The University of Tennessee, Knoxville
Undergraduate Council
Minutes of the Meeting
February 18, 2025

Leadership and Elected Members present: Chair Dawn Coleman, Vice Chair Manolis Doxastakis, Past Chair Jamie Coble, Derek Alderman, Justin Arft (by proxy Bill Hardwig), Doug Ayres, Quinten Bernhold, Jochen Denzler, Nicole Eggers, Bryan Good, Bill Hardwig, Terry Higgins, Yolanda Kirkpatrick, Nicole McFarlane, Kimberly Mitchell, Ryan Mokhtari, Gary Null, Mustafa Oz (by proxy Julie Longmire), Ashley Pennell, Cindy Raines, Jon Ring, Kimberly Roberts, Craig Ruff, Sean Schaeffer, Hemant Sharma, Brittany Shelton, Kimberly Sims (by proxy Jon Ring), Vandana Singh, Alice Stewart, Anna Szynkiewicz (by proxy Jochen Denzler), Jonathan Walton, and Josh Weinhandl

Ex-Officio Members present: Pat Akos, Katherine Ambroziak, George Drinnon, Lars Dzikus, Christopher Kelley, Julie Longmire, Brendan McConville, Phillip Moore (represented by Kathleen Thompson), Anna Sandelli, John Stier, and Liem Tran

Student Members present: Lizzy Heflin

Others present: Laura Brown, Ashley Browning, Brian Coldren, Cat Cox, Beth Foster, Brian Francis, Betsy Gullett, Jake Haramule, Travis Holsapple, Jonathan Hughes, Eric Lukosi, Miranda McAfee, Lori Mitchell, Shanna Pendergrast, Alysa Schoenfeld, Lisa Slaton, Josh Steele, and Merrill Walker

Welcome and Call to order: The meeting was called to order by Dawn Coleman, Chair, when quorum was determined at 2:30 pm.

Committee Reports and Approvals (see attachments for details):

Academic Policy Committee
The committee presented reports from the January 29, 2025 meeting.

A. One Content and Text Change proposal was postponed:

UG Update to Academic Policies and Procedures page – General Repeat Policy

B. One Information item was discussed:

An ad hoc committee was formed to further discussion regarding recommended changes for clinical immersion student appeals.

Volunteer Core Committee
The committee presented reports from the following meetings:

A. December 4, 2024
62 courses were approved for Vol Core.
B. January 29, 2025
79 courses were approved for Vol Core.
C. February 11, 2025 (eVote)
1 course was approved for Vol Core.

Curriculum Committee
The committee presented reports from the meetings of December 3, 2024, and February 4, 2025.

A. December 3, 2024
   1. 3 proposals from the College of Architecture and Design were passed.
   2. 166 proposals from the College of Arts and Sciences were passed.
   3. 40 proposals from the College of Education, Health, and Human Sciences were passed.
   4. 24 proposals from the College of Emerging and Collaborative Studies were passed.
   5. 41 proposals from the Herbert College of Agriculture were passed.
   6. 5 proposals from the Howard Baker School of Public Policy and Public Affairs were passed.
   7. 154 proposals from the Tickle College of Engineering were passed.
   8. 7 proposals from University Honors were passed.

B. February 4, 2025
   1. 75 proposals from the College of Architecture and Design were passed.
   2. 256 proposals from the College of Arts and Sciences were passed.
   3. 35 proposals from the College of Communication and Information were passed.
   4. 46 proposals from the College of Education, Health, and Human Sciences were passed.
   5. 31 proposals from the College of Emerging and Collaborative Studies were passed.
   6. 55 proposals from the College of Nursing were passed.
   7. 5 proposals from the College of Social Work were passed.
   8. 60 proposals from the Herbert College of Agriculture were passed.
   9. 85 proposals from the College of Business were passed.
   10. 5 proposals from the Howard Baker School of Public Policy and Public Affairs were passed.
   11. 57 proposals from the Natalie L. Haslam College of Music were passed.
   12. 3 proposals from the Tickle College of Engineering were passed.
   13. 1 proposal from University Honors was passed.

Information Item(s):
7 informational items were shared:

1. Withdrawal of CAS HIST 407 and 408 Proposals
2. College of Nursing - Grade Mode Change
3. English Advanced Placement (AP) Equivalencies Update
4. Reactivate EEB 485
5. THEA 475 - Connections Option Correction
6. Withdrawal of POLS 402, POLS 403, and POLS 409 2025-2026 Add Course Proposals
7. Update to About the University page: Consumer Information for Distance Education Students

Adjournment: Dawn Coleman adjourned the meeting at 3:28 pm.

Approval of minutes: These minutes were certified correct via email on February 21, 2025.

Minutes submitted by: Miranda McAfee

SS	POLS 471	International Political Economy	Initial approval
SS	POLS 483	Arms Control and Nuclear Proliferation	Initial approval
SS	SOCI 375 WGS 375	Gender in Society	Initial approval (approved for GCUS)
SS	SOCI 472 AFST 472	Civil Rights Movement	Initial approval
SS	WGS 201	Intro to LGBTQ+ Studies	Initial approval

10. **Course Approval: Written Communication**

Designation	Course	Name	Reason
WC	HIST 408R	Honors Senior Paper	Initial approval (base course approved 2022)

11. **Discussion: Volunteer Core Operating Guidelines**

- The current operating guidelines are available online. We have removed all language related to General Education and line edited the document to eliminate all future tense given that Volunteer Core has been around for over two years.
- When you access the document, it will indicate you are reviewing. We recommend changing the document to simple markup by choosing the dropdown immediately below reviewing and choosing markup in margin (simple markup)
- Please review them and make suggested edits prior to the meeting. Initial comments from previous discussions are included.

The University of Tennessee, Knoxville
Volunteer Core (General Education) Committee
Minutes of the Meeting
January 29, 2025

Call to order: A regular meeting of the Volunteer Core (General Education) Committee was held via online meeting software on January 29, 2025. The meeting was called to order by Chair Michelle Violanti when quorum was met at 9:01 am.

Members and Subcommittee Chairs present: Chair Michelle Violanti, Justin Arft (by proxy Nicole Eggers) Sarah Colby, Chuck Collins, Alison Connor, George Drinnon, Lars Dzikus, Nicole Eggers, Megan Fields, Kate Gourley, John Hess, Terry Higgins, Julie Longmire, Beauvais Lyons, Michael McFall, Phillip Moore, Sean Morey, Lee Murphy, Gary Null, Shanna Pendergrast, John Scheb, Brittany Shelton, Natalie Stepanov, John Stier, Jason Strickling (by proxy Merrill Walker), Kelley Strohacker, Liem Tran, and Erin Whitaker (by proxy Anna Sandelli), and Nick Zhou

Others present: K'Cindra Cavin, Gerard Cohen-Vrignaud, Dawn Coleman, Cat Cox, Manolis Doxastakis, Beth Foster, Jonathan Hughes, Miranda McAfee, Jennifer Meunier, Lori Mitchell, and Anna Sandelli

Voting Items - Changes to Approved Vol Core Courses:

- ELPS 201/ ELPS 207 to LEAD 201/ LEAD 207 Foundations of Leadership Studies (EI - prefix change)
- ELPS 350 to LEAD 350 Coached Leadership Practicum (EI - prefix change)
- NUTR 316: Nutrition Assessment Practicum (EI - assignment Change)
- EF 437 to IES 437: Honors: Senior Interdisciplinary Design (Drop WC and retain OC VolCore Designation – prefix change)
- ANSC 360 to ANSC 260: Equine and Food Animal Evaluation (OC - course number change)
- ARCH 461 to ARCH 431 Design Development Integrations (QR - course number change)
- DSGN 130 to COAD 130: Basic Design Thinking and Innovation (EI and OC - prefix Change)
- DSGN 430 to COAD 430: Design Thinking and Innovation (AOC and EI - prefix Change)

Voting Items - Course Approvals:

79 courses were approved for Vol Core. Please note that this total includes cross listings, base courses, and N/R/S courses as listed below.

Applied Arts and Humanities (AAH)

1. MUSC 111 Foundations of Guitar Basic Skills
2. MUSC 112 Foundations of Guitar II Intermediate Skills
3. MUSC 113 Foundations of Guitar III Style

Arts and Humanities (AH)

1. RUSS 453 Cultural Forms of Protest in Russia
2. MUJZ 411 From Jazz to Hip Hop

Applied Oral Communication (AOC)

1. AFST 302 Globalization and Black Health
2. ENGL 499 Careers for English Majors
3. MATH 395 Communicating Mathematics
4. ORPM 430 Natural and Cultural Interpretation
5. PHIL 366 Philosophy of Cognitive Science

Engaged Inquiries (EI)

1. AFST 313 Social Context of African American Health
2. ALEC 213 Agricultural Mechanics Applications in Agriscience Education
3. ANTH 325 Migration and Transnationalism
4. ANTH 413 Dynamics of Health and Illness
5. ANTH 453 Public Heritage and Community Archaeology
6. AREC 395 Executive Seminar Series
7. CCI 150 Communication in an Information Age
8. CHIN 471 Introduction to Chinese Linguistics
9. CYBR 101 Introduction to Cybersecurity Concepts
10. DATA 101 Data Knowledge and Discovery
11. DATA 102 Data Stewardship and Ethics
12. EEB 330S Field Botany
13. ESS 462 Environmental Climatology
14. GEOG 224 Geography of Country Music
15. EEPS 210 Astrobiology: Life, the Universe, and Everything
16. HEBR 315 Multicultural Mosaic: Exploring Voices in Israeli Society
17. HIST 302/ HIST 302R History and the Public
18. HIST 490/ HIST 490R Internship at the Center for the Study of Tennesseans and War
19. IES 438 Honors Interdisciplinary Senior Design Project II
20. ORPM 495 Internship in Outdoor Recreation and Park Management
21. PLSC 260 Biotechnology: Foundations and Applications
22. PLSC 421 Native Plants in the Landscape
23. PLSC 492 Internship in Horticultural and Plant Sciences
24. POLS 469 The Politics of Genocide and Ethnic Cleansing: Theory, Prevention, and Aftermath
25. REST 310 Religion and Gameworlds
26. REST 356/ AFST 356 Vodou Gods and Atlantic Perils: African Religions in the New World
27. REST 379 Chinese Religions
28. RMM 441 Branding
29. RUSS 352 Ukrainian-Russian Culture and Conflict
30. RUSS 453 Cultural Forms of Protest in Russia
31. SPAN 350 Spanish for Medical & Healthcare Professions
32. SUST 101 Transdisciplinary Perspectives on Sustainability
33. THEA 230/ AFST 230 The Black Arts Workshop: Performance and History
34. UNHO 207 Complex Problems and Human-Centered Design
35. WLC 394 Experiential Learning in Foreign Language Classroom

Global Citizenship - International (GCI)

1. PHIL 320 Ancient Western Philosophy
2. PLSC 491 International Study: Design Thinking Through The Lens of Gardens and Culture
3. POLS 452/ AFST 452 Foundations of African Politics: Dictators, Democratization, and Development
4. RUSS 453 Cultural Forms of Protest in Russia
5. WGS 419 Gender and Sexuality in Ancient Western Philosophy

Global Citizenship – United States (GCUS)

1. ANTH 320 American Cultures
2. HIST 140 The American Presidency
3. IAC 203 Constitutional Foundations
4. IAC 321 American Political Economy and Citizenship

5. PLSC 122 Food Justice and the Homegrown Harvest

Quantitative Reasoning (QR)

1. AET 200 Advanced Math for Applied Engineers
2. AGNR 220/ SNR 220 Introduction to Statistical Analysis in Agriculture and Natural Resources
3. AI 101 Introduction to the World of AI
4. AI 102 Natural Language-Based Programming Techniques
5. AREC 324 Quantitative Methods
6. DATA 202 Data Management and Visualization
7. PHIL 360 Philosophy of Science

Social Sciences (SS)

1. GEOG 362 Sustainable Development in Appalachia
2. INSC 201 Foundations of Information Sciences
3. INSC 210 Foundations of Information Technology
4. LARN 240 The Future of Nature
5. POLS 455 Identity, Conflict and State Building in South Asian Countries
6. REST 344 Religions in Appalachia
7. SOCI 341 Social Inequalities

Written Communication (WC)

1. AFST 330 Black Music Culture
2. CHEM 489 Advanced Medicinal Chemistry Laboratory
3. GEOG 362 Sustainable Development in Appalachia
4. WGS 419 Gender and Sexuality in Ancient Western Philosophy

Additional Item: The committee also approved a proposal from the floor that the GCUS subcommittee be asked to review the revised proposal "ENGL 210 Disability and Literature" with sufficient time for the Vol Core Committee to complete an electronic vote of the proposal before Feb. 11.

Adjournment: The meeting was adjourned at 10:03 am.

Approval of Minutes: These minutes were certified correct via email on February 5, 2024.

Minutes Submitted by: Miranda McAfee

Volunteer Core Meeting

Date: Wednesday, January 29, 2025 from 9:00 am to 10:00 am
Location: Zoom
Meeting Materials are in the Subcommittee folder on the VolCore OneDrive

Agenda

1. **Update from the Chair**

- Temporary pause on changing the way VolCore courses are designated in Catalog
- Dynamic Forms

2. **Voting Item: Changes to Approved VolCore Courses**

- Prefix Change from ELPS to LEAD for 201/207: Foundations of Leadership Studies (EI)
- Prefix change from ELPS to LEAD for 350: Coached Leadership Practicum (EI)
- Assignment Change for NUTR 316: Nutrition Assessment Practicum (EI)
- Prefix Change from EF 437 to IES 437: Honors: Senior Interdisciplinary Design (Drop WC and retain OC VolCore Designation)
- Course Number Change from ANSC 360 to ANSC 260: Equine and Food Animal Evaluation (OC)
- Course Number Change from ARCH 461 to ARCH 431 Design Development Integrations (QR)
- Prefix Change from DSGN to COAD for 130: Basic Design Thinking and Innovation (EI and OC)
- Prefix Change from DSGN to COAD for 430: Design Thinking and Innovation (AOC and EI)

3. **Course Approval: Applied Arts and Humanities.**

- MUSC 111 (also applying for EI): Foundations of Guitar Basic Skills
- MUSC 112 (also applying for EI): Foundations of Guitar II Intermediate Skills
- MUSC 113 (also applying for EI): Foundations of Guitar III Style

4. **Course Approval: Applied Oral Communication.**

- AFST 302: Globalization and Black Health (new course)
- ENGL 499: Careers for English Majors
- MATH 395: Communicating Mathematics
- ORPM 430: Natural and Cultural Interpretation
- PHIL 366 (originally 368): Philosophy of Cognitive Science (new course)

5. **Course Approval: Arts and Humanities.**

- RUSS 453: Cultural Forms of Protest in Russia (also applying for EI and GCI)
- MUJZ 411: From Jazz to Hip Hop (new course)

6. **Course Approval: Engaged Inquiries.**

- AFST 313: Social Context of African American Health
- ALEC 213: Agricultural Mechanics Applications in Agriscience Education
- ANTH 325: Migration and Transnationalism
- ANTH 413: Dynamics of Health and Illness
- ANTH 453: Public Heritage and Community Archaeology
- AREC 395: Executive Seminar Series
- CCI 150: Communication in an Information Age
- CHIN 471: Introduction to Chinese Linguistics
- CYBR 101: Introduction to Cybersecurity Concepts
- DATA 101: Data Knowledge and Discovery (approved for QR)
- DATA 102: Data Stewardship and Ethics (also applying for QR)
- EEB 330S: Field Botany (base course approved 2022)
- ESS 462: Environmental Climatology (approved for AOC)
- GEOG 224: Geography of Country Music
- GEOL 210/EEPS 210: Astrobiology: Life, the Universe, and Everything (approved for NS)
- HEBR 315: Multicultural Mosaic: Exploring Voices in Israeli Society
- HIST 302/302R: History and the Public (new course)
- HIST 490/490R: Internship at the Center for the Study of Tennesseans and War
- IES 438: Honors Interdisciplinary Senior Design Project II (was EF 438, approved for AOC)
- ORPM 495: Internship in Outdoor Recreation and Park Management

- PLSC 260: Biotechnology: Foundations and Applications (new course)
- PLSC 421: Native Plants in the Landscape
- PLSC 492: Internship in Horticultural and Plant Sciences
- POLS 469: The Politics of Genocide and Ethnic Cleansing: Theory, Prevention, and Aftermath
- REST 310: Religion and Gameworlds
- REST 356/AFST 356: Vodou Gods and Atlantic Perils: African Religions in the New World
- REST 379: Chinese Religions (approved for GCI)
- RMM 441: Branding
- RUSS 352: Ukrainian-Russian Culture and Conflict (approved for AH)
- RUSS 453: Cultural Forms of Protest in Russia (also applying for AH and GCI)
- SPAN 350: Spanish for Medical & Healthcare Professions
- SUST 101: Transdisciplinary Perspectives on Sustainability
- THEA 230/AFST 230: The Black Arts Workshop: Performance and History
- UNHO 207: Complex Problems and Human-Centered Design
- WLC 394: Experiential Learning in Foreign Language Classroom

7. **Course Approval: Global Citizenship International.**

- PHIL 320: Ancient Western Philosophy (approved for AH and WC)
- PLSC 491: International Study: Design Thinking Through The Lens of Gardens and Culture
- POLS 452/AFST 452: Foundations of African Politics: Dictators, Democratization, and Development
- RUSS 453: Cultural Forms of Protest in Russia (also applying for AH and EI)
- WGS 419: Gender and Sexuality in Ancient Western Philosophy (applying for WC)

8. **Course Approval: Global Citizenship United States.**

- ANTH 320: American Cultures
- HIST 140: The American Presidency (new course)
- IAC 203: Constitutional Foundations
- IAC 321: American Political Economy and Citizenship (new course)
- PLSC 122: Food Justice and the Homegrown Harvest

9. **Course Approval: Quantitative Reasoning**

- AET 200: Advanced Math for Applied Engineers (new prefix/course)
- AGNR 220/SNR 220: Introduction to Statistical Analysis in Agriculture and Natural Resources (new course/new prefix)
- AI 101: Introduction to the World of AI
- AI 102: Natural Language-Based Programming Techniques
- AREC 324: Quantitative Methods
- CYBR 101: Introduction to Cybersecurity Concepts
- DATA 102: Data Stewardship and Ethics (also applying for EI)
- DATA 202: Data Management and Visualization
- EMER 101: Gateway to Future Digital Technologies
- PHIL 360: Philosophy of Science

10. **Course Approval: Social Sciences.**

- GEOG 362: Sustainable Development in Appalachia (also applying for WC)
- INSC 201: Foundations of Information Sciences
- INSC 210: Foundations of Information Technology
- LARN 240: The Future of Nature
- POLS 455: Identity, Conflict and State Building in South Asian Countries
- REST 344: Religions in Appalachia
- SOCI 341: Social Inequalities (approved for GCUS)

11. **Course Approval: Written Communication.**

- AFST 330: Black Music Culture
- CHEM 489: Advanced Medicinal Chemistry Laboratory (new course)
- GEOG 362: Sustainable Development in Appalachia (also applying for SS)
- WGS 419: Gender and Sexuality in Ancient Western Philosophy (applying for GCI)

12. **Changes to Operating Guidelines**
13. **Upcoming Discussion Item: Transfer and Petition Process**
14. **Next Meeting: Wednesday, February 26th**
15. **Adjournment**

Clark, J. MS – Indiana-Purdue University
Gantte, A, MM – Tennessee
Hart, K., BM – Tennessee
Johnson, E., DM – Indiana
Madsen, N. MM – Texas Christian
Pappas, Joni, MM – Iowa
Turner, S., BM – Tennessee

The mission of the Natalie L. Haslam College of Music is to provide the highest quality instruction in the musical arts and to cultivate creative activity and research in the areas of composition, education, musicology, pedagogy, performance, and theory. As part of its mission, the college enriches the musical and educational lives of its students, the university community and citizens of Tennessee.

Progression Requirements

All new music students (freshman and transfer) must perform an audition in applied music and take a theory examination. In addition, students planning to major in music education, musicology or music theory/composition need to interview with a faculty member in the respective area. No student officially progresses to major in music until the audition, theory exam, and interview, if applicable, the interview is complete. Students will also take a theory examination. The results of the audition and theory exam will determine the student's placement in applied music and theory. The audition, theory exam, and interview should be completed during a visit to the university prior to final arrival to begin classes. Applicants are urged to contact the Natalie L. Haslam College of Music to schedule appointments for satisfying the requirements as early as possible, but certainly no later than the summer orientation period.

Students entering any one of the four emphases in music education must complete the same audition procedures as those of performance majors. At the end of the second year or after having completed the required courses, students will participate in an interview with an appointed Admissions Board. Upon receiving positive recommendation from this board, students are admitted to the Teacher Education Program and permitted to take required upper-division education courses.

Students who pursue the music education curriculum are subject to all rules and regulations of the Teacher Education Program in the College of Education, Heath, and Human Sciences, notwithstanding the fact that their degree will be awarded from the College of Arts and Sciences.

General Requirements

Students in the Natalie L. Haslam College of Music are required to consult the Natalie L. Haslam College of Music website and the *Undergraduate Catalog* for departmental policies and procedures pertaining to music degrees.

Minimum Performance Standards

Potential performance and music education majors not meeting minimum performance standards, but showing potential will be allowed to register for MUSC 101 in order to attain the desired level. Such students are normally expected to demonstrate sufficient progress by the end of the first academic year to perform on a level commensurate with a freshman student accepted without reservation by the college. The addition of the extra semesters of study usually results in lengthening the period needed to satisfy requirements for advanced standing (300-level).

Ensembles

Ensemble participation during each semester of residence is required of all full-time Bachelor of Music students except during student teaching. Students are required to participate in ensembles appropriate to their specific degree program. Ensemble requirements vary among the concentrations; specific requirements for each concentration are found in the *Undergraduate Catalog*.
Enrollment in all ensembles is by audition or consent of instructor. All ensembles in the Natalie L. Haslam College of Music are one credit. The amount of rehearsal time will vary based on the type of ensemble (i.e. advanced ensembles rehearse more than other ensembles), performance expectations and the necessary rehearsal time to achieve the quality expected of each ensemble.

Applied Music

Applied study is classified as principal or secondary. Students register for credit appropriate to their program (1-3 credit hours). Students registered for 1 hour of credit receive a half-hour lesson per week (minors, non-music majors). Students registered for 2-3 credit hours receive a one-hour lesson per week (2 credit hours, generally BM: music education, sacred music, studio music and jazz and BA majors; 3 credit hours, BM: Performance majors). Determination of the mode of instruction rests with the department. Applied music courses do not permit non-credit registration nor may students elect non-conventional grading. Typical practice minimums (although studios can set more stringent requirements) are: 1 credit hour lesson – 1 hour per day; 2 credit hour lesson – 2 hours per day; 3 credit hour lesson – 3 hours per day.

Solo Class

All music majors are required to register for MUSC 200 every fall and spring they are enrolled in applied music with the exception of the semester in which they are student teaching. This course requires attending scheduled concerts, recitals, master classes, repertoire, and solo classes, and performing at least once each semester in partial fulfillment of the applied music requirement.

Applied Music Fees

$150 per credit hour (1 credit hour = $150, 2 credit hours = $300, 3 credit hours = $450). Current registration and applied music fee payment must be verified in the College of Music office no later than the end of the second day of classes of the fall and spring semesters and the first day of the summer terms in order to be accepted for applied music study.

Keyboard Skills Proficiency Examination

Proficiency in keyboard skills is required of all music majors and is usually acquired in the four-semester series of MUKB 110, MUKB 120, MUKB 210, MUKB 220 or as specified by the student's concentration. Students who already possess keyboard skills may pass a proficiency examination in lieu of these courses.

Recital Attendance Policy

The faculty of the Natalie L. Haslam College of Music believes that exposure to a variety of live musical performances is an important part of education in music at the university level. As a result, the faculty has put in place a recital attendance requirement for undergraduate music students. Regular recital attendance acquaints students with accepted norms of recital presentation, exposes them to performers and styles of other students and faculty in the Natalie L. Haslam College of Music, and helps them establish the habit of attending musical performances after graduation. Specific recital attendance requirements are listed on the College of Music website.

Bachelor of Music Degree

The Natalie L. Haslam College of Music offers curricula leading to the Bachelor of Music degree with concentrations in music theory/composition, music education, sacred music (organ, piano, or voice), piano pedagogy, studio music and jazz, and applied music (brass, voice, piano, organ, strings, woodwind and percussion instruments). This study prepares students for graduate music study or for positions in music for which a professional music degree is required.

Bachelor of Arts Degree

This program is designed for students who have a strong interest in music and desire a comprehensive liberal studies program. The Bachelor of Arts degree requires a minimum of 120 hours.

There are five unique concentrations for the Bachelor of Arts (BA):

1. Applied Music
2. Music Advertising and Public Relations
3. Music Business Administration
4. Music and Culture
5. Music Journalism and Media

BA, Music – Applied Music Concentration

The Bachelor of Arts in Applied Music degree program is a specialized undergraduate program that combines the study of music with a focus on applied musical skills. Unlike a traditional Bachelor of Music program, which often emphasizes performance, education, and composition, the Bachelor of Arts in Applied Music offers a broader liberal arts education with a concentration in music.

BA, Music – Advertising and Public Relations

The Natalie L. Haslam College of Music's BA, Advertising & Public Relations degree contains a blend of coursework from the Natalie L. Haslam College of Music and the College of Communication & Information. Both are premier institutions in their respective disciplines.
This degree contains a mix of coursework from applied musical experiences as well as a core in popular/commercial music theory, musicology, music technology, music business, piano, and flexible music electives based on interests and career goals. On the advertising/public relations side, students take courses in topics such as advertising and public relations principles, multimedia writing, social media strategy, ethical and legal issues in public relations, marketing & supply chain management, and managing connections.

BA – Music Business Administration

The Natalie L. Haslam College of Music's BA, Music Business Administration degree contains a mix of coursework from the Natalie L. Haslam College of Music and the Haslam College of Business. Both are premier institutions in their respective disciplines.
This degree contains a variety of coursework from applied musical experiences as well as a core in music theory, musicology, music technology, music business, piano, and flexible music electives based on interests and career goals. On the business side, students select from one of two tracks – Professional Music Focus or Entrepreneurship in Music Focus – and they take courses in topics such as management, finance, legal environments in business, entrepreneurship, and new venture planning.

BA – Music and Culture Concentration

The Bachelor of Arts in Music and Culture degree emphasizes the study of music from the perspectives of humanistic and social science scholarship. Students learn aspects of music, research, criticism, and interpretation with an emphasis on historical and ethnographic scholarly approaches. The degree aims to highlight music as a culturally expressive form rather than solely as an objectified art.

BA, Music – Journalism and Media

The Natalie L. Haslam College of Music's BA, Journalism and Media degree contains a blend of coursework from the Natalie L. Haslam College of Music and the College of Communication & Information. Both are premier institutions in their respective disciplines.

This degree contains a mix of coursework from applied musical experiences as well as a core in popular/commercial music theory, musicology, music technology, music business, piano, and flexible music electives based on interests and career goals. On the journalism and media side, students take courses in topics such as multimedia writing, scriptwriting for creative works, multimedia reporting, media marketing and promotions, digital content creation, audience analytics, media programming in the digital era, and global communication.

College of Music Honors Program

The College of Music offers an honors program for exceptional undergraduate students. Students wanting to enter the music departmental honors program must have a cumulative GPA of 3.5, a music GPA of 3.5, and a recommendation from a faculty member. The recommendation is sent to the student's major area (e.g., voice, jazz, education, musicology, theory) to be approved. Once the area approves the student for entrance to the honors program, a letter will be sent to the College of Music's Associate Director for Undergraduate Studies admitting the student to the music departmental honors program.

Coursework: Students in the honors program must maintain a cumulative GPA of 3.5 and a music GPA of 3.5, and take 12 hours of honors coursework: 3 hours of honors by contract coursework in any area of music, 6 hours of honors by contract coursework in the major area, and 3 hours of a senior project. The senior project (MUSC 497) may take the form of an additional recital (such as a chamber recital) for performance majors, a recital paper, a curriculum proposal, or a research paper suitable for publication or presentation at a conference.

College-wide program option:

Discovery Modules

Some programs in the College of Music include a Discovery Module requirement. This offers a compact approach to discovering new passions, interests, or literacies through connected curricular themes. Students in programs with this requirement may satisfy it in one of four ways:

1. Complete a six-credit Discovery Module
2. Completion of six credit hours of study abroad coursework + one GCI course. The GCI course is in addition to their Vol Core requirement.
3. Completion of a minor, a second concentration, certificate program, or a second major. The minor or second major may be in the College of Music or in another college.
4. Completion of all Air Force or Army ROTC program requirements.

Discovery Module courses may overlap with Volunteer Core requirements but not major program requirements.

Rationale* The Natalie L. Haslam College of Music Discovery Module Requirement offers a compact approach to discovering new passions, interests, or literacies through connected curricular themes.

Course Type (ARCH) Architecture

Crosslisting

Notes

College of Architecture and Design - ARCH - 111

2025-2026 UG Drop/Archive Course

General Catalog Information

College* College of Architecture and Design

Department (Acalog Hierarchy)* School of Architecture

Subject/Prefix (choose from list)* ARCH

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 111

Course Title (max 100 characters)* Architecture and the Built Environment

Credit Hours* 3

Change course status from active to:* (•) Dropped (Inactive-Hidden) ( ) Archived

Course Description An introduction to architecture and the built environment for non-architecture majors. Significance of our surroundings, forces that create them. Creative aspects of design. Survey of examples from local to global. Strategies for individual and collective involvement.

Satisfies Volunteer Core Requirement: (AH)

Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

Equivalency

Rationale* ARCH 111 was designed as a course for non-majors, introducing them to theories and histories of the built environment. Several years ago, the School of Architecture introduced a new subject code, ARCN, Architecture for Non-majors and added an ARCN 111.

ARCH 111 is approved as AH in both Gen Ed and Vol Core. ARCN 111 is approved as AH for only Vol Core. We retained the ARCH 111 number to offer for students still requiring Gen Ed. In 2025-26, the first cohort of students following the Vol Core curriculum will be seniors and we will no longer offer the Gen Ed version.

Impact on Other Units* Interior Architecture includes ARCH 111 as a prerequisite option for one course and an option in their studies minor. We have notified them to update these listings to include ARCN instead.

For N/R/S base courses, should this course be:
- ( ) Active
- ( ) Archived
- ( ) N/A

Variable Title?
- ( ) Yes
- ( ) No

Credit Hours* 3

Course Description This course studies cities in the United States situated within a global context. The course is organized thematically, including architecture, planning paradigms, urban design theories, social equity, the economies of growth, the role of infrastructure, urban ecologies, geographies of sustainability and the American connection to land and landscape. A series of American case studies will be presented related to these themes. Understanding the complex evolution of American urbanism from multiple perspectives will help students in the future, as citizens of the 21st century.

Equivalency

Rationale* We offer ARCH 211/217 (for majors, Gen Ed AH and Vol Core AH and GCI) and ARCN 211/217 (for non-majors, Vol Core AH and GCI) in separate sections for different audiences of students. Though we add notes in the Course Schedule to explain who should register fr each section, the only way we can keep non-majors from taking ARCH 211/217 is to add a registration restriction in the Timetable. This requires that we individually clear all eligible architecture and interior architacture students so they can register. This takes quite a bit of administrative time. Now that students requiring Gen Ed credit are matriculating out and students in the first cohort of Vol Core will be seniors, we can restrict ARCH 211/217 to major students only.

Impact on Other Units*

Variable Title?*
- ○ Yes
- ◉ No

Credit Hours* 3

Course Description The course examines various input to the architectural design process from a range of technical issues that include building codes, construction types, cost, fire resistance, area, and bulk, along with comfort parameters, lighting intentions, energy performance targets, energy programming, and schedules with a focus on framing the designer's tasks and the technical support of architectural qualities. The course considers design concepts, form-making, and supporting strategies from a range of technical issues in support of studio class projects. Exploration of the implications of technical aspects of program on schematic design.

Equivalency*

Current Course Architecture (ARCH)	Equivalent Course Effective Fall 2028 Architecture and Design (ARCH)
461	431

Rationale* The School of Architecture performed an audit of its foundation, representation, and building technology courses. All current building technology courses EXCEPT for this course are being redesigned to combine content and create 3 CH full semester courses. This process requires a renumbering using x3x. To maintain consistancy, we are changing this course number from ARCH 461 to ARCH 431. Neither the content nor the teaching modality will change.

Impact on Other Units*

This course carries Vol Core QR credit. We have reached out to the Vol Core and Vol Core QR chairs to request the credit be transferred to the new course number.

No impact on onther units.

College of Architecture and Design - ARCH - 474

2025-2026 UG Revise Course

General Catalog Information

College* College of Architecture and Design

Department (Acalog Hierarchy)* School of Architecture

Subject/Prefix (choose from list)* ARCH

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 474

Course Title (max 100 characters)* Advanced Architectural Design: Landscape Architecture I

For N/R/S base courses, should this course be:
- ( ) Active
- ( ) Archived
- ( ) N/A

Variable Title?
- ( ) Yes
- ( ) No

Credit Hours* 6

Course Description Introduces students to techniques, concepts, and practices of landscape architecture and landscape planning with particular emphasis on development of representational and communication skills using digital and analog media. Strategic and formal design concepts are introduced as vehicles for the exploration of a wide range of media and techniques for analyzing landscapes, projecting design alternatives, and communicating design ideas.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Course Description This design studio focuses on issues of space and form in landscape architectural design. Working at small and intermediate scales, students explore contemporary and historical theories of space and form through a range of analog and digital media with a particular emphasis on 3-dimensional modeling. Students work rapidly across several projects in order to explore multiple formal and spatial concepts and practice new techniques.

For N/R/S base courses, should this course be:
- ○ Active
- ○ Archived
- ○ N/A

Variable Title?
- ○ Yes
- ◉ No

Credit Hours* 3

Course Description Introduction to design thinking and innovation for first year and second year undergraduate students from all majors. This course will assist students in how to work in multi-disciplinary teams to solve complex whole-to-part real-world problems. Students engage collaborative design thinking methods that emphasize producing unique, feasible, and implementable outcomes that can be applied in future classes and within career opportunities. Students will complete projects by generating a variety of ideas, applying and synthesizing knowledge from their discipline, building prototypes, and evaluating with critical thinking.

Notes

College of Architecture and Design - IARC - 101

2025-2026 UG Revise Course

General Catalog Information

College* College of Architecture and Design

Department (Acalog Hierarchy)* School of Interior Architecture

Subject/Prefix (choose from list)* IARC

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 101

Course Title (max 100 characters)* Introduction to the Spatial Experience

For N/R/S base courses, should this course be:
- ( ) Active
- ( ) Archived
- ( ) N/A

Variable Title?
- ( ) Yes
- ( ) No

Credit Hours* 2

Course Description Architectural design as a creative process based on visual thinking and ideas related to space, technology, and/or place. Scope and definition of the built environment in relation to contemporary society, building industry, and allied design professions. Orientation to courses and programs of the school.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Instructional Method* Lab, Lecture

Contact Hour Distribution (if more than one instructional method) 1 hour lecture, 1.5 hour lab

College of Architecture and Design - INDS - 330

2025-2026 UG Revise Course

General Catalog Information

College* College of Architecture and Design

Department (Acalog Hierarchy)* School of Design

Subject/Prefix (choose from list)* INDS

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 330

Course Title (max 100 characters)* The Art of Form and Function

For N/R/S base courses, should this course be:
- ( ) Active
- ( ) Archived
- ( ) N/A

Variable Title?
- ( ) Yes
- ( ) No

Credit Hours* 3

Course Description Students will understand the interconnected relationships between function, form, and appearance of a product relative to human needs. Emphasis will be placed on understanding the factors of cognitive, physical, and sensory experiences that inform human factors and ergonomics.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Instructional Method* Lecture

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability

Credit Restriction

Registration Enforced (RE) Prerequisite(s)

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s)

Comments

Registration Restriction(s)

Registration Permission

Equivalency

Rationale* Remove pre-requisite for the course

Impact on Other Units* None

Financial Impact* None

Have you consulted with all programs/departments that will be impacted by this change?* ( ) Yes ( ) No (•) Minor changes only/Not Applicable

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?
- [ ] Arts and Humanities
- [ ] Natural Sciences
- [ ] Social Sciences

Should this course be considered for Connections?
- ○ Yes
- ○ No

If yes, which Connections category?
- ☐ Ancient Mediterranean Studies
- ☐ Biodiversity and Humans
- ☐ Cultural and Artistic Achievement: Arts in the United States
- ☐ Cultures and Societies
- ☐ Emerging Asia
- ☐ Environment and Society
- ☐ Geographic Information Science for Our Changing World
- ☐ Global Social Justice
- ☐ Health and Biophysics
- ☐ Health Care Perspectives
- ☐ How to Live in the Premodern World
- ☐ Humans Living on a Dynamic Earth
- ☐ Inequalities: Race, Ethnicity, Class, and Gender
- ☐ Mobility and Migration
- ☐ New Geographies of the Global Economy
- ☐ Our World: Contemporary Arts and Culture
- ☐ Rise and Decline of Premodern Complex Societies
- ☐ Shifting Borders and Cultures in Europe
- ☐ Understanding Climate Change
- ☐ Visual Cultures and Media Studies

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The College of Architecture and Design offers a minor in Design Studies for students of any College in the University of Tennessee, Knoxville. This minor will expose students to the basic design thinking and visualization at the heart of architecture, graphic design, industrial design, and interior architecture. Additionally, students will gain a greater understanding in a range of topics related to the study and design of the built environment.

Application to the minor is available via the online minor form for the College of Architecture and Design.

Faculty in professional courses will make provisions for students with declared Design Studies Minor when necessary. Students who are receiving a Bachelor of Architecture, Bachelor of Fine Arts in Graphic Design, or Bachelor of Science in Interior Architecture are not eligible for this minor.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Requirements*

Minor Requirements

The Minor in Design Studies consists of **14-15 credit hours**.

Prerequisite requirements and registration restrictions may apply for some courses.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ○ Yes
- ◉ No

Rationale*

1. Revisions to the introductory content to include graphic design and industrial design and to correct the language about the application process to reflect current practices
2. Reduction of overall credit requirements from 21 to 14-15
3. Simple clean-up of unused or redundant numbers
4. Introduction of COAD to replace several DSGN courses
5. A series of course changes in Interior Architecture and Architecture
6. Requests for inclusion from the School of Graphic Design (GRDS 150, 330, and 331)
7. Movement of identified electives to menu of required courses, where appropriate

Financial Impact*
None

Impact on Other Units*

Impact on Other Units	Inclusion of courses from the Schools of Architecture, Design, and Interior Architecture - course were either previously included (no change) or were the ones requesting the changes.

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The fields of interior architecture and architecture are distinct design disciplines, although they overlap in many significant ways. Many talented designers are interested in both areas of expertise. This minor in Architectural Studies has been created specifically for Interior Architecture students who would like to gain a better understanding of architecture. Alternatively, students who have transferred out of the Bachelor of Architecture program after completing two years of study might consider this minor.

Through the Architectural Studies minor, students will gain experience in understanding architectural issues related to topics such as history and theory, building and construction, contemporary practices, and other related issues.

Faculty in architecture professional courses will make provisions for interior architecture students when necessary.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Qualified students in the architecture program may consider a course of study that will give them advanced placement in the Master of Landscape Architecture degree program. Completing this path allows Bachelor of Architecture graduates to gain advanced standing in the graduate landscape architecture program, satisfying degree requirements in one year rather than three. This path only applies to the degree program offered at the University of Tennessee, Knoxville. For more information, see the *Graduate Catalog*.

Requirements for architecture students pursuing this degree path:

- The student must meet with directors from both the architecture and the landscape architecture programs during their fourth year, or earlier.
- The student must have an earned minimum cumulative GPA of at least 3.0.
- The student must complete the following requirements before entering the Master of Landscape Architecture program with advanced placement.
  - ARCH 474 - Advanced Architectural Design: Landscape Architecture I
  - ARCH 475 - Advanced Architectural Design: Landscape Architecture II
  - EEPS 590 - Urban Ecology
  - LAR 421 - Design Communication I
  - LAR 422 - Design Communication II
  - LAR 432 - Plants in the Landscape I
  - LAR 487 - Contemporary Landscape Architecture
  - LAR 534 – Operative Strategies

The student must also follow the normal procedure and deadline for admission to the Graduate School and to the Master of Landscape Architecture program in the College of Architecture and Design.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Students are not allowed to enroll simultaneously in two of these design courses.
Students are exempt from MATH 125* with a score of 3 or higher on Calculus AB or Calculus BC AP exam.
Chosen from the Volunteer Core list.
Chosen from any 300-499 architecture, graphic design, industrial design, interior architecture, or landscape architecture course.
Students are required to participate in a school-approved study abroad or off-campus semester of study, minimum 12 credit hours including a 6 credit hour design studio. Study will typically occur in the fall or spring of fourth-year, the fall of fifth-year, or the summers after the third or fourth years of study.

*** Meets Volunteer Core Requirement.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
○ Yes
◉ No

Rationale*
The School of Architecture performed a complete audit of the curriculum, aiming to more equitably balance its building technology, representation, and history/theory courses, standardize courses as 3 CH full semester, and better manage the number of faculty and teaching assistants required for particular high-engagement courses.

Financial Impact*
None

Impact on Other Units*
The Bachelor of Architecture/Master of Landscape Architecture Preparatory Track includes courses from Landscape Architecture and Earth, Environment, and Planetary Science programs. The only edits in this proposal related to these programs are updated subject codes and name changes that had not been updated previously. No new courses were added or removed.

Have you consulted with all programs/departments that will be impacted by this change?*
◉ Yes ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.
Architecture Licensure (Bachelor of Architecture is a professional degree credited by NAAB. In addition to the degree, students must complete internship hours and take the licensing exams.)

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The curriculum for the Bachelor of Architecture degree includes a combination of required and elective courses offering the student both a solid professional program of study and a sound general education. While the majority of courses are designated as required, students may use the available architecture and general electives to broaden their education and to expand their knowledge in areas of personal interest.

All students studying for a Bachelor of Architecture degree will complete the following requirements in their course of study. For any additional specialized requirements, the student should refer to the *Student Handbook* of the School of Architecture and the student's professional advisor.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Students are not allowed to enroll simultaneously in two of these design courses.
Students are exempt from MATH 125* with a score of 3 or higher on Calculus AB or Calculus BC AP exam.
Chosen from any courses outside architecture, interior architecture, and landscape architecture not already required for the major.
Chosen from the Volunteer Core list.
Any course not already required for the major.
Chosen from any 300-499 architecture, graphic design, industrial design, interior architecture, or landscape architecture course. If a student is in a declared minor, 6 CH of minor credit may substitute for required professional elective credit.
Students are required to participate in a school-approved study abroad or off-campus semester of study, minimum 12 credit hours including a 6 credit hour design studio. Study will typically occur in the fall or spring of fourth-year, the fall of fifth-year, or the summers after the third or fourth years of study.

* Meets Volunteer Core Requirement.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* The School of Architecture performed a complete audit of the curriculum, aiming to more equitably balance its building technology, representation, and history/theory courses, standardize courses as 3 CH full semester, better manage the number of faculty and teaching assistants required for particular high-engagement courses, and provide better opportunities for students to pursue minors while ensuring that students who enter the program with credits are able to stay full-time through the entire 5-year curriculum.

Financial Impact* None

Impact on Other Units* A few of the foundation courses are shared with the School of Interior Architecture. Changes to these courses were reviewed with their faculty on November 22 and approved. They have submitted program revisions to address these impacts.

No impacts on other units.

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank. Architecture Licensure (Bachelor of Architecture is a professional degree credited by NAAB. In addition to the degree, students must complete internship hours and take the licensing exams.)

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Major Requirements:

I. Foundation (12 hours)

Complete:

DSGN 101 Graphic Design Foundation Studio I
DSGN 102 Graphic Design Foundation Studio II
DSGN 103 Graphic Design Foundation Studio III
DSGN 150 The Idea of Design

II. Industrial Design (45 hours)

A. Complete (portfolio review):

INDS 200 Industrial Design Portfolio Review

B. Complete (in sequence):

INDS 255 Introduction to Visualization
GRDS 256 Interaction Design
INDS 271 Beginning Industrial Design I
INDS 272 Beginning Industrial Design II
INDS 355 Advanced Interaction Design
INDS 373 Intermediate Industrial Design I
INDS 374 Intermediate Industrial Design II
GRDS 452 Graphic Design Professional Seminar
INDS 471 Advanced Industrial Design
[After]
INDS 472 Industrial Design Capstone

C. Complete (practicum) 6-7 hours:

INDS 451 Industrial Design Practicum
[After]
INDS 444 Industrial Design Research Studio

III. Required Design and Professional (9 hours)

Complete 9 hours:

INDS 330 The Art of Form and Function
INDS 331 From Process to Product
[After] and/or
INDS 425 Special Topics in Industrial Design
INDS 444 Industrial Design Research Studio
[After] and/or
INDS 491 Foreign Study
INDS 493 Independent Study
[After] Note: Appropriate courses in other departments may be substituted with the approval of student's assigned advisor.

IV. Studio (9 hours)

Select 9 hours from list below:

any 200-level and above course in the School of Art
any 200-level and above ARTN
any course in the College of Architecture and Design with a studio, lab, or workshop component

INDS 425 Special Topics in Industrial Design
INDS 444 Industrial Design Research Studio
GRDS 455 Graphic Design Collaborative Engagement

V. Art and Design History (9 hours)

Select 9 hours:

any art history course (ARTH)
any design history course offered in the College of Architecture and Design (ARCH, IARC, INDS, LAR)

Note: At least 3 hours must fulfill Volunteer Core Global Citizenship - International (GCI) credit.

INDS 211 History of Industrial Design

VI. Volunteer Core Curriculum (30-35 hours)

(Volunteer Core requirements not already covered in Foundation, Graphic Design, and Art and Design History program requirements).

A. Written Communication (7-9 hours)*:

ENGL 101 English Composition I
[Right] *
ENGL 102 English Composition II
[Right] *
[Right] (or their equivalent)
[After] any Written Communication (WC) course from the Volunteer Core list

B. Oral Communication (1-3 hours)*:

any Oral Communication (OC) course from the Volunteer Core list

C. Ways of Knowing (16-17 hours)*:

any two Natural Sciences (NS) courses from the Volunteer Core list (at least one with a laboratory)

any two Quantitative Reasoning (QR) courses from the Volunteer Core list

any one Social Sciences (SS) course from the Volunteer Core list

D. Global Citizenship (3 hours)*:

any Global Citizenship - United States (GCUS) course from the Volunteer Core list.

E. Engaged Inquiries (3 hours)*:

any Engaged Inquiries (EI) course with a non-GRDS code from the Volunteer Core list

* Meets Volunteer Core Requirements.

Rationale* This is a new degree program to be offered within the School of Design, College of Architecture + Design.

Financial Impact* Financial impact is primarily undertaken by the School of Design / College of Architecture + Design. Classes identified outside of the college are curricular electives and available to INDS students per enrollment availability.

Impact on Other Units* Impact of the program is confined to the School of Design.

Impact to Theatre department. Please attach documentation of acknowledgement.

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

CIP Code (if available) 50.0404

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Industrial Design Studies is open to students from any discipline across the University of Tennessee, Knoxville interested in enhancing their major field of study with an understanding of industrial design. The core classes will provide students with a broad introduction to concepts, processes, human factors, and the influence of industrial design in today's world. Electives offer options from across several colleges that allow further focus within the minor, including the option to take studio-intensive making classes from the School of Design.

Application to the minor is available via the online minor form for the College of Architecture and Design.

Students must successfully complete the following requirements (**15 hours**).

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

General Catalog Information

College* College of Architecture and Design

Department* School of Interior Architecture

Program Name* Interior Architecture Major, BS in Interior Architecture - Master of Architecture Preparatory Track

Degree Type* Bachelor of Science in Interior Architecture

Program Type* Concentration

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Qualified students in the interior architecture program may consider a course of study that will give them advanced placement in the Master of Architecture degree program. Completing this path allows Bachelor of Science in Interior Architecture graduates to gain advanced standing in the graduate architecture program, satisfying degree requirements in two years rather than three. This path only applies to the degree program offered at the University of Tennessee, Knoxville. For more information, see the *Graduate Catalog*.

Requirements for undergraduate interior architecture students pursuing this degree path:

- The student must meet with directors from both the interior architecture and the graduate architecture programs during their third year, or earlier.
- The student must have an earned minimum cumulative GPA of at least 3.0
- The student must complete the following requirements before entering the Master of Architecture program with advanced placement. This includes summer courses.
- ARCH 212 - History and Theory of Architecture II* or ARCH 218 - Honors: History and Theory of Architecture II*
- ARCH 213 - Modern Architecture: Histories and Theories
- ARCH 542 - Design III: Campus and Urban Architecture
- ARCH 547 - Structural Principles in Architecture
- ARCH 548 - Materials and Methods in Architecture

The student must also follow the normal procedure and deadline for admission to the Graduate School and to the Master of Architecture program in the College of Architecture and Design.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The interior architecture curriculum is a rigorous course of study which combines technical courses, design studio courses, humanities, and a wide choice of electives. Through coursework and field study experiences, students develop specialized problem solving skills and knowledge for the analysis, planning, and design of interior architectural environments. They apply the use of lighting, color, mechanical systems, and furnishings as they design spaces for both residential and commercial settings.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The College offers a series of different minors that are intended to promote interdisciplinary involvement within the College and University. Faculty in professional courses will make provisions for students with declared Interior Architecture Studies Minor when necessary. Students will gain basic knowledge in interior architecture with exposure to aesthetics, technology, professional practices, and history.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Minor Requirements

The minor in Interior Architecture Studies consists of **19-20 credit hours**. Prerequisite requirements and registration restrictions may apply.

Complete two courses:

ARCN 111 Architecture and the Built Environment
[Right] *

[Right] or
ARCN 117 Honors: Architecture and the Built Environment
[Right] *

[Right] or
IARC 101 Introduction to the Spatial Experience

College of Architecture and Design - School of Landscape Architecture - Landscape Architecture Studies Minor

2025-2026 UG Revise Program

General Catalog Information

College* College of Architecture and Design

Department* School of Landscape Architecture

Program Name* Landscape Architecture Studies Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The Minor in Landscape Architecture Studies is open to students from any discipline across the University of Tennessee, Knoxville interested in enhancing their major field of study with a greater understanding of the practices being used in contemporary landscape architecture and design. Students will receive a broad introduction to key concepts, processes, and techniques, as well as the evolving role of landscape architecture and landscape design as they seek to engage global issues of sustainability, environmental justice, anthropogenic climate change, and more. The required lecture-based core classes are coupled with a selection of classes from across several colleges that complement the focus within the minor.

Students must have a cumulative 2.5 GPA and be a declared major outside of the School of Landscape Architecture to undertake the minor. Application to the minor is available via the online minor form for the College of Architecture and Design.

Students must successfully complete the following requirements (15 hours).

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Requirements*

Minor Requirements

The minor requires the completion of a minimum of **15 credits**.

Minor Requirements (9 credits):

LAR 240 The Future of Nature
[Right] or
LARN 240 The Future of Nature
[After]
LAR 286 Contemporary Landscape Architecture
[Right] or
LARN 286 Contemporary Landscape Architecture
[After]
LARN 223 Visual Communication for Non-Designers

Complete two courses (6 credits):

ARTN 102 Non-Major Introduction to Art: Time
ARTN 103 Non-Major Introduction to Art: Space
ARTN 211 Non-Major Intro to Drawing
ARTN 231 Non-Major Intro to Photography
[After]
CoAD 130 Basic Design Thinking and Innovation
[Right] or

CoAD 430 Design Thinking and Innovation
[After]
EEPS 443 Sustainable Cities and Landscapes
EEPS 454 Environmental Restoration
GEOG 336 Political Ecology
GEOG 341 Introduction to Urban Studies: Social and Spatial Origins of Contemporary Cities
GEOG 363 Southern Spaces and Places
GEOG 373 Cultural Geography of Latin America and the Caribbean
GEOG 374 Emerging Landscapes of East Asia
GEOG 413 Remote Sensing of the Environment
GEOG 421 Maps, Society, Power
GEOG 433 Landform Analysis and Landscape Planning
GEOG 439 Plants, People, and Climate in North America
GEOG 440 Global Perspectives on Urban Sustainability
GEOG 442 Urban Spaces and Urban Society
GEOG 446 City and Community Sustainability Planning
GRDS 150 The Idea of Design
GRDS 330 The Art of Presentation Design
[After]
IARC 200 Human-Environment Relations
[Right] or
IARN 200 Human-Environment Relations
[After]
IARC 422 Inclusive and Exclusive Design
[After]
LAR 241 Planetary Gardening: Towards a Sustainable Future
[Right] or
LARN 241 Planetary Gardening: Towards a Sustainable Future
[After]
LAR 425 Special Topics in Landscape Architecture
LAR 434 Ecological Design: Theories and Methods I
LAR 435 Ecological Design: Theories and Methods II
PLSC 180 Landscape Design/Performance/Function
PLSC 280 Fundamentals of Sustainable Landscape Design
PLSC 311 Management of Landscape Systems
PLSC 455 Advanced Sustainable Landscape Construction
PLSC 491 International Study: Design Thinking Through The Lens of Gardens and Culture
SOCI 360 Environment and Resources
SOCI 361 Environmental Justice
SOCI 463 Community, Sustainability and Justice

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
○ Yes
◉ No

Rationale*
changed 'complete three courses' to 'Minor Requirements' because all three courses need to be completed.

added LARN 223 to required and removed LARN 423 becasue 223 is proposed to be approved this year and is a better fit for the minor.

Financial Impact*
none

Impact on Other Units*
none

Have you consulted with all programs/departments that will be impacted by this change?*

Course Description In this course, we will explore the multidisciplinary theoretical frameworks of environmental racism along with the uneven distribution of environmental hazards across communities of color. We will examine the way environmental problems exacerbate social inequality using a broad range of historical and contemporary case studies. The course will introduce students to environmental risks, covering key facts, and available interventions on the most important environmental risks including climate change, air pollution, water, sanitation and hygiene, and others. In addition, we will survey environmental racism as a global phenomenon and explore the emergence of the environmental justice movement. This course will have a strong focus on the experiences of people of African descent.

- ○ Yes
- ◉ No

Credit Hours* 3

Course Description This course will look at the political, social, technological, and economic aspects of globalization and how they affect people's health and well-being—particularly Black communities—while identifying opportunities and risks. Students will be exposed to academic literature across several disciplines that engage with environment-health nexus with emphasis on Black communities. Students will be exposed to examples of global Black health initiatives and will be asked to think critically about why specific global health initiatives and organizations exist, how they function and the impacts they are having on health and health equity in sub-populations in America and globally.

Course Description

Students explore the origins and impact of popular culture since the 19th century in the form of films, television, music videos, toys, games, social media, and print media and how these artifacts have shaped ideas about Black femininity, girlhood, and womanhood. Students examine various forms of popular culture that help them to better understand the intersections of gender, race, class, age, and sexuality. Students will also examine representations and absence of Black girlhood and womanhood in mainstream popular culture and their impact both in the United States and abroad. Other topics explored include consumption, propaganda, power, and white supremacy.

Credit Hours* 3

Course Description This course examines the ideology of the Black Power Movement in the 1960s and places it in the context of African American and Western political thought. By exploring the historic forerunners of the Movement, this course demonstrates that Black Power versus Black mainstream competition of the sixties – although significant – was not unique in American history. The course begins by investigating the foundations of race and racism and African Americans' response to it. Also, by probing the very meaning of Black Power, students will gain a fundamental understanding of the need of many African Americans to build on the ideas of integration by incorporating a call for "power" where it was perceived to be lacking.

Equivalency

Rationale* While we have a couple cross-listed courses on the Civil Rights movement and broader treatments of social movements, we don't have a course outlining the history of the Black Power movement. Importantly, this course also traces the foundations of the movement to early African and African American cultures, linking it to our early American history course (AFST 201).

Course Description This course is designed to explore African American intellectual thought and discourse from the mid-nineteenth century to the present. Students will examine the lives and though of a variety of individuals from a diverse set of backgrounds—from thinkers, writers, and artists to social critics, theorists, philosophers, and social scientists. Emphasis will be placed on situating and examining their ideas and sensibilities within their broader historical contexts. Some of the major themes of the course include liberatory ideologies and desires for self-determination, race and racism, equality, and justice as well as self-expression, group solidarity, and activism. The overarching goal of this course is to understand how African American intellectuals have contributed to understanding issues facing African American communities, people within the U.S., and people around the globe.

Credit Hours* 3

Course Description This course introduces the development, structure, and functioning of Black American politics from the latter 19th century to present. The class explores the construction of blackness, black racial identification, black consciousness, black intragroup relations, black intergroup relations, black political thought, black ideologies, black political preferences, black struggles for political incorporation and representation, the relationship(s) of African Americans to the American political system, and the political development of African Americans. The course builds on a breadth of literature from history, psychology, sociology, and most importantly, political science.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary AFST 415 (primary), POLS 415 (secondary)

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Equivalency

Rationale* This class discusses many topics that the Connection deals with, such as, but not limited to, how social categories of race and ethnicity produce stratification, discrimination, and inequality and the ways in which they interact with one another to shape identities, opportunities, life experiences, and life chances. Therefore, we believe that this class fits the Inequalities: Race, Ethnicity, Class, and Gender connection package.

Credit Hours* 3

Course Description In this course, students will investigate forensic approaches and methods that are the focus of most crime lab analyses. Topics to be covered include DNA, genetic genealogy, trace evidence, and toxicology with an emphasis on critical consideration of current methods. The role of forensic anthropology will also be examined.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all courses in this crosslisting relationship and note whether primary or secondary.

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Course Description This course reviews of some of the complex relationships between humans and animals over time. Topics covered include such as early hominin hunting and scavenging, animal domestication, pastoral management practices, animals as symbols, and human impacts on animal populations. These facets of human-animal interactions are explored through an archaeological lens, considering zooarchaeological, genetic, isotopic, and proteomic evidence of these relationships across a range of geographies and time periods.

Course Description This class reviews the history and material culture of ancient Egypt. Beginning with an overview of prehistoric Egypt, we situate Egypt in its broader context in Holocene northern Africa and review the beginnings of Egyptology and Egyptian archaeology. The course also provides a review of Egyptian history, with an emphasis on archaeological evidence. Throughout the course, we also address key themes in archaeology including the origins of social complexity, state formation and collapse, production and trade, heritage management, and decolonization.

Credit Hours* 3

Course Description The central question in this class is: what is the economy? This seemingly simple question raises complex issues when one begins to compare economic activities across historical periods and societies. This course explores whether the economy is a single unified sphere of life, whether it has always existed, and whether it can be said to exist in all societies. It examines the cultural and moral basis of diverse systems of exchange, production, consumption, and distribution, asking how economic activities relate to other aspects of society like family, religion, and politics. The course also examines the cultural and moral basis of the dominant economic system in the modern world, namely capitalism. What is capitalism and how did it arise? Are the problems of poverty, inequality, debt, and crisis intrinsic to capitalism and how can they be resolved? Are there alternatives to capitalism and what might they look like? What is the future of the global economy?

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 418

Course Title (max 100 characters)* Ethnographies of Trauma

Credit Hours* 3

Change course status from active to:* (•) Dropped (Inactive-Hidden) ( ) Archived

Course Description The concept of trauma has played a central role in many public discussions, especially those having to do with violence and suffering. With psychoanalytic roots, various political uses, connections to language and memory, and steeped in narratives of pain and suffering, trauma is something around and about which anthropologists consistently write. In this course, we will investigate trauma ethnographically, studying the ways in which the concept has been approached and written about (sometimes the ways in which as a concept/word it is left out although we might have expected it), and what this tells us about the human condition, politics, power, and life-worlds today. This course is a foray into psychological anthropology, making sense of the space and connections between collective social life and personal/emotional/psychic experience.

Satisfies Volunteer Core Requirement:

Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

Equivalency

Rationale* This course is not an honors class and so we are dropping this number. The department offers the class using a non honors number (412).

Course Description This class explores the study of animal remains to elucidate past human life. We cover how zooarchaeological data can be used to determine how animals fit into past human economies, ideologies, and ecologies. This course explores topics in zooarchaeology through readings, lectures, and hands-on experience with faunal remains. Finally, assignments will allow students to gain experience working with, interpreting, and visualizing zooarchaeological data.

2025-2026 UG Revise Course

General Catalog Information

College* College of Arts and Sciences

Department (Acalog Hierarchy)* Anthropology

Subject/Prefix (choose from list)* ANTH

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 469

Course Title (max 100 characters)* Selected Topics in Archaeological Area

For N/R/S base courses, should this course be:
- ( ) Active
- ( ) Archived
- ( ) N/A

Variable Title?
- (•) Yes
- ( ) No

Credit Hours* 3

Course Description Area studies in archaeological topics for undergraduate students. Topics may include practical experience or laboratory study of anthropological materials.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Instructional Method* Lecture

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability May be repeated. Maximum 6 hours.

Credit Restriction

Registration Enforced (RE) Prerequisite(s)

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s)

Recommended Background

Comments

Registration Restriction(s)

Registration Permission Consent of instructor.

Equivalency

Rationale* The variable topic box was not checked when this course was first proposed. This is a correction to that ommission.

Impact on Other Units* none

General Catalog Information

College* College of Arts and Sciences

Department (Acalog Hierarchy)* Anthropology

Subject/Prefix (choose from list)* ANTH

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 472

Course Title (max 100 characters)* Paleopathology

For N/R/S base courses, should this course be:
- ( ) Active
- ( ) Archived
- ( ) N/A

Variable Title?
- ( ) Yes
- (•) No

Credit Hours* 4

Course Description Provides advanced undergraduate students with an in-depth knowledge of how diseases affect the human skeleton and an introduction to evolutionary medicine. The culture-history of each disease provides the context in which diseases first appeared, how they were experienced by individuals, and the cultural impacts of certain diseases, especially infectious diseases, on communities. Laboratory sessions are designed for hands-on examination of the signatures of diseases discussed in lecture.

Course Type (ARTC) Art Four-Dimensional Arts

Crosslisting (Same as CNST 335*)

Notes

College of Arts and Sciences - ARTD - 351R

2025-2026 UG Drop/Archive Course

General Catalog Information

College* College of Arts and Sciences

Department (Acalog Hierarchy)* School of Art

Subject/Prefix (choose from list)* ARTD

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 351R

Course Title (max 100 characters)* Intermediate Graphic Design I

Credit Hours* 4

Change course status from active to:* (•) Dropped (Inactive-Hidden) ( ) Archived

Course Description Intermediate study of graphic design including research methodologies and practices as they relate to the design process. In-depth investigations into audience and context in relationship to form and meaning.

Satisfies Volunteer Core Requirement:

Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

Equivalency

Rationale* The Graphic Design major moved from the School of Art to the College of Architecture and Design in 2019 and began their own department: the School of Design. The Graphic Design majors that were in the College of Arts and Sciences have all graduated and will no longer require these courses. The ARTD courses need to be removed as they are restritcing students from taking courses in GRDS. In short the courses no longer exist and should be removed.

Impact on Other Units* none

Financial Impact* none

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale* Removed AFST 480 due to course being dropped.

Financial Impact* None

Impact on Other Units* None.

Have you consulted with all programs/departments that will be impacted by this change?* ( ) Yes (•) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?
- [x] Arts and Humanities
- [ ] Natural Sciences
- [x] Social Sciences

ADMINISTRATIVE USE ONLY

Impact Level
- [x] Low
- [ ] Mid
- [ ] High

ACALOG Program OID 34021

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Continuing, returning, and transfer students must meet progression requirements before declaring a major in anthropology.

Progression into the anthropology major is based on performance in the three prerequisite courses - ANTH 110* or ANTH 117*, ANTH 120* or ANTH 127*, and ANTH 130* or ANTH 137*..

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale* updating with new courses

Financial Impact* none

Impact on Other Units* none

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Notes

College of Arts and Sciences - BCMB - 230

2025-2026 UG Revise Course

General Catalog Information

College* College of Arts and Sciences

Department (Acalog Hierarchy)* Biochemistry and Cellular and Molecular Biology

Subject/Prefix (choose from list)* BCMB

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 230

Course Title (max 100 characters)* Human Physiology

For N/R/S base courses, should this course be:
- ( ) Active
- ( ) Archived
- (•) N/A

Variable Title?
- ( ) Yes
- ( ) No

Credit Hours* 5

Course Description Fundamentals of human physiology, primarily from the perspective of cellular and organ-system interactions.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Instructional Method* Lab, Lecture

Contact Hour Distribution (if more than one instructional method) 4 hours lecture and 1 lab.

Grading Restriction

Repeatability

Credit Restriction May not be applied toward the biochemistry and cellular and molecular biology concentration.

Registration Enforced (RE) Prerequisite(s) CHEM 102*-CHEM 103* or CHEM 122*-CHEM 123* or CHEM 128*

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s)

Recommended Background

Comments

Registration Restriction(s)

Registration Permission

Equivalency

Rationale* we have removed the credit restriction: "Students who receive a grade of C or better in BCMB 230 may not subsequently receive credit for BCMB 440" This credit restriction was necessary because we were allowing students to take BCMB 230 to meet the physiology requierement. However, in another curriculum change we are also changing the "physiology requirement" to "integrative biology requirement". BCMB 230 will not meet this requirement for BCMB students.

Impact on Other Units* none

Impact Report for BCMB 230

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s)

Recommended Background

Comments It is recommended that students complete PHYS 221*-PHYS 222* before enrolling in this course.

Registration Restriction(s)

Registration Permission

Equivalency

Rationale* We have changed the name of the course from General Physiology to Advanced Human Physiology. This new name more properly reflects the current BCMB 440, which is exclusively centered in human physiology. The qualifier "advanced" has been added because the syllabus and learning objectives represent an advanced level when compared with the human physiology taught in BCMB 230.

We have also removed the credit restriction, since we consider now that students that take BCMB 230 can benefit of a more advanced human physiology, which also will count towards the integrative biology requirement for BCMB majors.

We have also removed the prerequsites of Biol BIOL 113 - BIOL 115 because BCMB 440 no longer includes aspects of plant physiology.

Impact on Other Units* none

Rationale* This course aligns with departmental and disciplinary goals of examining Greece and Rome as part of the larger Mediterannean and interrogating Greek and Roman cultural identity through the lens of the outsider, even when the outsider is actually part of the Greco-Roman world. This course both examines these Greek, Roman, and Mediterannean cultures on their own terms but also takes a critical approach to the formation of Greek and Roman identity through the process of differentiation and othering. This course allows new members of our department to apply their teaching and research expertise on the broader Mediterannean and will serve the needs of students seeking upper division hours in our department.

Additional Rationale for Connections Packages: For AMS, this course explicitly "emphasizes the history and cultures of the people who lived around the Mediterranean," and for "How to Live in the Premodern World," this course deals directly with the question of how the Greeks and Roman defined "proper living" vis-a-vis the wider Mediterannean in addition to examing the lasting impact of Greek and Roman views on these cultures.

Rationale* We hired a new instructor to expand our offerings beyond film to other visual media such as TV and streaming services. We taught this content under a special topics number but since we anticipate offering this courses regularly, we need a number.

Also applying for Connections Package - Visual Cultures and Media Studies. This is a new course we designed based on topics classes we taught in the past few years under CNST 400. We are attaching a syllabus with an example of such a class. These classes broaden students' perspectives on film to include media, TV, and broader topics in moving images. Adding this course will help us keep up with media developments of the time.

Course Description CSS 201 will focus on data from a variety of fields. The course develops essential principles of computational social science, including (i) ethics of data collection and management (ii) exploring pertinent social science questions, (iii) causation and prediction, (iv) computation, and (v) public policy. The course will orient students with skills of computational social science, including social science data analysis, data wrangling, and visualization. Students will gain hands-on experience using basic R programming commands. Scheduled topics include introduction to R, topics and text, sentiment analysis, spatial mapping of sociocultural data, multivariate or multidimensional analysis, social media and cultural change—all using data from public sources.

- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description This Bachelor of Science degree is available to students who desire a more flexible program than the requirements for the ACS certified BS in Chemistry curriculum.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale* We propose to add CHEM 409, Chemistry Proficiency, as a required course for the BS in Chemistry Major. This course was recently proposed and approved by the CAS Curriculum Committee as a 0-credit hour course for students to complete required critical skills tests for assessment purposes.

Financial Impact* None

Impact on Other Units* None

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Rationale* We propose to create a new concentration that caters to students interested in specializing in the design, synthesis and evaluation of new medicinal compounds. This is an unmet need in the UT undergraduate curriculum, for example for students pursuing careers in the pharmaceutical industry. This new concentration includes the development of five new courses that we believe will be of interest to UT students.

Financial Impact* **The financial impact is expected to be minimal since the requirements are comparable to those for existing Chemistry Degree tracks.**

Impact on Other Units* The impact on other departments is expected to be minimal since the requirements from are comparable to those for existing Chemistry Degree tracks.

Have you consulted with all programs/departments that will be impacted by this change?*

List all courses in this crosslisting relationship and note whether primary or secondary.

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Instructional Method* Off Campus Study

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability May be repeated. Maximum 3 hours.

Credit Restriction

Registration Enforced (RE) Prerequisite(s):

Department Enforced (DE) Prerequisite(s) Prerequisite(s) Permission by DH chair and/or instructor.

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s):

Recommended Background

Comments

Registration Restriction(s) Students must be enrolled in the DH minor.

Registration Permission

Equivalency

Rationale* This class will allow students in the Digital Humanities minor to enroll in an internship to get professional experience or research experience working with a faculty member on a large-scale project. The DH program has created opportunities through the Digital Project Cultivator (https://humanitiescenter.utk.edu/news-item/digital-project-cultivator-cfp/) that will be administered through CAS and Libraries, in addition to partnership agreements with the Ewing Gallery, McClung Museum, Libraries, as well as Ramsey House off campus. This internship opportunity will allow students to add real-world experience to their resumes and gain skills that will help them on the job market. I plan to apply for an N designation for DH 492 in fall 2025.

Impact on Other Units* N/A

College of Arts and Sciences - Division of Biology - Biological Sciences Major, BS - Ecology and Evolutionary Biology Concentration

2025-2026 UG Revise Program

General Catalog Information

College* College of Arts and Sciences

Department* Division of Biology

Program Name* Biological Sciences Major, BS - Ecology and Evolutionary Biology Concentration

Degree Type* Bachelor of Science

Program Type* Concentration

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The biological sciences major offers concentrations in biochemistry and cellular and molecular biology; ecology and evolutionary biology; and microbiology.

Continuing, returning, and transfer students must meet progression requirements before declaring a major in biological sciences.

To declare biological sciences as a major, students must have an overall GPA of 2.0, be in good academic standing and have completed CHEM 122*-CHEM 123* and CHEM 132*-CHEM 133* and BIOL 150* or BIOL 113* with a minimum grade of C. Although the completion of either BIOL 113*-BIOL 114*-BIOL 115* or BIOL 150*-BIOL 160*-BIOL 159* are permissible as prerequisites to the major, the faculty encourage students to take BIOL 150*-BIOL 160*-BIOL 159*, particularly if they are pre-professional students.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*

Add EEB 250/251 as an option for remaining hours. We would like to facilitate students who are interested in health professions to declare the EEB concentration. Many pre-health careers require or encourage human anatomy. This revision brings us in line with other Biology concentrations.

Removed EEB 409 as a required course as staffing does not allow us to offer EEB 409 at a frequency such that it is a real alternative to EEB 490. Further, the faculty want to encourage attendance of undergraduates at departmental seminar, as it provides exposure to a diversity of career paths and scientists conducting research. Finally, EEB 409 and 490 have different credit hour requirements, and as such, having these as different options to fulfill the same requirement is confusing to students.

We reorganized information to allow DARS to read it properly.

Financial Impact* N/A

Impact on Other Units* ANTH, BCMB, CHEM, FORS, GEOG, EEPS, MICR, WFS all have courses in the EEB program. No changes to other units listed.

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s):

Recommended Background 8 hours of biology courses

Comments

Registration Restriction(s)

Registration Permission

Equivalency EEB 330

Rationale* Add Service-Learning Course Designation

Communicating to broad audiences is a critical skill for all scientists and we can acquire skills like this through practice. As a team, students will use their botanical knowledge to create a field guide intended to educate members of the public about plants and teaching them to distinguish common plant species.

We will be developing field guides to the plants at Seven Islands State Birding Park as a service-learning project that will be used by the park and shared with their visitors. Many visitors know little about plants and many kids join their parents on walks at the park. This guide should be accessible to both adult members of the public and kids eight years and older.

Base course EEB 330 currently has Connections Package: Biodiversity and Humans

Department (Acalog Hierarchy)* Ecology and Evolutionary Biology

Subject/Prefix (choose from list)* EEB

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 450

Course Title (max 100 characters)* Animal Behavior

For N/R/S base courses, should this course be:
- ( ) Active
- ( ) Archived
- ( ) N/A

Variable Title?
- ( ) Yes
- (•) No

Credit Hours* 3

Course Description Explore the diversity of extraordinary and sometimes puzzling animal behaviors in the natural world, seeking to understand and test questions about how and why animals (including humans) behave the way they do. Students will develop scientific and professional skills in hypothesis development, critical thinking, visual representation of data, oral communication, and teamwork.

Statement about Crosslistings:

College of Arts and Sciences - EEB - 490

2025-2026 UG Revise Course

General Catalog Information

College* College of Arts and Sciences

Department (Acalog Hierarchy)* Ecology and Evolutionary Biology

Subject/Prefix (choose from list)* EEB

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 490

Course Title (max 100 characters)* Undergraduate Seminar

For N/R/S base courses, should this course be:
- ( ) Active
- ( ) Archived
- ( ) N/A

Variable Title?
- ( ) Yes
- (•) No

Credit Hours* 2

Course Description Weekly departmental research seminar presenting current research in the areas of ecology, behavior, and evolutionary biology by UT faculty and researchers from around the world. Seminar meets to discuss a paper by the Department's weekly seminar speaker. As a result, enrollment in this course requires attendance to the Department's weekly seminar.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all existing and/or new courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Instructional Method* Seminar

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability May be repeated four times. Up to two credit hours of EEB 490 can count toward the major. Additional hours may be petitioned for honors students.

Credit Restriction

Registration Enforced (RE) Prerequisite(s)

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s)

Recommended Background

Comments

Registration Restriction(s) Biological Sciences majors; minimum student level – Sophomore

Registration Permission

Equivalency

Rationale* Changed course title, credit hours, and registration restrictions. The proposed revision aligns credit hours with the number of required contact hours per week. The course requires all students to attend a departmental seminar (a 50 minute lecture) followed by a 50-minute lecture/discussion with the seminar speaker, along with assigned readings every week.

Rationale* The state of Tennessee requires a percentage of our graduating seniors to complete a critical skills test. It is difficult to get students to complete this since it is not a requirement for graduation or any courses. Therefore, we propose to create EEB 499 as a 0-credit hour required course for EEB majors to complete this test. This will be a S/NC course that will be satisfied by completing the skills exam. Physics has a similar course on the books (Physics Proficiency).

Rationale* The course title and description are being updated to better reflect the way this course is currently being taught. We plan to teach three versions of this course in different semester with the same learning outcomes and methods but with different types of field data collection and laboratory analyses: geology, environmental/water science, planetary geoscience. The different versions will cater to the varied career goals of our students. This is why Variable Title was selected, so we can infrom students of the focus.

Credit Hours* 3

Course Description This course examines the ecology of urban systems. Starting with an overview of basic ecological principles, students will study how the emergence of cities has impacted natural systems and how this impact has accelerated. The course will focus on solutions, most notably the various ways that cities can be designed to reduce human impacts. The ultimate goal is to design cities to meet human needs while reducing the human footprint by increasing ecological functions.

Rationale* The name of EEPS 443 is being changed from Sustainable Cities and Landscapes to Urban Ecology to better reflect the content of the course. We would also like to add this course to the list of Environment and Society Connections courses (the course syllabus is attached to help with this decision).

This course is cross listed with GEOG and they are submitting a revise course proposal for GEOG 443 as well.

Given that this course is cross-listed in a NS Division and SS Division CAS department and is being asked to be considered for a Connections category, we have been instructed to include both the NS and SS CAS committees in the proposal workflow.

Recommended Background

Comments

Registration Restriction(s)

Registration Permission

Equivalency

Rationale* ENGL 103 is a writing workshop taken concurrently with ENGL 101, offering supplementary writing instruction to students in their first year at UT. Data we have gathered, and a comparison between students who take ENGL 103 concurrently with 101 and those who do not, show that the Writing Workshop substantially improves performance in ENGL 101 for students with ACT scores of 23 and below. Based on these data, we are increasing the threshold for students required to take ENGL 103 *from* ACT Composite & ACT English at or below 18 (or SAT Verbal/Composite at or below 450/850) *to* ACT Composite at or below 23 (or SAT Composite at or below 1130).

The current requirement threshold for ENGL 103 has not changed officially since it was first implemented in the late 1980s. But the score requirement was informally raised for FALL 2024 at the request of the Division of Student Success for a new group of about 100 students admitted via guaranteed admission, who were required to take ENGL 103 if they had an ACT English score at or below 20. We consulted with the Division of Student Success, which supports this formal change that will help better support students entering with less-developed writing abilities.

The new score threshold will affect about 381 students per year compared to the current threshold, which affects about 13 students per year. The Herbert Writing Center is already well equipped to support many more than 381 students per year, so students with higher ACT or SAT scores will still be able to enroll in ENGL 103 if they choose.

We have also removed all mention of ENGL 198, a discontinued part of Honors first-year writing, from this course's descriptions.

Impact on Other Units* None. The Herbert Writing Center, which will handle the additional students enrolled in ENGL 103 starting in Fall 2025, has the capacity to work with at least twice the number of students that this change will entail.

Financial Impact* None. The Herbert Writing Center, which will handle the additional students enrolled in ENGL 103 starting in Fall 2025, has the capacity to work with at least twice the number of students that this change will entail.

Rationale* Sports have an important place in literary texts, and an ancient one: there's wrestling in *Gilgamesh*, funeral games in Homer. Literary works have made use of sports to great effect: they represent athletic feats themselves, giving authors a chance to render the most incredible physical achievements and make them intelligible; they dwell on the cultural significance of sports, showing how society structures through its pastimes; and they use sports as a means for philosophical reflection, plumbing the depths of what it means to be human by focusing on things like the loneliness of the long distance runner, or the goalie's anxiety at the penalty kick.

The potential student demand for a course like this one seems fairly obvious. UT plays a prominent role in several different sports and is perennially ranked high in all of them. The games sell out and have a devoted fan base amongst students (and alumni). This class could make use of this already existing enthusiasm. What is more, it has the potential to increase the visibility of the English department in students' eyes. The most ardent sports fans are not necessarily the ones that we normally get a chance to reach, and this class could allow us to make inroads with those students. Because the course aims to show students what the English department can do, its broad purview allows instructors to teach a wide swath of genres and media forms, to say "yes, English covers this too."

This course will be proposed for the Oral Communications VolCore requirement. Most fans engage with sports conversationally and orally (going back to Greek Olympian odes) as well as in various audio-visual formats, and those different media often serve as a foundation for writing about sports. The OC designation acknowledges the important role of speaking of sports in podcasts, documentaries, interviews and the like and how this speech affects our understanding of different sports. The course will harness the passion of fans for speaking about games, athletes and sports to teach students the most effective ways to express themselves orally.

Rationale* “Literature Now” will allow students to analyze how current events, social movements, technological advancements, and cultural shifts are reflected in and shaped by contemporary literature. This connection between literature and real-world contexts makes the study more engaging and relevant to students who are interested in reading and appreciating current literature as a way to understand the contemporary world. This class will focus on works created recently that provide a range of perspectives from different social groups, nationalities, cultures, genders, races, ethnicities, religions, etc., which can potentially enrich students’ understanding of the world. Students will engage with literary discussions that are still in progress, inviting them into a deeper, more open-ended discussion of how literature works.

We propose this course to engage with students in the historical domain of the present. Students will be introduced to important skills like analysis through the critical examination of literature that is of the moment. Students might examine the way authors experiment with mode, form, genre, and technique in innovative ways. By including various modes, including innovative digital or multimodal texts, we could encourage students to become proficient in multimodal literacy, broadening their analytical skills and preparing them for diverse media consumption.

This course would use the familiarity of the present as a window to open discussion about the history of genre, form, mode, technique, school of criticism, etc. Studying contemporary literature equips students with knowledge that they can use in future academic pursuits or professional careers in fields as varied as the many cultural industries, as well as law, medicine, business, design, technology, publishing, writing, or education. And it positions them well to continue engaging with literature—and ongoing literary trends—for years to come. It will give them contexts and critical tools to help them read literature for the rest of their lives. This course is proposed as variously titled to allow flexibility should faculty wish to address particular issues of the moment via literature.

Rationale* In 1988, the ecotheologian Thomas Berry argued that storytelling was crucial for understanding the relationship between humans and the living natural world: “We are in trouble just now because we do not have a good story. We are in between stories.” Encoded in nearly every story, each work of literature or art, is an assumption about the relationship between humans and the natural world, between nature and culture. This course would focus on this perceived divide and the works of literature that consciously examine the environment and works through which cultural beliefs about the natural world are otherwise encoded. This class would examine the role of the natural world and the environment in fiction—both novels and short stories—nonfiction, poetry, drama, graphic narratives, and film.

A literature class that centers on the environment will introduce students to concepts and ideas that they would need for future English courses—literary history, narrative craft, and other crucial concepts—through an environmental lens. A discussion of character, for instance, could be expressed through the interrogation of nonhuman characters and agency. This class can also help to connect present environmental concerns—conservation, for instance, or sustainable development—to their historic cultural roots. This course would also allow students the opportunity to examine pressing issues like climate anxiety and environmental justice as it is expressed through human culture and writing. This course could be of interest not only to English majors and minors and other students interested in the literary arts, but also students in fields like environmental studies, forestry, wildlife and fisheries management, agriculture, biology, and other natural science related fields. Connecting literary movements, history, and craft to substantive issues of the environment will allow students to articulate the role a humanities education plays in current public and political conversations. In short, this is a literature class that will help student navigate the divide between the “traditional story” that Thomas Berry argued more than thirty years ago could no longer support us and the stories of connection, renewal, and climate justice for the future.

The course is being proposed as variable title so it can be themed to particular environmental topics or genres should faculty wish it.

Course Description Intensive writing and research instruction, with emphasis on critical inquiry, rhetorical analysis, persuasion/argumentation, and primary and secondary source research. Course topic includes exploration of debates concerning "human nature." Includes the study of longer works of nonfiction in addition to a selection of interdisciplinary readings.

Satisfies Volunteer Core Requirement: (WC)

Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

Equivalency

Rationale* Course was part of honors-composition sequence with 298 and was discontinued in favor of just one honors composition course, 298.

Impact on Other Units* The impact results for this proposal are significant in length. As an exception, they will not be pasted in full. Please run impact and view the impact to Programs. The majority of the impact is through this course being embedded within other courses (i.e. ENGL 101 as a credit restriction). Careful consideration needs to be given to the direct impacts (e.g. ENGL 101 and ENGL 103) versus those that are indirect (ENGL 198 embedded within other courses such as ENGL 101 in programs - the takeaway from this is that if attention is given to the impact to ENGL 101, many of the program impacts disappear because ENGL 198 will no longer be indirectly associated with those programs).

Pasted below is the first part of the impact report. Please run a full report when reviewing.

Rationale* We are revising this course from a two-course historical sequence to a one-course variable-title that will provide the same historical coverage in different sections titled to reflect their historical and thematic content.

We are also removing all prerequisites for this course so that first-year students can take some of our literature courses concurrently with their first-year writing courses. This course is not designated as a VolCore WC (Written Communication), meaning that the department has determined its focus is on readings rather than writing. Students should be able to explore literature in their first year at UT without having yet completed the Written Communication first-year sequence.

Subject/Prefix (choose from list)* ENGL

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 208

Course Title (max 100 characters)* Honors: British Literature II

Credit Hours* 3

Change course status from active to:* ○ Dropped (Inactive-Hidden) ◉ Archived

Course Description Enriched section of ENGL 202*.

Satisfies Volunteer Core Requirement: (AH) (WC)

Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

Equivalency

Rationale* We are dropping this course because we are reducing a two-course historical sequence to a one-course variable-title (ENGL 207: Honors: British Literature) that will provide the same historical coverage in different sections titled to reflect their historical and thematic content.

Equivalency

Rationale* The department is long overdue for a course on literature and disability. With the accelerating growth of Disability Studies in English and other fields nationwide, the absence of such a course in our curriculum puts us out of step with an important development in literary studies and with the curricular offerings of many of our peer and aspirational departments. Disability and Literature would contribute to our department’s diversity offerings by adding physical and cognitive difference to our courses on race, ethnicity, and gender. Several of our colleagues already teach undergraduate courses on disability under Themes in Literature (254), and others address disability issues in courses on other topics. Some of our top candidates in recent faculty searches have taught or have the training to teach, courses in this area. We have made the course variable-title so that instructors who teach the course can emphasize different issues and genres: cognitive disability, deafness, mental illness, and disability memoirs, for example.

Students with disabilities—and there are many on campus—welcome the chance to see their experiences, challenges, and abilities reflected in the texts they read. Students who don’t identify themselves in this way value the opportunity to learn about new perspectives and to think about the categories of “normality” in which they and everyone else are positioned. The course is proposed without prerequisites like a number of our new and old literature courses at the 100 and 200 levels. We have already had encouraging results in terms of enrollment from entering first-year students and we think this course would likewise appeal to a broad cross section. The course is being proposed as variable title so that faculty may theme it around particular disabilities and disability topics should they wish.

Impact on Other Units* None.

Financial Impact* None.

Equivalency

Rationale* We are revising this course as we reduce a two-course historical sequence to a one-course variable-title (ENGL 221: World Literature) that will provide the same historical coverage in different sections titled to reflect their historical and thematic content.

We are also removing all prerequisites for this course so that first-year students can take some of our literature courses concurrently with their first-year writing courses. This course is not designated as a VolCore WC (Written Communication), meaning that the department has determined its focus is on readings rather than writing. Students should be able to explore literature in their first year at UT without having yet completed the Written Communication first-year sequence.

Equivalency

Rationale* We are removing all prerequisites for this course so that first-year students can take some of our literature/film courses concurrently with their first-year writing courses. This course is not designated as a VolCore WC (Written Communication), meaning that the department has determined its focus is on readings and viewings rather than writing. Students should be able to explore literature and film in their first year at UT without having yet completed the Written Communication first-year sequence.

Rationale* This course adds a new pathway for training undergraduate tutors to work in the Judith Anderson Herbert Writing Center (JAHWC) that offers elective course credit and pedagogical training and experience that shows up on students' transcripts. This course option will enhance the effectiveness of the JAHWC's training model for new undergraduate tutors.

A dedicated 3-hour peer tutoring course offered to undergraduates in the Spring term would allow prospective new undergraduate tutors a stronger opportunity to gain in-depth understanding of theories and practices of tutoring at a reasonable pace before they begin extensive tutoring later, if desired and if hired, as paid tutors. The course would provide an opportunity to stage out the learning process for prospective UG tutors: first, learn the FYC curriculum and the major genres of academic writing across campus; then, learn best practices for tutoring inside and outside the FYC curriculum; and finally, tutor writers and reflect on the experience. The in-depth focus on writing should also improve undergraduates' own writing, which would be an additional benefit of taking the course.

Rationale* Introduction to Publishing (English 361) will introduce students to the foundations of publishing across a range of categories including books (trade, academic, and small-press) and periodicals (print journals, print magazines, and online publications). The course will explore the main phases of the publishing process: Acquisitions & Editorial, Design & Production, and Marketing & Publicity. Topics will include methods of evaluating, editing, producing, distributing, and promoting book projects and publications; the organizational and economic structure of publishing companies; current issues in publishing, such as intellectual property rights, plagiarism, generative AI, censorship, diversity, and the increasing fragmentation of the marketplace.

Rationale* A quarter of a century beyond the millennium, modern communications increasingly encompasses a variety of media and modes beyond the written word. The English Department has traditionally focused on the textual aspect of language and meaning transmission. But we might also begin to offer courses that focus on the multimedia storytelling forms that have now become widespread and vital for contemporary communication. We propose the creation of a course that would concentrate on short- and long-form video and audio narrative, including podcasts, documentaries, social-media content, literary and visual reportage, scripting, editing, and other aspects of new media publishing.

In today's digital age, storytelling has evolved beyond traditional forms of literature and narrative. The convergence of various multimedia platforms has created new opportunities for storytellers to engage audiences through dynamic, interactive, and immersive experiences. This proposed course aims to explore the art and techniques of multimedia storytelling, equipping students with the skills necessary to craft compelling narratives across diverse mediums.

Storytelling as a rhetorical concept refers to the strategic use of narrative elements and techniques to persuade, inform, entertain, or inspire an audience. It draws upon the principles of rhetoric, which is the art of effective communication and persuasion. Rather than relying solely on logical arguments or factual evidence, storytelling leverages the power of narrative structure, character development, and emotional appeal to engage with the audience on a deeper level and convey a message.

The variable title allows the course to be taught in one particular aspect of multimedia storytelling (e.g. podcasts or documentary videos) should a faculty member desire to do so.

Rationale* We are adding this course as a crosslisting for a Journalism course, Journalism as Literature, which considers the literary qualities of periodical writing.

We are NOT adding this course to our graduate catalog.

Impact on Other Units* None. The Journalism and Media school approved the course crosslisting and has capacity for the seats that may now be filled by English majors/minors.

Financial Impact* None. The course is regularly taught by JMED faculty.

Rationale* As the arguable originators of literature written in the space of America, Native American writers and their texts should be a component of any literary pursuit. This field is particularly pertinent to the UTK English Department as it allows us to fulfill UTK's land grant mission by educating our students about the Indigenous nations that shaped our local region and who continue to actively inhabit and define East Tennessee. Finally, a course on Native American texts also offers the English department an opportunity to take advantage of the many local resources on campus including the Hodges Library Archives and Special Collections -- which contains an extensive Indigenous, specifically Cherokee materials and an archivist specialized in these materials -- and the McClung Museum which is currently developing an exhibit devoted to the Cherokee nation.

ENGL 446 Native American Writers would introduce students to Native American authors and the methods for analyzing their textual production The course could be taught several ways. Instructors could group the texts around a genre, a time period, a region, a theme, or present a variety of texts to students. The larger field of Indigenous/Native American Literature is currently experiencing a resurgence which means that there are an increasing number of Native American novelists, essayists, poets, and artists that could be incorporated in the course including Tommy Orange, Terese Marie Mailhot, Natalie Diaz, etc. The field itself also has many well-established, award-winning authors to draw upon including Louise Erdrich, James Welch, N. Scott Momaday, Joy Harjo, Simon Ortiz, etc.

Another important component of this course would be the use of Native American and Indigenous Studies Methodologies (NAIS). These are methodologies which re-frame Indigenous texts in terms of their relationship to land, language, sovereignty, and community. NAIS methodologies not only represent the current state of the field, but also allow students a pathway for interpretation that will help them better frame the larger experience of Indigenous people within the space of the United States and Canada.

College of Arts and Sciences - Earth, Environmental, and Planetary Sciences - Geochemistry Minor

2025-2026 UG Revise Program

General Catalog Information

College* College of Arts and Sciences

Department* Earth, Environmental, and Planetary Sciences

Program Name* Geochemistry Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

A minor in Geochemistry consists of **15** credit hours. This minor is for undergraduate students who want to support their major with a general background in geosciences and a selection of courses that will expose them to the chemistry of Earth, Environmental, and Planetary materials. Students in this minor will develop analytical, critical thinking, and problem-solving skills they can put to work in careers in scientific research, teaching, environmental consulting, mining and minerals industries, government oversight, and related fields. Students can choose between two concentrations in:

- Solid Earth - focused on high- and low-temperature processes affecting the geochemistry of igneous, metamorphic, and sedimentary rock systems, or
- Aqueous Earth - focused on geochemical processes accompanying the water cycle, soil formation, environmental pollution, and climate change.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Requirements*

Students can choose among two concentrations in:

Solid Earth - focused on high- and low-temperature processes affecting the geochemistry of igneous, metamorphic, and sedimentary rock systems,

or

Aqueous Earth - focused on geochemical processes accompanying the water cycle, soil formation, environmental pollution, and climate change.

Concentration – Solid Earth

Notes:

*** Satisfies Volunteer Core Requirement**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*

Reducing total required hours from 23 to 15 by removing 100-level courses to bring the minor in line with other departments in Arts and Sciences (100-level courses are not allowed to count toward CAS majors or minors per CAS Policy).

Removing EEPS 100-level courses from the requirement matches other minors that do not include prerequisite 100-level courses. This also removes issues with having 100-level courses count toward the minor when there are overlaps with majors.

Financial Impact*

None

Impact on Other Units*

These changes only involve courses within EEPS.

Have you consulted with all programs/departments that will be impacted by this change?*
- (•) Yes
- ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

EEPS 493 Independent Study

Credit Hours 16

Term 7 Milestone Notes

Complete two Paleontology electives.
Complete at least 2 credits of EEPS 493.
Complete a total of at least 24 total upper-division (300-400 level) hours

Term 8

[2] Connections 6 *Credit Hours*
Non-U.S. History 3 *Credit Hours* * (continuation of sequence)
Paleontology Elective (EEPS, ANTH, EEB, GEOG) 3 *Credit Hours*
Engaged Inquiries Elective 3 *Credit Hours* *

EEPS 493 Independent Study

Credit Hours 16

Term 8 Milestone Notes

Complete minimum 5 credits of Field Geology
Complete one Paleontology elective.
Complete 3 credit hours of EEPS 493.
Complete at least 42 total upper-division (300-400 level) hours to receive a degree from the College of Arts & Sciences.

Total Credit Hours 129

Footnotes

All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The Connections requirement may be satisfied in one of three ways: (1) by completing 9 hours from one of the approved Connections packages, (2) by completing the requirements for a second major or minor, or (3) by completing 9 hours of study abroad coursework. All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The courses indicated meet both a Volunteer Core requirement as well as a requirement in the major. Students can choose to complete the Volunteer Core requirement using alternative courses; however, this could increase time to degree.

*** Meets Volunteer Core Requirements.**

Rationale*

There is a growing need for geoscientists trained in understanding the interactions between life and other parts of the Earth system. Paleontology provides a framework to tie these systems together and is a well-known discipline to the public. The recently launched minor in Paleontology within EEPS has been very successful, enrolling ~25 students within one year of launch, which indicates strong demand in this area of geoscience.

Hiring trends within the geosciences show growth in fields aligned with environment, biology, and climate, key focus areas of the degree path. Given the global scale of changes in climate and other aspects of the environment, understanding the impact of these changes requires the analysis of similar changes that occurred in Earth's distant and recent past. The curriculum of the Paleontology concentration will provide graduates with the practical knowledge and skills to contribute to solving problems across a variety of fields in education (formal and informal), museum settings, NGO, state and federal agencies, consulting firms, and private sectors.

The creation of this concentration takes advantage of existing strengths and resources in EEPS and CAS. There are very few BS degree programs in Paleontology in the United States. The concentration of paleontologists with varied specialties within EEPS provides an opportunity to create a unique program that will be sought out by prospective students from across the country.

Financial Impact*

No new resources are required to establish this concentration. The proposed Paleontology concentration is built on the expertise of existing faculty within EEPS and other units within CAS and so no new faculty resources are required to support its implementation. The curriculum will include one new course that will be taught by an existing faculty member within EEPS as part of their regular teaching load.

The launch of this concentration is expected to have a positive financial impact as it will attract new students to UTK due to its unique nature. Students who would have otherwise attended one of the few institutions with paleontology-related BS degrees will now have a choice at UTK.

Impact on Other Units*

This program includes prerequites and corequisites in Biology, Chemistry, Math, and Statistics.

Concentration requirements include required courses in Biology and electives in Anthropology, Ecology and Evolutionary Biology, and Geography.

These departments have been contacted regarding their courses and no issues were raised. Approval information is attached to the concentration proposal.

Have you consulted with all programs/departments that will be impacted by this change?*

- (•) Yes
- ( ) No

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The Geology and Environmental Studies major is designed for students who want a broad, general background in geosciences and wish to develop their leadership and communication skills to pursue careers in science, education, law, business, public policy, and many other fields.

Program Learning Outcomes for the B.S. degree in Geology and Environmental Studies:

- Students will demonstrate knowledge and understanding of geosciences in one of the four concentrations.
- Students can apply geoscience techniques presented in the curriculum.
- Students will develop a depth of professional knowledge, the ability to problem solve, and critical thinking skills comparable to other professional geoscience programs.

Water Science encompasses a variety of important topics related to water issues and challenges experienced by humanity. Water Science is a core area of the geosciences that is focused on studying the distribution, movement, and storage of water on the surface, and in the soils and rocks of Earth's crust and other rocky planetary bodies. Our undergraduate offerings in the Geology and Environmental Studies major focus on rock forming processes on Earth and other planetary bodies, the evolution of life, natural geological resources, geochemistry, environmental pollution, climate and human impact. Courses in the major not only provide the foundation for advanced education and research into urgent challenges in water quality, availability, and management, but also offer our students pathways into successful careers in science, education, industry and government.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Prerequisites:

A. Select one sequence:

CHEM 122 General Chemistry I
[Right] *
CHEM 123 General Chemistry I Laboratory
[Right] *
CHEM 132 General Chemistry II
[Right] *
CHEM 133 General Chemistry II Laboratory
[Right] *
[After] Or

CHEM 138 Honors: General Chemistry II
[Right] *
[After] Or
CHEM 102 Principles of Chemistry
[Right] *
CHEM 103 Principles of Chemistry Laboratory
[Right] *
CHEM 112 Introduction to Organic and Biochemistry
[Right] *
CHEM 113 Introduction to Organic and Biochemistry Laboratory
[Right] *

B. Complete two courses:

EEPS 101 The Dynamic Earth
[Right] *
EEPS 103 The Earth's Environments
[Right] *

C. Select one sequence:

MATH 141 Calculus I
[Right] *
[Before]AND one of
MATH 142 Calculus II
[Right] *
PHYS 135 Introduction to Physics for Physical Science and Mathematics Majors I
[Right] *
STAT 201 Introduction to Statistics
[Right] *
[After] or
MATH 151 Mathematics for the Life Sciences
[Right] *
MATH 152 Calculus for the Life Sciences
[Right] *

Concentration Requirements:

This concentration consists of **37-38** credit hours.

A. Complete the following (19 credit hours):

EEPS 310 Mineralogy
[Right] *
EEPS 330 Igneous and Metamorphic Petrology
EEPS 340 Earth Sedimentary Processes
EEPS 370 Earth Structure and Geophysics
EEPS 485 Principles of Hydrogeology

B. Complete one course (3 credit hours):

EEPS 301 Introduction to Scientific Field Methods and Analysis
EEPS 425 Data Analysis for Geoscientists
MICR 475 Reproducible Data Analysis

C. Complete at least 9 hours from:

CE 391 Water Resources Engineering I
CE 494 Water Resources Engineering II
CE 495 Hydrology
EEPS 424 GIS for Geoscientists
EEPS 450 Landscapes: Earth and Elsewhere
EEPS 452 Cave and Karst Geology
EEPS 455 Environmental Geology
EEPS 456 Global Climate Change

EEPS 459 Introduction to Oceanography
EEPS 462 Environmental Aqueous Geochemistry
EEPS 464 Water Sustainability and Climate
EEPS 466 Water and Air Pollution
EEPS 469 Limnology
EEPS 486 Computational Methods in Hydrogeology
EEPS 493 Independent Study
ESS 424 Environmental Stormwater Management
[Right] *
GEOG 433 Landform Analysis and Landscape Planning
GEOG 435 Biogeography
GEOG 436 Water Resources
JMED 451 Environmental Writing
[Right] *

D. Complete one course (3-4 credit hours):

AREC 470 Policy Analysis for Environmental and Natural Resource Management
ECON 201 Introductory Economics: A Survey Course
[Right] *
[After] or
ECON 207 Honors: Introductory Economics
[Right] *
[After]
ECON 362 Environmental and Natural Resource Policy

E. Complete at least 3 credit hours:

EEPS 440 Field Geology
[After] or
EEPS 493 Independent Study
[Right] (3 credit hours)

Honors Concentration – Water Science

Requirements for the honors concentration are:

Fulfill all requirements for a concentration of the Geology and Environmental Studies degree
Maintain an overall GPA of at least 3.25
Maintain a concentration GPA of at least 3.5
9 hours of honors-by-contract coursework chosen from: approved 300- and 400-level EEPS courses, EEPS 491 Foreign Study, EEPS 492 Off Campus Study, and EEPS 493 Independent Study.
3 hours of EEPS 497 Honors Senior Thesis (with a written and oral presentation of thesis)

Note:

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*

Updating concentration EEPS requirements to provide students with the training to obtain a professional geologist license while maintaining focus on water resource management with advanced elective courses. Adding new courses from EEPS catalog.

Reduction of concentration hours from 47 to 37/38 to bring the requirements in line with other concentrations in the Geology and Environmental Studies major.

Financial Impact*

None

Impact on Other Units*

All changes only impact EEPS courses.

Have you consulted with all programs/departments that will be impacted by this change?*
- (•) Yes
- ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

Water Science (400-level major course) 6 *Credit Hours*

Credit Hours 18

Term 8 Milestone Notes

Completion of at least 42 total upper-division (300-400) hours

Total Credit Hours 129

Footnotes

All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The Connections requirement may be satisfied in one of three ways: (1) by completing 9 hours from one of the approved Connections packages, (2) by completing the requirements for a second major or minor, or (3) by completing 9 hours of study abroad coursework. All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The courses indicated meet both a Volunteer Core requirement as well as a requirement in the major. Students can choose to complete the Volunteer Core requirement using alternative courses; however, this could increase time to degree.

*** Meets Volunteer Core Requirements.**

College of Arts and Sciences - Earth, Environmental, and Planetary Sciences - Geology and Environmental Studies, BS - Paleontology Concentration

2025-2026 UG Add Program

General Catalog Information

College* College of Arts and Sciences

Department* Earth, Environmental, and Planetary Sciences

Program Name* Geology and Environmental Studies, BS - Paleontology Concentration

Learning Outcomes

Students will indicate knowledge of basic principles of geology and environmental studies.

Students will demonstrate the ability to engage in scientific process through thecollection and evaluation of data, testing of hypotheses, and communication of results.

Students will illustrate critical thinking and communication skills necessary to address issues in geology and environmental studies at the core level.

Degree Type* Bachelor of Science

Program Type* Concentration

Campus code*

- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The EEPS Paleontology concentration is designed to provide students with broad training in the geosciences, with a focus on the interactions of the biological, physical, and chemical components of the Earth system through time. Designed for students interested in studying the history, and the future, of life on Earth, the Paleontology program includes flexible, interdisciplinary coursework, training in field and laboratory techniques, and independent research opportunities. This program prepares graduates with training in the knowledge and skills necessary for careers in academia, museums, state and federal agencies, environmental consulting, and public outreach.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Requirements*

College Requirements

Arts and Sciences

Prerequisites

[Before]A. Complete:

EEPS 101 The Dynamic Earth
EEPS 102 Earth, Life, and Time
[Before]

B. Select one sequence:

BIOL 150 Organismal and Ecological Biology
BIOL 159 Skills of Biological Investigation
BIOL 160 Cellular and Molecular Biology
[Before]

or

BIOL 113 Introductory Plant Biology I
BIOL 114 Introductory Plant Biology II
BIOL 115 Introductory Plant Biology Laboratory

Corequisites

[Before]A. Select one Chemistry Lecture / Lab Combination:

CHEM 102 Principles of Chemistry
CHEM 103 Principles of Chemistry Laboratory
[Before]

or

CHEM 122 General Chemistry I
CHEM 123 General Chemistry I Laboratory
[Before]

or

CHEM 128 Honors: General Chemistry I
[Before]

B. Select two courses:

STAT 201 Introduction to Statistics
[Before]or

STAT 207 Honors: Introduction to Statistics
[Before]

and

MATH 141 Calculus I
[Before]

or

MATH 147 Honors: Calculus I
[Before]

or

MATH 151 Mathematics for the Life Sciences

Concentration Requirements

This concentration consists of **41 - 42** credit hours.

[Before]A. Complete (15 credit hours):

BIOL 260 Ecology
BIOL 269 Ecology Field-Based Laboratory
BIOL 280 Evolution
EEPS 320 Paleobiology
EEPS 340 Earth Sedimentary Processes
[After]

[Before]B. Field Geology (5-6 Credit Hours):

[Before]You may use a combination of courses to reach a minimum of 5 credit hours to include:

1) EEPS 301 Field and Laboratory Methods in the Geosciences (3 credits) + EEPS 440 Field Geology (3 credits).

2) EEPS 440 Field Geology (3 credits) + EEPS 440 Field Geology (3 credits). Note: these two courses must involve different field destinations/topics.

3) Take an external field geology course for at least 5 credits and transfer those hours as EEPS 440.

EEPS 301 Introduction to Scientific Field Methods and Analysis
EEPS 440 Field Geology
[Before]

[Before]C. Complete 9 hours:

EEPS 406 Taphonomy
EEPS 420 Trace Fossils: Behavior, Environment, and Applications
EEPS 421 Vertebrate Paleontology
EEPS 422 Evolution of Life
EEPS 423 Paleoecology
EEPS 426 Biospheric Change and the Fossil Record
[Before]

[Before]D. Complete 3 hours:

EEPS 493 Independent Study
[Before]

[Before]E. Complete 9 hours:

ANTH 329 Skeletal Collections and Curation
ANTH 431 Isotope Ecology
ANTH 471 Vertebrate Osteology
ANTH 490 Primate Evolution
ANTH 495 Hominin Paleobiology
EEB 401 Natural History Collections Research
EEB 330 Field Botany
[Right] *

EEB 330S Field Botany
[Right] *

EEB 353 Comparative Vertebrate Biology
EEB 404 Ecosystem Ecology
EEB 410 Ecological and Evolutionary Developmental Biology
EEB 411 Biostatistics
EEB 424 Plant Diversity and Evolution
EEB 426 Plant-Animal Interactions
EEB 433 Plant Ecology
EEB 464 Macroevolution
EEB 473 Herpetology
EEB 474 Diversity, Ecology, and Evolution of Fishes
EEB 484 Conservation Biology
EEPS 205 Age of the Dinosaurs
EEPS 320 Igneous and Metamorphic Petrology
EEPS 310 Mineralogy
[Right] *

EEPS 370 Earth Structure and Geophysics
EEPS 424 GIS for Geoscientists
EEPS 425 Data Analysis for Geoscientists
EEPS 456 Global Climate Change
EEPS 459 Introduction to Oceanography
GEOG 430 Global Environments of the Quaternary
GEOG 431 Environmental History from Lake Sediments

Notes:

*** Satisfies Volunteer Core Requirements**

Rationale*

There is a growing need for geoscientists trained in understanding the interactions between life and other parts of the Earth system. Paleontology provides a framework to tie these systems together and is a well-known discipline to the public. The recently launched minor in Paleontology within EEPS has been very successful, enrolling ~25 students within one year of launch, which indicates strong demand in this area of geoscience.

Hiring trends within the geosciences show growth in fields aligned with environment, biology, and climate, key focus areas of the degree path. Given the global scale of changes in climate and other aspects of the environment, understanding the impact of these changes requires the analysis of similar changes that occurred in Earth's distant and recent past. The curriculum of the Paleontology concentration will provide graduates with the practical knowledge and skills to contribute to solving problems across a variety of fields in education (formal and informal), museum settings, NGO, state and federal agencies, consulting firms, and private sectors.

The creation of this concentration takes advantage of existing strengths and resources in EEPS and CAS. There are very few BS degree programs in Paleontology in the United States. The concentration of paleontologists with varied specialties within EEPS provides an opportunity to create a unique program that will be sought out by prospective students from across the country.

Financial Impact*

No new resources are required to establish this concentration. The proposed Paleontology concentration is built on the expertise of existing faculty within EEPS and other units within CAS and so no new faculty resources are required to support its implementation. The curriculum will include one new course that will be taught by an existing faculty member within EEPS as part of their regular teaching load.

The launch of this concentration is expected to have a positive financial impact as it will attract new students to UTK due to its unique nature. Students who would have otherwise attended one of the few institutions with paleontology-related BS degrees will now have a choice at UTK.

Impact on Other Units*

This program includes prerequites and corequisites in Biology, Chemistry, Math, and Statistics.

Concentration requirements include required courses in Biology and electives in Anthropology, Ecology and Evolutionary Biology, and Geography.

These departments have been contacted regarding their courses and no issues were raised.

Have you consulted with all programs/departments that will be impacted by this change?* (●) Yes ( ) No

CIP Code (if available)

- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description A minor in Paleontology consists of **15 hours**. This minor is for undergraduate students who want a general background in geosciences and wish to develop analytical, critical thinking, and problem solving skills to prepare them for successful careers in science, education, consulting, museums, government, and other related fields.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Minor requirements

A minor in Paleontology consists of 15 hours. A maximum of 3 hours of EEPS 493 may be counted toward the minor.

Complete (8 credit hours):

EEPS 320 Paleobiology
EEPS 340 Earth Sedimentary Processes

Select 3 credit hours from list A and 4 credit hours from list A or B.

List A:

EEPS 422 Evolution of Life
EEPS 423 Paleoecology
EEPS 426 Biospheric Change and the Fossil Record

List B:

ANTH 431 Isotope Ecology
ANTH 471 Vertebrate Osteology
ANTH 490 Primate Evolution
ANTH 495 Hominin Paleobiology
BIOL 280 Evolution
BIOL 269 Ecology Field-Based Lab
BIOL 260 Ecology

[After]
EEPS 406 Taphonomy
[Right] or
ANTH 406 Taphonomy
[After]
EEPS 421 Vertebrate Paleontology
EEPS 420 Trace Fossils: Behavior, Environment, and Applications
EEPS 459 Introduction to Oceanography
EEPS 493 Independent Study

Note:

*** Satisfies Volunteer Core Requirement**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*

- ○ Yes
- ◉ No

Rationale*

Reducing total required hours from 24 to 15 to bring the minor in line with other departments in Arts and Sciences.

Removing EEPS 102 to match other minors that do not include prerequisite 100-level courses. This removes issues with having 100-level courses to count toward the minor when there are overlaps with majors (CAS Policy doesn't allow 100-level courses to be required by major or minors).

Removing ANTH 465 Archeology of the Trojan War which was added by mistake.

Removing EEPS 490 Special Problems in Geology due to lack of control on course content (paleontology related EEPS 490 courses could be counted by petition).

Adding ANTH 431 Isotope Ecology, ANTH 471 Vertebrate Osteology, ANTH 490 Primate Evolution, BIOL 269 Ecology Field Based Lab, EEB 404 Ecosystem Ecology, EEB 411 Biostatistics, EEB 464 Macroevolution, and EEB 484 Conservation Biology to provide more options.

Adding EEPS 421 Vertebrate Paleotology which is new course.

Financial Impact*

None

Impact on Other Units*

Anthropology (removing 1 course, adding 3 courses to option List B)

Ecology and Evolutionary Biology (adding 4 courses to option List B)

Biology (adding 1 course to option List B)

These departments have been contacted concerning their courses and no issues were raised.

Have you consulted with all programs/departments that will be impacted by this change?*

- ◉ Yes
- ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ○ Yes
- ◉ No

Rationale*
This is a shared core for all English Majors.
We are adding a number of literature courses added over the years to the major's shared core so they can be counted for credit in the major. They are: ENGL 311: Race in Horror, Sci-Fi, and Thriller; ENGL 322: Race, Gender, and Medicine; ENGL 323: Black Women Writers; ENGL 346: The Gothic; ENGL 351: The Short Story; ENGL 389: Literature of the English Bible; ENGL 425: Black Feminist Theory; ENGL 430: Black and Indigenous Literatures; and ENGL 446: Native American Writers.

Removed from course list for being Inactive/hidden - ENGL 413, 415, 419, 481, 490, 496

Financial Impact*
None.

Impact on Other Units*

[Right] *
ENGL 495 Introduction to Rhetoric and Composition
[After]

Creative Writing – Honors Concentration

For students who qualify, the English Department offers specially designed courses at all undergraduate levels. The first-year and second-year honors courses are enriched versions of regular sections in composition, and in American and British literatures. To be given honors in English on the transcript, a student must have achieved a 3.25 or better GPA, a 3.5 or higher grade point in English courses, and the student must have completed 12 hours in honors courses in English at the 200-400 levels, including ENGL 398 - Junior-Senior Honors Seminar*, and ENGL 498 - Senior Honors Thesis. Any 300- or 400-level courses in English may be taken for honors credit through the Honors-by-Contract program with the permission of the instructor. Courses taken at the graduate level for undergraduate credit may be petitioned to count for honors credit in English. Depending on the topic, ENGL 398* may be petitioned to count for one of the other English major requirements as well.

*** Meets Volunteer Core Requirements.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ○ Yes
- ◉ No

Rationale*

We are revising the prerequisites for the English major to incorporate new 100-level literature classes we have added in the last couple of years as well as to exclude ENGL 298 as prerequisite because, despite its number, it is a first-year writing course (for Honors students).

We are updating the description text for the concentration to acknowledge the creation of a new publishing concentration.

We are adding a new sequence to our creative writing concentration: ENGL 369: Writing Creative Nonfiction; ENGL 469: Advanced Creative Nonfiction Writing;

English Major-Shared Core was updated in a separate proposal

Financial Impact*

None.

Impact on Other Units*

None.

Have you consulted with all programs/departments that will be impacted by this change?*

[Right] *

[Right] 3 *Credit Hours*

Publishing – Honors Concentration

For students who qualify, the English Department offers specially designed courses at all undergraduate levels. The first-year and second-year honors courses are enriched versions of regular sections in composition, and in American and British literatures. To be given honors in English on the transcript, a student must have achieved a 3.25 or higher GPA, a 3.5 or higher grade point in English courses, and the student must have completed 12 hours in honors courses in English at the 200-400 levels, including ENGL 398 - Junior-Senior Honors Seminar*, and ENGL 498 - Senior Honors Thesis. Any 300- or 400-level courses in English may be taken for honors credit through the Honors-by-Contract program with the permission of the instructor. Courses taken at the graduate level for undergraduate credit may be petitioned to count for honors credit in English. Depending on the topic, ENGL 398* may be petitioned to count for one of the other English major requirements as well.

*** Meets Volunteer Core Requirements.**

Rationale*

The new Publishing concentration within the English major provides a career-ready course of study for our majors, who identify publishing as one of their top three career goals. The success of past majors in publishing careers shows that the skills and training of English majors are a good match for the field. This new concentration builds on the strengths of a traditional English major in critical reading, elegant writing, creative expression, and cultural awareness and adds to it specific publishing industry knowledge and training through two key courses: an Introduction to Publishing course (ENGL 361) and our Internship/ENGL 400, added last year, through UT Press or another of the publishing internships in our departmental portfolio. The Publishing Concentration adds only one new course to our curriculum. It also makes an internship both mandatory and guaranteed. The internships are made possible by existing internships as well as a new and exciting relationship with UT Press and their student-focused imprint, Newfound Press. Students will gain firsthand experience with acquisitions, development, and production. As the concentration grows, we have the capacity to add section leaders for the internship experience from our PhD Creative Writing candidates, who can work with Katie Hannah and UT Press to supervise and guide these internships. The concentration is an exciting blend of our historic strengths and new growth areas. The Publishing Concentration prepares students to go into careers in print, digital, and multimedia publishing. Through a customizable blend of creative, professional, and technical writing classes, relevant classes outside the department, and internships, students will build a practical portfolio of skills and have a chance to apply them, graduating with career-ready experience.

Financial Impact*

Minimal to none. The resources for the curriculum already exist in English, our staffing plan for ENGL 361 includes a rotation of existing faculty members, and the selected courses have capacity. The participating units have identified classes where they also have capacity. The Department of English established a Director of Careers and Internships two years ago. The services of that faculty member are already in place to support the concentration through organizing the internships guaranteed by UT Press.

In the Publishing concentration's fourth category, students choose one of ten courses; nine of those choices are outside English. Based on current numbers and modest projections for growth, we anticipate 25 new majors in the first year, with predicted growth at 60 within the next five years. The initial impact on the other departments is 2-3 additional students in those classes, which should not require further course programming. The impacted departments and programs are the Tombas School of Advertising and Public Relations; Art; the School of Design, and Journalism and Media. Their department Heads or Directors have approved the use of these courses. See attached emails.

Impact on Other Units*

In the Publishing concentration's fourth category, students choose among the following ten courses; nine of those choices are outside English:

ADPR 365 – Social Media Strategy

ADVT 250 – Advertising Principles

ARTN 291 – Non-Major Intro to Book Arts and Papermaking

ENGL 400 – Internship

GRDS 330 – The Art of Presentation Design

GRDS 331 – The Art of Identity Design

JMED 320 – Media Marketing and Promotions

JMED 416 – Audience Analytics

JMED 441 – Media Entrepreneurship

PBRL 270 – Public Relations Principles

Based on current numbers and modest projections for growth fueled by this new concentration, we anticipate 25 new majors in the first year, with predicted growth at 60 within the next five years. The initial impact on the other departments is 2-3 additional students in those classes, which should not equire further course programming. The impacted departments and programs are the Tombas School of Advertising and Public Relations; Art; the School of Design, and Journalism and Media. Their department Heads or Directors have approved the use of these courses. See attached emails.

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

Term 1

[1] Elective **1-2** *Credit Hours*

Foreign Language **3** *Credit Hours* (intermediate level)

Natural Sciences (NS) Elective w/Lab **4** *Credit Hours* *

English (major) **9** *Credit Hours*

Engaged Inquiries (EI) Elective **3** *Credit Hours* * (at least one must be outside of English)

Credit Hours 15

Term 8 Milestone Notes

Completion of at least 42 total upper-division (300-400) hours

ENGL 400 Internship

Total Credit Hours 120

Footnotes

All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The Connections requirement may be satisfied in one of three ways: (1) by completing 9 hours from one of the approved Connections packages, (2) by completing the requirements for a second major or minor, or (3) by completing 9 hours of study abroad coursework. All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The courses indicated meet both a Volunteer Core requirement as well as a requirement in the major. Students can choose to complete the Volunteer Core requirement using alternative courses.

*** Meets Volunteer Core Requirements.**

Rationale* We are adding a Publishing concentration (see proposal). This is the uTrack requirements for that new concentration, copied from the Literature Concentration. The only major difference is that one of the two major prerequisites must be VolCore WC because there is no one required course in the concentration that is WC.

Courses taken at the graduate level for undergraduate credit may be petitioned to count for honors credit in English. Depending on the topic, ENGL 398* may be petitioned to count for one of the other English major requirements as well.

*** Meets Volunteer Core Requirements.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ○ Yes
- ◉ No

Rationale*

We are revising the prerequisites for the English major to incorporate new 100-level literature classes we have added in the last couple of years as well as to exclude ENGL 298 as prerequisite because, despite its number, it is a first-year writing course (for Honors students).

We are updating the description text for the concentration to acknowledge the creation of a new publishing concentration.

We are adding two new courses to our rhetoric and writing concentration:

a. ENGL 359: Peter Tutoring: Theory and Practice

b. ENGL 370: Multimedia Storytelling

Financial Impact*

None.

Impact on Other Units*

None.

Have you consulted with all programs/departments that will be impacted by this change?*
- ◉ Yes
- ○ No

ENGL 496 Rhetoric of Legal Discourse

Select one course:

any 300-400 level English course

Technical Communication – Honors Concentration

For students who qualify, the English Department offers specially designed courses at all undergraduate levels. The first-year and second-year honors courses are enriched versions of regular sections in composition, and in American and British literatures. To be given honors in English on the transcript, a student must have achieved a 3.25 or better GPA, a 3.5 or better grade point in English courses, and the student must have completed 12 hours in honors courses in English at the 200-400 levels, including ENGL 398 - Junior-Senior Honors Seminar*, and ENGL 498 - Senior Honors Thesis. Any 300- or 400-level courses in English may be taken for honors credit through the Honors-by-Contract program with the permission of the instructor. Courses taken at the graduate level for undergraduate credit may be petitioned to count for honors credit in English. Depending on the topic, ENGL 398* may be petitioned to count for one of the other English major requirements as well.

*** Meets Volunteer Core Requirements.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* We are revising the prerequisites for the English major to incorporate new 100-level literature classes we have added in the last couple of years as well as to exclude ENGL 298 as prerequisite because, despite its number, it is a first-year writing course (for Honors students).

We are updating the description text for the concentration to acknowledge the creation of a new publishing concentration.

We are adding a new course to our technical communication concentration:

ENGL 370: Multimedia Storytelling

Financial Impact* None.

Impact on Other Units* None.

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal? ☑ Arts and Humanities ☐ Natural Sciences ☐ Social Sciences

ADMINISTRATIVE USE ONLY

General Catalog Information

College* College of Arts and Sciences

Department* English

Program Name* English Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description An English minor consists of at least **15** credit hours of English courses. Three of those hours may be at the 200-level (excluding ENGL 298). Three of those hours must be at the 400-level. The remaining nine may be at the 300- or 400-level.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Rationale* This course's old title "Introduction to Descriptive Linguistics" gives students the false impression that it is an introductory course, while it is actually an advanced linguistics course. Students who have had some linguistics knowledge and advanced proficiency in a foreign language are more likely to succeed in this course. Therefore, we are proposing to change the title and add recommended background.

Also, changing primary course to be GERM 425 to be consistent with GERM 426.

Impact on Other Units* Linguistics graduate certificate

Rationale* This course will provide the foundation for students to prepare to take the FAA Part 107 UAV pilot license and start a career utilizing UAVs. Statista projects the global drone market to reach $54.6 billion by 2030. Markets for drone pilots include real estate, construction, mining and aggregate, filmmaking, public safety, insurance, journalism, agriculture and forestry, transportation, energy, and telecommunications. UTK students should be prepared to enter this career field but we found no equivalent courses after searching the course catalog for the keywords "drone", "UAV", and "UAS".

Impact on Other Units* None - We searched the course catalog for courses using the keywords "drone", "UAV", and "UAS" but did not find any outside of our department.

Rationale* The name of GEOG 443 is being changed from Sustainable Cities and Landscapes to Urban Ecology to better reflect the content of the course. We would also like to add this course to the list of Environment and Society Connections courses (the course syllabus is attached to help with this decision).

This course is cross listed with EEPS and they are submitting a revise course proposal for EEPS 443 as well.

Given that this course is cross-listed in a NS Division and SS Division CAS department and is being asked to be considered for a Connections category, we have been instructed to include both the NS and SS CAS committees in the proposal workflow.

Course Description This course provides an entry point for students interested in conducting field-based research in Physical Geography, Environmental Science, or Sustainability. Students will cover topics ranging from fieldwork preparedness and basic navigation to data visualization and project management. Moreover, students will get to tackle a suite of real-world geographical problems pertinent to both the nature and build environments and spanning a variety of sub-disciplines such as hydrology, urban forestry, biogeography, and climatology.

Course Description In this course, participants will learn principles of community and labor engagement used in the professional field of sustainability, examining how opportunities for public engagement can be structured depending upon project contexts and existing public fora for sustainability policy
making. This course will be an introduction to histories of energy and environmental justice movements that inform best pratices for community engagement and methods for data collection and feedback. Students will take part in a real world practicum, critically assessing community engagement venues in their respective geographies and developing a community engagement strategy for a project of their choosing.

Course Description This course will focus on the world's largest country, the Russian Federation, which is unique due to its complex regional dynamics. Geographically, Russia is one of the major players in the continent. Concentrating on Russia allows focusing on some of the most important geopolitical and geo-economic issues that involve almost the entire continent. The major approach of this course is to focus on spatial aspects of the cultural, environmental, historical, and current geopolitical diversity types of development of the region.

Rationale* This course is being added to give all Geography, BA concentrations an additional option to fulfill an upper-division Geography major requirement. This course is being added to the World Languages and Cultures Major, BA – Russian Studies Concentration. This allows for an additional option to fulfill an upper-division Russian major requirement. This course is also applying for the following Connection packages:

1. Inequalities: Race, Ethnicity, Class, and Gender: the history and geography of the Russian Realm is fraught with numerous iniqualities that include race, ethnicity, class, and gender throughout history and in the current geopolitical landscape.

2. Mobility and Migration: mobility and migration have alway been a theme in the Russian Realm. Because of various geopolitical conditions, migration has often been forced throughout the region. Shifting borders also create the need to migrate and mobility and is often decided upon by the governments.

3. Shifting Borders and Cultures in Europe: Because of the shifting borders from within Russia, the Soviet Union, and now the Russian Federation, people are often times forced to leave their homelands for long periods and often are unable to return. This can create cultures, that historically, are incompatible with one another and thus creating conflict.

Rationale* Increasing the number of upper division courses for students seeking Sustainability degrees to meet increasing demand. Making this a 400-level course will enable Graduate students, especially those in a Masters in Sustainability, to receive credit for this course.

Note to add: The 300-level course had never been taught so there was no assessment or content which had been finalized. The proposed content will include reading comprehension, reading amount, and assessements at a 400-level (per originator).

Course Description In this course, students critically examine questions of justice and equity as they apply to periods of energy transition, particularly as energy systems decarbonize in response to climate change. Students will learn about the distribution of costs, benefits, and risks associated with diverse forms of energy generation and energy distribution, studying efforts to create more just and equitable energy systems as policymakers and industry mitigate and adapt to climate change.

Equivalency

Rationale* This course's old title "Introduction to Descriptive Linguistics" gives students the false impression that it is an introductory course, while it is actually an advanced linguistics course. Students who have had some linguistics knowledge and advanced proficiency in a foreign language are more likely to succeed in this course. Therefore we are proposing to change the title and add recommended background.

Also, changing primary course to be GERM 425 to be consistent with GERM 426.

College of Arts and Sciences - Geography and Sustainability - Applications of Uncrewed Aerial Systems Certificate

2025-2026 UG Add Program

General Catalog Information

College* College of Arts and Sciences

Department* Geography and Sustainability

Program Name* Applications of Uncrewed Aerial Systems Certificate

Learning Outcomes

- Acquire the knowledge needed to pass the FAA Remote Pilot examination
- Develop the skills and knowledge necessary to effectively use Small Uncrewed Aerial Systems (sUAS) in variety of business and public sector domains
- Understand how to make good aeronautical decisions while managing risk, safety, and legal implications while using sUAS.

Degree Type* Undergraduate Certificate

Program Type* Undergraduate Certificate

Campus code*

- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The undergraduate certificate in Applications of Uncrewed Aerial Systems provides students with the skills and knowledge necessary to effectively use drones (Small Uncrewed Aerial Systems, sUAS) in variety of business and public sector domains. The program will prepare students to operate sUAS in a safe and responsible manner and to become licesnsed sUAS pilots.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Requirements*

Campus

Knoxville

Undergraduate Certificate Type

Stand-Alone

Credit Hours Required

The Applications of Uncrewed Aerial Systems Certificate consists of 12 credit hours. Courses for the certificate must be completed with a grade of "C" or better. In such cases, students must repeat courses and earn a grade of C or better prior to the awarding of the certificate from the University of Tennessee.

Admissions Standards/Procedures

Students seeking admission to the Undergraduate Certificate must meet the admissions standards established by the Undergraduate Council.

Required Courses (6 Credit Hours)

GEOG 311 Geovisualization and Geographic Information Science
GEOG 314 Introduction to Uncrewed Aerial Systems

Elective Courses - Select TWO courses (6 Credit Hours)

ARTN 231 Non-Major Intro to Photography
ARTN 239 Non-Major Intro to Special Topics in Four-Dimensional
JMED 441 Entrepreneurship in Journalism and Media

* Meets Volunteer Core Requirements

Rationale*

Statista projects the global drone market to reach $54.6 billion by 2030. Drone pilots work in the following markets: real estate, construction, mining and aggregate, filmmaking, public safety, insurance, journalism, agriculture and forestry, transportation, energy, and telecommunications. After searching the catalog, we could not find any other programs utilizing UAVs or drones preparing students for this career path and skillset. At the completion of the certificate students will be prepared to take the FAA Part 107 exam to become licensed UAV pilots and will have the necessary skills to pursue these markets.

Financial Impact*

We have already contacted the School of Art and the School of Journalism and Media. Both programs support this program and the recommneded courses. The program utilizes preestablished courses from both units so no new courses will be requried and both units have the faculty to teach these courses.

Impact on Other Units*

We have already contacted the School of Art and the School of Journalism and Media. Both programs support this program and the recommneded courses. The program utilizes preestablished courses from both units so no new courses will be requried and both units have the faculty to teach these courses. If the new program gaines enough popularity each unit may have to offer additional sections of the optional courses.

Have you consulted with all programs/departments that will be impacted by this change?*

- (•) Yes
- ( ) No

CIP Code (if available)

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Yes - Students will be prepared to take the FAA Part 107 airman knowledge test for a Remote Pilot Certificate with a sUAS rating

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?

- [x] Arts and Humanities
- [x] Natural Sciences
- [x] Social Sciences

ADMINISTRATIVE USE ONLY

Impact Level

- [ ] Low
- [x] Mid
- [ ] High

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

Term 1

[1] Elective **1** *Credit Hours*
Foreign Language **3** *Credit Hours* (intermediate level)

ENGL 101 English Composition I
[Right] *
[Right] (or equivalent)

Completion of at least 9 upper-division (300-400) hours

Term 7

Applied Oral Communication Elective **3** *Credit Hours* *

Engaged Inquiries Elective **3** *Credit Hours* *

GIS&T major courses **10** *Credit Hours*

Credit Hours 16

Term 7 Milestone Notes

Completion of at least 24 total upper-division (300-400) hours

Term 8

Engaged Inquiries Elective **3** *Credit Hours* *
GIS&T major courses **9** *Credit Hours*
Global Citizenship - US Elective **3** *Credit Hours* *

Credit Hours 15

Term 8 Milestone Notes

Completion of at least 42 total upper-division (300-400) hours

Total Credit Hours 120-123

Footnotes

All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The Connections requirement may be satisfied in one of three ways: (1) by completing 9 hours from one of the approved Connections packages, (2) by completing the requirements for a second major or minor, or (3) by completing 9 hours of study abroad coursework. All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

A student who completes GEOG 131*-GEOG 132* or GEOG 137*-GEOG 132* in terms 1 and 2 will satisfy all Natural Science electives and can take two general electives in term.

*** Meets Volunteer Core Requirements.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*

This is to update uTrack to match the program changes swapping COSC 100, 102, and 230 with COSC 101 and COSC 111. COSC supports these changes.

We removed references to INSC 201 and 210 because those no longer match the curriculum.

Financial Impact*

None

Impact on Other Units*

We anticipate the changes will impact COSC class enrollment by approximately 5 students per academic year. We have already discussed this with COSC and they support the change.

INSC 201 and INSC 210 have not been part of the curriculum for several years which means our students have not been taking these courses. There should be no impact on that department.

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?
- [ ] Arts and Humanities
- [x] Natural Sciences
- [x] Social Sciences

ADMINISTRATIVE USE ONLY

Impact Level
- [x] Low

2025-2026 UG Revise Program

General Catalog Information

College* College of Arts and Sciences

Department* Geography and Sustainability

Program Name* Geography Major, BA - Geospatial Science and Technology Concentration

Degree Type* Bachelor of Arts

Program Type* Concentration

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description Students who enter the major having completed a laboratory science sequence other than geography may petition the department to waive the GEOG 131*/GEOG 137* and GEOG 132*/GEOG 138* requirements. Students who enter the major with more than 60 hours credit may petition the department to waive the GEOG 101* or GEOG 121* requirement.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale* Adding GEOG 490, 494, and 495 as optional courses provides more opportunities for students to engage in experiential learning opportunities.

GEOG 314 and GEOG 315 are new (proposed) GIST courses and should be added as options.

The other courses (GEOG 412, 422, 424, and 425) were added over the last several years but were not added to the list of approved courses. Adding these courses brings consistency to the various GIST programs.

Financial Impact* None

Impact on Other Units* None

Credit Hours* 3

Course Description Examines the history of Byzantium from its social, cultural, and political margins. The Byzantine world is reimagined by avoiding the male world of court politics and the cultural world of Constantinople and its elites, focusing instead on marginalized groups like workers, non-Greek speakers, polytheists and other non-Christians, women, and other peoples and cultures that are often left out of scholarly and popular depictions of the early Byzantine world.

Credit Hours* 3

Course Description How connected were communities across the world before and during the "age of exploration"? Who traveled long distances in the premodern? Why and how did they make their journeys, and how did their impressions of the places and peoples they visited influence the imaginations of their home populations? What connected famous explorers like Marco Polo, Ibn Battuta, and Christopher Columbus to people who traveled the globe as part of their daily lives as merchants, captives, and pirates? This course will address these questions and more, covering long-distance travel from the late medieval through the colonial period.

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 490R

Course Title (max 100 characters)* Internship at the Center for the Study of Tennesseans and War

Experience Learning Designation
- ( ) N (Internship)
- (•) R (Research)
- ( ) S (Service Learning)

For N/R/S base courses, should this course be:
- ( ) Active
- ( ) Archived
- ( ) N/A

Variable Title?*
- ( ) Yes
- (•) No

Credit Hours* 3

Course Description The Center researches, preserves, and shares the stories of people in our region who have been involved in wars over the past 300 years. Students get 3 credits toward their history major, and they can add the work experience to their resumes. Interns work on research projects for the Center's website.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all courses in this crosslisting relationship and note whether primary or secondary.

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Instructional Method* Practicum

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability May be repeated. Maximum 6 hours.

Credit Restriction

Registration Enforced (RE) Prerequisite(s):

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s):

Recommended Background

Comments

Registration Restriction(s)

Registration Permission Consent of Director of the Center for the Study of War and Society.

Equivalency

Rationale* HIST 490 was approved as an R-Designation course last year, which requires the submission of this "Add Course" form for HIST 490R.

Impact on Other Units* None

Financial Impact* None

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?
- [x] Arts and Humanities
- [ ] Natural Sciences
- [x] Social Sciences

Social Sciences

Course Description INPG 201 is a 3-credit hour course that serves as an introduction to cognitive methods essential for understanding various disciplines, including natural sciences, mathematics, philosophical logic, social sciences, cultural studies, and the arts. This interdisciplinary course is designed to raise students' awareness of distinctive research methods associated with their chosen minors. INPG 201 emphasizes active engagement and critical thinking to foster a deeper understanding of the ways in which different disciplines approach research and problem-solving.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

College of Arts and Sciences - Interdisciplinary Programs - Animal Behavior Minor

2025-2026 UG Add Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Animal Behavior Minor

Learning Outcomes

Student Learning Outcomes (SLOs) of Animal Behavior Minor:

1. Students will demonstrate fundamental knowledge of animal behavior principles
2. Students will be able to describe the types of techniques animal behavioral biologists use to explore the natural world
3. Students will be able to apply the techniques animal behavioral biologists use to explore the natural world

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The minor in Animal Behavior consists of **18 hours** of courses. The minor is designed to give students flexibility to explore different areas of animal behavior, including animal research, care, and welfare.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Rationale* We propose this minor as a way for students to add a skill set specific to understanding behavior in non-human animals. Specifically, the minor will include courses that entail: (i) mechanistic aspects (e.g., neurobiology of behavior, cognitive biology), (ii) eco-evolutionary outcomes of behaviors (e.g., behavioral ecology), (iii) animal welfare, as well as course materials on how to investigate behaviors, design experiments, and analyze data from behavioral experiments or observations. Critical thinking and core competency skills that are learned in a science discipline are highly desired in many future careers, as well as graduate and professional study. Student interest in animal behavior is also high given the important role that behavior plays in navigating/mitigating/resilience to a rapidly changing world.

Financial Impact* New course in INPG require faculty FTE.

Impact on Other Units* Units with included courses have been contacted for approval. Email attached. Will update with responses as received.

Have you consulted with all programs/departments that will be impacted by this change?*
- (•) Yes
- ( ) No

College of Arts and Sciences - Interdisciplinary Programs - Digital Humanities Minor

2025-2026 UG Revise Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Digital Humanities Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The Digital Humanities (DH) minor offers students the opportunity to study from an interdisciplinary perspective and enhance their skills in humanities, liberal arts, and social sciences by incorporating digital technology. Students learn how to engage critically with digital media, and many courses introduce students to digital techniques for research, analysis, and publication. Courses enable students to create digital work, and some of them offer students the opportunity to plan and build digital projects independently and in project teams. The range of electives available for the digital humanities minor, combined with frequent special topics courses enables students to find thematic clusters that connect to their interests in literature, history, classics, graphic design, music, information sciences, text analysis, digital archives, and more. Graduates with a digital humanities minor are well prepared for a growing number of careers in industry, nonprofit, and educational sectors that welcome digital skills alongside the communication and critical thinking abilities that have long been valued in humanities students.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale* This was a minor revision of the DH minor to add a few related courses and clarify some of the requirements. The courses added to the minor are REST 310: Religion and Gameworlds, JAPA: 321 Japanese Popular Media, ENGL 370: Multimedia Storytelling, and the new DH 492: Digital Humanities Internship. The addition of the DH internship class is important, in particular, because the minor has four partnerships with institutions (UT Libraries, McClung Museum, Ewing Gallery, and Ramsey House) that would like to employ DH students as interns. This revision also reorganized some of the required credits to clarify that certain courses would only count in certain cases (for special and variable topics).

Removed AI 399 and AI 499 due to CECS ending courses. Added CECS 399 and CECS 499 as replacement Capstone Courses

Financial Impact* N/A

Impact on Other Units* I have added four courses to the program: REST 310: Religion and Gameworlds, JAPA: 321 Japanese Popular Media, ENGL 370: Multimedia Storytelling, and the new DH 492: Digital Humanities Internship. Emails from the heads of REST, JAPA (WLC), and ENGL are attached granting permission for DH to include these courses in the minor. DH 492 is a new course proposed by DH.

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Description

A Humanities Certificate is open to all enrolled Knoxville Campus Students of any major. This certificate will prepare students for the complex, diverse, and rapidly changing world that awaits them. Students completing the 12 credit hours of coursework required for the Humanities Certificate will have the opportunity to make a wealth of interdisciplinary connections as they choose courses from Africana Studies, Art History, Classics, English, History, Philosophy, Religious Studies, Theatre, and World Languages and Cultures. A wide range of courses taught by UTK's expert faculty in each of these disciplines (e.g., 200-level introductory courses, specialized upper-division courses, research-intensive seminars, community-engaged courses, off-campus study) can satisfy the requirements of the Humanities Certificate.

12 credit hours of 200-400-level coursework.

At least 9 of these hours must be in upper-division courses. 6 credit hours must be unique, i.e., outside of the student's major.

Courses for the certificate must be completed with a grade of "C" or better. Depending upon a student's undergraduate program of study, prerequisite courses may be needed in order to complete the requirements of this certificate.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Rationale*

This 12-credit Humanities Certificate is designed to expand the role of the humanities in the undergraduate degree for students enrolled on campus. The Humanities Certificate reflects the breadth of the disciplines that comprise the humanities at UTK. Students can choose from a wide range of courses across 9 departments. With a high number of Certificate-eligible courses that also satisfy Vol Core requirements, the Humanities Certificate will appeal to students across all majors. It will enrich interdisciplinary conversations in undergraduate education. It will teach students to ask questions about the world they live in, to read carefully and critically, to express themselves in well-reasoned and well-written language, and to think deeply about what it means to be human. The Humanities Certificate will therefore broaden the number and kinds of students who enroll in humanities courses at UTK.

Finally, the Humanities Certificate will be a mark of distinction that sets our non-humanities majors apart when they apply for internships, graduate programs, and jobs.

Financial Impact* None

Impact on Other Units* Africana Studies, School of Art, Classics, English, History, Philosophy, Religious Studies, Theatre, World Language and Culture (see attached for acknowledged acceptance)

Have you consulted with all programs/departments that will be impacted by this change?*

College of Arts and Sciences - Interdisciplinary Programs - Interdisciplinary Programs Major, BA - Animal Behavior Concentration

2025-2026 UG Add Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Interdisciplinary Programs Major, BA - Animal Behavior Concentration

Learning Outcomes

Student Learning Outcomes (SLOs) of Animal Behavior Major:

1. Students will demonstrate fundamental knowledge of animal behavior principles
2. Students will be able to describe the types of techniques animal behavioral biologists use to explore the natural world
3. Students will be able to apply the techniques animal behavioral biologists use to explore the natural world

Degree Type* Bachelor of Arts

Program Type* Concentration

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The B.A. in Animal Behavior offers an interdisciplinary foundation, including courses from the natural sciences, social sciences, and humanities to explore animal behavior from multiple perspectives. This degree prepares students for careers in research, wildlife conservation, veterinary medicine, animal training, and more. Through coursework and hands-on experiences, students investigate the causes and evolution of animal behavior, gaining insights into both biological and environmental influences. Opportunities for independent research, internships, and laboratory work prepare students to apply their skills in settings such as zoos, wildlife centers, and museums.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Requirements*

Rationale*

Animal Behavior degree programs are rapidly expanding at other universities. Our interdisciplinary concentration will draw from various departments, providing comprehensive training for diverse professions such as academic research in animal behavior, animal welfare, animal care giving, and wildlife conservation. There is a scarcity of animal behavior programs at research-intensive (R1) Universities (only 2 out of 12 national animal behavior majors are R1). This program has potential to attract new top-tier students to UTK and provide them with immersive research opportunities in the labs of leading experts in the field.

Financial Impact* Two new courses in the Interdisciplinary Program are proposed which will require restructuring of faculty FTE.

Impact on Other Units*

Units impacted (and faculty/staff contacted) are listed here:

Associate Dean of Curriculum College of Arts & Sciences - Liem Tran

Head of CAS Advising - Shanna Pendergrast

BIOL (Biology) - Randy Small (rsmall@utk.edu)

PSYC (Psychology) - Erin Hardin (erin.hardin@utk.edu), Bob DuBois (drbob@utk.edu)

ANTH (Anthropology) - Kandace Hollenbach (kdh@utk.edu), Joanne Devlin (jdevlin@utk.edu)

EEB (Ecology and Evolutionary Biology) - Jen Schweitzer (jschweit@utk.edu), Jim Fordyce (jfordyce@utk.edu)

CHEM (Chemistry) - Mike Best (mdbest@utk.edu)

COSC (Computer Science) - Jens Gregor (jgregor@utk.edu)

EEPS (Earth, Environmental & Planetary Sciences) - Alycia Stigall (stigall@utk.edu), Dan Hembree (hembree@utk.edu)

MATH (Mathematics) - Nik Brodskiy (nbrodski@utk.edu)

PHYS (Physics) - Christine Nattrass (cnattras@utk.edu)

STAT (Statistics) - Charlie Cwiek (ccwiek@utk.edu)

BCMB (Biochemistry and Cellular and Molecular Biology) - Barry Bruce (bbruce@utk.edu) and Mariano Labrador (labrador@utk.edu)

NEURO (Neuroscience) - Jim Hall (jhall1@utk.edu)

HIEU (History) - Denise Phillips (aphill13@utk.edu)

PHIL (Philosophy) - David Palmer (dpalmer6@utk.edu), Adam Cureton (acureto1@utk.edu)

REST (Religious Studies) - Helene Sinnreich (hsinnrei@utk.edu) and Megan Bryson (mbryson4@utk.edu)

ANSC (Animal Science) - Cheryl Kojima (ckojima@utk.edu)

FWF (Forestry, Wildlife, and Fisheries) - Lisa Muller (lmuller@tennessee.edu)

AUSP (Audiology and Speech Pathology) - Kristen Secora (ksecora@utk.edu)

College of Arts and Sciences - Interdisciplinary Programs - Interdisciplinary Programs Major, BA - Computational Social Science Concentration

2025-2026 UG Add Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Interdisciplinary Programs Major, BA - Computational Social Science Concentration

Learning Outcomes Students in the in Computational Social Sciences (CSS) B.A. will develop abilities to

- Use computational tools to analyze social science variables
- Understand steps of computational social science from data collection to interpretation
- Carry out statistical analyses on social science data and interpret the results.
- Understand statistical inference and Assess competing models
- Summarize and visualize data using an appropriate programming language.
- Apply CSS methods toward real-world problems
- Uphold and apply principles of data ethics
- Address real-world social science problems
- Communicate CSS-based assessments for diverse audiences.

Degree Type* Bachelor of Arts

Program Type* Concentration

Campus code* ☑ Knoxville Campus ☐ Distance Ed ☐ Nashville Campus ☐ UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description As an established element of the social sciences, computational social science comprises interdisciplinary skills for visualization and predictive modeling using social science data. This IDP major brings together approaches from different disciplines, including geography, sociology, psychology and neuroscience, public policy, information science, economics, and anthropology. Examples of applications range from mapping and revealing sociodemographic factors across society, analysis of population-scale public health factors, exploration of innovation in science and public opinion, or topic analysis in communication and social media. Using accessible coding langauges, the tools in the elective courses range from mapping and visualization to established statistics and regression analyses to machine learning.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

College of Arts and Sciences - Interdisciplinary Programs - Interdisciplinary Programs Major, BA - Human Behavior and Society Concentration

2025-2026 UG Add Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Interdisciplinary Programs Major, BA - Human Behavior and Society Concentration

Learning Outcomes

The Interdisciplinary Programs Major, BA - Human Behavior and Society Concentration prepares students to critically analyze and understand the intricate relationships between individual behavior, psychological processes, and societal influences. Through a combination of core psychology courses and interdisciplinary studies in gender, social inequalities, cultural contexts, and ethics, students gain a broad and integrated perspective on human behavior. Graduates will be equipped with the skills and knowledge necessary for careers in social services, public policy, healthcare, and education.

- **Understand the Foundations of Human Behavior:** Students will demonstrate an understanding of key psychological concepts, including human development, cognition, and social interaction, and how these factors influence individual and collective behaviors.
- **Analyze the Role of Social and Cultural Forces**: Students will critically analyze how societal structures, cultural norms, and social inequalities shape human behavior and interactions.
- **Evaluate Psychological and Societal Issues**: Students will apply interdisciplinary perspectives to evaluate psychological disorders, health behaviors, and the ethical implications of societal trends on human behavior.
- **Apply Interdisciplinary Approaches to Problem-Solving**: Students will synthesize knowledge from psychology, social sciences, and humanities to address complex human behavior issues through interdisciplinary frameworks.
- **Develop Critical Thinking and Communication Skills**: Students will demonstrate strong critical thinking and communication skills by articulating the connections between individual behavior and societal challenges, both in written and oral forms.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The Human Behavior and Society concentration within the Bachelor of Arts in Interdisciplinary Programs provides students a comprehensive exploration of the psychological, social, and cultural factors that shape human behavior. Designed for students interested in the intersection of psychology and social sciences, this concentration provides a well-rounded understanding of how societal forces like culture, politics, and social structures influence individual and collective actions.

Students will gain foundational knowledge in psychology, including human development, cognition, mental health, and social interaction, while interdisciplinary courses broaden their perspective through the study of gender, culture, and ethics. This program prepares graduates with the analytical skills and insights needed for careers in social services, public policy, healthcare, and education, equipping them to address complex societal challenges related to human behavior.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Requirements*

Rationale*

In today's increasingly interconnected and complex world, the ability to understand human behavior through a multifaceted lens is critical. The **Human Behavior and Society** concentration addresses a growing need for professionals equipped to analyze how psychological, social, and cultural factors shape individual and collective behavior. As issues like mental health, social justice, and cultural diversity become more prominent in public discourse and policymaking, the demand for individuals who can navigate these challenges with empathy, critical thinking, and interdisciplinary knowledge is rising.

Traditional academic programs often focus on psychology or social sciences in isolation. However, the Human Behavior and Society concentration is unique in its interdisciplinary approach, offering students the opportunity to study the intersections of psychology, sociology, gender studies, political science, and ethics. This integrated understanding allows graduates to better grasp the complex factors influencing human actions and societal change.

The need for professionals with this expertise extends across various sectors, including social services, public health, education, government, and nonprofit organizations. As organizations and institutions increasingly prioritize mental health, diversity, and inclusion, individuals with a holistic understanding of human behavior are well-positioned to fill roles that address these critical needs. Furthermore, the program's focus on real-world applications equips graduates with the analytical and problem-solving skills needed to contribute meaningfully in their chosen careers.

By combining theoretical knowledge with practical insights, the Human Behavior and Society concentration not only fills a current gap in higher education but also ensures students are prepared to meet the demands of a rapidly evolving job market, where understanding human behavior is essential to driving positive societal change.

Financial Impact*

The proposed **Human Behavior and Society** concentration will have minimal financial impact on the College of Arts & Sciences and units across the University of Tennessee, Knoxville (UTK). The curriculum for this concentration is built on existing courses that are already being offered asynchronously online. As such, no new courses or faculty resources are required to support the program's implementation.

Because these courses have been integrated into UTK's online offerings, the program can efficiently leverage existing instructional infrastructure without imposing additional financial burdens on departments within or outside the College of Arts & Sciences.

Moreover, the launch of this concentration is expected to have a **positive financial impact**. By expanding course options for distance learning students, the program has the potential to increase enrollment and attract a broader student base. This would generate additional revenue for the university without necessitating further investments in course development or faculty hiring. In essence, the program opens up more choices for students seeking flexible, online educational pathways, particularly those who are balancing work or other commitments.

Therefore, the **Human Behavior and Society** concentration aligns with the university's strategic goals of expanding access to education through distance learning while maintaining fiscal sustainability.

Impact on Other Units*

No impact on other units.

2025-2026 UG Add Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Interdisciplinary Programs Major, BA - Human Behavior and Society Concentration (uTrack Requirements)

Learning Outcomes

The Interdisciplinary Programs Major, BA - Human Behavior and Society Concentration prepares students to critically analyze and understand the intricate relationships between individual behavior, psychological processes, and societal influences. Through a combination of core psychology courses and interdisciplinary studies in gender, social inequalities, cultural contexts, and ethics, students gain a broad and integrated perspective on human behavior. Graduates will be equipped with the skills and knowledge necessary for careers in social services, public policy, healthcare, and education.

- **Understand the Foundations of Human Behavior:** Students will demonstrate an understanding of key psychological concepts, including human development, cognition, and social interaction, and how these factors influence individual and collective behaviors.
- **Analyze the Role of Social and Cultural Forces**: Students will critically analyze how societal structures, cultural norms, and social inequalities shape human behavior and interactions.
- **Evaluate Psychological and Societal Issues**: Students will apply interdisciplinary perspectives to evaluate psychological disorders, health behaviors, and the ethical implications of societal trends on human behavior.
- **Apply Interdisciplinary Approaches to Problem-Solving**: Students will synthesize knowledge from psychology, social sciences, and humanities to address complex human behavior issues through interdisciplinary frameworks.

College of Arts and Sciences - Interdisciplinary Programs - Interdisciplinary Programs Major, BA - Integrated Studies of Arts and Sciences

2025-2026 UG Add Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Interdisciplinary Programs Major, BA - Integrated Studies of Arts and Sciences

Learning Outcomes

The Integrated Studies of Arts and Sciences (ISAS) Concentration is driven by the goal of offering students a flexible and interdisciplinary education. This approach prepares them for various career paths, equipping them with essential skills for an ever-evolving job market. The program seeks to cultivate critical thinking, effective communication, and adaptability, creating well-rounded individuals poised to meet the challenges of the 21st century.

The learning outcomes of the program include:

1. Interdisciplinary Exploration: Students will engage in interdisciplinary exploration by combining three minors, allowing them to customize their education and pursue their interests in a unique and personal manner.
2. Critical Thinking and Analytical Skills: Graduates will develop critical perspectives and analytical skills through the study of pathbreaking ideas and research methods across various academic disciplines and scholarly traditions, enhancing their ability to critically evaluate information and solve complex problems.
3. Communication Proficiency: Students will cultivate effective reading, reasoning, and communication skills, enabling them to articulate ideas clearly and persuasively across different contexts and audiences.
4. Lifelong Learning and Adaptability: Graduates will be prepared for lifelong learning and adaptability, equipped with the skills and knowledge to thrive in a broad range of career contexts and to pursue continuous personal and professional development.
5. Appreciation of Liberal Arts Tradition: Students will gain an appreciation for the liberal arts tradition, understanding its historical significance and its role in fostering intellectual curiosity, creativity, and self-governance in modern and diverse societies.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The Integrated Studies of Arts & Sciences concentration is designed to provide students with a comprehensive educational experience. It allows them to explore diverse disciplines, tailor their studies to individual interests, and align their education with future career goals. Encompassing arts and humanities, social sciences, and natural sciences, the program prepares students for contemporary professions, which are often interdisciplinary in nature. This concentration aims to maximize, enhance, and accentuate the significance of Minor programs within the college.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Rationale*

UTK has a longstanding commitment to providing students with a comprehensive education that nurtures critical thinking, creativity, and a holistic understanding of the world. The proposed concentration aims to expand and enrich our current curriculum by integrating a diverse range of courses spanning humanities, social sciences, and natural sciences.

The establishment of the Integrated Studies of Arts and Sciences Concentration is driven by the goal of offering students a flexible and interdisciplinary education. This approach prepares them for various career paths, equipping them with essential skills for an ever-evolving job market. The program seeks to cultivate critical thinking, effective communication, and adaptability, creating well-rounded individuals poised to meet the challenges of the 21st century.

Financial Impact*

The BAIP-ISAS is expected to have minimal financial impact on the College of Arts and Sciences at UTK. By utilizing existing minors, the program avoids the need for additional resources. Additionally, the introduction of three new courses will be managed within the college's existing budget through the hiring of a Non-Tenure Track Faculty member to oversee instruction and program administration. This ensures fiscal responsibility while effectively delivering the proposed program.

Impact on Other Units*

The BAIP-ISAS is not expected to have significant impacts on colleges or departments outside of the College of Arts and Sciences. Since the concentration primarily relies on minors offered within CAS, there will be minimal demand for resources or changes from other units. CAS Department Heads (DHs) have discussed the proposed concentration at a DH meeting in Spring 2024 and all units were on board.

In cases where students wish to pursue a minor outside of CAS, they will be required to seek approval from the respective unit(s). This process ensures that any potential impacts on other colleges or departments are managed appropriately, maintaining the integrity of existing programs while allowing students to pursue interdisciplinary studies that align with their academic and career goals.

College of Arts and Sciences - Interdisciplinary Programs - Interdisciplinary Programs Major, BA - Latin American and Caribbean Studies Concentration - Brazilian Studies Track

2025-2026 UG End Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Interdisciplinary Programs Major, BA - Latin American and Caribbean Studies Concentration - Brazilian Studies Track

Instructions:

This form is intended to end (drop) the following programs: Major, Minor, Certificate, or Concentration.

Degree Type* Bachelor of Arts

Program Type* Concentration

Description

Kristen Block, History, Chair

The Latin American and Caribbean Studies program offers students a broad sampling of courses from numerous academic disciplines, which enables comprehensive and integrated study of Latin American and Caribbean histories, cultures, politics and languages. Within the program, the Brazilian studies concentration enables students to focus their intellectual inquiry on this increasingly influential country, placing the Brazilian experience in regional perspective. The major is sponsored by the joint efforts of professors from such departments as Anthropology, Geography, History, Modern Foreign Languages and Literatures, Political Science, Religious Studies, and Sociology.

- ( ) New major name and new CIP code (requires THEC approval)
- (•) New major name and keeping the same CIP code

For new majors: have you or will you be submitting THEC paperwork?
- (•) Yes
- ( ) No

CIP Code (if available)

Rationale* The change in name and description of the major reflect major changes that we are making for the Latin America and Caribbean Studies program in general. We want to bring more structure to the program to attract the interest of more students and grow the program.

This concentration description change seeks to attrack students interested in working in arts management, literary criticism, international relations, public policy and more after graduation. It is an ideal complement to majors in fields such as international studies, political science, history, or social sciences, offering a rich, interdisciplinary approach to understanding one of the world's most dynamic regions.

We also added two new courses to the program.

Financial Impact* None

Impact on Other Units* No impact is expected to other units. We have emailed the Departments whose classes we include in the concentration and are awaiting response.

- [ ] UTSI

Description Arts, Culture, Society, and Politics of Latin America and the Caribbean offers students a broadly interdisciplinary exploration of the region which also includes Latinx communities in the US. This concentration is designed for those students interested in a more traditional liberal arts education that is based in the study of the arts, culture, political systems and societal issues of the region, and the ways in which they are intricately interconnected and constantly changing and intermingling with other areas and influences. The historical origins of Latin America and the Caribbean are based on conquest, colonialism, migration, racial and ethnic diversity, and inequalities. Students will learn about these origins and how, from which distinct and dynamic cultures, political regimes, societies, and artistic forms of productions have developed to represent a shared as well as diverse regional landscape. Similarly, the US, Latin America, and the Caribbean are intricately connected through a shared history, political interventions, and economic goals. Combining courses from departments such as Anthropology, Geography, History, World Languages and Cultures, Political Science, Africana Studies, Religious Studies, Sociology, Cinema Studies, Africana Studies, as well as School of Art and School of Music, students will be able to develop a nuanced and comprehensive understanding of the historical legacies and contemporary dynamics of the region and its connections to the US, Europe, and other countries and areas. Because of the intentionally broad character of this major, students should develop their own program that focuses on a particular language and/or country in the region. This may also include an area of study or approach.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description Challenges and Solutions of Climate and the Environment in Latin America and the Caribbean provides a natural science-oriented interdisciplinary exploration of one of the most ecologically diverse regions in the world. This concentration invites students to delve into the environmental and climatological dynamics of the region while examining the links between these issues and the political and societal conflicts that arise. Through an integrative approach, students will engage with courses from departments such as Anthropology, Geography, History, World Languages and Cultures, Political Science, Ecology and Evolutionary Biology, and Sociology. This diverse curriculum will enable students to cultivate a nuanced and comprehensive understanding of the environmental and climatological challenges facing the region and the potential solutions to address them.

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Rationale* This new concentration is ideal for students looking to comprehend their major with a focus on Latin America and the Caribbean. This track provides the skills and knowledge needed for careers in international relations, cultural exchange, public policy, and more. It is particularly suited for those interested in areas such as social justice, global development, or diplomatic service, offering a unique perspective on the region's impact on global affairs. It is an ideal complement to majors in fields such as international studies, political science, history, or social sciences, offering a rich, interdisciplinary approach to understanding one of the world's most dynamic regions.

We are introducing this new major with the goal to attract more students to our program. Students have also expressed an interest in the past of having a more environmetally focused concentration within our program.

Financial Impact* None

Impact on Other Units* None is expcted. We have contacted the Departments whose classes we included in the major and are awaiting responses.

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

CIP Code (if available)

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Yen-Chen Hao, Linguistics Program, Chair

This concentration offers a broad exposure to the various fields of linguistics (including historical, descriptive, theoretical, and applied linguistics) along with an opportunity to study areas where linguistics overlaps with other disciplines such as psycholinguistics, sociolinguistics, and speech pathology. The program of study is designed to prepare a student for graduate work in linguistics or related areas or to serve as a general survey of language and linguistics. The program of study provides the additional possibility of emphasizing the teaching of English as a Second Language for the student interested in language-related employment at the Bachelor of Arts level.

Students should consult program advisors early in planning a linguistics major or minor. LING 200 is highly recommended and 300-level courses should, if possible, be completed before 400-level courses are begun.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Anne-Hélène Miller, Riggsby Director of the Marco Institute

The Interdisciplinary Program in Medieval and Renaissance Studies offers students the opportunity to explore cultures and societies of western Europe, the Mediterranean, and the Middle East, from the collapse of the Roman Empire through the 17th century. The curriculum covers topics associated with these early periods and methodological approaches to them from the humanities, social sciences, languages, and arts. The concentration emphasizes the study of distinct and temporally remote cultures, including their material conditions, social and political institutions, values and ideals, and modes of perception and expression. It encourages students to encounter the past as "another country" and thus to understand in new ways the historical conditions that have shaped our increasingly interconnected contemporary world.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

College of Arts and Sciences - Interdisciplinary Programs - Interdisciplinary Programs Major, BA - Sustainable Systems and Societal Development Concentration

2025-2026 UG Add Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Interdisciplinary Programs Major, BA - Sustainable Systems and Societal Development Concentration

Learning Outcomes

The Sustainable Systems and Societal Development concentration is designed to prepare students for a dynamic and evolving landscape of sustainability challenges. By emphasizing an interdisciplinary approach, this program equips students with the necessary skills and knowledge to understand the intricate relationships between ecological systems, social justice, and public policy. The following learning outcomes outline the key competencies that graduates will possess upon completion of the program, enabling them to become effective advocates and leaders in the pursuit of sustainable solutions.

1. **Interdisciplinary Understanding**: Graduates will demonstrate a comprehensive understanding of sustainability concepts by integrating ecological, geographical, sociological, and political perspectives to analyze complex environmental and societal challenges. This interdisciplinary approach will enable them to see the interconnectedness of systems and the multifaceted nature of sustainability issues.
2. **Critical Analysis**: Graduates will employ critical thinking and analytical skills to evaluate the impacts of human activities on ecological systems, assessing both local and global sustainability issues. They will be equipped to conduct thorough analyses of environmental problems, considering factors such as economic viability, social equity, and ecological integrity.
3. **Policy and Governance Insight**: Graduates will understand the role of public policy, governance structures, and social justice frameworks in shaping sustainable practices. They will evaluate the effectiveness of various policies and strategies in promoting environmental justice and equitable resource distribution, preparing them for careers in environmental policy and advocacy.
4. **Practical Application**: Graduates will apply theoretical knowledge to real-world scenarios through projects, case studies, and community engagement. They will develop practical solutions to enhance sustainable practices in diverse contexts, demonstrating their ability to translate academic learning into impactful action.
5. **Ethical and Social Responsibility**: Graduates will cultivate a sense of ethical responsibility and social awareness regarding environmental issues. They will foster a commitment to advocating for sustainability and social equity in professional and community settings, preparing them to be responsible leaders and advocates for change in an increasingly complex world.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The **Sustainable Systems and Societal Development** concentration within the Bachelor of Arts in Interdisciplinary Programs (BAIP) empowers students to address critical sustainability challenges and their impacts on society. This interdisciplinary approach integrates ecological, geographical, sociological, and political perspectives, providing a comprehensive framework for understanding the complex relationships between environmental systems and human societies. Students will explore key concepts in sustainability, environmental justice, and social equity, preparing them to tackle pressing global issues. Through a diverse curriculum that includes core courses in ecology and environment, interdisciplinary studies in globalization and policy, and advanced topics in sustainability, students will develop essential skills for careers in environmental policy, conservation, international development, and social justice advocacy.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

Requirements*

Rationale*

The establishment of the Sustainable Systems and Societal Development concentration responds to an urgent and growing demand for professionals equipped to tackle the multifaceted challenges of sustainability in our increasingly interconnected world. As climate change, environmental degradation, and social inequalities become more pressing issues, there is a critical need for a new generation of leaders who can integrate knowledge from various disciplines to develop holistic solutions. This program will provide students with a robust foundation in ecological systems, public policy, and social justice, ensuring they are well-prepared to address the complexities of sustainability.

Furthermore, the program aligns with global initiatives and frameworks, such as the United Nations Sustainable Development Goals (SDGs), which emphasize the necessity of interdisciplinary approaches to achieve social, economic, and environmental sustainability. By equipping students with the skills to analyze and address the intricate relationships between human activities and environmental outcomes, the concentration prepares graduates for meaningful careers in fields such as environmental policy, conservation, urban planning, and international development. This program will not only benefit students but also contribute to the broader community by fostering innovative solutions that promote sustainable practices and equitable development. Ultimately, the Sustainable Systems and Societal Development concentration is a timely response to the critical challenges of our age, positioning graduates to make impactful contributions in their chosen fields.

Financial Impact*

The proposed Sustainable Systems and Societal Development concentration is designed to have a minimal financial impact on the College of Arts & Sciences and the broader University of Tennessee, Knoxville (UTK). The curriculum leverages existing courses and resources, including those already offered asynchronously online. This strategic approach means that no new courses or faculty resources are necessary for the program's implementation, allowing for a seamless integration into the current academic framework.

In addition to maintaining cost efficiency, the launch of this concentration is anticipated to yield a positive financial impact. By broadening the range of course offerings for distance learning students, the program aims to attract a diverse student population and increase overall enrollment. This growth has the potential to generate additional revenue for the university without requiring significant investments in new course development or faculty hiring. Ultimately, the Sustainable Systems and Societal Development concentration not only enhances educational opportunities for students seeking flexible learning paths but also aligns with UTK's strategic objectives of expanding access to education while ensuring fiscal responsibility.

Impact on Other Units* No impact on other units.

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Rationale*

The establishment of the Sustainable Systems and Societal Development concentration responds to an urgent and growing demand for professionals equipped to tackle the multifaceted challenges of sustainability in our increasingly interconnected world. As climate change, environmental degradation, and social inequalities become more pressing issues, there is a critical need for a new generation of leaders who can integrate knowledge from various disciplines to develop holistic solutions. This program will provide students with a robust foundation in ecological systems, public policy, and social justice, ensuring they are well-prepared to address the complexities of sustainability.

Furthermore, the program aligns with global initiatives and frameworks, such as the United Nations Sustainable Development Goals (SDGs), which emphasize the necessity of interdisciplinary approaches to achieve social, economic, and environmental sustainability. By equipping students with the skills to analyze and address the intricate relationships between human activities and environmental outcomes, the concentration prepares graduates for meaningful careers in fields such as environmental policy, conservation, urban planning, and international development. This program will not only benefit students but also contribute to the broader community by fostering innovative solutions that promote sustainable practices and equitable development. Ultimately, the Sustainable Systems and Societal Development concentration is a timely response to the critical challenges of our age, positioning graduates to make impactful contributions in their chosen fields.

Financial Impact*

The proposed Sustainable Systems and Societal Development concentration is designed to have a minimal financial impact on the College of Arts & Sciences and the broader University of Tennessee, Knoxville (UTK). The curriculum leverages existing courses and resources, including those already offered asynchronously online. This strategic approach means that no new courses or faculty resources are necessary for the program's implementation, allowing for a seamless integration into the current academic framework.

In addition to maintaining cost efficiency, the launch of this concentration is anticipated to yield a positive financial impact. By broadening the range of course offerings for distance learning students, the program aims to attract a diverse student population and increase overall enrollment. This growth has the potential to generate additional revenue for the university without requiring significant investments in new course development or faculty hiring. Ultimately, the Sustainable Systems and Societal Development concentration not only enhances educational opportunities for students seeking flexible learning paths but also aligns with UTK's strategic objectives of expanding access to education while ensuring fiscal responsibility.

Impact on Other Units* No impact on other units.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The interdisciplinary BA in Visual and Interactive Storytelling Program (VIS) is designed to prepare students for careers in emerging forms of storytelling that employ visual, narrative, and performative elements. Core classes will provide students with a broad introduction to traditional and new concepts, art and literary history, various modes of storytelling, visual and audio art practices, and emerging technologies. Students elect experiential and project-based learning through studio and laboratory experiences to specialize in animation, filmmaking, theatre, interactive media, virtual reality, sound design, data visualization, and artificial intelligence, supported by a strong historical and narrative grounding in great storytelling as a fundamental human activity.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Rationale* The Departments of Art, English, and Theatre propose the creation of a BA in Visual and Interactive Storytelling (VIS) concentration within the existing Interdisciplinary Programs Major BA degree. This interdisciplinary program will build collaboratively on the visual, narrative, and performance expertise of the three core departments to prepare students for careers in content creation utilizing emerging forms of storytelling.

VIS is designed to meet the expanding role of the arts in the creative economy. The program aligns strategic University initiatives at multiple levels:

- UTK's mission to advance the prosperity, well-being, and vitality of communities across Tennessee and around the world through our research, teaching, service, and engagement.
- The College of Arts and Sciences' mission to empower individuals with broad knowledge, transferable skills, and a strong sense of values, ethics, and civic engagement.
- The College's Envisioning and Narrating Emerging Futures (ENEF) strategic focus, intended, in part, to promote trustworthy narratives that explain environmental, social, and technological change and that inoculate societies against extremism and demagoguery.

VIS will combine existing courses, internships, performance opportunities, and studio resources to help students collaborate across multiple disciplines and to create and present new forms of digital and interactive media. This engaged, internship-rich program of study will prepare them to excel in a competitive media landscape.

The proposed program is also designed to meet student demand. Each of three core programs has MFA degrees and vibrant undergraduate populations interested in the rapidly expanding fields of animation, graphic novels, multimedia, digital and videoart, gaming, augmented and virtual reality, emerging media, immersive theatre, and digital storytelling. The School of Art's Cinema Studies / Time Based Arts programs; English's Creative Writing concentration; and Theatre's BA are all growing and thriving. The VIS initiative will build on these successes by fusing the principles of great narrative design with emerging media technologies to explore the frontiers of media art and storytelling.

Financial Impact* None. All the courses in the proposed concentration are currently offered regularly as part of Art, English, and Theatre faculty teaching schedules.

Impact on Other Units* NA

- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Nora Berenstain, Department of Philosophy, Chair

Women, Gender, and Sexuality is a major dedicated to the study of how gender and sexuality shape the past, present, and future of human cultures and societies. Our interdisciplinary curriculum trains students in critical studies of the ways gender and sexuality intersect with race, ethnicity, nationality, dis/ability, and other dimensions of social inequality. Our courses provide students with a wide variety of methodological skills and perspectives with which to conduct their own research, creative activity, and activism.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*

This proposal adds the following relevant courses to count for our major in Women, Gender, and Sexuality:

WGS 201: Intro to LGBTQ+ Studies: This course is currently required for our LGBTQ+ Studies minor and deals with feminist and queer methodologies relevant to the study of women, gender, and sexuality.

This proposal also removes the following course because it is no longer offered at UT:

WGS 326: Gay American History

Added to "Select Four section" after Sub-Committee voting due to prior blanket petition in 2022 and was not previously added by originator - WGS 354, WGS 425, and WGS 444.

Financial Impact* N/A

College of Arts and Sciences - Interdisciplinary Programs - Interdisciplinary Programs Major, BA - Women, Gender, and Sexuality Concentration - Women's Health Track

2025-2026 UG Add Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Interdisciplinary Programs Major, BA - Women, Gender, and Sexuality Concentration - Women's Health Track

Learning Outcomes

1. Students can identify and articulate key methods in women, gender, and sexuality studies, focusing on intersectionality and how gender and sexuality intersect with race, ethnicity, nationality, dis/ability, and other dimensions of difference.

2. Students will be knowledgeable about feminist theory on medicine and health, focusing on enforced and regulated categories of difference that shape and affect medical standards and procedures, health outcomes, and political systems of healthcare.

3. Students will be adept at applying WGS methodological skills and perspectives to conduct their own current and future research and creative activity in medicine, public health, reproductive justice, and related fields.

Requirements*

Rationale* This proposal for the IDP-WGS leverages existing courses to create a new major concentration program in "Women's Health." Current students are increasingly interested in health as a topic of study, and this new concentration allows us to attract students interested in the interdisciplinary study of this topic at UTK and prepare them for diverse career pathways in medicine and healthcare.

Financial Impact* N/A

Impact on Other Units* The majority of courses listed as requirements and electives for this major concentration are already listed in the curriculum schema for our existing WGS minor. We have obtained permission from all non-WGS departments and IDPs to continue listing their courses for the Women's Health major concentration. Emailed proof of correspondence and approval is attached to this proposal. All other courses in this list are owned by WGS or are current cross-listings with WGS.

College of Arts and Sciences - Interdisciplinary Programs - Justice Studies Certificate

2025-2026 UG Revise Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Justice Studies Certificate

Degree Type* Undergraduate Certificate

Program Type* Undergraduate Certificate

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The Undergraduate Certificate in Justice Studies (JUST) offers undergraduate students the opportunity to train in complex and collaborative sociolegal problem solving to address the diverse issues faced by marginalized rural and urban Appalachian communities, as articulated by those communities themselves. The certificate is offered through the newly established Justice Studies interdisciplinary program, home to the Appalachian Justice Research Center's undergraduate curriculum. Working with interdisciplinary UTK faculty and community members, undergraduate students will train in capstone, intern, and/or community lab courses, alongside law, graduate, and clinical students. Students will select their courses from a menu of curated courses from across campus, in consultation with the program director/advisor. In addition to the core JUST curriculum, students are required to choose courses from 1) a foundational set of sociolegal and justice studies courses and 2) a robust set of transdisciplinary methods and skill sets needed for an emergent and transforming justice workforce. Completion of the certificate requires an online exit survey for program assessment purposes.

Applicants to the JUST undergraduate certificate program must submit a letter of application and record of coursework to the director(s) of the Appalachian Justice Research Center, including any relevant courses and community experience. Students should tailor their letter to their major's skill sets, their justice interests, and their community background. The JUST certificate is intended as additional study for undergraduate students who are concurrently enrolled in another discipline at the University of Tennessee.

The JUST Undergraduate Certificate consists of a minimum of 12 hours, completed at the upper division level (300 or above), in interdisciplinary coursework outlined as follows. A maximum of 6 credits can overlap between the JUST certificate and the student's home discipline, as approved by the program director. Courses for the certificate must be completed with a grade of "C" or better. Depending upon a student's undergraduate program of study, prerequisite courses may be needed in order to complete the requirements of this certificate.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The undergraduate minor in Justice Studies (JUST) offers students the opportunity to integrate social sciences, humanities, and law in the empirical and theoretical study of legal, political, and economic systems of justice. The Justice Studies curriculum is designed to equip students with a comprehensive but contextualized understanding of justice and injustice from diverse perspectives, including the importance of race, class, gender, sexuality, ecology, and indigeneity in struggles over the meaning and delivery of justice and injustice. This entails a consideration of how precarious populations in local and global contexts often articulate claims to justice that challenge a status quo. To study the politics of justice is to study the sociopolitical forces, structures of power, cultural rhetorics, and historical roots of conflict, harm, and inequality while contextualizing the role of social movements, grassroots organizing, and legal tactics in local to global struggles for a more just world.

The JUST Minor is intended as an additional study for undergraduate students who are concurrently enrolled in a degree program at the University of Tennessee. Students will select their courses from a menu of curated courses from a variety of different departments and programs. Degree programs that might pair well with the JUST Minor are Africana Studies, Anthropology, English, Geography and Sustainability, Global Studies, History, Philosophy, Political Science, Psychology, Religious Studies, Sociology (and Criminology), Women, Gender, and Sexuality Program, and many more. Applicants to the JUST undergraduate minor must submit a letter of application and record of coursework to the Program Chair of Justice Studies.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Rationale*

This proposed Minor in Justice Studies is the key piece of the newly established Justice Studies IDP, housed in CAS's new Consortium on Social and Cultural Inquiry (CoSCI). Currently, the Justice Studies IDP has a undergraduate Certificate, and the goal is once/if this Minor gets approved then the Certificate program will be terminated. That is to say that the JUST Minor will function as the foundation of the Justice Studies IDP, and therefore vital to the success of the new JUST IDP.

Financial Impact*

None. There is no significant impact given all the courses for inclusion in the JUST Minor are already existing courses, and the department heads of the departments involved have given permission (see attached).

Impact on Other Units*

Africana Studies, Anthropology, English, Geography and Sustainability, Justice Studies IDP, History, Philosophy, Political Science, Psychology, Religious Studies, Sociology, Women, Gender, and Sexuality Program.

Please see attached PDF of email permissions from respective Department Heads

College of Arts and Sciences - Interdisciplinary Programs - Latin American, Caribbean, and Latinx Studies Minor

2025-2026 UG Change Program Name / Department

General Catalog Information

Important Note:

This Change Program Name / Department form is to be used for changing the name of a program (major, concentration, minor, or certificate) and/or changing the department where the program is offered. Other regular revisions to program requirements can be included in this form.

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Latin American, Caribbean, and Latinx Studies Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

Description

The minor consists of **18 hours** (above 200-level) taken from courses offered by at least three different academic departments, selected from the courses listed in either Interdisciplinary Programs Major, BA - Latin American, Caribbean, and Latinx Studies Concentration - Arts, Culture, Society, and Politics of Latin America and the Caribbean Track and/or Interdisciplinary Programs Major, BA - Latin American, Caribbean and Latinx Studies Concentration - Challenges and Solutions of Climate and the Environment in Latin America and the Caribbean Track. Students pursuing a minor in Latin American, Caribbean, and Latinx Studies are expected to satisfy the College-level foreign language requirement with one of the languages from the region: French, Portuguese, or Spanish.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

For new majors: indicate the type of change
- ( ) New major name and new CIP code (requires THEC approval)
- (•) New major name and keeping the same CIP code

For new majors: have you or will you be submitting THEC paperwork?
- ( ) Yes
- (•) No

CIP Code (if available)

Rationale*

The changes to the name and description of this minor reflect the overarching changes we are making to the Latin American, Caribbean, and Latinx Studies Independent Program (formerly Latin American and Caribbean Studies). These changes are made in an attempt to grow student enrollment in our program.

The changes include that students can take classes from our revised **Arts, Culture, Society, and Politics of Latin America and the Caribbean Concentration Track** (Formerly General Studies Track) and our new **Challenges and Solutions of Climate and the Environment in Latin America and the Caribbean Concentration Track.**

Financial Impact* None.

Impact on Other Units* None

College of Arts and Sciences - Interdisciplinary Programs - Pre-Health Professions Minor

2025-2026 UG Revise Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Pre-Health Professions Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

This **24-credit hour** minor includes the prerequisites for each of our pre-health profession tracks. Students should seek advice from a pre-health advisor in Arts & Sciences Advising Services as to which specific courses they should take for their chosen profession.

It is also advised that students interested in this minor consult with a Pre-Health Advisor in the College of Arts and Science to determine if the minor is suitable for their major and goals. Due to course overlap, this minor may not be suitable for students in STEM majors, including Biology, Neuroscience, Nutrition, Food Science, and Kinesiology.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*

The Pre-Health professions minor was created to help students who are interested in going in a variety of health profession fields, all of which have different pre-requisites. In the last few years since the minor was created, we've noticed that students aren't always able to complete the prerequisites they need for their health professions based on there not currently being a rule regarding the overlap between their major and minor. This is due to how DARS pulls courses and once a requirement has been fulfilled (i.e., a student takes NUTR 100 for their major, it automatically pulls into the minor) we cannot remove that course from the DARS requirement if a student actually wanted to take another course.

Added paragraph about consulting a CAS Advisor prior applying for minor to ensure requirements were being met. Also moved statement requiring 9 credit hours outside of major down to the Major requirements description, rather in description for minor as a whole.

Financial Impact* None

Impact on Other Units* None - no course changes were made. Just changed text location about 9 credit hours outside of major being required to Major Requirements section and text in Program Description about consulting CAS Advisor to determine if minor is suitable for students.

Have you consulted with all programs/departments that will be impacted by this change?* ( ) Yes (•) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description Students will explore how science and technology relate to real-world societal challenges. Students will critically assess the impacts of science and technology on health and well-being in different segments of society, and understand the applications of science and technology in societal context.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale* A number of courses from History, Geography, Philosophy, and Information Sciences have been added. They are topics that are directly relevant to the program (dealing with the history of science and medicine; climate change; digital worlds; national parks and policy; ethics and technology; the internet's impact on society) and would enhance the course offerings available to the students. While not directly being taught through the lens of STHS, these are the kind of interdisciplinary topics that make this programs's rationale - students are expected to take both humanities AND social and other science topics. It widens the availability of coruses for students and will make the minor more likely to be taken up, especially with the addition of extra classes in Cluster A (Social Sciences).

The removal of Children's Literature (offered by English) is as the topic is not as relevant to the idea of the program as the other offerings.

Financial Impact* None that I am aware of as these are courses already offered by the various departments.

Impact on Other Units* None as again these are courses already offered by other departments and the aim of this revision is just to widen the catalogue of the STHS program, and thus encourage students to recognize that the minor is made up of multiple courses they may already be planning to take across the various departments. The aim of the whole revision is to encourage the uptake of the minor, and no new courses have been created in this revision: simply the catalogue is being updated.

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

College of Arts and Sciences - Interdisciplinary Programs - Women's Health Minor

2025-2026 UG Add Program

General Catalog Information

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Women's Health Minor

Learning Outcomes

1. Students can identify and articulate key methods in women, gender, and sexuality studies, focusing on intersectionality and how gender and sexuality intersect with race, ethnicity, nationality, dis/ability, and other dimensions of difference.

2. Students will be knowledgeable about feminist theory on medicine and health, focusing on enforced and regulated categories of difference that shape and affect medical standards and procedures, health outcomes, and political systems of healthcare.

3. Students will be adept at applying WGS methodological skills and perspectives to conduct their own current and future research and creative activity in medicine, public health, reproductive justice, and related fields.

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Nora Berenstain, Department of Philosophy, Chair

Women, Gender, and Sexuality is a major dedicated to the study of how gender and sexuality shape the past, present, and future of human cultures and societies. Our interdisciplinary curriculum trains students in critical studies of the ways gender and sexuality intersect with race, ethnicity, nationality, dis/ability, and other dimensions of social inequality. Our courses provide students with a wide variety of methodological skills and perspectives with which to conduct their own research, creative activity, and activism.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Rationale* This proposal for the IDP-WGS leverages existing courses to create a new minor program in "Women's Health." Current students are increasingly interested in health as a topic of study, and this new minor allows us to attract students interested in the interdisciplinary study of this topic at UTK and prepare them for diverse career pathways in medicine and healthcare.

Financial Impact* N/A

Impact on Other Units* The majority of courses listed as requirements and electives for this minor are already listed in the curriculum schema for our existing WGS programs. We have obtained permission from all non-WGS departments and IDPs to continue listing their courses for the Women's Health minor. Emailed proof of correspondence and approval is attached to this proposal. All other courses in this list are owned by WGS or are current cross-listings with WGS.

Have you consulted with all programs/departments that will be impacted by this change?*
- (•) Yes
- ( ) No

College of Arts and Sciences - Interdisciplinary Programs - Women, Gender, and Sexuality LGBTQ+ Studies Minor

2025-2026 UG Change Program Name / Department

General Catalog Information

Important Note:

This Change Program Name / Department form is to be used for changing the name of a program (major, concentration, minor, or certificate) and/or changing the department where the program is offered. Other regular revisions to program requirements can be included in this form.

College* College of Arts and Sciences

Department* Interdisciplinary Programs

Program Name* Women, Gender, and Sexuality LGBTQ+ Studies Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

For new majors: indicate the type of change
- ( ) New major name and new CIP code (requires THEC approval)
- ( ) New major name and keeping the same CIP code

For new majors: have you or will you be submitting THEC paperwork?
- ( ) Yes
- ( ) No

CIP Code (if available)

Rationale* This proposal is correcting a typo in the minor program name. It previously read "LBGTQ+ Studies" when it should be "LGBTQ+ Studies."

This proposal is also correcting a typo in the UG catalog that indicates a student must select 15 hours when they are selecting four, 3 credit hour courses. This is equal to 12 hours, not 15 hours. The 15 hours is for the minor in total, which has 3 credit hours that are required. 3 required hours + 12 hours selected from choosing 4 courses (3 credit hours each) from a list of courses.

Also, added course WGS 499 - Capstone Seminar in Women, Gender, and Sexuality

Financial Impact* None

Impact on Other Units* None. All other units in this program were notified when the original proposal went through in 2024-2025. This proposal is to fix a typo in the catalog and change the title.

Have you consulted with all programs/departments that will be impacted by this change?* ( ) Yes (•) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*

This proposal adds the following relevant courses to count for our minor in Women, Gender, and Sexuality:

WGS 201: Intro to LGBTQ+ Studies: This course is currently required for our LGBTQ+ Studies minor and deals with feminist and queer methodologies relevant to the study of women, gender, and sexuality.

WGS 499: Capstone Seminar in Women, Gender, and Sexuality

This is a course currently required for WGS majors that we want to open up to minors as well.

This proposal also removes the following course because it is no longer offered at UT:

WGS 326: Gay American History

Added after Sub-Committee vote due to previous blanket petition that had expired (see attached) - WGS 354, WGS 425, WGS 444 to "Select four additional courses" section

Registration Restriction(s)

Registration Permission

Equivalency* This course is equivalent to JUST 300.

Rationale* This course, which has yet to be offered for the first time (was a 300-level), should be changed to 200 due to the 200-level better serving the needs of the JUST Certificate by allowing our program to recruit freshmen and sophmores rather than primarily juniors and seniors at the 300-level. Changing this course to 200 should faciliate better recruitment practices to the Certificate, but also the in-progress JUST Minor (this proposal is being prepared) this course will serve as the foundational requirement for the upstart Minor.

Impact on Other Units* None

Impact Report for JUST 300.

- (•) No

Credit Hours* 1-15

Course Description This course provides junior and senior students pursuing a Justice Studies certificate through the Appalachian Justice Research Center (AJRC) with the opportunity to receive credit for an off-campus internship doing work related to their field of study or professional goals and community needs in the Appalachian region. Through participation in class discussions, course assignments, and the internship, students will apply knowledge and skills learned in previous coursework with community justice partners in an effort to address community-driven needs. You will develop a professional practice consistent with emergent workforce needs in justice studies; and gain structured exposure to a meaningful experience in community work.

Statement about Crosslistings:

This section is only for adding a new crosslisting or revising an existing crosslisting. Submit additional proposals to all courses in the crosslisting as needed. See section 3.6.4 in the Curricular Submission Guide for details.

List all courses in this crosslisting relationship and note whether primary or secondary.

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Course Description This course provides an engaging introduction to the diverse and dynamic region of Latin American and the Caribbean. Explore the rich cultural, historical, political, social, and environmental landscapes of the region by examining how these factors shape the region's identity and global significance. Through a mix of lectures, discussions, and interactive activities, participants will gain a deeper understanding of key issues and themes, including colonial legacies, cultural diversity, and environmental challenges.

Course Description Broad introduction to the systematic study of language for a general student audience. Students explore how humans systematically utilize sounds, words, and sentences in combination with semiotic resources such as timing, body language, or intonation to communicate with one another across modalities and social contexts. The course furthermore features readings on language universals and linguistic diversity, language learning, and how language changes over time. As a whole, the course considers the significance of language for the human experience across social, cultural, and national contexts.

Course Description This course delves into constructed languages—those deliberately created for artistic or political purposes, like Elvish or Esperanto—and compares them with natural languages that arise spontaneously in human communities, such as Spanish or Arabic. We will explore the design and motivation behind constructed languages from a modern linguistic perspective. The course includes a survey of the history and properties of existing constructed languages and features a collaborative project where students will construct their own languages, incorporating phenomena from a variety of world languages.

Statement about Crosslistings:

Rationale* Currently, the IDP of Linguistics lacks an entry-level course at the 300 level that focuses on building foundational skills in linguistic theory while offering practical experience in language analysis and construction. This gap leaves our students without the necessary groundwork to engage deeply with modern linguistic perspectives in our 400 level courses or develop skills applicable across various languages. We propose adding this new 300-level course to the linguistic curriculum. This course is designed not only for linguistics majors and minors but also for any student interested in understanding the fundamental principles of study of languages.

Impact on Other Units* None.

Financial Impact* None.

Rationale* This course's old title "Introduction to Descriptive Linguistics" gives students the false impression that it is an introductory course, while it is actually an advanced linguistics course. Students who have had some linguistics knowledge and advanced proficiency in a foreign language are more likely to succeed in this course. Therefore, we are proposing to change the title and add recommended background.

Also, changing primary course to be GERM 425 to be consistent with GERM 426.

Registration Restriction(s)

Registration Permission

Equivalency

Rationale* There is a need to change the catalog's course description of Math 131 and 132. The current descriptions are not descriptive enough for advising, other departments, and other universities and are causing problems. For example, it does not make sense for a student to only take MATH 131, but the department was hearing that other departments were considering moving towards only requiring 131 for certain majors. Also, other departments have reached out to the Math department due to confusion over what these courses are. Similarly, the current description would not help others at a different university understand what was covered in these courses.

Impact on Other Units*

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s)

Recommended Background

Comments

Registration Restriction(s)

Registration Permission Permission of the instructor

Equivalency

Rationale* Since not enough students are going on from Math 148 to 257, the hope is to encourage more students to sign up for 257 by adding "or permission of the instructor" to the prerequisite. It has always been possible to override the prerequisite, and the process for doing so is essentially the same as for enrolling by permission of the instructor, but students may not know that. Adding "or permission of the instructor" informs prospective students that there is the possibility of enrolling, while still allowing the instructor to exercise judgement regarding which students have sufficient background for Math 257.

Instructional Method* Lab

Contact Hour Distribution (if more than one instructional method)

Grading Restriction Letter grade only

Repeatability

Credit Restriction Students may not receive credit for both MICR 209 and BIOL 229

Registration Enforced (RE) Prerequisite(s): BIOL 150*, BIOL 159*

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s):

Recommended Background

Comments MICR 209 is an introductory course that aims to prepare students for future advanced work in research laboratories. It will cover a wide number of topics with the intent that students can integrate well into research groups.

Registration Restriction(s) **Registration Permission**

Equivalency NA

Rationale* Research opportunities for undergraduate students at UT are in high demand. Unfortunately, the “demand” for these opportunities dramatically outsizes the “supply” of research positions available. Those students that do manage to land a coveted research position in a lab are sometimes unprepared for their experience and it takes them a long time to “get up to speed”. Other students are intimidated to seek out research experiences because they lack confidence in their basic lab skills. MICR 209 aims to get students prepared for these opportunities with real-world practice and application of basic microbiology skills that will prepare students for an independent research position.

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s):

Recommended Background

Comments Students will learn to design research and execute an experiment. They will also be expected to present their findings at either the annual Spring EUReCA Poster Session or CAS ASUReS Oral Session hosted by UTK and CAS, respectively.

Registration Restriction(s)

Registration Permission

Equivalency

Rationale* **Research opportunities for undergraduate students at UT are in high demand. Unfortunately, the "demand" for these opportunities dramatically outsizes the "supply" of research positions available. Additionally, for many students the "barrier to entry" into an independent research position in a science lab is high. Many students are insecure in their subject knowledge and students are intimidated to approach faculty regarding research opportunities due to low self-confidence in their abilities. MICR 309 aims to increase undergraduate participation in microbiological research by providing a gradual introduction to the research environment.**

- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale* Updating to match curriculum and total credit hours required.

Financial Impact* None

Impact on Other Units* None

Have you consulted with all programs/departments that will be impacted by this change?* ( ) Yes (•) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

Which CAS Committee(s) will be involved in this proposal?

Rationale* Add PHIL346 (Environmental Ethics) to the following Connections Packages: (1) Biodiversity and Humans, (2) Humans Living on a Dynamic Earth, and (3) Understanding Climate Change

(1) Biodiversity and Humans

Fit with the package description

PHIL346 (Environmental Ethics) is a critical component of the “Biodiversity and Humans” Connections Package. It directly addresses some of the core ethical questions and philosophical issues related to human interaction with the natural world.

- Ethical Frameworks: The course explores different philosophical theories and ethical frameworks that guide human behavior towards the environment. This includes discussions on anthropocentrism (human-centered ethics) vs. biocentrism (life-centered ethics) and ecocentrism (ecosystem-centered ethics).
- Moral Considerations: It delves into the moral considerations of conservation, such as the intrinsic vs. instrumental value of nature, helping students to understand why biodiversity should be preserved.
- Analyzing Human Impact: Students will engage in critical analysis of human impacts on the environment, which complements the scientific studies covered in other courses within the program.
- Debate and Discussion: The course encourages philosophical debate and discussion about human responsibilities and the ethical implications of environmental policies, which are essential for forming educated opinions and arguments about biodiversity issues.
- Linking Ethics with Action: By understanding the ethical dimensions of environmental issues, students can better appreciate the complexities involved in real-world biodiversity conservation efforts, such as policy-making, community involvement, and global cooperation.
- Bridging Gaps Between Fields: The ethical discussions in this course provide a philosophical underpinning to scientific and social scientific studies within the program, helping bridge gaps between how biodiversity is understood, valued, and managed.

Fit with current package course offerings

- Complementing Conservation Biology courses: Insights from environmental ethics can inform practical approaches in conservation biology, particularly in managing human-wildlife conflicts and in the ethical use of natural resources.
- Complementing Environmental Geography courses: Understanding ethical principles can enhance the interpretation and application of environmental science findings, particularly in public policy and law.

(2) Humans Living on a Dynamic Earth

Fit with the package description

PHIL346 (Environmental Ethics) fits well with the “Humans Living on a Dynamic Earth” Connections Package by providing philosophical perspectives that deepen student understanding of environmental issues and human interactions with the Earth.

- Understanding Human-Earth Relationships: PHIL346 explores the philosophical questions surrounding the nature of the environment and humanity’s place within it. This helps students grasp why and how humans interact with and impact the Earth, which is crucial for assessing human contributions to environmental change.
- Ethical Considerations: The course delves into the ethical implications of human actions on the environment, providing frameworks to evaluate decisions related to environmental management and conservation. This ethical lens is essential for students learning about the dynamic changes of the Earth and human influence.
- Bridging Science and Ethics: The course bridges the gap between scientific knowledge and ethical action, encouraging students to apply ethical theories to real-world environmental challenges. This interdisciplinary approach is vital for developing comprehensive solutions that are scientifically sound and ethically justifiable.
- Debate and Discussion: The course encourages philosophical debate and discussion about human responsibilities and the ethical implications of environmental policies.
- Critical Thinking and Analysis: PHIL346 fosters critical thinking about complex environmental issues, such as climate change and resource management. It challenges students to question common assumptions and to consider diverse perspectives, enhancing their ability to engage with public debates and misinformation concerning environmental changes.
- Bridging Gaps Between Fields: The ethical discussions in this course provide a philosophical underpinning to scientific and social scientific studies within the program.

Fit with current package course offerings

- Complementing Ecology courses: PHIL346 introduces ethical discussions about biodiversity conservation, ecosystem services, and the rights of non-human entities. These discussions provide ecologists with a framework for considering how scientific practices and environmental policies can be guided by ethical principles..
- Complementing Geography courses: The course encourages students to consider concepts of spatial justice, such as equitable access to natural resources and the ethical implications of land use decisions. This helps geography students understand the broader ethical issues related to spatial distribution of environmental benefits and burdens.

Rationale*

Add PHIL348 (Honors: Environmental Ethics) to the following Connections Packages: (1) Biodiversity and Humans Connections Package, (2) Humans Living on a Dynamic Earth, and (3) Understanding Climate Change

(1) Biodiversity and Humans

Fit with the package description

PHIL348 (Honors: Environmental Ethics) is a critical component of the “Biodiversity and Humans” Connections Package. It directly addresses some of the core ethical questions and philosophical issues related to human interaction with the natural world.

- Ethical Frameworks: The course explores different philosophical theories and ethical frameworks that guide human behavior towards the environment. This includes discussions on anthropocentrism (human-centered ethics) vs. biocentrism (life-centered ethics) and ecocentrism (ecosystem-centered ethics).
- Moral Considerations: It delves into the moral considerations of conservation, such as the intrinsic vs. instrumental value of nature, helping students to understand why biodiversity should be preserved.
- Analyzing Human Impact: Students will engage in critical analysis of human impacts on the environment, which complements the scientific studies covered in other courses within the program.
- Debate and Discussion: The course encourages philosophical debate and discussion about human responsibilities and the ethical implications of environmental policies, which are essential for forming educated opinions and arguments about biodiversity issues.
- Linking Ethics with Action: By understanding the ethical dimensions of environmental issues, students can better appreciate the complexities involved in real-world biodiversity conservation efforts, such as policy-making, community involvement, and global cooperation.
- Bridging Gaps Between Fields: The ethical discussions in this course provide a philosophical underpinning to scientific and social scientific studies within the program, helping bridge gaps between how biodiversity is understood, valued, and managed.

Fit with current package course offerings

- Complementing Conservation Biology courses: Insights from environmental ethics can inform practical approaches in conservation biology, particularly in managing human-wildlife conflicts and in the ethical use of natural resources.
- Complementing Environmental Geography courses: Understanding ethical principles can enhance the interpretation and application of environmental science findings, particularly in public policy and law.

(2) Humans Living on a Dynamic Earth

Fit with the package description

PHIL348 (Honors: Environmental Ethics) fits well with the “Humans Living on a Dynamic Earth” Connections Package by providing philosophical perspectives that deepen student understanding of environmental issues and human interactions with the Earth.

- Understanding Human-Earth Relationships: PHIL348 explores the philosophical questions surrounding the nature of the environment and humanity’s place within it. This helps students grasp why and how humans interact with and impact the Earth, which is crucial for assessing human contributions to environmental change.
- Ethical Considerations: The course delves into the ethical implications of human actions on the environment, providing frameworks to evaluate decisions related to environmental management and conservation. This ethical lens is essential for students learning about the dynamic changes of the Earth and human influence.
- Bridging Science and Ethics: The course bridges the gap between scientific knowledge and ethical action, encouraging students to apply ethical theories to real-world environmental challenges. This interdisciplinary approach is vital for developing comprehensive solutions that are scientifically sound and ethically justifiable.
- Debate and Discussion: The course encourages philosophical debate and discussion about human responsibilities and the ethical implications of environmental policies.
- Critical Thinking and Analysis: PHIL348 fosters critical thinking about complex environmental issues, such as climate change and resource management. It challenges students to question common assumptions and to consider diverse perspectives, enhancing their ability to engage with public debates and misinformation concerning environmental changes.
- Bridging Gaps Between Fields: The ethical discussions in this course provide a philosophical underpinning to scientific and social scientific studies within the program.

Fit with current package course offerings

- Complementing Ecology courses: PHIL348 introduces ethical discussions about biodiversity conservation, ecosystem services, and the rights of non-human entities. These discussions provide ecologists with a framework for considering how scientific practices and environmental policies can be guided by ethical principles..
- Complementing Geography courses: The course encourages students to consider concepts of spatial justice, such as equitable access to natural resources and the ethical implications of land use decisions. This helps geography students understand the broader ethical issues related to spatial distribution of environmental benefits and burdens..

Rationale*

Add PHIL350 (Aesthetics) to the following Connections Packages: (1) Cultural and Artistic Achievement: Arts in the United States and (2) Our World: Contemporary Arts and Culture

(1) Cultural and Artistic Achievement: Arts in the United States

Fit with the package description

PHIL350 (Aesthetics) on the nature of art, artworks, and beauty, along with aesthetic appraisal and connections between art and morality, will enrich the "Cultural and Artistic Achievement: Arts in the United States" Connections Package.

- Understanding Art and Beauty: The course provides foundational theories and philosophical perspectives on what constitutes art and beauty. This understanding is crucial for analyzing various art forms within the program, helping students grasp more than just the technical aspects of art but also its conceptual underpinnings.
- Aesthetic Appraisal: It delves into how art is evaluated, both subjectively and objectively, which is key to recognizing and analyzing aesthetic similarities and differences among various American art forms.
- Philosophical Tools: Students learn to apply philosophical tools and methods to dissect and appreciate art, enhancing their ability to describe the historical development of artistic conventions and traditions in different forms, from visual arts to literature.
- Critical Engagement: The course encourages critical thinking about art, prompting students to question and understand how art influences and is influenced by societal values and cultural norms.
- Links Between Art and Culture: By exploring the connections between art and the cultures within which it is created, the course directly addresses and expands upon the third learning outcome of the program. It helps students understand how art reflects, critiques, and shapes cultural identities and societal issues.
- Diverse Interpretations: The philosophical approach to understanding art enables students to consider multiple interpretations and engage with diverse artistic expressions.

Fit with current package course offerings

- Complementing Art History courses: The course encourages a critical approach to traditional narratives in art history, potentially questioning established interpretations and biases in the history of art. This promotes a more nuanced understanding and discussion within Art History courses.
- Complementing English courses: Literature often grapples with moral questions and ethical dilemmas through narrative and character development. The Philosophy course's focus on the connections between art and morality equips students with the tools to explore these dimensions in literary texts, enhancing their ability to engage with complex themes.
- Complementing Music courses: Understanding the philosophical and cultural contexts in which musical works are created and received can deepen students' appreciation and critical engagement with music. The Philosophy course helps link these cultural understandings, enriching discussions in music courses about the influence of societal values and cultural dynamics on musical expression.

(2) Our World: Contemporary Arts and Culture

Fit with the package description

PHIL350 (Aesthetics) fits well with the "Our World: Contemporary Arts and Culture Connections" Connections Package because of its emphasis on understanding the nature of art, beauty, and the philosophical implications of artistic creation within contemporary contexts.

- Understanding Art and Beauty: The course provides foundational theories and philosophical perspectives on what constitutes art and beauty. This understanding is crucial for analyzing various art forms within the program, helping students grasp more than just the technical aspects of art but also its conceptual underpinnings.
- Aesthetic Appraisal: It delves into how art is evaluated—both subjectively and objectively—which is key to recognizing and analyzing aesthetic similarities and differences among various American art forms.
- Philosophical Tools: Students learn to apply philosophical tools and methods to dissect and appreciate art, enhancing their ability to describe the historical development of artistic conventions and traditions in different forms, from visual arts to literature.
- Critical Engagement: The course encourages critical thinking about art, prompting students to question and understand how art influences and is influenced by societal values and cultural norms.
- Links Between Art and Culture: This course provides a philosophical foundation for analyzing how art interacts with and reflects cultural dynamics. By exploring aesthetic theories and the nature of artworks, students can better understand how contemporary art forms (like digital art, performance art, and new media) respond to and shape the globalized, technologically infused world.
- Philosophical Insight into Cultural Products: The course encourages students to think philosophically about contemporary cultural products, such as films, books, and music, enhancing their ability to articulate how these arts contribute to constructing realities and influencing societal norms.
- Art, Morality, and Politics: Students will investigate the connections between art and morality, gaining insights into how artworks challenge, reflect, or propagate ethical and political values.

Fit with current package course offerings

- Complementing Art History courses: The course encourages a critical approach to traditional narratives in art history, potentially questioning established interpretations and biases in the history of art. This promotes a more nuanced understanding and discussion within Art History courses.
- Complementing English courses: Literature often grapples with moral questions and ethical dilemmas through narrative and character development. The Philosophy course's focus on the connections between art and morality equips students with the tools to explore these dimensions in literary texts, enhancing their ability to engage with complex themes.
- Complementing Music courses: Understanding the philosophical and cultural contexts in which musical works are created and received can deepen students' appreciation and critical engagement with music. The Philosophy course helps link these cultural understandings, enriching discussions in music courses about the influence of societal values and cultural dynamics on musical expression.

Rationale*

Add PHIL382 (Philosophy of Feminism) to Global Social Justice Connections Package

Fit with the package description

PHIL382 (Philosophy of Feminism) fits well with the "Global Social Justice" Connections Package by providing critical philosophical insights into various dimensions of global justice issues, particularly those related to gender, sex, and intersectional inequalities.

- Foundational Concepts: This course provides foundational knowledge of key feminist philosophical concepts such as sexism, racism, colonialism, and intersectionality. Understanding these concepts is crucial for analyzing global social injustices and recognizing how disparate systems of oppression intersect, which aligns with the program's goal to critically examine globalization's differential effects on marginalized groups.
- Expanding the Discourse on Globalization: The course enables a deeper understanding of how globalization can exacerbate or mitigate social injustices across different identities and geographies, contributing to a comprehensive view of global social justice issues.
- Analyzing Structures of Power: Through a philosophical exploration of feminist theories, students learn to critically analyze structures of power and domination that perpetuate inequality and injustice, both historically and in contemporary contexts. This critical lens is essential for students aiming to recognize key processes and elements of globalization related to injustice.
- Engaging with Complex Social Issues: The course encourages students to engage with complex issues such as sexual violence and labor exploitation within a philosophical framework, enhancing their ability to consider these problems from multiple analytical perspectives.
- Ethical Reasoning and Advocacy: The course cultivates ethical reasoning skills that are critical for articulating and defending positions concerning global social justice, empowering students to advocate for gender equity and broader social changes effectively.
- Philosophical and Critical Thinking Skills: PHIL382 enhances students' philosophical reasoning and critical thinking capabilities, allowing them to dissect complex arguments and theories concerning social justice and to apply these insights in other courses and real-world scenarios.

Fit with current package course offerings

- Complementing Africana Studies courses: Feminist philosophy's focus on intersectionality is particularly relevant to Africana Studies, which deals with racial and colonial dimensions of social justice. This cross-disciplinary relevance strengthens students' understanding of the interconnectedness of global social issues.
- Complementing Geography and Sociology courses: Insights from feminist philosophy aid in the sociological and geographical exploration of how gender and sexuality shape social and spatial dynamics worldwide, thereby enhancing coursework in these disciplines within the program.

Rationale* Add PHIL383 (Philosophy of Disability) to the following Connections Packages: (1) Global Social Justice, (2) Health Care Perspectives, and (3) Inequalities: Race, Ethnicity, Class, and Gender.

(1) Global Social Justice

Fit with the package description

PHIL383 (Philosophy of Disability) fits well with the "Global Social Justice" Connections Package by providing providing a focused philosophical exploration of issues surrounding disability, which are integral to understanding broader social justice concerns on a global scale.

- Broadening Concepts of Injustice: This course extends the discussion of social justice to include disability, a critical area often overlooked in global discussions of injustice. It helps students recognize and critically examine how disability intersects with global processes and social structures, which furthers the program's goal to understand key elements of globalization related to injustice.
- Exploring Dependency and Autonomy: The course addresses philosophical themes such as autonomy and dependency, which are central to understanding the experiences of individuals with disabilities. These discussions are essential for evaluating policies and societal norms that affect historically marginalized and vulnerable groups globally.
- Analyzing Ableism and Social Structures: By exploring ableism and its impacts on policy and societal attitudes, students gain insights into another layer of social stratification that contributes to global injustices. This enhances their ability to critically examine the differential effects of globalization and to advocate for more inclusive and equitable policies.
- Intersectional Connections: The course's focus on intersectionality helps students understand how disability interacts with other categories of identity, such as race, gender, and class, thereby enriching the interdisciplinary analysis within the program.
- Legal and Educational Implications: Discussions on legal interpretations of disability and the provisioning of educational accommodations enhance students' understanding of the rights-based approaches to disability, informing their perspectives on legal and social reforms needed to address disability justice globally.
- Philosophical and Critical Thinking Skills: PHIL383 enhances students' philosophical reasoning and critical thinking capabilities, allowing them to dissect complex arguments and theories concerning social justice and to apply these insights in other courses and real-world scenarios.

Fit with current package course offerings

- Complementing Africana Studies courses: The course enhances discussions within Africana Studies by addressing the intersections of race and disability. These discussions include how systemic racism and ableism compound disadvantages for individuals at these intersections, offering a deeper understanding of the complex layers of oppression.
- Complementing Geography courses: Geography courses often explore how environments can be designed to either inhibit or enhance the mobility and quality of life for various populations. PHIL383 contributes philosophical discussions on the right to access and the concept of designing inclusive spaces, which complements geographical studies focused on urban planning, accessibility, and spatial justice.
- Complementing Sociology courses: The course discusses the role of social policies in either perpetuating or alleviating oppression faced by people with disabilities. This complements sociological analyses of policy impacts on social stratification, offering students frameworks for understanding how to implement changes that promote social justice.

(2) Health Care Perspectives

Fit with the package description

PHIL383 (Philosophy of Disability) fits well with the "Health Care Perspectives" Connections Package by providing philosophical insights into the complex issues surrounding disability, which are central to understanding broader healthcare and public health challenges.

- Ethical Considerations in Healthcare: The course covers critical ethical topics such as prenatal testing, assisted dying, and eugenics, which are directly relevant to students studying the science of medicine and public health.
- Philosophical Exploration of Autonomy and Dependency: Understanding these concepts is crucial for healthcare providers as they affect decision-making processes in healthcare settings, impacting how patients' rights and dignity are respected. This aligns with the program's goal to provide comprehensive education on the different facets affecting healthcare.
- Disability and Public Health: By examining how societal structures and policies impact individuals with disabilities, PHIL383 provides insights into the social determinants of health, which is a significant aspect of public health education. This helps students appreciate how public health efforts can be designed to be more inclusive and equitable.
- Provisioning Accommodations and Legal Interpretations: The course's focus on legal aspects of disability rights, such as the provision of accommodations and accessibility in healthcare, is vital for understanding public health from a policy perspective. This knowledge is crucial for discussing public health issues that affect both local and global communities.
- Global Perspectives on Disability: PHIL383 encourages students to consider how disability is viewed and treated in different cultures and legal systems, enhancing their ability to address public health issues from a global perspective. This global understanding is crucial for healthcare professionals working in increasingly diverse societies.
- Philosophical and Critical Thinking Skills: PHIL383 enhances students' philosophical reasoning and critical thinking capabilities, allowing them to dissect complex arguments and theories concerning social justice and to apply these insights in other courses and real-world scenarios.
- Preparation for Healthcare Professions: The philosophical insights provided by this course prepare students for real-world healthcare scenarios where ethical, legal, and social dimensions of disability play a critical role in patient care and public health strategies.

Fit with current package course offerings

- Complementing Biology courses: Biology courses often cover genetic, physiological, and developmental aspects of human health, including conditions categorized as disabilities. PHIL383 adds depth by offering philosophical reflections on the social (rather than the medical) model of disability as well as on topics like prenatal testing and eugenics, prompting students to think critically about the ethical implications of biological research and interventions.
- Complementing Pubic Health courses: Public Health courses often explore how social, economic, and environmental factors influence health outcomes. PHIL383 enriches this study by discussing how societal structures and policies, especially those related to ableism, impact the health and well-being of people with disabilities. This encourages a more comprehensive approach to public health that includes advocacy for accessibility and inclusivity.

(3) Inequalities: Race, Ethnicity, Class, and Gender

Fit with the package description

PHIL383 (Philosophy of Disability) fits well with the "Inequalities: Race, Ethnicity, Class, and Gender" Connections Package by enlarging concepts of inequality to include disability and by bringing philosophical explorations of disability that intersect with the program's concerns around stratification and inequality.

- Exploring Constructs of Disability: PHIL383 engages students in a critical examination of how disability is constructed socially and legally, much like race, ethnicity, class, and gender. This exploration helps students understand disability not just as a medical condition but as a complex social and cultural phenomenon that intersects with other categories of identity to produce unique forms of discrimination and inequality.
- Intersectionality: The course's focus on intersectional connections is particularly relevant for a program that aims to explore how various social categories interact to shape identities and life chances. PHIL383 helps students analyze how disability intersects with race, class, gender, and ethnicity, enriching their understanding of the broader dynamics of social stratification.
- Philosophical Analysis: By discussing topics such as autonomy, dependency, justice, and respect in the context of disability, the course equips students with philosophical tools to critically analyze societal attitudes and policies that affect people with disabilities. This critical perspective is crucial for the program's goal to develop skills in critical thinking and comparative analysis across different axes of identity.
- Ethical Considerations: The course also dives into ethical issues such as prenatal testing, assisted dying, and eugenics, challenging students to consider the ethical implications of these practices and their impact on society's view of disability. This complements the program's focus on identity and the ethical dimensions of social categories.
- Philosophical and Critical Thinking Skills: PHIL383 enhances students' philosophical reasoning and critical thinking capabilities, allowing them to dissect complex arguments and theories concerning social justice and to apply these insights in other courses and real-world scenarios.

Fit with current package course offerings

- Complementing Africana Studies courses: The course enhances discussions within Africana Studies by addressing the intersections of race and disability. These discussions include how systemic racism and ableism compound disadvantages for individuals at these intersections, offering a deeper understanding of the complex layers of oppression.
- Complementing Geography courses: Geography courses often explore how environments can be designed to either inhibit or enhance the mobility and quality of life for various populations. PHIL383 contributes philosophical discussions on the right to access and the concept of designing inclusive spaces, which complements geographical studies focused on urban planning, accessibility, and spatial justice.
- Complementing Sociology courses: The course discusses the role of social policies in either perpetuating or alleviating oppression faced by people with disabilities. This complements

Course Description Philosophical exploration of the role of race in the production of scientific and medical knowledge. Topics may include the history and function of scientific racism, structural racism as a cause of public health inequities, realism and anti-realism about biological race, social constructions of race, metaphysics of population genetics, theories of human evolution and migration, the continuing influence of ideologies of race and racial pseudoscience on data collection and interpretation, and the intersections of racial ideologies with issues of gender, sexuality, and disability.

Rationale* Add PHIL463 (Race, Science, and Medicine) to the following Connections Packages: (1) Global Social Justice, (2) Health Care Perspectives, and (3) Inequalities: Race, Ethnicity, Class, and Gender

(1) Global Social Justice

Fit with the package description

PHIL463 (Race, Science, and Medicine) fits well with the "Global Social Justice" Connections Package by examining the production and application of scientific and medical knowledge through the lens of race.

- Historical Context of Scientific Racism: This course explores the history and ongoing impact of scientific racism, providing students with a critical historical backdrop to understand contemporary social injustices. This historical perspective is vital for analyzing how past beliefs and practices continue to influence present-day scientific and medical fields.
- Public Health Inequities: By examining structural racism as a cause of public health inequities, the course directly addresses one of the key global social justice issues. It helps students understand how racial biases within medical systems contribute to differential health outcomes among racial and ethnic groups worldwide.
- Social Constructions of Race: Students learn to analyze how race is constructed socially and its implications for scientific research and healthcare practices.
- Ethical Implications of Race-Based Research: The course fosters ethical reasoning regarding the conduct of race-based scientific research and medical practices, preparing students to advocate for ethical standards that prevent racial bias in these fields.
- Policy Implications: By understanding the intersections of race, science, and medicine, students are better equipped to contribute to policy discussions and reforms aimed at reducing health disparities and promoting equity in healthcare access and treatment.
- Intersectionality: A focus on how racial ideologies intersect with gender, sexuality, and disability issues offers a comprehensive view of identity that is crucial for addressing the multifaceted nature of social injustice.
- Philosophical and Critical Thinking Skills: PHIL463 enhances students' philosophical reasoning and critical thinking capabilities, allowing them to dissect complex arguments and theories concerning social justice and to apply these insights in other courses and real-world scenarios.

Fit with current package course offerings

- Complementing Africana Studies courses: Africana Studies courses often examines the impacts of colonialism, including how Western science was used to justify and perpetuate racial hierarchies. PHIL 463 delves into the history and functions of scientific racism, providing philosophical and ethical analyses that deepen understanding of these issues.
- Complementing Geography courses: Geography courses that explore spatial distribution of resources and human demographics can be significantly enriched by the insights from PHIL 463 on public health inequities caused by structural racism. Understanding how racialized views in science and medicine influence the geographic distribution of health services and environmental hazards adds depth to geographical analyses.
- Complementing Sociology courses: Sociology courses examining social structures and inequalities gain depth from PHIL 463's exploration of how these structures manifest in health disparities. This philosophical lens aids in dissecting the complex interactions between societal norms, scientific practices, and medical systems, enhancing sociological studies of health inequalities.

(2) Health Care Perspectives

Fit with the package description

PHIL463 (Race, Science, and Medicine) fits well with the "Health Care Perspectives" Connections Package by addressing the complex intersections of race, science, and medicine.

- Historical Context of Scientific Racism: This course explores the history and ongoing impact of scientific racism, providing students with a critical historical backdrop to understand contemporary social injustices. This historical perspective is vital for analyzing how past beliefs and practices continue to influence present-day scientific and medical fields.
- Racial Disparities in Healthcare: PHIL463 explores how racial assumptions and biases influence medical research and healthcare delivery, directly addressing the impact of structural racism on public health inequities. This analysis is essential for understanding and addressing one of the major challenges in healthcare today.
- Social Constructions of Race in Medical Practice: The course enhances students' understanding of how race is socially constructed and its implications for health disparities, which is vital for effectively addressing and designing public health interventions.
- Ethical Implications of Race-Based Research: The course fosters ethical reasoning regarding the conduct of race-based scientific research and medical practices, preparing students to advocate for ethical standards that prevent racial bias in these fields.
- Policy Implications: By understanding the intersections of race, science, and medicine, students are better equipped to contribute to policy discussions and reforms aimed at reducing health disparities and promoting equity in healthcare access and treatment.
- Intersectionality: A focus on how racial ideologies intersect with gender, sexuality, and disability issues offers a comprehensive view of identity that is crucial for addressing the multifaceted nature of healthcare injustice.
- Critical Thinking and Advocacy: By developing critical thinking about race and medicine, students are better prepared to advocate for systemic changes in healthcare practices and policies to reduce racial and ethnic disparities in health outcomes.

Fit with current package course offerings

- Complementing Biology courses: PHIL463 addresses how concepts of race are utilized and often misconstrued in genetics and population studies. By exploring realism and anti-realism about biological race and the metaphysics of population genetics, the course equips Biology students with the philosophical tools to critically assess and ethically engage with genetic research that involves racial categorization.
- Complementing Public Health courses: PHIL463's focus on structural racism as a cause of public health inequities offers crucial insights for Public Health students. Understanding the deep-rooted social and systemic factors that lead to health disparities allows students to design better-informed public health interventions that are culturally sensitive and equitable.

(3) Inequalities: Race, Ethnicity, Class, and Gender

Fit with the package description

PHIL463 (Race, Science, and Medicine) fits well with the "Inequalities: Race, Ethnicity, Class, and Gender" Connections Package by providing philosophical insights into how race as a concept influences and interacts with scientific and medical knowledge in ways that produce stratification and inequality.

- Historical Context of Scientific Racism: This course explores the history and ongoing impact of scientific racism, providing students with a critical historical backdrop to understand contemporary social injustices. This historical perspective is vital for analyzing how past beliefs and practices continue to influence present-day scientific and medical fields.
- Public Health Inequities: By examining structural racism as a cause of public health inequities, the course directly addresses one of the key social justice issues. It helps students understand how racial biases within medical systems contribute to differential health outcomes among racial and ethnic groups worldwide.
- Social Constructions of Race: Students learn to analyze how race is constructed socially and its implications for scientific research and healthcare practices.
- Ethical Implications of Race-Based Research: The course fosters ethical reasoning regarding the conduct of race-based scientific research and medical practices, preparing students to advocate for ethical standards that prevent racial bias in these fields.
- Policy Implications: By understanding the intersections of race, science, and medicine, students are better equipped to contribute to policy discussions and reforms aimed at reducing health disparities and promoting equity in healthcare access and treatment.
- Intersectionality: A focus on how racial ideologies intersect with gender, sexuality, and disability issues offers a comprehensive view of identity that is crucial for addressing the multifaceted nature of social inequality.
- Philosophical and Critical Thinking Skills: By engaging with ethical issues in the use of race in scientific contexts, students develop sophisticated philosophical reasoning abilities that are essential for critically evaluating and responding to inequality. These skills are integral to the program's goals of fostering critical thinking and comparative analysis.

Fit with current package course offerings

- Complementing Africana Studies courses: Africana Studies courses often examines the impacts of colonialism, including how Western science was used to justify and perpetuate racial hierarchies. PHIL 463 delves into the history and functions of scientific racism, providing philosophical and ethical analyses that deepen understanding of these issues.
- Complementing Geography courses: Geography courses that explore spatial distribution of resources and human demographics can be significantly enriched by the insights from PHIL 463 on public health inequities caused by structural racism. Understanding how racialized views in science and medicine influence the geographic distribution of health services and environmental hazards adds depth to geographical analyses.
- Complementing Sociology courses: Sociology courses examining social structures and inequalities gain depth from PHIL 463's exploration of how these structures manifest in health disparities. This philosophical lens aids in dissecting the complex interactions between societal norms, scientific practices, and medical systems, enhancing sociological studies of

Rationale*

No Changes to course.

Add PHIL464 (Feminist Philosophy of Science) to Inequalities: Race, Ethnicity, Class, and Gender Connections Package

Fit with the package description

PHIL464 (Feminist Philosophy of Science) fits well with the "Inequalities: Race, Ethnicity, Class, and Gender" Connections Package by providing philosophical insights into how social categories shape identities, opportunities, and life experiences.

- Feminist Critiques of Scientific Methods: PHIL 464 explores feminist critiques of traditional scientific methodologies, focusing on how assumptions about sex and gender can influence scientific inquiry. This directly supports the program's goal to critically examine how social understandings of gender (and other intersecting categories like race and disability) shape scientific knowledge.
- Situated Knowledge and Objectivity: The course introduces the concept of situated knowledge, which argues that all knowledge is socially situated, including scientific knowledge. This challenges traditional notions of objectivity and neutrality in science, aligning with the program's focus on understanding how social categories are constructed and applied across various contexts.
- Philosophical Analysis of Science: This course fosters critical thinking about the role of social biases in shaping scientific practices and conclusions. Engaging with feminist philosophy of science helps students critique and deconstruct scientific studies and theories, particularly those related to human biology, psychology, and health, enhancing their ability to conduct critical analyses across various disciplines.
- Ethical and Social Implications: The discussions on how scientific conceptions of sex, sexuality, and gender impact societal beliefs and policies equip students with the philosophical tools to address ethical and social implications of scientific research.
- Informed Advocacy and Policy Development: Understanding the feminist critiques of science prepares students to engage in informed advocacy and policy-making concerning science and technology. This knowledge is vital for addressing gender and other inequalities in scientific research and public health policies.
- Philosophical and Critical Thinking Skills: By engaging with ethical issues in the use of race in scientific contexts, students develop sophisticated philosophical reasoning abilities that are essential for critically evaluating and responding to inequality. These skills are integral to the program's goals of fostering critical thinking and comparative analysis.

Fit with current package course offerings

- Complementing Geography courses: The course aligns with feminist geographical theories that critique traditional spatial analyses and advocate for the recognition of gendered experiences of space. It provides philosophical insights into how scientific ideas about gender and race can shape geographical landscapes and spatial justice.
- Complementing Sociology courses: Sociology courses that explore social structures and identity formations benefit from PHIL 464's analysis of how gender and sexuality are constructed in scientific discourse. The course complements sociological investigations into how societal norms and scientific 'truths' are mutually reinforcing, particularly in the contexts of gender and family studies, health sociology, and the sociology of science.

Equivalency

Rationale* We are no longer allowing PHYS 136* or PHYS 138* or PHYS 232* as prereqs, since under our current catalog all majors and minors must take Phys 251 as of the Fall 2021 catalog. Phys 431 would also provide adequate background. There may be a few students on older catalogs who would need prerequisite overrides. This change is necessary to complete the curriculum changes we started to implement in the Fall 2021 catalog.

Impact on Other Units*

Some physics minors who want to take Phys 421 may have to delay when they take this class. Students who are non-majors and non-minors completing the biophysics connections package would have to take an additional class, but virtually all students who have completed that package have been majors or minors.

Rationale* This class discusses many topics that the Connection deals with, such as, but not limited to, how social categories of race and ethnicity produce stratification, discrimination, and inequality and the ways in which they interact with one another to shape identities, opportunities, life experiences, and life chances. Therefore, we believe that this class fits the Inequalities: Race, Ethnicity, Class, and Gender connection package.

Rationale* COUN/PSYC 324: This course is designed to be an engaged inquiry vol core course (separate proposal will be submitted) in which students engage in weekly community outreach activity focused (e.g., career education with rural Appalachian high school students). The course content and process align closely with the mission of this modern land-grant institution and the needs of Tennesseans. The course is the result of a collaboration between counselor education and psychology and will be cross-listed with COUN 324 (separate proposal will be submitted).

Rationale* PSYC/COUN 325: This course is designed to be an engaged inquiry vol core course (separate proposal will be submitted) in which students engage in STEM outreach and mentoring. The course content and process align closely with the mission of this modern land-grant institution and the needs of Tennesseans. The course is the result of a collaboration between counselor education and psychology and will be cross-listed with COUN 325 (separate proposal will be submitted).

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

College Requirements

Arts and Sciences

Concentration Requirements

The honors philosophy of science and medicine concentration requires a 3.25 overall GPA with a 3.5 GPA in philosophy coursework. It consists of **31 hours** of courses numbered 200 or above. Four honors or honors-by-contract philosophy courses and additionally, one hour of PHIL 407 with a grade of B or better are required. Only 3 hours of philosophy electives may be taken at the 200-level. Apart from the one required hour of PHIL 407, at least 6 hours must be taken at the 400-level or above. Majors are required to discuss their programs with a member of the philosophy faculty.

I. Complete A, B, and C (including four honors courses or honors-by-contract courses):

A. Complete:

PHIL 235 Formal Logic
[Right] *
PHIL 345 Bioethics
[Right] *
PHIL 360 Philosophy of Science

B. Select one course from each area:

1. Ancient Philosophy

PHIL 320 Ancient Western Philosophy
PHIL 327 Honors: Ancient Western Philosophy

2. Modern Philosophy

PHIL 324 17th- and 18th-Century Philosophy
PHIL 328 Honors: 17th- and 18th-Century Philosophy

3. Ethics

PHIL 340 Ethical Theory
PHIL 347 Honors: Ethical Theory

C. Select three courses:

PHIL 346 Environmental Ethics
[Right] *
PHIL 348 Honors: Environmental Ethics
PHIL 365 Philosophy of Social Science
PHIL 366 Philosophy of Cognitive Science
PHIL 370 Philosophy of Religion
PHIL 371 Epistemology
PHIL 372 Metaphysics
PHIL 373 Philosophy of Mind
PHIL 375 Philosophy of Action
PHIL 383 Philosophy of Disability
PHIL 435 Intermediate Formal Logic
PHIL 460 Topics in Philosophy of Science
PHIL 463 Race, Science, and Medicine
PHIL 464 Feminist Philosophy of Science

II. Select one additional philosophy course:

See Concentration Requirements heading for restrictions.

III. Complete one hour with a grade of B or better (no more than 1 hour may be applied toward the major):

PHIL 407 Honors: Thesis

IV. Proficiencies

Students are required to complete a 0-credit course, typically at the end of the student's degree program.

PHIL 499 Philosophical Proficiency
[After]
*** Meets Volunteer Core Requirement.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
○ Yes
◉ No

Rationale*

Add a new course (PHIL366: Philosophy of Cognitive Science) to Part III of our Honors Philosophy of Science and Medicine Concentration requirements, which is a long list of courses from which students must choose three.

- Philosophy of cognitive science bridges elements of psychology, neuroscience, philosophy, and computer science.
- Students gain insights into how cognitive processes affect perception, decision-making, and behavior.
- Philosophy of Cognitive Science involves ethical questions around artificial intelligence, neurotechnology, mental health, and consciousness.
- The course equips students with research skills relevant to both philosophical inquiry and empirical investigation.
- Philosophy of Cognitive Science covers several philosophical topics not traditionally included in our curriculum, such as philosophy of perception and computational models of cognition.

Also add PHIL365: Philosophy of Social Science, PHIL463: Race, Science, & Medicine, and PHIL464: Feminist Philosophy of Science Part III of our Honors Philosophy of Science and Medicine Concentration requirements, which is a long list of courses from which students must choose three.

- Conforms the Honors Philosophy of Science and Medicine Concentration with the Philosophy of Science and Medicine Concentration.
- Philosophy of Science is a vast area of inquiry. Those who major in Philosophy require courses that focus on the major subfields, including Philosophy of Social Science (PHIL 365), Feminist Philosophy of Science (PHIL 464), and influences of race on the production of scientific knowledge (PHIL 463). These courses are especially relevant to our Honors Philosophy of Science and Medicine Concentration, which should include discussions of relations among gender, race, science, and medicine as well as economics, political science, sociology, and other social sciences. Allowing these courses to count for distribution requirements will give majors opportunities to explore these issues in greater depth.

Financial Impact*
None

Impact on Other Units*
None

Have you consulted with all programs/departments that will be impacted by this change?*
○ Yes ◉ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

PHYS 231 Fundamentals of Physics: Electricity and Magnetism
[Right] *
[Before]
[After] It is recommended that students take courses from the same sequence, e.g. PHYS 135* and PHYS 136*.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
( ) Yes
(•) No

Rationale*
This is a shared core for the Physics Major, BS - Academic Concentration and the Physics Major, BS - Astronomy Concentration. This change was also added to the Physics Major, BA, which does not have this shared core.

Phys 135 & 136, introductory programming, and math classes (calc I, II, III, and differential equations) are prerequisites to the major, as opposed to classes in the major. Currently we effectively require a C or better since they are prerequisites for other classes, all of which require a C or better. It would be more transparent if we explicitly required a C or better. Not having them explicitly listed creates problems for students who have earned more than 60 credit hours and have not gotten a C or better in all of the prerequisites to the major; those students need a petition to be allowed to retake the class. This would also reduce paperwork.

Financial Impact*
Minimal. By requiring students to do well in prerequisites to progress, we reduce the chance that they will fail classes repeatedly, which reduces the money they will spend on tuition.

Impact on Other Units*
None.

Have you consulted with all programs/departments that will be impacted by this change?*
( ) Yes (•) No

College of Arts and Sciences - Political Science - Political Science Major, BA

2025-2026 UG Revise Program

General Catalog Information

College* College of Arts and Sciences

Department* Political Science

Program Name* Political Science Major, BA

Degree Type* Bachelor of Arts

Program Type* Undergrad (Major)

Campus code*
- [x] Knoxville Campus
- [x] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The political science discipline is broad and diverse ranging from the study of campaigns and elections to analysis of political philosophy. Political science gives attention to the theory and practice of government at all levels from local to international, as well as to the complex relationships between social values and the formulation of public policy. As a blend of the theoretical and the practical, political science has much to offer as an undergraduate major and as an elective field for the non-major. It provides a broad liberal arts background for professional careers in law, government service, foreign service, business, journalism, and public-school teaching. It offers a good foundation for those wishing to pursue post-graduate study, especially in the fields of law, political science, and public administration. For those interested in specializing in fields outside of law and government, political science courses can contribute significantly to an awareness of public issues and an appreciation of the complexity of modern society.

Continuing, returning, and transfer students may declare an interest in political science at any time. The department will then assign the student an academic advisor.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

Credit Hours 15-17

Term 8 Milestone Notes

Completion of at least 42 total upper-division (300-400 level) hours

Total Credit Hours 120

Footnotes

All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The Connections requirement may be satisfied in one of three ways: (1) by completing 9 hours from one of the approved Connections packages, (2) by completing the requirements for a second major or minor, or (3) by completing 9 hours of study abroad coursework. All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

* Meets Volunteer Core Requirements.

Is this proposal Adding or Removing a 5-Year

Is this proposal Adding or Removing a 3+1 and/or Honors version of this program?*	○ Yes ◉ No
Rationale*	Expand online course offerings to meet the growing demand of Distance Education students and thereby support UTK's land-grant mission.
Financial Impact*	None initially, but if the number of Distance Education students in the program increases significantly, additional instructional resources will be need to offer more online sections of Political Science classes.
Impact on Other Units*	N/A
Have you consulted with all programs/departments that will be impacted by this change?*	◉ Yes ○ No
Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

College of Arts and Sciences - Political Science - Political Science Major, BA - Completion Program

2025-2026 UG End Program

General Catalog Information

College* College of Arts and Sciences

Department* Political Science

Program Name* Political Science Major, BA - Completion Program

Instructions:

This form is intended to end (drop) the following programs: Major, Minor, Certificate, or Concentration.

Degree Type* Bachelor of Arts

Program Type* Concentration

Description The political science discipline is broad and diverse ranging from the study of campaigns and elections to analysis of political philosophy. Political science gives attention to the theory and practice of government at all levels from local to international, as well as to the complex relationships between social values and the formulation of public policy. As a blend of the theoretical and the practical, political science has much to offer as an undergraduate major and as an elective field for the non-major. It provides a broad liberal arts background for professional careers in law, government service, foreign service, business, journalism, and public-school teaching. It offers a good foundation for those wishing to pursue post-graduate study, especially in the fields of law, political science, and public administration. For those interested in specializing in fields outside of law and government, political science courses can contribute significantly to an awareness of public issues and an appreciation of the complexity of modern society.

Requirements*

Campus

Distance Education

Admission Requirements

Completed at least 60 hours obtained from an accredited institution(s) (cannot submit with less than 60 hours unless a veteran, see below)

- Returning veterans with at least 45 hours obtained from an accredited institution(s)m and who meet the other requirements above, may apply.
- Current or former UT students may transfer to the online program if they have completed at least 60 hours and meet other admission requirements.
- For prospective students with 50-59 transferable credits upon initial review (LD or better), we will request that these applications be forwarded to the College for additional review and consideration.
- Prospective students with less than 50 transferable credits upon initial review will be denied admission unless they are returning veterans who meet all other criteria.
- 2.0 or higher GPA (if lower, must provide letter of explanation).
- Completed at least 27 hours in the following categories:
  - 6 hours of English Composition sequence (ENGL 101 and ENGL 102 or equivalent)
  - 6 or more hours of math (courses TBD)
  - 6-8 hours of science with labs
  - 9 hours meeting specific Volunteer Core requirements for Social Science, Humanities, Oral Communication, etc.
  - (option) replace 3 hours of math with an additional 3 hours applicable to Vol Core
  - 2 years of language study and a sequence in non-US History (or plan on completing as part of their 60 hours in this program)

Current students who earn an AA, AS, AFA, or AST and 60 credit hours through the Tennessee Reverse Transfer process are eligible to apply as well.

College Requirements

Arts and Sciences

Prerequisites

Select one course:

POLS 101 United States Government and Politics
[Right] *
POLS 107 Honors: United States Government and Politics
[Right] *

Complete:

POLS 102 Introduction to Political Science
[Right] *

Major Requirements

The major consists of 31 hours in courses numbered 200 or above. At least 19 hours of credit in courses numbered 300 or above must be completed.

Select four courses – Foundations of Political Science:

POLS 200 Introduction to Political Philosophy
POLS 215 Tennessee Government and Politics
POLS 240 Introduction to Public Administration and Public Policy
POLS 249 Introduction to Comparative Politics
POLS 265 Introduction to International Relations

Complete 18 hours:

Upper-division (300-400 level) political science credits (Note: POLS 480 - Capstone does not count toward this requirement.)

Complete:

POLS 480 Capstone
[After]
[After] * Meets Volunteer Core Requirement.

Rationale* The Department of Political Science created the completion program last year with the intention to be the Political Science version for Distance Learning, but this was done with a wrong proposal type. This year, the department revised the Political Science Major, BA program to include the Distance Education program, so this "completion program concentration" is being requested to end. The correct Distance Learning program has been added to the Political Science concentration via a proposal to update the Non-Honors version of Political Science Major, BA on uTrack, as was the goal for the 2024-2025 catalog.

Impact on Other Units* N/A

Financial Impact* N/A

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Number of students in program* 0

Teach out plan Though the department is removing the item of the "Completion Program Concentration" from the catalog, the Distance Education program has been added to the Political Science Major, BA with a Program Revision form, revising the BA progarm with adding Distance ED to the Campus Code. Consequently, there is no need for a particular six-year teach-out plan since the new and correctly listed Distance Education program will be keeping the same online classes the department currently offered in the Completion Program.

AY2024-2025 - keep the same online classes for students in the completion program.

AY2025-2026 - keep the same online classes for students in the completion program.

AY2026-2027 - keep the same online classes for students in the completion program.

AY2027-2028 - keep the same online classes for students in the completion program.

AY2028-2029 - keep the same online classes for students in the completion program.

AY2029-2030 - keep the same online classes for students in the completion program.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The political science discipline is broad and diverse ranging from the study of campaigns and elections to analysis of political philosophy. Political science gives attention to the theory and practice of government at all levels from local to international, as well as to the complex relationships between social values and the formulation of public policy. As a blend of the theoretical and the practical, political science has much to offer as an undergraduate major and as an elective field for the non-major. It provides a broad liberal arts background for professional careers in law, government service, foreign service, business, journalism, and public-school teaching. It offers a good foundation for those wishing to pursue post-graduate study, especially in the fields of law, political science, and public administration. For those interested in specializing in fields outside of law and government, political science courses can contribute significantly to an awareness of public issues and an appreciation of the complexity of modern society.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

Honors Option - Democracy, Social Problems, and Political Advocacy

Admission to the Department of Political Science Honors Program is selective, and by application. Generally, the Department of Political Science Honors Program admits only those majors who have completed more than forty (40) hours of college course credit with a minimum GPA of 3.0. A student's GPA, however, does not automatically qualify or disqualify him/her from admission to the Department of Political Science Honors Program. A student must apply for and be admitted to the Department of Political Science Honors Program by the Honors Program Director in the Department of Political Science.

The Department of Political Science accepts applications to its Honors Program on a rolling basis, but students are encouraged to apply during the sophomore or junior year. The Honors Program encourages fruitful contacts between individual students and faculty members, and student involvement in planning and developing the program.

As a senior, each student takes POLS 487 and POLS 488, investigates a topic of his or her choice, and presents the results in an Honors Thesis. This project develops with the assistance and supervision of the Honors Director or another member of the Political Science faculty

Program Requirements

To receive Honors in Political Science students must:

Apply for and be admitted to the program by the Director of Undergraduate Studies; students are encouraged to apply for the program during the Fall Semester (by mid-October) of their Junior Year.
Maintain a minimum 3.3 GPA in Political Science and a minimum cumulative GPA of 3.0 for all university coursework;
Complete 40 hours of credit in Political Science courses numbered 200 or above, as detailed below.
Complete POLS 301, POLS 487 and POLS 488. 487 and 488 are taken during fall and spring, respectively, of the senior year. POLS 301 should be completed prior to enrolling in POLS 487, but can be taken at the same time as 487.

College requirements

Arts and Sciences

Prerequisites

1. Select one course:

POLS 101 United States Government and Politics
[Right] *

POLS 107 Honors: United States Government and Politics
[Right] *

2. Complete:

POLS 102 Introduction to Political Science
[Right] *

Democracy, Social Problems, and Political Advocacy - Honors Concentration

Students majoring in political science who wish to pursue careers involving public policy, solving social problems, campaigns, political advocacy, or work in support of democracy in the United States and/or around the world may select the Democracy, Social Problems, and Political Advocacy concentration. The concentration consists of **40 hours** of coursework in political science beyond the 100-level.

1. Complete the following four courses:

POLS 200 Introduction to Political Philosophy
POLS 240 Introduction to Public Administration and Public Policy
POLS 249 Introduction to Comparative Politics
POLS 265 Introduction to International Relations

2. Complete the following three courses:

POLS 351 Democracy and Authoritarianism
POLS 422 Political Campaigns and Elections
SOCI 341 Social Inequalities
[Right] *

3. Select one course: Democracy and Democratic Institutions:

JMED 366 Media and Democracy
POLS 320 State Government and Politics
POLS 330 Law in American Society
POLS 412 Congress

POLS 415 Black American Politics
POLS 425 Media and Politics
POLS 452 Foundations of African Politics: Dictators, Democratization, and Development
POLS 456 Development and Decay of Democracy in Latin America
[Right] *

4. Select one course: Social Problems:

POLS 311 Contemporary Issues in American Public Policy
[Right] *

POLS 350 Sources of Political Change in the Global South: Coups, Climate, and Conflict
POLS 370 Contemporary International Problems
POLS 413 Race, Ethnicity, and Politics
POLS 414 Gender and Politics
POLS 461 Comparative Public Policy: Ideas, Interests, and Institutions
[Right] *

POLS 463 Politics and Power in the Middle East
POLS 464 Fear and Bias in Migration Politics
[Right] *

POLS 469 The Politics of Genocide and Ethnic Cleansing: Theory, Prevention, and Aftermath
SOWK 316 Social Justice and Anti-oppressive Practices

5. Select one course: Political Advocacy and Communication:

JMED 419 Communicating with Data
POLS 341 Judicial Process and Policymaking
POLS 420 Political Attitudes and Behavior
[Right] *

POLS 421 Political Parties and Interest Groups
[Right] *

SOCI 345 Social Movements
[Right] *

6. Complete:

POLS 301 Research Methods I
[Right] *

POLS 480 Capstone
POLS 487 Senior Honors: Thesis and Seminar
POLS 488 Senior Honors: Thesis and Seminar

Rationale*

This proposal is to add an honors version to Political Science's new non-honors concentration of Democracy, Social Problems, and Political Advocacy. To enroll in the honors option, a student must: (a) completed the BA pre-requisites, (b) complete POLS 301 (c) be a junior/senior, (d) meet the honors concentration GPA requirements, and (e) complete the application to enroll in POLS 487 and 488.

Political Science has had four concentrations (Law and Courts, International Affairs, Public Administration, and Honors) and is adding two new concentrations (Human Rights and Justice in the International System; and Democracy, Social Problems). Majors frequently select two concentrations. Advisors and students have noted, however, that given the current formatting of our concentrations, it is difficult for majors to add an honors concentration late in their academic careers or if they enter as transfer students because of some of its requirements. We want to meet our students' demand to provide flexibility for late blooming students and transfer students to be able to pursue honors theses in our major if they meet the GPA, course, and writing requirements.

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

[Right] *

6. Complete:

POLS 480 Capstone

Rationale*

Political Science has three issue areas for its concentration programs — Law and Courts, International Affairs, and Public Administration. There are increasing interests in more topical issues in political science, and democracy, social problems, and political advocacy is one of them. We want to meet this increasing demand of students by creating the new concentration on Democracy, Social Problems, and Political Advocacy.

This proposal is too add a new concentration on Democracy, Social Problems, and Political Advocacy.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The political science discipline is broad and diverse ranging from the study of campaigns and elections to analysis of political philosophy. Political science gives attention to the theory and practice of government at all levels from local to international, as well as to the complex relationships between social values and the formulation of public policy. As a blend of the theoretical and the practical, political science has much to offer as an undergraduate major and as an elective field for the non-major. It provides a broad liberal arts background for professional careers in law, government service, foreign service, business, journalism, and public-school teaching. It offers a good foundation for those wishing to pursue post-graduate study, especially in the fields of law, political science, and public administration. For those interested in specializing in fields outside of law and government, political science courses can contribute significantly to an awareness of public issues and an appreciation of the complexity of modern society.

Continuing, returning, and transfer students may declare an interest in political science at any time. The department will then assign the student an academic advisor.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code **options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type **options should be entered from the following list: Add-On, Stand-Alone**

Credit Hours **120 credit hours is the minimum for majors and concentrations.**

Requirements **List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.**

College requirements

Arts and Sciences

Prerequisites

1. Select one course:

POLS 101 United States Government and Politics
[Right] *

POLS 107 Honors: United States Government and Politics
[Right] *

2. Complete:

POLS 102 Introduction to Political Science
[Right] *

Human Rights and Justice in the International System - Honors Concentration

Students majoring in political science who wish to emphasize international relations, human rights, and judicial processes in their study may select the concentration Human Rights and Justice in the International System. The concentration consists of **37 hours** of coursework in political science beyond the 100-level. To graduate with honors in the democracy, social problems, and political advocacy concentration of political science, the student must have a minimum GPA of 3.3 in political science and a minimum cumulative GPA of 3.25.

1. Complete three of the following four courses (9 credit hours):

POLS 200 Introduction to Political Philosophy
POLS 249 Introduction to Comparative Politics
POLS 265 Introduction to International Relations
POLS 350 Sources of Political Change in the Global South: Coups, Climate, and Conflict

2. Human Rights and Judicial Process (9 credit hours):

Select three courses:

POLS 341 Judicial Process and Policymaking
POLS 350 Sources of Political Change in the Global South: Coups, Climate, and Conflict
POLS 351 Democracy and Authoritarianism
POLS 413 Race, Ethnicity, and Politics
POLS 414 Gender and Politics
POLS 435 Criminal Law and Procedure
POLS 464 Fear and Bias in Migration Politics
[Right] *

POLS 470 International Law
POLS 474 International Organization

3. International Relations (9 credit hours)

Select three courses:

POLS 352 Political Challenges of Globalization
POLS 366 United States Foreign Policy Process
POLS 370 Contemporary International Problems
POLS 371 Terrorism and Political Violence
POLS 372 Civil War and the International System: Rebellions, Resources, and Outside Intervention
[Right] *

POLS 469 The Politics of Genocide and Ethnic Cleansing: Theory, Prevention, and Aftermath
POLS 472 Conflict Processes
[Right] *

POLS 473 Negotiation, Bargaining, and Diplomacy
[Right] *

POLS 479 Regional Analysis of International Politics
POLS 483 Arms Control and Nuclear Proliferation

4. Complete (10 credit hours):

POLS 301 Research Methods I
[Right] *

POLS 480 Capstone
POLS 487 Senior Honors: Thesis and Seminar
POLS 488 Senior Honors: Thesis and Seminar

Rationale*

Political Science has had four concentrations (Law and Courts, International Affairs, Public Administration, and Honors) and is adding two new concentrations (Human Rights and Justice in the International System; and Democracy, Social Problems, and Political Advocacy). Majors frequently select two concentrations. Advisors and students have noted, however, that given the current formatting of our concentrations, it is difficult for majors to add an honors concentration late in their academic careers or if they enter as transfer students because of some of its requirements. We want to meet our students' demand to provide flexibility for late blooming students and transfer students to be able to pursue honors theses in our major if they meet the GPA, course, and writing requirements.

This proposal is to add an honors version to Political Science's new non-honors concentration of Human Rights & Justice in the International System. To enroll in the honors option, a student must: (a) completed the BA pre-requisites, (b) complete 301 (c) be a junior/senior, (d) meet the honors concentration GPA requirements, and (e) complete the application to enroll in POLS 487 and 488.

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

Human Rights and Justice in the International System Concentration

Students majoring in political science who wish to emphasize international relations, human rights, and judicial processes in their study may select the concentration Human Rights and Justice in the International System. The concentration consists of 31 hours of coursework in political science beyond the 100-level.

1. Complete four of the following five courses (12 credit hours):

POLS 200 Introduction to Political Philosophy
POLS 249 Introduction to Comparative Politics
POLS 265 Introduction to International Relations
POLS 301 Research Methods I
POLS 350 Sources of Political Change in the Global South: Coups, Climate, and Conflict

2. List A: Human Rights and Judicial Process (9 credit hours):

Select three courses from the list below:

POLS 341 Judicial Process and Policymaking
POLS 350 Sources of Political Change in the Global South: Coups, Climate, and Conflict
POLS 351 Democracy and Authoritarianism
POLS 413 Race, Ethnicity, and Politics
POLS 414 Gender and Politics
POLS 435 Criminal Law and Procedure
POLS 464 Fear and Bias in Migration Politics
POLS 470 International Law
POLS 474 International Organization

3. List B: International Relations (9 credit hours):

Select three courses from the list below:

POLS 352 Political Challenges of Globalization
POLS 366 United States Foreign Policy Process
POLS 370 Contemporary International Problems
POLS 371 Terrorism and Political Violence
POLS 372 Civil War and the International System: Rebellions, Resources, and Outside Intervention
POLS 469 The Politics of Genocide and Ethnic Cleansing: Theory, Prevention, and Aftermath
POLS 472 Conflict Processes
POLS 473 Negotiation, Bargaining, and Diplomacy
POLS 479 Regional Analysis of International Politics
POLS 483 Arms Control and Nuclear Proliferation

4. Complete (1 credit hour):

POLS 480 Capstone

Rationale*

Political Science has three issue areas for its concentration programs — Law and Courts, International Affairs, and Public Administration. There are increasing interests in more topical issues in political science, and human rights and justice in the international system is one of them. We want to meet this increasing demand of students by creating the new concentration on Human Rights & Justice in the International System.

This proposal is to add a new concentration on Human Rights & Justice in the International System.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The college offers an accelerated B.S./J.D. program with the College of Law. For joint B.S./J.D. students, College of Law admissions requirements are higher than those normally expected for J.D. applicants. Desired College of Law qualifications include at a minimum a cumulative undergraduate GPA and a Law School Admissions Test (LSAT) score at or above the medians for the entering class.

Students pursing this program complete their first three years of coursework in the College of Arts and Sciences, and their last three years of coursework in the College of Law. During their first three years, students will fulfill all University General Education requirements and all College of Arts and Sciences requirements for a B.S. degree, will complete a minor in the College of Arts and Sciences, will complete 13 hours of pre-law professional electives, and will complete a total of at least 90 hours of undergraduate coursework.

Students interested in pursuing the accelerated B.S./J.D. program are counseled initially in Arts and Sciences Advising Services (313 Ayres Hall) regarding both College of Law admissions standards and undergraduate degree requirements for the College of Arts and Sciences. If the student is a likely candidate for admission into the J.D. program, she or he should consult with the College of Law Admissions Office, take the LSAT, and submit an application to the College of Law. Upon admission to the joint B.S./J.D. program, a student will begin College of Law coursework in the fourth year and, upon successful completion of 30 hours of College of Law coursework, will be awarded a B.S. degree in Pre-Professional Programs with a concentration in Pre-Law at the end of that year. The student will receive the J.D. degree upon successful completion of the graduation requirements for that degree.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

College Requirements

Complete a minor in any department, school, or interdisciplinary program in the College of Arts and Sciences. Consult Minors, A-Z for a list of minors and descriptions of their requirements.

Professional Electives

Complete:

INPG 220 - Introduction to Law and the Legal Profession (1 hour)

and

12 hours from the courses listed below, at least 9 hours must be chosen from List A.

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The Pre-Professional Programs Major with a Pre-Medicine concentration at the University of Tennessee, Knoxville, is designed to offer students a comprehensive four-year program that prepares them for medical school and other health-related professional studies. Moving beyond the traditional pre-medical track, this program emphasizes a holistic, interdisciplinary approach to healthcare, providing students with the knowledge and skills to thrive in an evolving medical landscape. Students will gain a solid foundation in biological, chemical, and physical sciences, while also exploring the critical social, cultural, ethical, and psychological factors that influence healthcare.

This program prepares students for medical schools nationwide, offering a curriculum that aligns with the expectations of modern healthcare education. Students will develop the critical thinking, research, and clinical inquiry skills necessary to address complex healthcare challenges. The program combines essential coursework in science with humanities, social sciences, and hands-on field experiences, fostering an understanding of diverse populations and the socio-economic and behavioral influences on health.

In addition to core science courses, students are encouraged to engage in research, internships, and volunteer work, gaining practical experience that complements their academic studies. The flexible curriculum also allows for study abroad opportunities, broadening students' global health perspectives. Graduates of the program will be well-prepared for admission to medical schools and other health-related graduate programs, equipped with a comprehensive and adaptable skillset for future careers in medicine, dentistry, pharmacy, or allied health fields.

Program Requirements

The Pre-Professional Programs Major with a Pre-Medicine concentration at the University of Tennessee, Knoxville, is a **35** credit hour program designed to prepare students for medical school and health-related fields. It combines a strong foundation in biological, chemical, and physical sciences with an interdisciplinary approach that integrates social, cultural, ethical, and psychological aspects of healthcare. Students are encouraged to broaden their knowledge through research, internships, volunteer work, and/or study abroad, while fulfilling other college and university requirements.

Notes

* Meets Volunteer Core Requirements.

Several courses listed in the curriculum meet both a Volunteer Core Requirement as well as a requirement in the major. Students can choose to complete the Volunteer Core Requirement using alternative courses; however, this could increase time to degree.

In addition to the coursework listed in the curriculum and uTrack pathway, students should plan to engage in research, internships, volunteer work, and MCAT preparation throughout the program, particularly during the summer months. These activities not only strengthen applications to medical school but also to other health-related professions. By balancing academics with hands-on opportunities, students can develop critical skills and experiences beyond the classroom. This approach will provide a deeper understanding of the healthcare field and better prepare students for the challenges ahead.

The Pre-Medicine concentration is one of many pathways offered within the College of Arts and Sciences (CAS) to help prepare students for future careers in health-related fields. Common pathways include programs in the biological sciences, such as Biochemistry, Cellular, and Molecular Biology (BCMB), Microbiology, Ecology and Evolutionary Biology (EEB), Global Health, and Neuroscience. Students are encouraged to explore these various options with guidance from CAS academic advisors to determine the pathway that best aligns with their career goals and academic interests.

Credit Hours: 16

Term 5 Milestone Notes

Complete two additional science classes with a grade of C or better.

Term 6

Two courses from Group A and/or B Upper-Division Courses (major) **6** ***credit hours***
Engaged Inquiries Elective **4** ***credit hours*** *
Connections Course **3** ***credit hours***

[3] Applied Oral Communication Elective **3** *credit hours* *

Credit Hours: 16

Term 6 Milestone Notes

Complete BCMB 401 with a grade of C or better
Complete a total of at least 9 total upper-division (300-400 level) hours.

Term 7

Two courses from Group A and/or B Upper-Division Courses (major) 6 *credit hours*
Connections Course 3 *credit hours*
Engaged Inquiries Elective 3 *credit hours* *
Non-U.S. History 3 *credit hours* *

Credit hours: 15

Term 7 Milestone Notes

Complete a total of at least 24 upper-division (300-400 level) hours.

Term 8

One course from Group A or Group B Upper-Division Courses (major) 3 *credit hours*
Connections Course 3 *credit hours*
[3] Global Citizenship - US Focus Elective **3** *credit hours* *
Non-U.S. History 3 *credit hours* *
Upper Division Elective 3 *credit hours*

Credit Hours: 15

Term 8 Milestone Notes

Complete a total of 42 upper-division (300-400 level) hours.

Total Credit Hours 122

Footnotes

*** Meets Volunteer Core Requirements .**

[1]MCAT 2015 contains new content; therefore, pre-med students should complete BIOL 240 and BCMB 401 and select PSYC 110* or PSYC 117* and SOCI 120* to satisfy the Volunteer Core Requirement in Social Sciences.

[2]The Connections requirement may be satisfied in one of four ways:

- **completing 9 hours from one of the approved Connections packages,**
- **completing the requirements for a second major or minor, or**
- **completing 9 hours of study abroad coursework.**
- **completing all Air Force or Army ROTC program requirements**

Completion of at least 42 total upper-division (300-400 level) hours to receive a degree from the College of Arts & Sciences.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program? * ○ Yes ◉ No

Rationale*

The re-design of the Pre-Professional Programs Major, BS – Pre-Medicine Concentration at the University of Tennessee, Knoxville, addresses key issues with the existing three-year program, such as the heavy course load and lack of real-world healthcare exposure. The compressed timeline, requiring over 100 credit hours during the first three years, placed undue strain on students, often leading to academic struggles or shifts to other majors. By transitioning to a four-year program, the re-design reduces these pressures, allowing students to focus on academic excellence while incorporating interdisciplinary courses that explore the social, cultural, and psychological factors influencing healthcare.

Additionally, the re-designed program enhances advising and mentorship by offering more structured guidance throughout the medical school application process. New internship and shadowing opportunities will be integrated to ensure students gain hands-on healthcare experience, which is critical for medical school admissions. The curriculum will also offer flexible pathways, allowing students to explore alternative science-related careers, thereby improving retention and providing a well-rounded education.

Financial Impact*

The financial impact of the re-design for the Pre-Professional Programs Major, BS – Pre-Medicine Concentration, is expected to remain contained within the College of Arts and Sciences, with no anticipated impact on units outside the college. All proposed changes involve courses that are already part of the existing curriculum, and the primary financial effect will be the result of increased enrollment in these courses due to improved retention in the program. The re-design's shift to a four-year model, along with enhanced academic and advising support, is expected to reduce attrition and keep more students within the pre-med track, which will naturally boost enrollment in key science courses and electives already offered.

Outside of formal coursework, the college has proactively engaged in discussions with various departments within the college and external agencies and organizations to expand opportunities for research, internships, and volunteer work. These collaborations are intended to enrich students' experiential learning without incurring additional financial obligations to the college, as these partnerships will leverage existing resources and infrastructures. Thus, the re-design strengthens student outcomes while maintaining financial sustainability within the College of Arts and Sciences.

Impact on Other Units*

No impacts on other units.

Have you consulted with all programs/departments that will be impacted by this change?*

(•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Major Requirements:

The major consists of **32 hours**. Some courses may require prerequisites or corequisites that are not part of the neuroscience major.

I. Neuroscience Core

Complete 15 hours:

BCMB 311 Advanced Cellular Biology
BCMB 415 Foundations in Neurobiology
NEUR 200 Introductory Neuroanatomy
[Right] (one offering for 1 hour)
NEUR 301 Foundations of Behavioral Neuroscience
NEUR 400 Neuroscience Journal Club
[Right] (one offering for 1 hour)
NEUR 499 Senior Portfolio
[Right] (one offering for 1 hour)
PHIL 345 Bioethics
[Right] *

II. Laboratory Experience

Complete a minimum of 2 hours:

Credit Restriction: Any combination of 3 hours of the following courses may be used in the major.

BCMB 403 Neurogenetics Laboratory
BCMB 416 Neurobiology Laboratory
BCMB 452 Independent Research in Biochemistry and Cellular and Molecular Biology
[Right] *
COSC 493 Independent Study
EEB 400 Undergraduate Research
EEB 459 Comparative Animal Behavior Laboratory
MSE 494 Special Project Laboratory
NEUR 425 Brain-Image Analysis Laboratory
PSYC 489 Supervised Research
[After]
Or other independent courses with approval of Program Director

III. Remaining Hours, Complete 15 hours:

AUSP 302 Acoustics and Perception
AUSP 303 Introduction to Hearing Science
AUSP 306 Anatomy and Physiology of Speech
BCMB 401 Biochemistry I
BCMB 402 Biochemistry II
BCMB 412 Molecular Biology and Genomics
BCMB 423 Neural Basis of Behavior
BME 480 Computational Cell Biology
COSC 420 Biologically-Inspired Computation
EEB 450 Comparative Animal Behavior
JMED 450 Writing about Science and Medicine
[Right] *
NEUR 375 Behavioral Genetics
NEUR 403 Cognitive Neuroscience
NEUR 482 Advanced Topics in Neuroscience
PHIL 366 Philosophy of Cognitive Science
PHIL 373 Philosophy of Mind
PSYC 300 Child Development
PSYC 310 Learning and Thinking
PSYC 314 Cognitive Basis of Behavior
PSYC 320 Motivation
PSYC 325 Community-Engaged STEM Mentoring and Outreach
PSYC 330 Abnormal Psychology
PSYC 370 Evolutionary Psychology and Ethology
PSYC 410 Sensory Processes and Perception
PSYC 432 Childhood Psychopathologies
PSYC 454 Animal Communication
PSYC 461 Behavioral Neuroscience
PSYC 464 Drugs and Behavior
[After]
PSYC 484 Sleep and Dreaming
[After]
Or other courses with approval of Program Director

Honors Neuroscience Concentration

Neuroscience students may elect to pursue the Honors Neuroscience Program by completing the honors application form and emailing it to the Director of the Neuroscience Program. Students pursuing the Honors Neuroscience Concentration must complete an honors thesis under the guidance of a faculty member.

The degree requirements for the Honors Neuroscience Concentration are those for the regular Neuroscience Major with the following modifications:

Before applying to the Honors Neuroscience program, students must complete BIOL 150*, BIOL 160*, and PSYC 110* with an overall GPA of 3.5 or higher in these three courses.

Before applying to the Honors Neuroscience program, students must have an overall GPA of 3.25 or higher. Students must have an overall GPA of 3.25 or higher at graduation.

12 hours of courses drawn from the Neuroscience Core (Roman Numeral I) and/or Electives (Roman Numeral III) must be completed as Honors-by-contract courses, and a grade of B or better must be earned in courses used to satisfy this requirement.

1 hour of NEUR 497 must be completed with a grade of S. Students complete this course by completing an honors thesis that is approved by a faculty mentor. The approved honors thesis must be submitted to the Program Director no later than the last instructional day of the semester of intended graduation.

*** Meets Volunteer Core Requirements.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* Added four new courses; all are working through the approval process now: NEUR 425 is a lab course and can count toward the 2 credit lab requirement; NEUR 375 Behavior Genetics, PSYC 325 Community-Engaged STEM Mentoring and Outreach, PHIL 366 can count toward the 15 credits of electives.

Financial Impact* n/a

Impact on Other Units* Philosophy requested we add PHIL 366 to our list of electives and these are all new courses so are not listed in any other department's programs.

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

Footnotes

All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The Connections requirement may be satisfied in one of three ways: (1) by completing 9 hours from one of the approved Connections packages, (2) by completing the requirements for a second major or minor, or (3) by completing 9 hours of study abroad coursework. All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The courses indicated meet both a Volunteer Core Requirement* as well as a requirement in the major. Students can choose to complete the Volunteer Core Requirement* using alternative courses; however, this could increase time to degree.

*** Meets Volunteer Core Requirements.**

Major Requirements

Students must complete a total of 31 credit hours, at least 20 of which must be at the 300-level or above. No more than 6 hours from courses offered outside the psychology department may be counted toward the major. No more than 6 hours from PSYC 289 , PSYC 373 , PSYC 382 , PSYC 399 , PSYC 486 , PSYC 489 , PSYC 491 , PSYC 492 , PSYC 493 may be used in this major. Continuation in the psychology major requires maintenance of a GPA of 2.0. Students placed on Academic Probation will be informed in writing that they are on probation and their records will be reviewed. Students who continue on Academic Probation will be dropped from the major.

Core Courses (22 Hours)

To ensure that all psychology majors are exposed to the breadth of psychology as a hub science, including the diversity of human experience, all psychology majors are required to complete coursework in seven core areas.

1. Scientific Foundation of Psychology

Complete:

PSYC 294 Research Methods in Psychology Laboratory
[Right] or
[Right] *
PSYC 297 Honors: Research Methods in Psychology Laboratory
[After]
[Right] *
PSYC 295 Introduction to Psychological Research Methods
[Right] or
PSYC 298 Honors: Introduction to Psychological Research Methods

2. Human Development

Select one course:

HDFS 210 Human Development
[Right] *
PSYC 300 Child Development

3. Cognition and Learning

Select one course:

PSYC 310 Learning and Thinking
PSYC 314 Cognitive Basis of Behavior

4. Connections to the Biological Sciences

Select one course:

PSYC 211 Brain Science Applications
PSYC 301 Foundations of Behavioral Neuroscience
PSYC 320 Motivation
PSYC 370 Evolutionary Psychology and Ethology
PSYC 410 Sensory Processes and Perception

5. Connections to the Social Sciences

Complete:

PSYC 360 Social Psychology

6. Connections to Mental Health and Applications

Complete:

PSYC 330 Abnormal Psychology

7. Individual Differences and Human Diversity

Select one course:

PSYC 335 Intergroup Dialogue Facilitation
PSYC 415 Psychology of Religion
PSYC 434 Psychology of Gender
[Right] *
PSYC 435 Multicultural Psychology
PSYC 470 Theories of Personality
PSYC 471 Psychology of Prejudice
[Right] *
PSYC 476 African American Psychology
PSYC 491 Special Topics in Psychology-Study Abroad

[Right] *
SOWK 316 Social Justice and Anti-oppressive Practices

Electives (9 hours)

Psychology majors will choose a minimum of 3 additional courses, at least one of which must be at the 400-level. No more than 6 hours of PSYC 382, PSYC 399, PSYC 489, PSYC 491, PSYC 492, PSYC 493 may be counted toward the major and no more than 6 hours from courses offered outside the psychology department.

[Before]any PSYC course not already completed for the major

any non-departmental elective above not already completed for the major

BCMB 415 Foundations in Neurobiology
BCMB 423 Neural Basis of Behavior
CMST 414 Persuasion
COUN 480 Skills for Counseling
JMED 450 Writing about Science and Medicine
[After]
[Right] *

Proficiencies (0 hours)

To support the department's assessment efforts, students are required to complete two 0-credit courses, typically near the beginning and at the end of the student's degree program.

PSYC 299 Foundational Proficiency in Psychology
PSYC 499 Psychology Proficiency
[After]

Honors Concentration – Psychology

The Psychology Department offers an honors concentration that is a specially designed individualized mentorship program for high achieving students. Chancellor's Honors students and psychology majors with psychology GPAs of 3.5 or better and cumulative GPAs of 3.25 or better may apply.

Concentration Requirements

Complete:

all the requirements of the psychology major

PSYC 385 Statistics in Psychology
PSYC 397 Honors: Advanced Research Methods in Psychology
PSYC 498 Honors: Capstone Seminar

Complete one of:

PSYC 467 Psychology Honors Thesis
PSYC 468 Honors: Research Experience in Psychology
PSYC 497 Honors: Internship in Psychology
[After]

A major GPA of 3.5 and an overall GPA of 3.25 is required at graduation.

***Meets Volunteer Core Requirements.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ○ Yes
- ◉ No

Rationale*
just moving a paragraph to a different place - the paragraph that starts "Students must complete a total of 31 credit hours, at least 20 of which must be at the 300-level or above. No more than...." somehow got moved to below the heading for Honors so it looked like it only applied to Honors students and not all students. We are moving it to appear between the heading "Major Requirements" and "Core courses"

Financial Impact*
n/a

Impact on Other Units*
n/a

Have you consulted with all programs/departments that will be impacted by this change?*
- ◉ Yes
- ○ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Major Requirements

The Health Services Psychology Concentration consists of **31** credit hours.

Core Courses

Consistent with guidelines from the American Psychological Association, the concentration requires exposure to the broad foundations of behavior, along with an emphasis on applied coursework and an understanding of individual differences.

1. Scientific Foundation of Psychology

Complete:

PSYC 294 Research Methods in Psychology Laboratory
[Right] or
[Right] *
PSYC 297 Honors: Research Methods in Psychology Laboratory
[After]

[Right] *
PSYC 295 Introduction to Psychological Research Methods
[Right] or
PSYC 298 Honors: Introduction to Psychological Research Methods

2. Developmental Aspects of Behavior

Complete:

HDFS 210 Human Development
[Right] *

3. Cognitive Aspects of Behavior

Complete:

PSYC 314 Cognitive Basis of Behavior

4. Biological Aspects of Behavior

Select one course:

PSYC 211 Brain Science Applications
PSYC 301 Foundations of Behavioral Neuroscience
PSYC 375 Behavioral Genetics
PSYC 410 Sensory Processes and Perception

5. Social Aspects of Behavior

Complete:

PSYC 360 Social Psychology

6. Connections to Mental Health and Applications

Complete:

PSYC 330 Abnormal Psychology

Select two courses: (6 credit hours)

COUN 480 Skills for Counseling
PSYC 300 Child Development
PSYC 310 Learning and Thinking
PSYC 335 Intergroup Dialogue Facilitation
PSYC 373 Youth Mentoring: Supervised Field Experience
PSYC 382 Contemporary Topics in Psychology
PSYC 396 Internship in Psychology
PSYC 396N Internship in Psychology
PSYC 405 Illusion and Knowledge, Intuition and Reason
PSYC 409 Intergroup Dialogue Facilitation II
PSYC 430 Health Psychology
PSYC 432 Childhood Psychopathologies
PSYC 433 Theories of Counseling Psychology
PSYC 436 Positive Psychology
PSYC 440 Organizational Psychology
PSYC 445 Measurement and Testing
PSYC 464 Drugs and Behavior
PSYC 472 Psychology of Trauma
PSYC 473 Youth Mentoring: Theory, Research, and Practice
PSYC 475 Adolescent Development
PSYC 481 Intimate Partner Violence
PSYC 482 Topics in Psychology
PSYC 484 Sleep and Dreaming

7. Individual Differences and Human Diversity

Select two courses:

PSYC 335 Intergroup Dialogue Facilitation
PSYC 415 Psychology of Religion
[Right] *

PSYC 434 Psychology of Gender
[Right] *
PSYC 435 Multicultural Psychology
[Right] *

PSYC 470 Theories of Personality
PSYC 471 Psychology of Prejudice
[Right] *
PSYC 476 African American Psychology
PSYC 491 Special Topics in Psychology-Study Abroad
SOCI 341 Social Inequalities
[Right] *
SOCI 343 Race and Ethnicity
[Right] *
SOCI 375 Gender in Society
[Right] *
SOWK 316 Social Justice and Anti-oppressive Practices

8. Affective Aspects of Behavior

Complete:

PSYC 320 Motivation

Proficiencies (0 hours)

To support the department's assessment efforts, students are required to complete two 0-credit courses, typically near the beginning and at the end of the student's degree program.

PSYC 299 Foundational Proficiency in Psychology
PSYC 499 Psychology Proficiency

Footnotes

* Meets Volunteer Core Requirements

Connections requirement - The Connections requirement may be satisfied in one of four ways: (1) by completing 9 hours from one of the approved Connections packages, (2) by completing the requirements for a second major or minor, (3) by completing 9 hours of study abroad coursework, or (4) by completing all Air Force or Army ROTC program requirements.
All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts & Sciences.

Rationale*

This concentration is intended to (a) provide a pathway through the major for students interested in more applied careers and (b) allow the specific "health services psychology" concentration to appear on their transcript, signalling to future employers the focus of their coursework.

The requirements for the concentration are based on the "Discipline-specific knowledge" requirements of the new APA-accredited health service psychology master's program (see page 4) which may be fulfilled at the undergraduate level. Currently there are no such accredited master's programs in the country; as those programs emerge and guidance on requirements becomes clearer, we may make future adjustments to the concentration requirements.

Financial Impact*

None anticipated. The new concentration is quite similar to the existing major.

Impact on Other Units*

Our existing major lists the same out-of-department courses as options for the major. We are not adding any new out-of-department courses. The existing major requires students to complete EITHER PSYC 300 OR HDFS 210. This new proposed concentration would require all students to complete HDFS 210. Department Head Casey Barrio has indicated support for this change and believes they can accommodate demand (see attached email). Other departments have confirmed support for inclusion of their courses as options in this new concentration (see attached emails).

Have you consulted with all programs/departments that will be impacted by this change?*

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

Term 1

Rationale* This course's old title "Introduction to Descriptive Linguistics" gives students the false impression that it is an introductory course, while it is actually an advanced linguistics course. Students who have had some linguistics knowledge and advanced proficiency in a foreign language are more likely to succeed in this course. Therefore, we are proposing to change the title and add recommended background.

Also, changing primary course to be GERM 425 to be consistent with GERM 426.

[Right] *
REST 343 Religion, Nature, and Ethics

III. Select 6 additional hours of honors or honors-by-contract courses in Religious Studies.

*** Meets Volunteer Core Requirements**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ○ Yes
- ◉ No

Rationale*

We are reducing the number of credit hours for our major from 33 to 30 to better accommodate students who double major in Religious Studies and who add the major relatively late (e.g., in their junior year). We are removing the additional 3 credit hours from the elective sections of the regular and honors major (sections III and IV, respectively) so that this change does not affect the major's core structure.

We are also revising the honors major to allow students to take Religious Studies honors courses as well as honors-by-contract courses.

REST 204 (Religion and American Horror) was mistakenly included in section II.B of the honors major, which should only include 300-level courses, so we are correcting this by removing it from the major.

Also added the DE Shared Core for Campus- indicating that Religious Studies does not have an Honors version of DE and that the DE Religious Studies program is designed for students who have completed 45 credit hours and directed those interested in applying to visit https://volsonline.utk.edu.

Financial Impact*

none

Impact on Other Units*

none

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

Total Credit Hours 120

Footnotes

All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.
The Connections requirement may be satisfied in one of three ways: (1) by completing 9 hours from one of the approved Connections packages, (2) by completing the requirements for a second major or minor, or (3) by completing 9 hours of study abroad coursework. All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

* Meets Volunteer Core Requirements.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ( ) Yes
- (•) No

Rationale*

We are revising our major concentrations to require 30 credit hours instead of 33. This is a revision of our uTrack program for our regular major, which we offer both conventionally and through Distance Education. We changed the uTrack program for Term 7 to recommend 6 hours in the major (vs. the current 9) and 6 hours of electives (vs. the current 3). This does not change the overall credit hours for that term, which remains at 15 hours.

New shared core in this program clarifies DE is available for non-honors version only.

Financial Impact*

none

Impact on Other Units*

none

**Honors Concentration not available for Distance Education

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

Term 1

Foreign Language **3** *Credit Hours* (intermediate level)

Total Credit Hours 120-122

Footnotes

All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The Connections requirement may be satisfied in one of three ways: (1) by completing 9 hours from one of the approved Connections packages, (2) by completing the requirements for a second major or minor, or (3) by completing 9 hours of study abroad coursework. All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

* Meets Volunteer Core Requirements.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?* ○ Yes ◉ No

Rationale* We are revising our major concentrations to require 30 credit hours instead of 33. This is a revision of our uTrack program for our Religion and Nonprofit Leadership major concentration, which we offer both conventionally and through Distance Education. We changed the uTrack program for Term 7 to recommend 3 hours of electives in the major (vs. the current 6) and 9 hours of electives (vs. the current 6). This does not change the overall credit hours for that term, which remains at 15 hours.

Financial Impact* none

Impact on Other Units* none

Have you consulted with all programs/departments that will be impacted by this change?* ◉ Yes ○ No

REST 380 American Buddhism
[Right] *

IV. Select 3 hours (may include another course in section III)

any remaining Religious Studies course at the 200-level or above

* Volunteer Core Requirements.

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
- ○ Yes
- ◉ No

Rationale*

We are reducing the number of credit hours for the Religion, Race, and Ethnicity major concentration from 33 to 30 to better accommodate students who double major in Religious Studies and who add the major relatively late (e.g., in their junior year). We are removing the additional 3 credit hours from the elective section (Section IV) of the major so that this change does not affect the major's core structure.

We are also revising this major concentration to correct previous errors. REST 204 (Religion and American Horror) was mistakenly included in section II.B of the major, which should only include 300-level courses, so we are correcting this by removing it from the major. We also added the courses in Section III of the major to Sections II.A and II.B of the major as well to allow students to take more courses related to this major concentration's focus of intersections of religion, race, and ethnicity in North America.

Financial Impact*

none

Impact on Other Units*

Registration Restriction(s)

Registration Permission

Equivalency JUST 411

Rationale* SOCI 411 has always been taught from within a "justice studies" framework, and so both courses are highly equivalent in substance and approach. Crosslisting SOCI 411 as JUST 411 also helps with staffing the new JUST 411 course given that the Program Chair of the newly created Justice Studies, Tyler Wall, created and also regularly teaches SOCI 411 as part of his standard teaching load. Please see attached email of Sociology Head Dr. Stephanie Bohon granting permission for the crosslisting of the primary course.

Rationale* This course's old title "Introduction to Descriptive Linguistics" gives students the false impression that it is an introductory course, while it is actually an advanced linguistics course. Students who have had some linguistics knowledge and advanced proficiency in a foreign language are more likely to succeed in this course. Therefore, we are proposing to change the title and add recommended background.

Also, changing primary course to be GERM 425 to be consistent with GERM 426.

Impact on Other Units*

College of Arts and Sciences - School of Art - Art History Major, BA

2025-2026 UG Revise Program

General Catalog Information

College* College of Arts and Sciences

Department* School of Art

Program Name* Art History Major, BA

Degree Type* Bachelor of Arts

Program Type* Undergrad (Major)

Campus code*
- [x] Knoxville Campus
- [ ] Distance Ed
- [ ] Nashville Campus
- [ ] UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. Existing courses MUST be imported. Do not use the Add Course button unless the course is not yet available for import.

Requirements*

College Requirements

Arts and Sciences

Prerequisites (12 hours):

A. Complete (grade of C or better):

ARTH 172 Western Art: Ancient through Medieval
[Right] *
ARTH 173 Western Art: Renaissance to Contemporary
[Right] *

B. Select one course (grade of C or better):

ARTH 152 Survey of Islamic Art
ARTH 183 Asian Art
[Right] *

C. Select 3 hours (grade of C or better):

any 100-200 level Art course (ART)
any 200-level Design course (ARTD)
any 100-200 level Two-Dimensional Arts course (ARTA)
any 100-200 level Three-Dimensional Arts course (ARTB)
any 100-200 level Four-Dimensional Arts course (ARTC)

Major Requirements:

The Art History major consists of **30** credit hours.

A. Select one course from four of the six areas (12 hours):

Ancient World

ARTH 410 Art and Image in the Age of Pharaohs
ARTH 421 Greek Art
ARTH 422 Roman Art

Medieval/Early Renaissance

ARTH 425 Early Christian and Byzantine Art to 1350
ARTH 441 Northern European Painting, 1350-1600
ARTH 443 Islamic Art in Global Context I: Medieval
ARTH 451 The Art of Italy, 1250-1450

Early Modern

ARTH 444 Islamic Art in Global Context II: Early Modern
ARTH 452 Art of Italy, 1475-1600
ARTH 453 Art of Southern Europe, 1575-1700
ARTH 455 The Global Renaissance
ARTH 456 Global Baroque Art and Architecture

American

ARTH 470 African American Art
ARTH 472 History of 20th-Century American Art
ARTH 473 19th-Century American Art
ARTH 474 Transatlantic Modernism

19th/20th Century

ARTH 403 History of Photography
ARTH 416 Chinese Art of the 20th and 21st Centuries
ARTH 433 History of Film and Modern and Contemporary Art
ARTH 472 History of 20th-Century American Art
ARTH 475 Dawn of Modernism: 19th-Century European Art
ARTH 476 Modernism and Postmodernism: 20th-Century European Art

Non-Western

ARTH 410 Art and Image in the Age of Pharaohs
ARTH 411 Art of South and Southeast Asia
ARTH 413 Art of China: Neolithic Period Through the Song Dynasty
ARTH 414 Art of China: Yuan through Qing Dynasties
ARTH 416 Chinese Art of the 20th and 21st Centuries
ARTH 419 Art of Japan
ARTH 461 Art of Southern and Eastern Africa
ARTH 462 Art and Archaeology of Ancient Africa
ARTH 463 Arts of the African Diaspora
ARTH 464 Oceanic Art

B. Select 12 additional hours:

any 200-400 level Art History courses, or any of the following courses

*** Meets Volunteer Core Requirements.**

Is this proposal Adding or Removing a 5-Year and/or Honors version of this program?*
○ Yes
◉ No

Rationale*
Revisions reflect School of Architecture proposal restricting enrollment of ARCH 211 and ARCH 212. Those courses have been removed and replaced with ARCN 211 and ARCN 212. This notice came in late November, after this concentration had already been revised and approved by the UG Council.

This duplicate proposal also corrects moving the prerequisite section above the Major Requirements and removed the 200-level ARTD courses accepted in the prerequistes as they don't exist any longer.

Financial Impact*
none

Impact on Other Units*
NA

Have you consulted with all programs/departments that will be impacted by this change?*
○ Yes ◉ No

Can this program lead to professional licensure? If yes, what type(s)? If no, leave this field blank.

Arts and Sciences Originators Only

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

Credit Hours 13 - 15

Term 8 Milestone Notes

Completion of at least 42 total upper-division (300-400) hours

Total Credit Hours 120

Footnotes

All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The Connections requirement may be satisfied in one of three ways: (1) by completing 9 hours from one of the approved Connections packages, (2) by completing the requirements for a second major or minor, or (3) by completing 9 hours of study abroad coursework. All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The courses indicated meet both a Volunteer Core requirement as well as a requirement in the major. Students can choose to complete the Volunteer Core requirement using alternative courses.

Select one course from 4 of the 6 areas listed: Ancient World (ARTH 410, ARTH 421, ARTH 422), Medieval/Early Renaissance (ARTH 425 , ARTH 441*, ARTH 443*, ARTH 451*), Early Modern (ARTH 443*, ARTH 452*, ARTH 453, ARTH 455*, ARTH 456*), American (ARTH 470, ARTH 472*, ARTH 473*, ARTH 474), 19th/20th century (ARTH 403, ARTH 416, ARTH 433, ARTH 472*, ARTH 475, ARTH 476), Non-Western (ARTH 410, ARTH 411, ARTH 413, ARTH 414, ARTH 416, ARTH 419, ARTH 461, ARTH 462, ARTH 463, ARTH 464).

* Meets Volunteer Core Requirement.

ARTH 463 Arts of the African Diaspora
ARTH 464 Oceanic Art

B. Select three courses from the following (9 hours):

ARTH 405 Topics in Visual and Legal Culture
ARTH 483 History of Museums and Collections
ARTM 379 Special Topics in Museum Studies
ARTM 479 Special Topics in Museum Studies
ARTM 490 Introduction to Museum Studies

C. Complete 3 credit hours of internship (3 hours)

ARTM 495 Internship

Complete (6 hours):

ARTH 375 Seminar in Art History I
ARTH 402 Seminar in Art History II
[Right] *

Notes:

* **Meets** Volunteer Core Requirements.

Rationale*

The proposed concentration builds on the demonstrated student demand for our recently-established interdisciplinary Museum and Curatorial Studies (MCS) minor, which, only in its fourth year, is reflecting market demand already with 29 minors. The proposed degree concentration, which will be supported by a new TT faculty hire in AY 25-26, provides career paths to professions in museums and galleries, and appeals widely to students across campus majoring in fields ranging from anthropology to journalism and botanical science. The U.S. Labor Department recently reported that, "Overall employment of archivisits, curators, and museum workers is projected to grow 10 percent from 2022 to 2032, *much faster than the average for all occupations*" (https://www.bls.gov/ooh/education-training-and-library/curators-museum-technicians-and-conservators.htm). At a moment when students, administrators, and faculty are struggling to balance the demands of the economy and a need for greater professionalization with the long-standing benefits of a wide-ranging humanities education, the MCS concentration will provide students with vocational training *through* a traditional humanities education with a clear career path to a growth industry.

Our current art historians are uniquely well-suited to support this concentration. Dr. Wright was assistant curator of Far Eastern art at the Los Angeles County Museum of Art, Dr. Cambell works with the Rosenfeld Gallery in New York, and Dr. Hiles is laying the groundwork for an exhibition that will accompany his latest book. Dr. Wood is a practicing curator and art critic with experience at institutions including the Art Institute of Chicago and the National Gallery of Art. Wood curated a permanent gallery of the 3–2–1 Qatar Olympic & Sports Museum in Doha, Qatar, for the 2022 FIFA World Cup and has an upcoming exhibition at the Sunaparanta Goa Centre for the Arts in India in 2025. She also serves as a commissioning editor for contemporary art criticism for *The New Art Examiner*. In addition to this extensive curatorial expertise, we can offer our students an introduction to the legal issues that a robust MCS program needs. Campbell has a J.D. from Yale Law School, specialized in intellectual property law, and is an active member of the New York Bar Association; she publishes in legal journals and has had her scholarship cited by the federal district courts. She has been teaching a popular course on art law in SOA for several years.

Financial Impact*

none.

Impact on Other Units*

The proposed degree concentration, which will be supported by a new TT faculty hire in AY 25-26, provides career paths to professions in museums and galleries, and appeals widely to students across campus majoring in fields ranging from anthropology to journalism and botanical science. The U.S. Labor Department recently reported that, "Overall employment of archivisits, curators, and museum workers is projected to grow 10 percent from 2022 to 2032, *much faster than the average for all occupations*" (https://www.bls.gov/ooh/education-training-and-library/curators-museum-technicians-and-conservators.htm). At a moment when students, administrators, and faculty are struggling to balance the demands of the economy and a need for greater professionalization with the long-standing benefits of a wide-ranging humanities education, the MCS concentration will provide students with vocational training *through* a traditional humanities education with a clear career path to a growth industry.

Financial Impact* none.

Impact on Other Units* NA

Have you consulted with all programs/departments that will be impacted by this change?* (•) Yes ( ) No

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description The proposed interdisciplinary Art BA Concentration is designed to prepare students for careers on the business side of art galleries, museums, and creative entrepreneurship. Core classes will provide students with a broad introduction to traditional and new concepts, contemporary art practices, various art media and processes, and emerging technologies along with economics, finance, management, marketing, and advertising. In addition to requirements in both the School of Art and Haslam College, students will have electives in both units that will permit them to focus more intensively or specialize in particular areas of interest.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below. For additional information, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: **Knoxville Campus, Distance Ed, Nashville Campus, UTSI**

Certificate Type options should be entered from the following list: **Add-On, Stand-Alone**

Credit Hours 120 credit hours is the minimum for majors and concentrations.

Requirements List the required courses using the "View Curriculum Courses" tab; add the listed courses and all program text and requirements into cores in the "View Curriculum Schema" tab. ENT 492 Entrepreneurship Internship

Professional Development (3 credit hours):

ART 455 Professional Practice Seminar

Undergraduate Council	U 14555	Notes:	February 18, 2025

***** Meets Volunteer Core Requirements

Rationale* While our existing BA degree program provides exemplary career training for students seeking scholarly and creative careers, many students seek careers on the institutional, entrepreneurial, and industry side of these disciplines.
The proposed new concentration within the BA Art degree is designed to meet the expanding role of the arts in the **creative economy.**

Financial Impact* We have consulted with Breanna Hale, Executive Director, Anderson Center for Entrepreneurship & Innovation; Lane Morris, Associate Dean; and George Drennon, Assistant Dean for Undergraduate Programs. They have assured us that they can accommodate students from this proposed concentration into their listed courses.

Impact on Other Units* Anderson Center for Entrepreneurship & Innovation, Haslam College of Business

uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

Term 1

Foreign Language 3 *Credit Hours* (intermediate level)
Quantitative Reasoning (QR) Elective 3 *Credit Hours* *
ENGL 101 - English Composition I 3 *Credit Hours* * (or equivalent)
