THE UNIVERSITY OF TENNESSEE

Budget Document

Fiscal year 1959

Submitted to the
Board of Trustees
Annual Meeting, 1958

TABLE OF CONTENTS

THE UNIVERSITY OF TENNESSEE
Knoxville
Office of the President

June 19, 1958

Board of Trustees,
The University of Tennessee,
Knoxville, Tennessee.

Gentlemen:

There are transmitted herewith proposed budgets for the University General Fund, The Memorial Research Center and Hospital, and the Athletic Department of The University of Tennessee for the period from July 1, 1958, to June 30, 1959. The proposals included herein have been given careful study and are the results of program analyses on the part of the department heads, deans, directors, and administrative personnel, and I recommend these budgets to you for your approval.

Although the coming year is the second year of the current biennium, it is not the typical second year in that additional revenues which have been provided by both appropriation allotments and increased fees have made it possible to make certain salary adjustments which were urgently needed. The general budget proposed herein provides for expenditures of $18,045,527.11 which are $827,246.90 in excess of revenue presently budgeted for fiscal year 1959. This excess is to be financed from the impoundment release of 10 per cent of gross appropriations applicable to the current fiscal year 1958.

We are grateful to the Governor and to the Director of the Budget for the release of the current impoundment. Except for the continuation of the Capital Improvement Program of the sub-stations of the Agricultural Experiment Station, this entire amount has been reserved to partially finance the proposed program for 1959.

This budget reflects two significant changes relative to State appropriations. First, in accordance with the Acts of the 1957 General Assembly any sales tax overage of the State for the fiscal year 1957 was to be divided among educational programs. The University's share of this overage amounted to $100,512.58, and upon receipt was appropriated by the Board of Trustees to finance the employer's share of the State Group Hospitalization Insurance which was also authorized by the 1957 Legislature and put into effect for University staff December 1, 1957. The annual cost of this insurance to the employer is approximately $100,000. Consequently, the special funds financed the entire program for fiscal year 1958 and will finance approximately five months of it for fiscal year 1959. The cost of the program for the remaining seven months will be financed out of general funds and appears in this budget under Staff Benefits.

Secondly, the Governor, recognizing the imperative need for salary adjustments, has permitted the University, in the preparation of revenue estimates for 1959, to budget 95 per cent of the appropriated funds instead of only 90 per cent as has been the custom for a number of years. Consequently, the 1959 budget is being supported by 105 per cent of the annual appropriation. Ten per cent results from the 1958 impoundment release which does not appear as estimated revenue in the 1959 budget. The 95 per cent of the 1959 appropriation appears as revenue. There are two minor exceptions to the 95 per cent allotment. The Municipal Technical Advisory Service was budgeted at 90 per cent and the Memorial Research Center at 100 per cent.

Other significant changes in revenue estimates for 1959 are:

a. The established student fee rates at the Knoxville, Nashville, and Martin Units are to be increased effective the Fall Quarter.
b. Fee rates at the Medical Units which were increased January 1, 1958, will be in effect for the full four quarters of 1959 as compared to two quarters of the current year.
c. Based upon appropriation bills presently before Congress, it is anticipated that Federal appropriations for the Agricultural Extension Service and the Agricultural Experiment Station will be increased. The expected increase for the Agricultural Extension Service has been included herein and has primarily been used for salaries. The Experiment Station budget does not reflect the expected increase and an amended budget will be filed accordingly should the increase materialize.

Increased funds resulting from sources mentioned have been budgeted principally in the areas of increased staff benefits, salary adjustments on a merit basis, and provision for additional physical plant costs resulting from new buildings being put into operation. More specifically these fund requirements are:

a. To finance employer's share of Group Hospitalization Insurance for seven months. Cost for five months is provided from the sales tax overage for 1957.
b. To provide employer's contribution to TIAA retirement and Social Security necessitated by the addition of new positions and an increased salary base.
c. To provide pension stipends for staff who had service prior to September 1, 1955, and who are retiring at the close of the current year.
d. To finance salaries of new positions necessitated by increased enrollments at all branches of the University and the expanded programs at Martin.
e. To cover salary costs for twelve months of newly employed staff who were in the current budget for only ten months.
f. To provide for increases in base pay of staff and faculty throughout the University. All proposed increases are based on merit and result from the recommendations of department heads, deans, and directors as submitted to the President. No "across the board" increases have been given and every member of the staff has not been proposed for a merit increase.
g. To provide for increased costs of instructional supplies, laboratory equipment, materials used in the maintenance and operation of University buildings, postage, and other general expenses. New buildings to be added to the operating budget include:

1. Armory-Field House - Knoxville
2. Library - Knoxville
3. 810 Broadway - Nashville (only partially operated in 1958)
4. Air-conditioning in University Center - Knoxville
5. Classroom - Administration Building - Martin

h. To finance amortization of debt and interest on the 810 Broadway Building, Nashville.

As I have indicated before, the University's most pressing problem at the current time is the improvement of our salary scale. Throughout the nation the supply of qualified teachers and trained research personnel is not increasing as rapidly as the growth of the student bodies of the various institutions. A high percentage of graduates at the Ph.D. level are going into industry rather than institutional teaching or research. According to a recent study made on a national basis only one out of each four Ph.D. graduates in Chemistry is going into college work and only two out of five in Physics and the other sciences are choosing careers in education. Formerly most recipients of the doctor's degree accepted teaching positions.

Since qualified teaching personnel are in short supply the competition is increasing all the time. It is not a case of competition within Tennessee or even the South. We must compete for our staff on a nationwide basis.

Approximately $475,000 of the increase in this proposed budget is devoted to improvement in the salary scale. Although the increases provided have had a salutary effect on the moral of our staff, they have hardly kept up with increases which have taken place elsewhere in universities as well as business and government. We notice that the Post Office and Military Services have had substantial raises during the current year, and it is now proposed that all federal employees receive a 10 per cent raise. One national organization in a study of faculty salaries has set up criteria for measurement of salary scales and has created categories AA, A, B, C. D. E, and F. In accordance with these criteria the University's elements at Knoxville after the proposed adjustments will place no better than Category E among comparable institutions nationally.

During the past year and in the early part of the coming year we have or will occupy new facilities at Memphis, Martin, Knoxville, and Nashville. The addition of these new facilities greatly increases the University's programs, but at the same time adds considerably to the cost of the operation of the University's physical plant. It is estimated that the operation of the Armory-Field House, Knoxville, will cost approximately $26,000 a year. The operation of the 810 Broadway Building in Nashville, including the amortization of the debt, is estimated to be $113,500. In addition to the cost required by these new facilities the cost of labor and supplies for the whole physical plant operation has continued to increase.

A summary of comparative actual revenue and expenditures of the General Fund for the year 1957 and the estimated revenues and expenditures for 1958 and 1959 follows:

	Actual 1957	Probable 1958	Proposed Budget 1959
Revenue	$15,539,800.44	$16,728,793.53	$17,218,280.21
Expenditures	15,475,913.94	16,982,228.13	18,045,527.11
Surplus or (deficit)	$ 63,886.50	$ (253,434.60)	$ (827,246.90)

The budget for the Memorial Research Center and Hospital (Appendix I) is presented in separate parts; one is the Hospital operation, including the drugstore, and the other for the Research Program. During the current year the Research Program has been partially staffed under the direction of Dr. Stanfield Rogers, and approximately $117,800 of the $150,000 appropriation for 1958 has been used to cover expenses of the initial personnel and to set up the laboratory equipment. The program for 1959 will be supported by the carry forward of 1958 funds and the State appropriation of $100,000 plus additional gifts and grants which have already been received, or are expected from various foundations and organizations interested in the type of medical research to be carried on here.

The Hospital operation is expected to continue at about the same pace as has taken place during 1958. It is expected that the modest excess of revenue over expenditures resulting from hospital operations and the accumulation of the reserve for replacement of equipment will greatly reduce the Hospital's advances from the University's General Fund. It is to be understood that this budget is flexible and that expenses will not be allowed to exceed revenue.

The budget for the Athletic Department as shown in Appendix II has not been changed from the manner in which it was submitted by the Athletic Director and recommended by the Athletic Council. The Director explained that his estimates were very liberal for expenditures and always on the conservative side as far as revenue is concerned. In all probability, the current fiscal year 1958 will show the Athletic Department in a much better position than estimates in this budget indicate. Likewise, I will guess that the football revenues for the coming fall season will also be in excess of the amounts herein estimated. Consequently, it is recommended that this budget be adopted with the understanding that expenditures will not take place unless there be sufficient means of financing them from current revenues or accumulated funds.

These budgets, as prepared, permit a strong program for the University within the available resources, and it is recommended that:

a. The attached budgets be adopted with the estimated excess expenditures financed from current funds.
b. Every effort be made to secure the release of the remaining impounded state funds applicable to the coming year.
c. Any remaining balance of current funds be considered as a reserve for contingencies to be used to:

    1. Employ additional staff where enrollment requirements warrant it.
    2. Increase operating appropriations of departments where changing conditions during the year necessitate additional funds.

3. Make salary adjustments for key personnel in emergency cases as they arise during the year.

4. Improve physical facilities for academic and research departments as the opportunity arises.

Respectfully submitted,

C. E. Brehm
President
