for a substantial conference during a designated semester each year.

Programs of Study

The college offers students a wide variety of undergraduate degree programs. These programs have been designed both to help students achieve specific educational and vocational objectives and to provide students with a broad-based liberal education that will prepare them to be engaged global citizens. The college also offers a small number of three-year pre-professional curricula that prepare students for advanced study in a specific profession. Detailed information about these pre-professional curricula can be found by consulting the Pre-Professional Programs major description and by contacting Arts and Sciences Advising Services.

Bachelor of Arts (B.A.) and Bachelor of Science (B.S.)

Students earning the Bachelor of Arts and Bachelor of Science degrees have achieved both broad knowledge of the arts and sciences and a comprehensive understanding of one or more focused areas of special interest.

Bachelor of Arts in College Scholars

The College Scholars program is a college-wide honors program that serves a limited number of especially qualified and motivated students. College Scholars have additional freedom to design an individualized undergraduate curriculum that meets particular academic interests and goals. Students must apply for admission to the College Scholars program. More information about the College Scholars program is available at https://scholars.utk.edu/.

VolsTeach Program

Students pursuing a major in selected programs in the College of Arts and Sciences are eligible to participate in the University's VolsTeach program (http://volsteach.utk.edu/). This 4-year program permits students to complete a major in mathematics or science while also receiving secondary education teaching licensure through completion of a VolsTeach minor. For more information about VolsTeach, including advising associated with teacher licensure requirements, contact https://cehhs.utk.edu/cehhsadvising/.

Pre-Professional Programs

The college offers pre-professional undergraduate programs for students who wish to participate in the cooperative 3+1 curricula in the health sciences (dentistry, pharmacy, or veterinary medicine) and the four-year pre-medicine program, and in pre-law. Students taking one of the health sciences or pre-law curricula proceed directly to specialized training in the chosen area after the third year of Arts and Sciences study. These students complete the first year of professional study in lieu of satisfying the requirements for a traditional major in the college.

Bachelor of Science in Chemistry

See Department of Chemistry.

Bachelor of Fine Arts

See School of Art.

Readmission

Information regarding readmission to the College of Arts and Sciences is available at http://admissions.utk.edu/other/readmission/. The official notification of readmission from the Office of Undergraduate Admissions will provide additional details regarding academic advising.

Requirements for Degrees

To earn a Bachelor of Arts or Bachelor of Science degree, these requirements must be completed.

- All university degree requirements as described in the section Academic Policies and Procedures – General Requirements for a Bachelor's Degree.
- A minimum of 120 credit hours.
- At least 42 credit hours in courses numbered 300 or above.
- Appropriate work to satisfy the Foundations, Perspectives, and Connections requirements. (These three requirements do not apply to students in the College Scholars Program.)
- Completion of any required coursework designed to prepare students for their chosen major(s). This work may be described as "preparation for" or "prerequisites to" or "corequisites to" the major(s) chosen by a student.
- Completion of at least one major consisting of 30 to 48 credit hours at 200-level or above. Courses used for the major may also be used to satisfy Foundations, Perspectives, and Connections requirements as described below.

Students may choose to complete one or more minors. A minor in the college consists of 15 or more hours at the 200-level or above.

Students may take up to 20 hours of courses graded Satisfactory/No Credit subject to the regulations described below.

Satisfactory/No Credit Courses

A few courses in the college are offered only on a Satisfactory/No Credit (S/NC) basis. Students may elect to take other courses on this basis, except where the S/NC option is specifically prohibited. Courses taken on the S/NC basis, if successfully completed, will count as hours for graduation although neither S nor NC grades will be calculated in a student's grade point average. Satisfactory is defined as C or better work on the traditional grading scale and No Credit is defined as less than C.

The option of taking courses on an S/NC basis is provided to encourage the curious and able student to explore subject matter in fields where the student's performance may be somewhat less outstanding than work in the student's primary field.

Note: Students planning to seek admission to graduate or professional schools (especially in the health sciences) should discuss with their advisors possible limitations on exercise of the S/NC option before registering for courses on this basis.

The following regulations apply to S/NC coursework:

- Except for courses offered only on the S/NC basis, courses taken under the S/NC option may not be applied towards Foundations, Perspectives, or Connections requirements, towards major and minor requirements, or towards major or minor preparatory work, prerequisites, or corequisites unless specifically permitted by petition.
- The maximum number of S/NC elective hours which may be counted toward graduation is 20, exclusive of courses that are offered only on the S/NC basis, physical education courses, and/or satisfactory hours earned by examination, military service, etc.
- A transfer student with S/NC or equivalent credit earned prior to admission to the University of Tennessee, Knoxville, in a course which satisfies a Foundations, Perspectives, or Connections requirement may count it for that purpose. Transfer students who want to apply S/NC or equivalent credit to a major or minor requirement, or to major or minor preparatory work, prerequisites, or corequisites, must receive permission to do so by petition.

College-wide Requirements for B.A. and B.S. Students

To receive a B.A. or B.S. degree from the College of Arts and Sciences, students must satisfy the Foundations, Perspectives, Engaged Inquiries, and Connections requirements as well as the requirements for a major in the college. The requirements are described in detail below.

The following rules govern students' ability to apply courses to more than one College of Arts and Sciences degree requirement:

- Except as otherwise noted, no course may be applied to both the Perspectives requirement and the Connections requirement.
- No course may be used to satisfy two different components of the Perspectives requirement.
- If a student satisfies the Connections requirement by completing a 9-credit Connections Package, one course that applies to the Connections Package may also be applied to the student's major requirements.
- Foundations courses may be applied to Perspectives, Engaged Inquiries, Connections, and the major.

College-wide Requirements: Foundations

All students who earn a degree in the College of Arts and Sciences must complete the Foundations requirement established by the college. Satisfying the Foundations requirement demonstrates that a student can communicate effectively in English, both orally and in writing, and that a student can use the tools of quantitative analysis. The Foundations coursework requirements consist of four parts: (1) first year English composition; (2) one additional course designated as a Volunteer Core Written Communication (WC) course; (3) one course designated as a Volunteer Core Oral Communication (OC) course; and (4) one course designated as a Volunteer Core Applied Oral Communication (AOC) course; and (5) two courses that provide foundational instruction in quantitative reasoning. The specific course requirements are as follows.

First Year English Composition

Completing the University's first year English composition requirement equips students with the skills needed to write persuasive, logical and coherent essays in English; teaches students to read critically and to evaluate and cite sources in research; and helps students understand how to write effectively for different audiences and purposes. Students may satisfy this requirement in one of two ways.

1. By completing 6 hours in English writing courses according to one of the following 3 sequences:

- ENGL 101* and ENGL 102*
- ENGL 101* and ENGL 298* (for 1794 Scholars Program, Chancellor's Honors Program, Haslam Scholars Program, or Honors Leadership Program students)
- ENGL 131* and ENGL 132*. Placement in ENGL 131* or ENGL 132* will be determined by TOEFL (or equivalent standardized test) scores.

2. By earning credit for ENGL 101* through a College Board Advanced Placement Test and completing one additional course from the following:

- ENGL 102*, ENGL 112*, or ENGL 298*. Eligibility for ENGL 112*, and ENGL 298* will be determined by a combination of AP and ACT or SAT scores.

First-Year English Placement Information

Eligibility for ENGL 112 - Advanced Writing and Research* will be determined by ACT or SAT scores. Placement in ENGL 131 - Composition for Non-Native Speakers of English I* will be determined by TOEFL (or equivalent standardized test) scores. All students enrolled in either ENGL 101* or ENGL 131* may simultaneously enroll in ENGL 103 - Writing Workshop I to receive additional instruction in writing.

A student must complete the first-year composition requirement prior to enrolling in English courses numbered 200 or higher.

Written Communication

To further develop the writing skills that are foundational to advanced work in the College of Arts and Sciences, all students pursuing a degree from the college must, after satisfying the first year English composition requirement, complete one additional course designated as a Volunteer Core Written Communication (WC) course. This additional course may also be applied to either the Perspectives or Connections requirement of the college and may be used to satisfy major requirements.

Oral Communication

The ability to communicate one's ideas orally is as important as the ability to express them in writing, and oral communication skills are foundational to advanced work in the College of Arts and Sciences. All students pursuing a degree from the college must therefore complete one course designated as a Volunteer Core Oral Communication (OC) course.

Applied Oral Communication

Effectively communicating ideas within a particular discipline or profession is a fundamental skill that all students should acquire and demonstrate. Applied Oral Communication (AOC) courses will expand upon OC course skills to promote understanding of and engagement with targeted audiences and stakeholders in a variety of communication contexts, such as: interpersonal, small group, and team communication; nonverbal and cross-cultural communication; communication of discipline-specific or professional information both within and outside the discipline or profession; conversational communication in formal and informal settings; and active listening. All students pursuing a degree from the college must therefore complete one course designated as a Volunteer Core Applied Oral Communication (AOC) course. Students may satisfy the AOC requirement by completing any course from the approved AOC.

Quantitative Reasoning

All students pursuing a degree from the College of Arts and Sciences must demonstrate the ability to use quantitative, statistical, and logical methods to build arguments and support opinions and actions. Students may meet this college requirement either by completing two courses from the Volunteer Core Quantitative Reasoning list of mathematics, statistics, and data science courses, or by completing one course from the list of mathematics, statistics, and data sciences courses and one additional course designated as a Volunteer Core Quantitative Reasoning (QR) course. The QR course can be count towards the students major, other requirements, or be an elective.

College-wide Requirements: Perspectives

All students who earn a degree from the College of Arts and Sciences must complete the Perspectives requirement established by the college. The Perspectives requirement is designed to introduce students to the modes of inquiry and discourse that characterize various academic disciplines and to the ways in which hypotheses are constructed and evaluated. In completing the Perspectives requirement, students also gain an informed appreciation for the diverse natures of the world's cultures and societies, whether historical or present-day, and for the artistic and cultural milestones created by these cultures and societies. Perspectives courses thus prepare students to become broadly-educated, engaged, and responsible citizens.

Arts and Humanities

By studying the arts and humanities, and by participating as an informed and appreciative observer of artistic and cultural achievements in fields within the visual, spatial, musical, theatrical, or written arts, we gain new perspectives on the human experience and on humankind's creative impulse. Studying the arts and humanities also develops our critical thinking and analytical skills as we consider historical and present-day answers to the enduring question "What common experiences, if any, make up the human experience?" The Arts and Humanities component of the Perspectives requirement serves to introduce students to the modes of inquiry that are employed in the fields that constitute the arts and humanities, to help students understand how aesthetic and moral judgments are arrived at and defended, and to acquaint students with the artistic and cultural achievements of both the past and the present.

Students may meet this requirement by completing two courses, from two different departments, chosen from the list below or complete one course from the list below and a second course from a different department from the approved Volunteer Core Arts and Humanities (AH) or Applied Arts and Humanities (AAH) list.

Literature and Philosophical and Religious Thought

AFST 225*, AFST 226*; ARAB 251*; CLAS 223*, CLAS 224*, CLAS 253*, CLAS 254*, CLAS 255*, CLAS 256*, CLAS 352*; ENGL 201*, ENGL 202*, ENGL 206*, ENGL 207*, ENGL 208*, ENGL 209*, ENGL 217*, ENGL 218*, ENGL 221*, ENGL 222*, ENGL 225*, ENGL 226*, ENGL 231*, ENGL 232*, ENGL 233*, ENGL 237*, ENGL 238*, ENGL 247*, ENGL 248*, ENGL 251*, ENGL 252*, ENGL 253*, ENGL 254*, ENGL 258*, ENGL 331*, ENGL 333*, ENGL 340*, ENGL 342*, ENGL 389*; HIAS 394*; HIEU 321*; JST 321*; MEST 225*; PHIL 101*, PHIL 107*, PHIL 244*, PHIL 252*; REST 202*, REST 225*, REST 227*, REST 280*, REST 306*, REST 321*, REST 341*, REST 354*, REST 389*; RUSS 221*, RUSS 222*, WGS 332*.

Natural Sciences

Science and technology play an important role in many aspects of modern life, and as citizens we are increasingly asked to make decisions about public policy questions with scientific or technological aspects. Familiarity with scientific methods of inquiry and with the development and testing of scientific hypotheses provides us with the foundation to make these decisions in an informed and responsible way, and also helps us distinguish science from pseudoscience. The Natural Sciences component of the Perspectives requirement serves to introduce students both to the basic discoveries, foundational knowledge, and logical organization of a scientific discipline and to the experimental methods used in that discipline for scientific inquiry and for the testing of scientific hypotheses.

Students may satisfy this requirement by completing one of the 8-credit laboratory sequences listed below.

ASTR 151*-ASTR 153* and ASTR 152*-ASTR 154* (all four of these courses must be completed to fulfill the 8-credit requirement), ASTR 217*-ASTR 218*; BIOL 101*-BIOL 102*, BIOL 113*-BIOL 114*-BIOL 115*, BIOL 150*-BIOL 160*-BIOL 159* (all three of these courses must be completed to fulfill the 8-credit requirement), BIOL 158*-BIOL 168*-BIOL 167* (all three of these courses must be completed to fulfill the 8-credit requirement); CHEM 102*-CHEM 103* and CHEM 112*-CHEM 113*; CHEM 122*-CHEM 123* and CHEM 132*-CHEM 133*, CHEM 128*-CHEM 138*; GEOG 131*-GEOG 132*, GEOG 137*-GEOG 138*; two courses chosen from EEPS 101*, EEPS 102*, EEPS 103*, EEPS 104*, EEPS 107*, EEPS 108*; PHYS 135*-PHYS 136*, PHYS 137*-PHYS 138*, PHYS 221*-PHYS 222*.

Social Sciences

The disciplines that make up the social sciences help us analyze the interactions that take place between individuals, between groups or societies, and between an individual and a group. Studying these interactions helps us understand the political and social dynamics that govern contemporary societies. Equipped with this understanding, we can participate more effectively, and as informed and engaged citizens, in social, political, and economic decision making. The Social Sciences (SS) component of the Perspectives requirement serves to introduce students both to the principal concerns of disciplines in the social sciences and to the methods by which social scientists collect and evaluate knowledge and test hypotheses.

Students may meet this requirement by completing two courses, from two different departments, chosen from the Volunteer Core Social Sciences (SS) list.

Foreign Language

Learning a foreign language helps prepare a student to become an engaged global citizen. Studying the vocabulary, grammatical structure, and literary milestones of a second language can help students understand the close relationship between language and culture, and can provide students with tools that can be used to both understand and bridge cultural differences. Study of a foreign language can also help us understand better the structure and nuances of our own native language. The Foreign Language component of the Perspectives requirement supports the broad goals of liberal education by promoting intellectual tolerance and flexibility, informing students' understanding of cultural diversity, and introducing students to the literary achievements of authors writing in other languages.

Students may meet this college requirement in one of four ways.

- Completion of one of the following intermediate-level foreign language sequences: ARAB 221-ARAB 222*; ARAB 231-ARAB 232*; ASL 211*-ASL 212*; ASST 261-ASST 262; CHIN 231-CHIN 232*; FREN 211-FREN 212*, FREN 211-FREN 214, FREN 211-FREN 216, FREN 212*-FREN 213, FREN 213-FREN 214, FREN 213-FREN 216, FREN 217-FREN 218*; GERM 211-GERM 212; (Greek) CLAS 261-CLAS 264*; (Latin) CLAS 251-CLAS 252*; HEBR 241-HEBR 242*; ITAL 211-ITAL 212*; JAPA 251-JAPA 252*; PORT 211-PORT 212*; REST 221-REST 222*; RUSS 201-RUSS 202*; SPAN 211-SPAN 212*, or SPAN 217-SPAN 218*.
- Completion of a six-hour intensive intermediate-level foreign language course. Any one of the following courses will satisfy the requirement: FREN 223*, GERM 223, SPAN 223*.
- Demonstration of intermediate competence on a departmental placement or proficiency examination or by AP or CLEP credit.
- Students whose native language is not English may satisfy the requirement with ENGL 131* and ENGL 132* and any two of the following courses: AFST 225*, AFST 226*, AFST 233*; CLAS 253*; ENGL 201*, ENGL 202*, ENGL 206*, ENGL 207*, ENGL 208*, ENGL 209*, ENGL 221*, ENGL 222*, ENGL 225*, ENGL 226*, ENGL 231*, ENGL 232*, ENGL 233*, ENGL 237*, ENGL 238*, ENGL 247*, ENGL 248*, ENGL 251*, ENGL 252*, ENGL 253*, ENGL 254*, ENGL 258*; ITAL 401*, ITAL 402; JAPA 313, JAPA 314; JST 312*; LAC 315; MRST 261, MRST 262, MRST 401, MRST 402; WLC 300*; PORT 315; REST 312*; RUSS 221*, RUSS 222*.

Foreign Language Placement Information

All students who wish to enroll in a foreign language course, who have completed at least two years of this language in high school and who have not yet taken a college course in the language, must take a placement examination before enrolling. Placement in the appropriate course will be determined by the score on the examination. Examinations for most languages will be given online prior to orientation and at any time during the fall, spring, and summer. Students who place into 200-level courses will receive six hours of elementary language credit upon successful completion of a 200-level course in the same language at UTK, provided that they do not subsequently enroll and receive credit for any 100-level course in the same language. If they do, elementary placement credit is forfeited and removed from the student's transcript.

Students who place into 300-level courses will receive six hours of intermediate language credit upon successful completion of a 300-level course in the same language at UTK, provided that they do not subsequently enroll and receive credit for any 200-level course in the same language. If they do, intermediate placement credit is forfeited and removed from the student's transcript. Those students who place into 200- or 300-level courses and do not wish to continue in a language, but wish to receive six hours of 100- or 200-level credit, respectively, for their online exam, may do so by completing a proctored placement exam during the fall, spring, or summer and confirming the results of their online placement exam.

Placement test scores expire after one year. Students have one year from the date on which they take the placement exam to either register for the course for which they are eligible (as determined by their placement test score) or complete the proctored placement exam to confirm the results of the online exam. After the one-year period elapses, students will have to take the placement test again.

For placement information regarding ASL, contact the Deaf Studies program in the College of Education, Health and Human Sciences.

Non-U.S. History

Careful and thoughtful study of the past, and of the diversity of human societies and cultures found around the world, helps us understand the historical origins of contemporary society. By investigating change and continuity in human societies, and by asking how historical contexts shape people, events, and ideas, students can also further develop their analytical and critical thinking skills. The Non-U.S. History component of the Perspectives requirement serves to introduce students to the modes of inquiry that are employed in the study of human history, to help students understand how hypotheses about the historical past are formulated and tested, and to improve students' understanding of how historical events have shaped present-day society.

Students may meet this requirement by completing one of the following pairs of courses.

AFST 235*-AFST 236*; HIEU 241*-HIEU 242*, HIEU 247*-HIEU 248*, HILA 255*-HILA 256*, HIST 261*-HIST 262*, HIST 267*-HIST 268*; LAC 251*-LAC 252*; MRST 201*- MRST 202*.

Global Citizenship - US Focus

Courses in the U.S. Focus area of the Global Citizenship (GCUS) category develop students' appreciation of the variety and realities of the "American experience," taking into consideration categories of difference, such as social class, disability, ethnicity, gender, human geography, language, race, religion, and sexual orientation. Courses will help students develop an understanding of the transnational, historical, and contemporary forces that affect American society, in order to foster students' awareness of their own identities and responsibilities in a deeply pluralistic nation and globally intertwined world. Students may satisfy the GCUS requirement by completing one course from the approved Volunteer Core Global Citizenship - United States (GCUS) list.

College-Wide Requirements: Engaged Inquiries

Truly well-educated citizens should be ready to lead and solve problems, building on their chosen fields of study and personal interests and strengths. Students will benefit from experiences that broaden, extend, apply, and integrate prior learning and promote effective collaboration and self-awareness. In all Engaged Inquiries courses, students will produce an investigative, creative, or practical work relevant to the course topic. All students pursuing a degree from the college must therefore complete 9 credits in Volunteer Core Engaged Inquiries (EI) courses from at least two different departments. Students may satisfy the EI requirement by completing courses from the approved EI list.

College-wide Requirements: Connections

In completing the Connections requirement of the college, students undertake a focused educational experience that complements in-depth study in their chosen major field. Students may satisfy the Connections requirement in one of four ways.

- Completion of nine credit hours of study abroad coursework or six credit hours of study abroad coursework and completing one additional upper level course from the approved Global Citizenship-International (GCI) list. These nine hours of coursework may, if appropriate, be applied to non-Connections degree requirements. The nine hours of coursework do not need to be taken during a single academic term or at a single study abroad site. Students interested in pursuing study abroad are strongly encouraged to contact a study abroad advisor at the Center for Global Engagement.
- Completion of a minor, a second concentration, or a second major. The minor or second major may be in the College of Arts and Sciences or in another college. Courses used to satisfy the requirements of a minor or a second major may also be used to meet Perspectives requirements.
- Completion of nine credit hours drawn from one of the Connections Packages listed here. The nine credit hours must be drawn from at least two different departments. Three of the nine credit hours may be applied toward a student's major requirements. Connections Packages are topically-oriented collections of upper-division courses that have been designed by faculty to focus students' attention on questions that have substantial multidisciplinary character.
- Completion of all Air Force or Army ROTC program requirements.

Connections Packages

Ancient Mediterranean Studies

The "Ancient Mediterranean Studies" Connections Package emphasizes the history and cultures of the people who lived around the Mediterranean Sea from prehistory through the end of late antiquity. Because of the conquests of Alexander the Great and the later unification of the region under the Roman Empire, the influence of the ancient Mediterranean has been far-reaching: from the philosophy of Plato and Aristotle to the art that inspired the Renaissance, from the literature we call the Classics to the medical tradition of the Hippocratic Oath, from Athenian democracy to the Roman Senate, and from the development of Judaism to the rise of Christianity. It is difficult to exaggerate the influence that the ancient Mediterranean has had on Western history and continues to have in our world today. This Connections Package includes courses from Art History, Classics, History, Philosophy, and Religious Studies, emphasizing the deeply interdisciplinary nature inherent in the study of the Ancient Mediterranean world.

Students who complete this Connections Package will be able to: (1) analyze the rich connectivity among the different micro-regions of the ancient Mediterranean; (2) recognize the influence of ancient Mediterranean cultures in our world today; and (3) communicate orally and in writing across traditional disciplinary boundaries.

ARTH 425; CLAS 302*, CLAS 306*, CLAS 309*, CLAS 381*, CLAS 382*, CLAS 384*, CLAS 389, CLAS 439*, CLAS 441, CLAS 442*, CLAS 443*, CLAS 444*, CLAS 445*, CLAS 461, CLAS 462*, CLAS 465*; HIEU 303*, HIEU 304*, HIEU 305*, HIEU 311*, HIEU 425*; HIME 382, HIME 383; PHIL 320*, PHIL 322*, PHIL 327*; REST 311, REST 312, REST 321, REST 322, REST 413*, REST 423*; WGS 419.

Biodiversity and Humans

The loss of biodiversity resulting from growing human populations and impacts on Earth is an issue of great global concern, given the importance of biodiversity for human welfare. The concept of biodiversity encompasses the number of species of plants, animals, fungi, and microorganisms in different areas and in the world as a whole, the genes in these species, and the different ecosystems in which the species are found. As humans we are a part of Earth's biodiversity, and we are shaped by and depend upon the biodiversity around us while also strongly influencing it. Human actions can promote local increases in biodiversity, but on a global scale we are responsible for huge and increasing losses in biodiversity, including species extinctions that have greatly altered the natural world and may threaten human survival. The multidisciplinary theme of this connections package is the interrelationships between biodiversity and humans, including how biodiversity is explored, documented, conceptualized, and exploited by humans; how biodiversity can be increased or decreased by human activity and environmental changes; how changes in biodiversity affect human society and the natural world; and patterns of human biodiversity and their causes.

Students who complete the Biodiversity and Humans connections package will be able to: (1) identify methods used to document and study biodiversity; (2) describe patterns in biodiversity across different wild or managed ecosystems; (3) explain the importance of biodiversity for humans; and (4) give examples of natural and anthropogenic forces that cause changes in biodiversity.

Cultural and Artistic Achievement: Arts in the United States

Artistic creation is one significant way that some members of a society respond to and try to represent the culture in which they live and work. This connections package will focus on the traditions of artistic achievement in the visual and fine arts, music, film, and literature produced by artists living and working in the United States.

Students who select this package will be able to: (1) recognize and analyze the aesthetic similarities and differences among various art forms produced in the United States; (2) describe the historical development of conventions and traditions in different art forms; and (3) recognize the relationships between art works and the cultures within which those works were created.

Cultures and Societies

The connections package "Cultures and Societies" explores the interaction between different cultures and their impact on society. Pulling from a broad range of courses, students will see how these different perspectives help us understand ourselves and our situations. This connections package is especially for students in the Applied Studies Interdisciplinary Program in the Cultures and Societies Track. These courses support the focus of that program and sections of these courses will be offered online.

Students completing this package will: (1) learn about different cultures and their perspectives; and (2) explore how these different views given added insight into our current society and inform our actions in it.

Emerging Asia

The main goal of this connections package is to provide students with the background and analytical tools to understand the dynamics that have facilitated the rise of some of the fastest growing economies in the world across the past half century, and, to understand the impacts of these countries within the region and around the world. The catalysts for the recent economic development and increasing geopolitical power of countries such as China, India, and Japan are rooted in numerous (and interconnected) economic, geographical, historical, and political factors, some of which were influenced by outside actions (and actors).

Students completing this package will be able to: (1) understand the myriad historical factors that have catalyzed this explosive growth, and just as important, stifled development in other parts of Asia; (2) explore patterns of growth in terms of rising economic, industrial, and geopolitical power across the Asia-Pacific region; (3) recognize the cultural, economic, and political impacts of this growth not only on China, India, Japan, South Korea, and other countries across Asia, but also outside of the region; and (4) assess the local, regional, and global environmental impacts of this explosive growth.

Environment and Society

Environment and Society provides students with a strong social, biophysical and ecological foundation that can be used to identify and assess major socio-environmental issues facing the Earth, the United States and Southern Appalachia. Courses in this cluster engage topics and methodologies related to biodiversity, industrialization and urbanization, pollution, climate change, population, technology, energy resources and environmental justice.

Students completing this package will be able to: (1) recognize the interconnectedness of self, society, and nature; (2) analyze policies, conflicts, and places and degrees of environmental danger; and (3) consider alternatives to current practices.

Geographic Information Science for Our Changing World

Recent developments in Geographic Information Science (GIS) and Technology are transforming our environment and society, changing our natural and societal behaviors/practices in different parts of the world. Understanding the technical and theoretical aspects of GIS is of critical importance to train a new generation of students in developing and applying GIS on various issues associated with environment, natural resources, and social imperatives, which in turn exert their impacts on our dynamic world.

Students completing this package will be able to: (1) understand the problem-solving values of GIS and its role on the information-based society and environment/natural resource management of the twenty-first century; (2) obtain a solid understanding of GIS to analyze environmental and social issues from a spatially integrated science perspective; and (3) gain hands-on experience with a variety of geospatial technologies, ranging from desktop-based to web-based mapping, spatial analysis, and remote sensing-based data processing, to address various environmental and societal issues.

This connections package explores the problems and promises of social justice in a global age. Courses illuminate the various visions of globalization and the multiple methods and theories through which to analyze the modern world. In order to better understand and address some of the world's most pressing social problems, students explore the social, economic, political, cultural, ideological, and historical processes that connect disparate parts of the world in highly unequal ways, examining the various factors that contribute to social injustice. Students completing this package will be able to: (1) recognize key processes and elements of globalization as they relate to injustice; (2) critically examine the differential effects of globalization on historically marginalized, oppressed, and vulnerable groups; and (3) consider fair, equitable, and beneficial policies and pathways for peoples engaged in struggles and contests for social justice.

Health and Biophysics

At the intersection of medical/biological sciences with the physical sciences, health physics and biophysics encompass a broad range of studies that help us understand biological systems and their response to light and ionizing radiation. From studying the physical structure of cells, to the mechanisms used to image the human body, as well as the underlying physics and chemistry, this package highlights the interdisciplinary nature of the health and biological sciences.

Students completing this package will be able to integrate fundamental biology, physics and engineering principles together to solve problems in health and biological sciences. Depending on courses chosen this may include: (1) discussing the advantages and health risks of using different types of radiation in medical diagnosis and therapy; (2) understanding the structure of biological matter and how it can be studied with nuclear magnetic resonance and X-ray crystallography; (3) characterizing how the structure of biomolecules drive their function, and how disruption of the structure leads to health conditions and diseases; (4) applying computational modeling to biological systems to understand experimental results and predict biological responses; and (5) examining reaction kinetics in biochemical systems.

BCMB 333, BCMB 405, BCMB 420, BCMB 422*; NE 433, NE 490; PHYS 341, PHYS 421.

Health Care Perspectives

As our population continues to grow and to age, the factors affecting health care and public health are becoming increasingly important. The breadth of courses compiled for Health Care Perspectives incorporates the complexity and challenges facing future patients and health care providers.

Students completing this package will be able to: (1) explain the impact of human aging on society, (2) describe the various facets of the science of medicine, (3) recognize the multiple levels of science communication in health care, and (4) discuss public health issues from both a local and a global perspective.

How to Live in the Premodern World

The connections package "How to Live in the Premodern World" explores how people in the period before ca. 1600 CE responded to the fundamental human problem of how one ought to live life. Students who complete this package will learn about various modes in which people in antiquity conceived of the question of proper living, including religion, philosophy, and social roles. Students will furthermore become familiar with representative examples of these things from various places and times before the modern era, with possibilities ranging from Chinese philosophy to Roman physical ideals and Middle Eastern religion. Finally, students who complete this package will also come to understand different ways scholars in the present examine attitudes and conceptions in antiquity, drawing not only upon texts but also through archaeological exploration and the study of material culture.

Students completing this package will: (1) learn about the ways in which people in premodern (before ca. 1600 CE) societies conceived of the question of a proper life; (2) become familiar with representative answers to that question that appeared in various times and places; and (3) understand methods used by modern scholars to study attitudes and concepts in the distant past.

Humans Living on a Dynamic Earth

The Earth's environment is constantly changing, but just how much and how fast the Earth has changed and is changing has evoked considerable debate. The public often receives misinformation when all the public wants is answers to questions such as: "Is the Earth actually warming up?" "Why can't we predict hurricanes and earthquakes?" and "How long have humans been altering our environment?" Courses included in the Humans Living on a Dynamic Earth Connections package provide focused opportunities for our undergraduates to learn about our ever-changing Earth and how humans have and will continue to alter the Earth.

Students completing this package will be able to: (1) understand why our Earth's surface is constantly changing; (2) recognize the gradual (such as erosion by water, wind, and ice) and abrupt (earthquakes and volcanic eruptions) processes that altered and created the landscapes we live in today; and (3) assess and understand how humans have impacted our environment.

Inequalities: Race, Ethnicity, Class, and Gender

This connections package reflects an interdisciplinary approach to the study of race, ethnicity, class, and gender and how these social categories produce stratification, discrimination, and inequality. It focuses upon the ways in which categories of difference interact with one another to shape identities, opportunities, life experiences, and life chances by exploring what categories of difference mean and how they have been defined, constructed, and applied in various contexts.

Students completing this package will: (1) engage in a critical examination of the construction of race, ethnicity, class, and gender in a variety of social, cultural, historical, political, and economic contexts; (2) develop skills in critical thinking, comparative analysis, theory, research methods, and written expression as it relates to identity; and (3) explore strategies and policies necessary for a more informed understanding of difference.

Mobility and Migration

Modern transportation and communication technologies contribute to an increase in mobility and migration worldwide. This connections package explores identity issues related to mobility and migration, and the historical, socio-cultural, and political contexts within which mobility and migration take place. It also addresses policy issues and ethical questions related to mobility and migration, and the creation, maintenance, and policing of (inter)national borders. Students completing this package will be able to: (1) explain factors that contribute to contemporary forms of mobility and migration; (2) analyze historical, political, social, cultural, and ethical aspects of mobility and migration; and (3) place mobility and migration issues in a national and global context.

New Geographies of the Global Economy

International trade has increased rapidly in recent decades, encompassing movements in raw materials, manufactured goods, services, information, and labor. Given the current state of the global economy, the location-based aspects of economic activities become even more important to examine, especially in terms of the impacts of trade on people at various scales, ranging from the local to the global levels. Students completing this package will be able to: (1) recognize patterns of trade and economic development; (2) analyze the impacts of trade on economic development and labor; and (3) recognize and evaluate disparities in development, trade policies, wealth, and economic growth.

Our World: Contemporary Arts and Culture

Characterized by globalization, political crisis, and the entrance of technology into all facets of everyday life, the period from 1945 to the present arguably has seen some of the most drastic and accelerated changes of cultural life in human history. Focusing on how the humanities and social sciences analyze and contribute to these changes, this package offers students a rich and complex experience of the post-WWII era, teaching them skills and perspectives that they will need to enter today's global environment. Courses in the package emphasize critical thinking, comparative analysis, and research methods. Coursework asks students to consider the thorny issues of non-negotiable cross-cultural contact, how we formulate political and ethical values in today's complex world, and the important role of the arts (movies, books, music, media) in constructing our reality.

Students completing this package will be able to: (1) recognize historical, cultural, and sociological movements important to post-1945 political environments; (2) analyze the relationships between art and culture that are important to contemporary life; (3) evaluate the importance of new, contemporary art forms in relation to previous arts theories, movements, and performances; and (4) articulate philosophical, ethical, political, and sociological positions concerning how new global exchanges reconfigure how we think about the world and our place within it.

Rise and Decline of Premodern Complex Societies

The connections package "Rise and Decline of Premodern Complex Societies" consists of courses that explore socio-political organization and change in Europe, the Middle East, Africa, the Far East and the New World predating the European Renaissance. One of the fundamental questions in premodern history and archaeology is how complex societies developed from the simple villages that were the earliest form of permanent settlement in human history. This question has bearing on basic issues of the human condition that are still very much in focus in the world today: human relationships, the

ability to organize and incorporate ever larger population groups, the development of socio-political elites, and the wielding of power. Conversely, even though complex societies as a rule had a degree of built-in stability, all have come to an end. A continuing discourse in social archaeology and history is concerned with the question of how complex societies collapsed and reverted to a simpler level of socio-political organization. Students will explore these issues through written and/or archaeological evidence as well as by examining current scholarly approaches.

Students who complete this package will learn to (1) analyze different ways in which premodern societies in various parts of the world were organized; and (2) evaluate how these societies experienced – and dealt with – societal change.

ANTH 360, ANTH 462, ANTH 463; CLAS 302*, CLAS 306*, CLAS 362*, CLAS 436*, CLAS 442*, CLAS 443*, CLAS 444*, CLAS 445*, CLAS 465; HIAF 371; HIAS 389*; HIEU 303*, HIEU 304*, HIEU 305*, HIEU 312, HIEU 324, HIEU 426; HIME 369*, HIME 370, HIME 382, HIME 383, HIME 400; POLS 475; WGS 419.

Shifting Borders and Cultures in Europe

With the growing importance of the European Union, both the cultures of Europe and its very borders have become more dynamic and contested. This connections package offers students a multifaceted set of lenses through which to investigate broad themes and issues in European history from the medieval period up until the present day. The varied approaches of courses on political and economic history, literature and film, history of science and conceptions of gender, sexuality, and ethnic identity allows students to piece together a comprehensive overview of the changing physical, cultural, religious, and economic characteristics of Europe from the Middle Ages to today.

Students completing this package will be able to: (1) understand and analyze topics in European history, geography, culture, literature, and religion across regions and centuries; (2) engage with a variety of perspectives on shifting borders and cultures in Europe and develop skills to make synthetic and comparative arguments about them in their socio-cultural and historical context; and (3) cultivate basic research skills, develop analytical writing abilities, and practice writing to advance an argument.

Understanding Climate Change

Climate change is one of the most significant issues of our time, but few citizens have the background to understand the public debates it raises or to move beyond the focus on "Is climate changing?" to consider the effects of climate change on environments, ecosystems, and economies – and humankind's options for the future. Courses included in the Understanding Climate Change connection package provide opportunities for focused inquiry into the nature of the climate system; how climate interacts with and affects weather, ocean processes, hazards, vegetation, wildlife, and human activity; the evidence for climate change in the past and present; and the longer-term context of natural climate change and variability.

Students who complete this connections package will be able to: (1) identify natural and anthropogenic causes of climate change; (2) describe sources of data on past climate; (3) give examples of how past changes in climate have affected Earth's environments and ecosystems; (4) recognize how climate change affects human society; and (5) place current climate trends in their longer-term context.

Visual Cultures and Media Studies

In a globalized world, the study of cinema has acquired a new meaning. From the 1960s onward, many countries have witnessed escalating violence, social unrest and war. Many scholars have examined the cinematic representation of these events, however, the process of negotiation inside different countries' popular cinematic genre has just started to be mapped out. This connection package demonstrates that some of the most important documents of self-representation in the 20th century and of its cultural-political disorientation can be found in films. International references are ever-present in many national cinemas together with the recording of fluctuating national identities, as a consequence the study of cinematic products instead of displaying a direct reliance on Hollywood cultural formats, presents a multiplicity of discordant messages. Cinema after the 1960s occupies a liminal zone that traverses cultures, genres and tastes and challenges the notion of a national cinema that speaks only to its own people. The courses in this package all address aspects of visual culture in the media, be it in film, TV, print, digital media, or the arts. The prominence of the visual in today's world and its use and abuse for political and social agendas makes it pertinent that we learn how to critically read the visual image. This package also includes courses that offer critical tools for analyzing media in the digital age from cinematic, historical, socio-political and economic point of views.

Students completing this package will be able to: (1) critically analyze their own culture; (2) demonstrate knowledge of foreign cultures other than their own; (3) demonstrate insight into aspects of world geography, global economics, international politics, various religions, philosophies, histories, languages, literatures, or arts; (4) demonstrate intercultural communication concepts; (5) evaluate the impact of historical forces on the modern world; (6) explain the causes of domestic and global social problems; (7) identify and summarize concepts of interdependence; and (8) recognize global systems, processes, social constructs, trends, and issues.

Majors

Requirements for specific majors vary by program and are discussed under each department or program. A major consists of 30 to 48 credit hours in courses numbered 200 or above as specified by the department or program. Courses taken to satisfy the college Foundations requirement may, when appropriate, be used in the major. Up to six credit hours used to satisfy major requirements may also be used to satisfy Perspectives requirements. A minimum grade of C must be earned in every course counted as part of the major. This grade requirement does not apply to preparatory coursework, prerequisites, or corequisites unless otherwise stated by the department.

All first-time, first-year UT Knoxville students who are admitted to an exploratory program must declare a major no later than the end of their fourth tracking semester. Transfer students with less than 45 hours of transferable work must declare a major no later than the end of their second full semester at UT. Transfer students with 45 hours or more of transferable work must be admitted directly into a major. Returning students may declare a major as soon as they have met required standards; however, they must officially declare a major by the time they have earned 75 credit hours.

The requirements for declaring a specific major are stated under the department or program listing. To declare a major, students should go to the academic department which houses the major. To declare an interdisciplinary major and for more information, contact Arts and Sciences Advising Services.

Students transferring from other institutions must complete at least nine credit hours at the University of Tennessee, Knoxville, in each major earned in the College of Arts and Sciences. Students may elect as many courses as desired in any department or program. Majors available for students pursuing a B.A. or B.S. degree include: anthropology, art, art history, biological sciences, chemistry, classics, economics, English, geography, geology and environmental studies, history, interdisciplinary programs, mathematics, modern foreign languages and literatures, music, philosophy, physics, political science, psychology, religious studies, sociology, statistics, and theatre.

Optional Multiple Majors

After a student has satisfied the general Foundations and Perspectives requirements, and the requirements of a major, additional majors may be recorded on the transcript without regard to course overlap among majors or among the additional majors and Foundations, Perspectives, or Connections requirements, provided a minimum of 18 distinct credit hours differentiates the primary major from the additional majors. Students developing multiple majors must declare this intent at the time of application for graduation. Once a student has graduated, the establishment of additional majors becomes subject to university second degree requirements.

Students who satisfy the requirements of a degree in a college other than Arts and Sciences may also major inside the College of Arts and Sciences with the approval of the degree-granting unit. These students need complete only the major requirements, not the Foundations, Perspectives, or Connections requirements for Arts and Sciences degrees. The Arts and Sciences major may also be listed on the student's transcript.

Minors

Single or multiple minors may be recorded on the academic record without regard to course overlap among minors and major or among minors and Foundations and Perspectives requirements, provided at least nine hours differentiate a minor from a student's majors and from any other minors and the minor is not in the same concentration as any of the student's majors. Students who satisfy the requirements of a degree in a college other than Arts and Sciences may also minor inside the College of Arts and Sciences with the approval of the degree-granting unit. The minimum requirement for a minor is 15 credit hours in courses numbered 200 or above. Minors are available in most departments or programs in which majors are offered across the University. At least 6 of the 15 credit hours required for a minor must be completed at the University of Tennessee, Knoxville. Students should declare the minor at the earliest possible date, and in any case, prior to applying for graduation.

Elective Courses

Students completing a B.A. or B.S. degree in the college have the opportunity to select elective courses that supplement and support the work being done in the major and in the college-wide Foundations, Perspectives, and Connections requirements. This dimension of the student's experience at the university represents that freedom within which total education may be rounded out and enriched. Elective courses should be chosen with care so that they will truly enhance the student's total program and help in the achievement of well thought-out educational objectives.

Some of the choices which the student might make in selecting the elective courses are additional courses in the major field, a related minor, an area in the arts, or an off-campus semester.

Only the student's imagination and initiative and the willingness to conceive and develop a meaningful academic program limit the choices of supplementary elective courses.

Program for Prospective K-12 Teachers

Students planning careers in K-12 teaching must complete an Arts and Sciences major in a department, in one of the interdisciplinary programs, or, if eligible, in the College Scholars Program. Prospective secondary and middle school teachers must fulfill the requirements of appropriate content majors; prospective elementary teachers may choose any major in the College of Arts and Sciences.

To be licensed for teaching, students must also gain formal admission to the Teacher Education Program in the College of Education, Health, and Human Sciences. The process involves successful completion of a series of requirements including presentation of satisfactory scores on certain tests, completion of professional courses in the College of Education, Health, and Human Sciences, maintenance of a 2.7 or higher GPA, and completion of a fifth year program emphasizing practical application. For details, see the College of Education, Health, and Human Sciences section of this catalog and contact the Advising Center, 332 Bailey Education Complex.

PEACE CORPS PREP PROGRAM

The Peace Corps Prep program at the University of Tennessee is open to all undergraduate UT students regardless of major, provided they meet the admissions requirements for the program. Students in the program prepare for international experiences by completing a set of courses and activities designed to develop their professional and leadership skills. These courses may be used to satisfy requirements or electives in many UT majors and the International Agricultural and Natural Resources minor. The program is designed to prepare students to be strong candidates for the U. S. Peace Corps program following completion of their undergraduate degrees. The program includes training/experience for specific sectors: Education, Health, Environment, Agriculture, Youth in Development, and Community Economic Development. Students should apply for admission to the program as early as possible and no later than one year before they expect to complete their UT undergraduate degree. For more information, please visit the Peace Corps page of the Department of Political Science website or contact the Peace Corps Prep Program Coordinator.

* Meets Volunteer Core Requirements.

Rationale* VolsTeach paragraph needs updating due to location update and hyperlinks for the following were never added (link should scroll to location on catalog webpage as other links do):

1. College-wide Requirements: Foundations
   - Applied Oral Communication
2. College-Wide Requirements: Perspectives:
   - Literature and Philosophical and Religious Thought
   - Global Citizenship - US Focus
3. College-Wide Requirements: Engaged Inquires

- Removed "medicine" from the Programs of Study area in the 3+1 programs and added "and the four-year pre-medicine program"

Also changed a duplicate GEOG 132* listing in Natural Sciences Perspectives Requirement to GEO 138*

Students pursuing a major in selected programs in the College of Arts and Sciences are eligible to participate in the University's VolsTeach program (http://volsteach.utk.edu/). This 4-year program permits students to complete a major in mathematics or science while also receiving secondary education teaching licensure through completion of a VolsTeach minor. For more information about VolsTeach, including advising associated with teacher licensure requirements, contact https://cehhs.utk.edu/cehhsadvising/.

Requested Content Changes for Catalog

Internal and External Transfer Admission

Students who are not directly admitted to the Haslam College of Business or who are transferring from other educational institutions can apply for admission after completion of the tracking courses. Students seeking transfer admission must complete all progression courses with a grade of C or better prior to the completion of 75 hours. Selection is highly competitive and based on academic achievement, commitment to pursuing a business discipline, and departmental capacity.

Curriculum

The curriculum coursework is divided into four components – general education, pre-business core, business core, and major.

The 57 hours of general education focus on all aspects of human endeavor – written and oral communications; mathematics; social, behavioral, and natural sciences; humanities; global citizenship; ethics; and the arts. General education courses span the student's entire academic career.

The pre-business core courses (18 hours) are taken during the student's first and second year. The pre-business core provides students with the fundamentals of business education, introducing the tools, the environment, and the functions of contemporary business practices.

Building on the pre-business core foundation, the business core (17 hours) consists of integrated contemporary business management modules in supply chain management, demand management, lean operations, and information management; a discipline-specific course in financial management; coursework on legal issues, and a capstone experience integrating business strategy with a business simulation. Students must earn a minimum grade of C in the capstone, BUAD 453* (Honors BUAD 457*). As business management perspectives change, the topics in the business core will, by design, adapt.

Simultaneously, students are completing the coursework (27 hours) required by their chosen major. The Haslam College of Business offers eight primary majors – accounting, business analytics, economics, finance, human resource management, management, marketing, and supply chain management. Additionally, approved students may pursue International Business as a secondary major (with one of the previously listed eight majors as primary). Within the 27 hours of their major, students may study two areas of emphasis – their major with a collateral or their major with a concentration. With a collateral, students complete 18 hours in their major and 9 hours in their collateral area. With a concentration, students complete 15 hours in their major and 12 hours in their concentration area. See the chart in this section for details of the collateral and concentration options for each major. A minimum grade of C must be earned in every course counted toward the major, including major, collateral, or concentration courses.

Upon the completion of this curriculum, students are awarded a Bachelor of Science in Business Administration.

2025 Majors with Collaterals and Concentrations

1	In addition to its collateral options, economics also offers areas of focus in environmental economics, industrial organization, international economics, labor economics, money/macroeconomics, public economics, and quantitative economics.
2	Students majoring in management will choose one of two major tracks: Leadership and Organizational Effectiveness or Entrepreneurship and Emerging Enterprises. The track students choose will determine eligible collaterals.
3	Students pursuing international business are required to have an international educational experience.
4	Only for students admitted to Health IBEP.

Readmission

For students reentering Fall 2025 and later:

- Returning probationary and dismissed students will not be readmitted to a major in the Haslam College of Business and should explore other options withundergraduate admissions and the appropriate college advising center.
- Returning students not in good standing with the college (below minimum 2.50 GPA) can be readmitted into the Business Exploratory major but must meet with an academic advisor in the Undergraduate Programs office of the Haslam College of Business to discuss the appropriate course of action. Once in good college standing (2.50 GPA or higher), the student can be eligible for readmission to their major.
- Returning students in good standing (minimum 2.50 cumulative GPA with at least a "C" in all completed tracking courses) will be readmitted to their major but must meet with an academic advisor in the Undergraduate Programs office of the Haslam College of Business to discuss the appropriate course of action.

International Programs and Study Abroad

Several opportunities for study abroad are available to Haslam College of Business students, such as group programs arranged and supervised by the college's departments on a full semester or summer term; direct enrollment, exchange, summer study, international internships; and individualized programs. Students pursuing an International Business major, collateral, or concentration are required to study abroad.

Students planning foreign study must first meet with an advisor in Haslam's Office of International Programs and Study Abroad to discuss curricular issues. All Haslam students studying abroad are required to be enrolled in IB 489 or IB 490.

Business Fellows Program

The HCB Business Fellows Honors Program is a premier business honors program for high-achieving, academically minded students enrolled in the Haslam College of Business. The program is designed to provide intellectual challenge for students who have distinguished themselves through high academic achievement. The program supports and enhances HCB's pillars of Inclusion, Integrity, Insight, and Impact by providing both curricular and co-curricular activities for student engagement.

The HCB Business Fellows Honors Program prepares students to be innovative leaders in the competitive business climate by blending classroom learning and real-world experience. In addition to co-curricular activities, students:

- Engage in a strategically designed four-year academic and career development plan with opportunities to take smaller pre-business and business core honors courses
- Participate in company visits to engage with executives and explore industries and organizations
- Engage in professional development workshops and mock interview sessions

For questions about the program, contact businessfellows@utk.edu.

Rationale* Catalog clean-up.

- Internal and external transfer students are directly admitted to any of the college's eight majors, so the admission policy listed in the catalog was outdated.
- The curriculum section states that the college has nine majors and still includes Public Administration, which has moved to the Baker School.
- The Business Exploratory major is now used for readmitted students who are not in good standing (below 2.50 GPA).
- International Programs and Study Abroad: This modification codifies an existing procedure to enroll all students in this zero credit hour course. While this course is required for all IB collaterals/concentrations while studying abroad, enrolling all students helps to facilitate tracking and assessment of the study abroad experience, and to include wrap-around cultural preparation for the experience. It also demonstrates on the transcript the completion of such an experience.
- Business Fellows text should have been updated last year; reflects current admission policy.

Microbiology is one of the fastest growing areas of science. It is the study of organisms so small that they must be viewed with a microscope. These organisms include bacteria, yeasts, molds, protozoa and viruses. Many important scientific discoveries of recent years have been made by microbiologists: since 1910, one-third of the Nobel Prizes in medicine and physiology have been awarded to microbiologists. Microbiology is a broad field which includes the following areas.

1. Pathogenic microbiology – the study of microbial-host interactions which influence disease and immunity.
2. Environmental microbiology – the role of micro-organisms in nature and relationships between organisms, including microbiomes.
3. Environmental biotechnology – the use of micro-organisms to address environmental problems.
4. Food microbiology – the use of micro-organisms in food production.
5. Virology – the study of viruses of both eukaryotes (higher organisms like humans, plants, and fungi) and prokaryotes (bacteria).
6. Immunology – the study of how the human immune system responds to and eliminates pathogens.

Students wishing to emphasize study in this area elect to major in biological sciences with a concentration in microbiology. See the description of the biological sciences major, microbiology concentration for requirements.

VolsTeach Program

Students pursuing a major in selected programs in the College of Arts and Sciences are eligible to participate in the University's VolsTeach program (http://volsteach.utk.edu/). This 4-year program permits students to complete a major in mathematics or science while also receiving secondary education teaching licensure through completion of a VolsTeach minor. For more information about VolsTeach, including advising associated with teacher licensure requirements, contact https://cehhs.utk.edu/cehhsadvising/.

Rationale*

Updating VolsTeach paragraph because Greve Hall no longer exists.

Website

https://honors.utk.edu/

University Honors is a scholarly community comprised of diverse, accomplished, and action-oriented high-potential students from across UT's eleven undergraduate colleges and the dedicated Honors faculty and staff who challenge and support them. The curriculum focuses on interdisciplinary breadth, innovative complex problem-solving, and leadership to complement the depth of learning in students' academic disciplines. University Honors creates and nurtures a community of students eager to learn, lead, and make a positive difference on campus, in Tennessee, and beyond.

University Honors offers two programs: the Chancellor's Honors Program and Haslam Leadership Scholars. Each program has its eligibility requirements, goals, and curriculum (see Academic Program links below).

University Honors students are encouraged to participate in one or more of the University of Tennessee's many specialized departmental honors concentrations or college honor programs. They are encouraged and supported to deepen their honors experience by participating fully in campus life, serving the community, and pursuing experiential learning opportunities, such as internships, research, service learning, and global experiences.

Eligibility and Admission

Chancellor's Honors: High school seniors with superior academic and extracurricular credentials are invited to apply to the Chancellor's Honors Program. Qualified transfer students with less than or equal to one year of credit can apply for membership. Students beyond one year of academic credit are encouraged to enroll in departmental honors concentrations or college honor programs.

Haslam Leadership Scholars: Only high school seniors are eligible to apply to Haslam Leadership Scholars. Highly accomplished students with a demonstrated commitment to leadership, service, and civic engagement who aspire to leverage their leadership to enrich the lives of people and communities across Tennessee and beyond are strongly encouraged to apply.

Prospective high school students must apply to the University of Tennessee by the early action deadline (typically November 1st) and to University Honors by typically November 20th. Transfer students must apply to University Honors by approximately May 1st. For further information and precise dates about admissions, please access: https://studentsuccess.utk.edu/honors/getting-started-with-honors-scholars/

Currently, distance education students are not eligible for the University Honors program.

University Honors students are expected to make timely progress toward honors graduation while maintaining a minimum cumulative GPA of 3.5. Students not meeting expectations must complete supplemental academic coaching with University Honors.

Benefits

Students in the University Honors enjoy scholarships and various privileges designed to facilitate their growth, engagement, and achievement. They are granted priority registration, advanced library privileges, and specialized honors coaching to ensure access to the coursework and resources an ambitious curriculum demands. University Honors students can access exclusive study spaces, engagement opportunities, competitive honors grants, and residence in the University Honors Living and Learning Community.

Rationale* Updated faculty listings and grammar improvements in the text.

The Department of Chemistry presents to the next generation of chemists and chemically literate citizens an integrated program of teaching and research that will prepare them to respond responsibly to current and future national needs. To satisfy our diverse clientele, the educational program is continually improved and includes research, classroom, and laboratory activities. In addition, we endeavor to maintain local responsibilities in support of the university's mission for public service.

Students who desire to major in chemistry may select from either of two courses of study – Bachelor of Science or Bachelor of Science in Chemistry.

Placement in General Chemistry Sequences

The sequences which meet all of the requirements of a year of general chemistry and which serve as prerequisite for upper-division courses are CHEM 122*-CHEM 123*-CHEM 132*-CHEM 133* and CHEM 128*-CHEM 138*; chemistry majors are strongly urged to take the latter sequence. Courses CHEM 102*-CHEM 103* and CHEM 112*-CHEM 113* emphasize organic and biochemistry, and may not be used as prerequisite for other chemistry courses.

It is possible to move from one sequence to another if permission for substitution is obtained in advance. For example, a student who finds a need to complete the CHEM 122*-CHEM 123*-CHEM 132*-CHEM 133* series after having completed CHEM 102*-CHEM 103* may substitute CHEM 102*-CHEM 103* for CHEM 122*-CHEM 123* with approval of the Department of Chemistry and may then take CHEM 132*-CHEM 133*. Credit may be received for only one of the courses CHEM 102*-CHEM 103*, CHEM 122*-CHEM 123*, or CHEM 128*.

In any chemistry course above the freshman level which has CHEM 132*-CHEM 133* as a prerequisite, CHEM 112*-CHEM 113* may be used as a prerequisite with approval of the Department of Chemistry.

CHEM 128*-CHEM 138* are honors courses designed for the student who has already made considerable progress in science. Class size is limited to promote faculty-student interaction. Selection is based on ACT scores, high school chemistry grade, and, if necessary, performance on a placement examination to be given during the first class meeting. A student receiving a passing grade below B in CHEM 128* will complete the year's work by taking CHEM 132*-CHEM 133*.

Beginning students who have had high school chemistry and who have had additional experience (e.g. summer institute study, special research projects, home laboratory) are invited to apply during the summer to the head of the department for permission to take a proficiency examination in one or more semesters of general chemistry. If a satisfactory grade is made on the examination, credit will be allowed for the semester (or course) for which the exam was taken. The Department of Chemistry gives credit in general chemistry to students who present satisfactory scores on the Chemistry Advanced Placement Examination.

Cooperative Program

A cooperative program is available to students who are chemistry majors. After the freshman year, the student alternates a semester in school with a semester in a job in the chemical industry. The program normally requires five years and involves a total of four work semesters and eight school semesters. Students are required to have at least a 2.5 average to enter and remain in the program. Some opportunity exists for students to enter the program later than the end of the freshman year. Interested students should make application to the head of the department at least one semester in advance of the beginning of the first work period. Further information will be supplied on request.

VolsTeach Program
Students pursuing a major in selected programs in the College of Arts and Sciences are eligible to participate in the University's VolsTeach program (http://volsteach.utk.edu/). This 4-year program permits students to complete a major in mathematics or science while also receiving secondary education teaching licensure through completion of a VolsTeach minor. For more information about VolsTeach, including advising associated with teaching licensure requirements, contact http://volsteach.utk.edu/

Requested Content Changes for Catalog

Consumer Information for Distance Education Students

UT provides student consumer information in accordance with federal regulations. An institution offering distance education is required to provide enrolled and prospective students with contact information for filing complaints with its accrediting agency, and with the appropriate state agency for handling complaints in the student's state.

Internal Contacts

- The Consumer Information and Student Right to Know page contains general consumer information, details about the process for handling complaints, and resources for student questions and concerns
- The Hilltopics Student Handbook provides information on student rights and responsibilities, as well as academic policies and procedures
- Complaints concerning departments within the Division of Student Life can be submitted using the student feedback and complaints form

External Contacts

Since 1897, UT has been continuously accredited by the Southern Association of Colleges and Schools Commission on Colleges to award baccalaureate, master's, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, or call 404-679-4500 for questions about the accreditation of the University of Tennessee, Knoxville.

- To access the Commission's complaint policy, procedures, and the Complaint Form, see Complaint Procedures Against the Commission or Its Accredited Institutions. To file a complaint, a student must complete the Commission's Complaint Form and send two print copies to the President, Southern Association of Colleges and Schools Commission on Colleges, 1866 Southern Lane, Decatur, GA 30033-4097.
- The Tennessee Higher Education Commission serves as the coordinating body for the state's universities, public colleges, and Colleges of Applied Technology.

State Authorization and Consumer Protection

There are laws in each state that govern an institution of higher education's ability to offer programs in that state. The University of TN, Knoxville operates in the state of Tennessee, and under the terms and conditions of the State Authorization Reciprocity Agreement, commonly known as SARA.

The NC-SARA website contains a map of SARA member states and a SARA-Participating Institution Directory.

Complaint Resolution Policies and Procedures for Non-Tennessee Resident Students in State Authorization Reciprocity Agreement (SARA) States

Student complaints relating to consumer protection laws that involve distance learning education offered under the terms and conditions of the State Authorization Reciprocity Agreement (SARA) must first be filed with the Institution to seek resolution.

UT strives to employ a fair and expeditious process for resolving student grievances and complaints. Complainants not satisfied with the outcome of the Institution's internal process may appeal, within two years of the incident about which the complaint is made, to the Tennessee Higher Education Commission.

SARA Student Complaints

For purposes of this process, a complaint shall be defined as a formal assertion in writing that the terms of SARA or the laws, standards or regulations incorporated by the SARA Policies and Standards have been violated by the institution operating under the terms of SARA.

SARA consumer protection provisions require the home state portal entity to investigate and resolve complaints of dishonest or fraudulent activity by a provider and of operating a course or program contrary to practices set forth in the C-RAC Guidelines.

The SARA Student Complaint Process page provides an overview of how to file a SARA student complaint.

Complaints regarding student grades or student conduct violations are not covered by SARA.

California is the only state that is not a SARA member state. California residents wishing to file a complaint should notify the CA Department of Consumer Affairs.

UT's State Authorization and Professional Licensure Programs page contains additional information for distance education students who live outside of Tennessee.

Rationale*

Having this information in the catalog is necessary for the university to maintain compliance with federal regulations and the requirements for ongoing participation in the State Authorization Reciprocity Agreement (SARA).

Requested Content Changes for Catalog

7. If a student's clinical performance for any nursing course is found to be unsatisfactory, the student will fail the Clinical Immersion course regardless of grades earned. If the unsatisfactory clinical performance is characterized by unethical, unprofessional, or unsafe behavior, behavior that actually or potentially places the client in jeopardy, the student will be required to withdraw from the program.
8. *If a student fails a clinical immersion course or fails to achieve a 75% or better in its associated lecture, they may repeat the course once. However, to ensure continued competency and relevance in the field, the student is required to retake both the clinical course and the lecture, even if one was previously completed with an acceptable grade.*
9. Requirements for competence in cardio-pulmonary resuscitation are included in the Undergraduate Student Handbook.
10. At periodic intervals specified by the faculty, students must take comprehensive examinations designed to predict success on the NCLEX (licensure) examination.
11. Students must also adhere to all policies and procedures outlined in the BSN handbook (https://tiny.utk.edu/ughandbook).

The College of Education, Health, and Human Sciences is a vibrant and diverse college that seeks to enhance quality of life through research, outreach, and practice. Our mission is to promote a healthy, educated, and civil society; to encourage life-long learning; and to enhance the quality of life within the diverse, global community by preparing professionals to lead and serve through research and engagement in outreach activities. In alignment with that mission, our vision is "to be nationally and internationally recognized for our rich academic programs, highly qualified faculty and staff, and diverse and academically talented student population." The college aspires to build on its already strong reputation in ways that enhance student learning, create new knowledge through research, and positively impact our world on local-to-global levels.

Our core values are:

- An appreciation of individuals regardless of race, creed, ethnicity, sex, sexual orientation, gender identity, physical ability, or socioeconomic status.
- A recognition of the challenge of teaching, learning and practice, and a commitment to high-quality instruction and academic integrity.
- A commitment to the pursuit of knowledge, the respectful exchange of ideas, and academic freedom.
- An understanding of the rich rewards that come through intercultural and international engagement.
- A commitment to making a positive impact through outreach and engagement.
- A resolution to act according to high ethical and professional standards.
- An obligation to create a college culture that is respectful and appreciative of all members of our community.

The college, with its disciplines located at the intersection of many of society's greatest challenges, is positioned to make a significant difference through its programs of study, research, and outreach. Recognizing that the strength of the college is greater than the sum of its parts, the college is subdivided into the following academic departments – Counseling, Human Development, and Family Science; Educational Leadership and Policy Studies; Nutrition; Kinesiology, Recreation, and Sport Studies; Public Health; Retail, Hospitality, and Tourism Management; and Theory and Practice in Teacher Education.

The Graduate School of Education, comprised of the four departments within CEHHS that offer programs in professional education, promotes our education research community and its engagement in the generation and sharing of knowledge designed to improve student opportunity, achievement, and success. Further, it strives to foster a deep understanding of education throughout the local, regional, national, and international community. The School serves to build and strengthen collaborations across departments, programs, and services in education.

Degrees and Majors

Bachelor of Science in Audiology and Speech Pathology

Bachelor of Science in Education – deaf studies major (ASL education concentration, deaf education concentration, and educational interpreting concentration); education major (elementary education concentration, elementary education concentration – English as a second language education specialization, elementary education concentration – interventionist special education specialization, elementary education concentration – middle grades math specialization, elementary education concentration – middle grades science specialization, second language education concentration – world language education and English as a second language education specialization); interdisciplinary early childhood concentration; secondary social science education concentration, STEM secondary concentration; and special education major.

Bachelor of Science in Health and Human Sciences – human evelopmnet and family science major and nutrition major (concentrations in biomedical nutrition science, community nutrition, and dietetics).

Bachelor of Science in Kinesiology

Bachelor of Science in Public Health

Bachelor of Science in Recreation and Sport Management - sport management major and therapeutic recreation major

Bachelor of Science in Retail, Hospitality, and Tourism Management – hospitality and tourism management major and retail and merchandising management major (fashion retailing concentration and merchandising analytics concentration).

Minors

The academic departments within the College of Education, Health, and Human Sciences offer minors in American Sign Language, art education, biomedical research in nutrition, culinary arts, English as a second language education, event planning and design, human development and family science, interpersonal development, leadership studies, mathematics education grades 6-8 and science education grades 6-8 (for Arts and Sciences students only), nutrition, nutrition and physical activity for health, public health, retail and merchandising management minor, secondary education (for Arts and Sciences students only), tourism and hospitality management, VolsTeach Mathematics, VolsTeach Science, and world language education.

Students pursuing a minor must complete at least one-half of the required classes at the University of Tennessee, Knoxville, and all courses must be taken for a letter grade unless otherwise specified.

Admission to the College of Education, Health, and Human Sciences

Entering freshmen and transfer freshmen students (i.e., with fewer than 30 credit hours and a minimum 2.0 GPA) are eligible for admission to the College of Education, Health, and Human Sciences. Transfer students, with 30 or more credit hours completed, must have a minimum GPA based on the desired major.

- All teacher licensure majors - minimum 2.75
- Audiology and Speech Pathology - minimum 3.0
- Deaf studies, educational interpreting concentration - minimum 2.6
- Hospitality and Tourism Management - minimum 2.3
- Human Development and Family Science - minimum 2.3
- Kinesiology - minimum 2.5
- Nutrition - minimum 2.6
- Public Health - minimum 2.6
- Retail Merchandising Management - minimum 2.3
- Sport Management - minimum 2.5
- Therapeutic Recreation - minimum 2.5

Once admitted, students are expected to maintain the minimum GPA, ranging from 2.3-3.0, as outlined by uTrack.

College advisors will assist students who fail to progress to identify other academic alternatives and, if necessary, to facilitate the transfer of those students to other academic units.

Readmission

Students who return in good standing are eligible for readmission to the College of Education, Health, and Human Sciences. College advisors are available at A332 Bailey Education Complex (865-974-8194) to meet with students interested in EHHS academic programs and to discuss GPA and progression requirements.

Students on probation with more than 30 hours and less than a 2.3 GPA will be readmitted as College Exploratory and assisted by college advisors in identifying a major. In order for students on probation to return to their original intended major, all requirements including improved GPA must be achieved.

Students dismissed from the university will be readmitted into College Exploratory and assisted by college advisors. In order for academically dismissed students to return to their original intended major, all requirements including improved GPA must be achieved.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students who first entered Fall 2013 or later. uTrack does not apply to transfer students who entered prior to Fall 2015.

Progression to a Major, Concentration, or Program

Progression refers to the process during which a student demonstrates an aptitude to complete an academic major, concentration, or academic program. Typically, progression requirements include completion of prerequisite courses and attainment of a minimum grade point average. Some majors, concentrations, and programs also require applicants to attain certain minimum performance levels on standardized aptitude or achievement tests and a favorable recommendation from an interview panel. Academic majors, concentrations, and programs involving teaching or other interaction with children require applicants to submit to security checks. Upon successful progression (i.e., admission) to a major, concentration, or program, students must meet additional criteria in order to maintain good standing and to graduate or complete a program.

Complete progression requirements for each major or concentration are located in the following sections of this catalog. Progression requirements for the Teacher Education Program appear in the section entitled Teacher Education at the University of Tennessee, Knoxville.

VolsTeach

Students pursuing a major in selected programs in the College of Arts and Sciences are eligible to participate in the University's VolsTeach program (https://volsteach.utk.edu/), which permits students to simultaneously complete a major in mathematics or science and receive secondary education teaching licensure within this 4-year undergraduate program. For more information about VolsTeach, including advising associated with teaching licensure requirements, contact the Office of Advising & Student Services in the College of Education, Health, and Human Sciences (332 Bailey Education Complex).

College of Education, Health, and Human Sciences Honors Program

The College of Education, Health, and Human Sciences provides a unique opportunity for its best and brightest students to use classroom learning in solving practical problems. Through the college's honors program, students have an opportunity to apply knowledge and skills specific to their academic majors to their work with individuals and/or groups in the community.

The goal of the CEHHS honors program is to provide students with an experiential educational model that is based on reciprocal learning including practical application of their classroom studies; service activities that emerge from and inform classroom context; and structured reflection linking service experiences back to specific learning goals. The honors program provides students with a rigorous and relevant curriculum to teach civic responsibility and enrich the overall learning experiences.

Admission to the College of Education, Health, and Human Sciences Honors Program is competitive and applicants should be aware that meeting the minimum admission criteria does not assure entry into the program. In addition to fulfillment of the minimum requirements shown below, applicants should note that an individual's personal objectives, type of field setting desired, availability of adequate faculty supervision, as well as total number of applicants are determinants in the selection process. Applicants should also note that participation in this particular honors program does not preclude participation in other honors programs.

Admission Requirements

- Admitted to one of the college's undergraduate majors.
- Attainment of a minimum cumulative 3.50 GPA (based on the completion of at least 15 semester credit hours).
- Submission of a CEHHS Honors Program application. Applications are available in the CEHHS Office of Advising and Student Services, A332 Bailey Education Complex.
- Individual meeting with departmental coordinator.

Program Requirements

- Two lower-division honors courses. Examples include but are not limited to PSYC 117*; SOCI 127*; SPAN 217, SPAN 218*; UNHO 257*, UNHO 267*, UNHO 277*. It is also possible to satisfy this requirement through lower-division honors coursework in the major and/or through Honors-by-Contract*.
- One 3-credit hour course with a service-learning component as approved by the department. This requirement may be met through Honors-by-Contract*.
- One upper-division 3-credit hour honors course in the student's academic major (e.g., HDFS 497, KNS 497, RMM 497, etc.) through which the student will develop and present a capstone project at the university's annual Exhibition of Undergraduate Research and Creative Achievement or at an approved similar professional venue. This requirement may be met through Honors-by-Contract*.

**Honors-by-Contract requires completion of a written contract (available in the CEHHS Office of Advising and Student Services, BEC A332) delineating additional effort and is submitted to the College's honors coordinator/director by the third week of the semester.*

Program Completion

Students who successfully complete the program requirements and maintain a minimum cumulative 3.50 GPA will be recognized during commencement and have their participation in the CEHHS Honors Program so noted on their official transcript.

Further Information

Students interested in obtaining an application or further information regarding the College of Education, Health, and Human Sciences' Honors Program should contact the CEHHS Office of Advising and Student Services in A332 Bailey Education Complex (865-974-8194).

Departmental faculty contacts:

- Counceling, Human Development, and Family Science - Dr. Sally Hunter – sbhunter@utk.edu
- Kinesiology – Dr. Dawn Coe – dcoe@utk.edu
- Recreation and Sport Management – Dr. Robin Hardin – robh@utk.edu
- Retail, Hospitality, and Tourism Management – Dr. Junehee Kwon – jkwon7@utk.edu
- Nutrition – Dr. Dhiraj (Raj) Vattem – vattem@utk.edu
- Theory and Practice in Teacher Education – Dr. Lynn Hodge – lhodge4@utk.edu
- Leadership Studies - Dr. Brandon Kliewer - bkliewer@utk.edu

Advising

The CEHHS Office of Advising & Student Services houses the Advising Center, providing academic program planning and related services to students in the College of Education, Health, and Human Sciences. The center, located in the Jane and David Bailey Education Complex A332, maintains a full-time staff of academic advisors to respond to students' concerns regarding progression to academic programs, uTrack milestones, courses of study, academic petitions (e.g., course substitutions, etc.), and referrals to other campus services.

Course Load

Undergraduate students may enroll in a maximum of 19-credit hours during fall and spring semesters and for no more than 12-credit hours during summer term. Appeals to exceed these maximums should be directed to the college's Office of Advising & Student Services; decisions to approve overloads are based on a review of each student's academic record but, typically, will not be granted to students with less than a 3.0 GPA.

Students who are granted permission by the university's Dean of the Graduate School to earn graduate credits (see Seniors Eligible for Graduate Credit) prior to earning a bachelor's degree may enroll in no more than 15-credit hours during either fall or spring semesters or a maximum of 12-credit hours during summer term.

Course Credit

With permission of the instructor, an undergraduate student who has a minimum 3.0 GPA may enroll in a 500-level course for undergraduate credit. Exclusions include courses numbered 500, 502, and independent or directed study courses for which there are appropriate undergraduate course alternatives.

Grading

Students enrolled in the College of Education, Health, and Human Sciences may take courses graded on a Satisfactory/No Credit (S/NC) basis when letter grading (i.e., A-F) is not an option or in non-specified (i.e., unrestricted electives) courses. Additionally, students must earn at least a C in major prefix courses and in any other course so identified by the major area faculty (see departmental sections for specific progression requirements for each major).

General Education Test for Seniors

The Tennessee Higher Education Commission (THEC) requires each public institution of higher education to evaluate the general education skills of the senior class. The College of Education, Health, and Human Sciences requires each of its senior students to take this general education test prior to graduation. The test results enable the University of Tennessee, Knoxville, to evaluate its general education program and to qualify for needed funding from the State of Tennessee. Students enrolled in programs that are scheduled to take a major field test are exempt from the general education testing.

Major Field Test for Seniors

The Tennessee Higher Education (THEC) requires that each public institution for higher education assess the knowledge and expertise of students within each major area of study. Each year, a subset of all major fields of study on campus is required to test all graduating seniors from those respective fields. The results from these tests enable the University of Tennessee, Knoxville, to evaluate and, where necessary, improve the quality of major fields of study. Students are informed in their senior year if they are required to take a major field test. Students enrolled in a major field of study that is scheduled to test majors are exempt from the general education testing that particular year.

Seniors Eligible for Graduate Credit

Subject to approval by the Dean of the Graduate School, a senior at the University of Tennessee, Knoxville, who needs fewer than 30-semester hours to complete requirements for a bachelor's degree and has at least a B average (3.0) may enroll in graduate courses for graduate credit, provided the combined total of undergraduate and graduate coursework does not exceed 15-credit hours per semester (12 credits during summer semester).

- Only students working toward a first bachelor's degree are eligible.
- Students who have met all requirements for graduation are not eligible for senior privilege.
- Approval must be obtained each semester at the Graduate School, Rm 111 Student Services Bldg.; (865) 974-2475. Form available online at: https://gradschool.utk.edu/forms-central/senior-requesting-graduate-credit/
- A maximum of 9 hours of graduate credit at the 400- and 500-level can be obtained in this status.
- Some departments do not permit seniors to register for graduate courses without prior permission.
- Courses taken for graduate credit may not be used toward both the baccalaureate and a graduate degree program except in the case of approved dual bachelor's/master's programs.

Teacher Education at the University of Tennessee, Knoxville

The College of Education, Health, and Human Sciences is the administrative base for the university's preparation programs for educators. As such the college has oversight responsibilities for licensure programs attached to other academic units. The Teacher Education Program at the University of Tennessee is accredited by the Council for the Accreditation of Educator Preparation (CAEP), https://caepnet.org/. This accreditation covers the initial teacher preparation programs and advanced educator preparation programs.

Admission to Teacher Education

A student desiring to become a teacher, regardless of college affiliation or academic major must be formally admitted to the Teacher Education Program. Admission requirements include, but are not limited to the following:

1. Academic achievement – Per Tennessee State Board of Education policy, GPA should be 2.75 or above to apply for admissions to teacher education. If you are unsure whether your GPA meets the minimum requirement, please contact your advisor or beateacher@utk.edu.
2. Minimum number of hours completed and required courses for formal progression to the major, concentration, minor, and/or specialization:
    1. 12-credit hours for American Sign Language education, early childhood education integrated PreK-3, early childhood education integrated birth to kindergarten, elementary education, deaf education, second language education, secondary English education, secondary social science education, VolsTeach secondary STEM education and special education; 30- credit hours for educational interpreting; 45-credit hours for art education, and music education.
    2. completion of specific courses prior to admission to the following teaching areas: education of the deaf and hard of hearing-ASL 211*; music education – MUTH 210 and at least one semester 200-level (applied) music.
3. Standardized Tests: Per Tennessee State Board of Education policy, those applying for admission to undergraduate teacher education programs should have an ACT Composite – 21 or SAT Verbal & Math – 1080. If you do not have proof of minimum ACT or SAT but are passionate about becoming a teacher, you are encouraged to apply as exceptions can be made in select cases.
4. Tennessee state law (TCA 49-5-5610) requires that students wishing to enter an approved higher education educator preparation program must submit to a criminal history background check. Admission to the program is dependent on clearance of any conviction(s) as referenced to a list of crimes that would prohibit a person from being licensed in Tennessee.

Boards of Admission in Teacher Education

Admission decisions will be made by a Board of Admissions based on the above admission criteria, as well as each applicant's written application, appropriate experience working with children and youth, and expressed interest in teaching. Applicants may also be invited to interview at the discretion of the Board of Admissions. Admission decisions are based on a comprehensive review of candidates' credentials, and as appropriate results from the Admissions Board interviews. Admissions decisions are made by faculty who are responsible for the application review process and who sit on Admissions Boards.

Admission is competitive and certain teaching fields have more qualified applicants than space available. Reviews are conducted during fall and spring semesters; each board is comprised of content and pedagogy specialists. All licensure programs have received State of Tennessee approval and must comply with state licensing requirements. Prospective applicants should request appointments with teacher licensure academic advisors to thoroughly discuss licensure program requirements. Appointments may be made by calling the Office of Advising & Student Services at 865-974-8194.

Maintaining Good Academic Standing in Teacher Education

To maintain good standing in the Teacher Education Program and to qualify for a degree and/or licensure as a teacher, students must perform adequately both in the university classroom and in the school(s). Students must maintain a minimum 2.75 cumulative GPA and maintain a minimum 2.8 GPA (course grade C or better required) in professional education courses.

Complete information on the teacher licensure program is available through the College of Education, Health, and Human Sciences' website (https://cehhs.utk.edu/); the college's Office of Advising & Student Services' website (https://cehhsadvising.utk.edu/licensure) and office – Bailey Education Complex, A332; or from teaching area faculty.

University-Wide Involvement in Teacher Education

The faculty in the College of Education, Health, and Human Sciences assume primary responsibility for preparing school personnel. The College of Arts and Sciences faculty have major responsibility for providing the general education background required of all teachers and for providing the specialized content knowledge needed by teachers.

Information regarding specific teaching fields and educational specialties is available at the following campus locations.

- Agriculture Education – 325 Morgan Hall
- Art Education – 313 Ayres Hall
- Library Information Specialist – 451-K Communications Building
- Music Education – 211 Natalie L. Haslam College of Music
- School Counseling – A535 Jane and David Bailey Education Complex
- School Psychology – A535 Jane and David Bailey Education Complex
- Audiology and Speech Pathology – UT Conference Center, 600 Henley Street, Suite 119
- College of Social Work – Stokley Management Center, Floors 5 & 7
- VolsTeach – 429 Philander P. Claxton Education Building

Information regarding general teacher preparation is described in the College of Education, Health, and Human Sciences section of this catalog and is available through the college's Student Services Center, A332 Bailey Education Complex.

Type of Change Requested* [ ] New Content to be Added to the Catalog [x] Content to be Revised in the Catalog

This request should be applied to:* [x] Next year's catalog [ ] Current published catalog [ ] Other catalog(s)

Other Catalog(s)

Page Information

Where will this NEW or REVISED content appear?* (•) Existing Page ( ) New Page

If content is being added to an existing page, copy & paste the URL of the catalog page where it will go. https://catalog.utk.edu/preview_entity.php?catoid=51&ent_oid=5862

Indicate the location on the page(s) where this information will appear. VolsTeach and Five-Year BS/MS with Physics Minor

If an existing page should be removed entirely, copy & paste the URL here.

If content is being added to a new page, indicate what the name of that page should be:

Directions to Propose Content Changes:

1. Copy and Paste the current content from the Catalog as it appears online into the field below. Do NOT make any edits to the text until step 4.

2. Click on Save (this will ensure that original content is saved).

3. After you have completed all required fields, marked with an asterisk, Validate and Launch your proposal.

4. Make edits to the text in the field below. Be sure to format the content exactly as it will appear online.

5. After you have completed all edits to the text, be sure to approve your proposal in the decisions tab on the right.

Requested Content Changes for Catalog

VolsTeach Program

Students pursuing a major in selected programs in the College of Arts and Sciences are eligible to participate in the University's VolsTeach program (http://volsteach.utk.edu/). This 4-year program permits students to complete a major in mathematics or science while also receiving secondary education teaching licensure through completion of a VolsTeach minor. For more information about VolsTeach, including advising associated with teaching licensure requirements, contact http://volsteach.utk.edu/

Rationale* We need to update the text about VolsTeach to make it accurate (Greve Hall no longer exists!) and we need to remove outdated information about a program which no longer exists.

The study of nutrition is heavily grounded in the biological and biochemical sciences that underlie the understanding of how nutrients and non-nutritive food components contribute to human health and disease. The Nutrition major is designed for students interested in developing a background in nutrition in preparation for health professional careers or graduate education in research, practicing in community and public health nutrition, or undertaking applied practice as Registered Dietitian Nutritionist. Students are able to pursue one of three concentrations: Biomedical Nutrition Science, Community Nutrition, or Dietetics. Each concentration includes a foundation in the basic sciences, introductory nutrition coursework, nutrient metabolism, nutrition assessment, and nutrition research design and methods, which is built upon through advanced concentration-specific coursework.

- Biomedical Nutrition Science Concentration - The Biomedical Nutrition Science Concentration of the Nutrition Major prepares students for graduate studies in biological and health sciences or for health professional programs, such as pharmacy and medicine. This concentration also prepares students for careers as laboratory technicians, research assistants, technical consultants, and sales representatives in the biomedical and nutrition industries. The Biomedical Nutrition Science Concentration includes advanced coursework in the basic nutrition and biomedical sciences to prepare graduates for graduate study in biomedical health sciences and, with additional coursework planned with an advisor, provides a solid background for application to a variety of health professional programs. In addition, for qualified students, the Department of Nutrition offers a 5-year BS/MS accelerated degree program with a major in Nutrition and a concentration in Biomedical Nutrition Science. Interested students should see the section of the catalog specific to this program or see the Nutrition program information in the Graduate Catalog.
- Community Nutrition Concentration - Students pursuing the Community Nutrition Concentration are trained in competencies needed to become a Certified Health Education Specialist (CHES) and to work in the community in a variety of roles, such as nutrition educators, WIC nutritionists, and worksite wellness program coordinators, and in a variety of settings, such as public health departments, community agencies, and Extension programs. Individuals with CHES certifications are commonly employed in healthcare, government, university, business, community/non-profit, and K-12 education settings. For qualified students, the Department of Nutrition offers a 5-year BS/MS accelerated degree program with a major in Nutrition and a concentration in Community Nutrition. Interested students should see the section of the catalog specific to this program or see the Nutrition program information in the Graduate Catalog.
- Dietetics Concentration – Students pursuing the Dietetics Concentration prepare to become credentialed as Registered Dietitian/Nutritionists (RDNs). The Dietetics Concentration is accredited as a Didactic Program in Dietetics (DPD) by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics, 120 S. Riverside Plaza, Suite 2190, Chicago, Illinois 60606-6995, (312) 899-0040 ext. 5400, http://www.eatright.org. RDNs are employed in a variety of settings including hospitals, medical offices and clinics, long-term care, private practice, community settings such as health departments, other government entities including the military, food banks and other non-profits, schools, and Extension programs, food and nutrition management, collegiate and professional athletics programs, industry, and many others. Clinical RDNs may specialize in a number of areas including diabetes, pediatrics, malnutrition and critical care, cancer, gastrointestinal diseases, kidney disease, and others. Coursework emphasizes the role of nutrition for disease prevention and treatment, nutrition education and counseling, community nutrition, food science/culinary arts, and foodservice management, and hands-on skills courses that prepare graduates for seamless transition to practice. Qualified students in the Dietetics Concentration can apply through a competitive process to complete both BS and MS degrees with a concentration in Clinical Nutrition in Dietetics in five years through our accelerated program and be immediately eligible to take the RDN national credentialing exam. Separate application to the M.S. is required. Students graduating with the B.S. degree alternatively have the option to apply to accredited supervised practice programs across the country to pursue careers as RDNs. For details on the M.S. in Nutrition Concentration in Clinical Nutrition and Dietetics, see the section in the catalog specific to the Dietetics Concentration or see Nutrition program information in the Graduate Catalog. Students interested in preparing for both careers as RDNs and other health professionals should choose the Dietetics Concentration.

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.
