IJNS Student Writing Competition

Today's students in nuclear science, technology, and security are on the cutting edge of research, engaged in international and domestic policy debates, and are offering fresh perspectives on challenging problems. By encouraging students to publish their insights and research, the *International Journal of Nuclear Security* hopes to foster international collaboration, to recognize standout individuals, and to expose aspiring nuclear security professionals to research being conducted by professionals and peers.

The editorial staff of the *journal*—in conjunction with Institute for Nuclear Security (INS), the Howard Baker Jr. Center for Public Policy, and the Institute for Nuclear Materials Management (INMM) Student Chapter at the University of Tennessee, Knoxville—are pleased to announce the first IJNS Student Writing Competition. Graduate and undergraduate students passionate about nuclear security and nonproliferation, from all parts of the world, are encouraged to participate in this opportunity to be recognized for their valuable insights and research related to these vital issues. Submissions from multiple disciplines are encouraged, including scientific R&D, physical protection systems, human reliability, policy decisions & diplomacy, economics, law, and education & training.

Eligibility

Authors and co-authors for all contest submissions must be enrolled as full-time students from any country (graduate or undergraduate) at the time of submission. All work must be original and previously unpublished. Manuscripts must conform to the competition guidelines; see IJNS website.

Prizes

This year's contest winners will receive cash prizes—to be announced on the IJNS website. The first-place winner will be published in the *International Journal of Nuclear Security*; additional awardees will be considered for publication. Details at IJNS website.

Deadline

All submissions must be made on or before midnight on October 15, 2015 (Eastern U.S. time).
