About the Booklist:

This booklist started decades ago as an attempt to locate early children's literature that would help promote positive attitudes about aging and positive aging. In reviewing this literature it was found that portrayals of older adults often focused on the negative aspects of aging and mirrored our society's ageist attitudes. The booklist contains books that have meaningful, positive portrayals of aging and is available for free, online at the Lincoln Memorial University Carnegie-Vincent Library (www.library.lmunet.edu).

This booklist is a compilation of carefully selected children's literature that contains positive, meaningful portrayals of older adults and promotes positive aging. Positive aging is a relatively contemporary term that denotes attitudes, lifestyles, and activities that maximize the potentials and quality of life of life's later years. Helping to promote positive aging is important. Children today are expected to live longer than any other generation of Americans. A child born in the U.S. can expect to live to be 80, 90, or even 100 years old. Centenarians (people 100 years old and older) are the most rapidly growing segment of the U.S. population. The attitudes children form about aging will play an important role in how successfully they age. The images of older people in children's literature play an important role in attitude formation.

Books on the booklist portray aging as a natural and lifelong process of growing and developing, present similarities between young and old, show young and old enjoying each other and learning from each other, view older adults as valuable and contributing members of society, and help children to think about life's later years. Books that focus on death, dying, disability, dependency, disease, and dementia are not included on this list. These topics are not synonymous with aging.

The books can be used to help children see their "elder within"¹ (the older person they can become), see the potentials of aging, and think in terms of "lifespan activities" (activities they can do now and can do as an older person--like reading, writing, art, dance, music, theater, traveling, and athletic activities). They can stimulate interesting discussions, promote positive attitudes about aging, promote positive aging, help children learn about growing up and growing older and to start planning for the long life ahead of them. Have older adults read the books to children as an intergenerational experience. Have children write their own stories about older adults and what they would like to be as an older adult.

The first part of the booklist presents *books-in-print* with publisher, reading level, ISBN, and cost. Please note that publishers and costs of books can change. Many of the books listed are now also available as eBooks. The listing of books-in-print is followed by: 1) a table of some of my *favorite books-in-print*, 2) a list of *Out-of-Print Stories* (OOPS), 3) a table of some of my favorite *OOPS*, and 4) a table of *books with multicultural content*. Books can soon become out-of-print. There are many excellent *OOPS* that can be obtained at libraries or through vendors.

In recent years, books from the extensive *Rookie Biographies* series (Grades 2-3) have been added to the booklist. These bibliographies address growing up and growing older and the accomplishments of people as older adults. They offer the opportunity to talk with children about what they would like to be and do as an older adult. Selected books from the series are found under the “R” alphabetical listing on the booklist. Please review the series to find additional books for the young reader.

In 2009, The Association for Gerontology in Higher Education (AGHE) started the *AGHE Children’s Book Award* for early children’s literature (Preschool-Grade 5) with meaningful, positive portrayals of older adults. These awards are presented biannually at the AGHE annual meeting. Books receiving AGHE awards are: *Rock, Brock and the Savings Shock* (Bair), *The Golden Rule* (Cooper), *Niwechihaw/I Help* (Nicholson), *Ain’t Nobody a Stranger to Me* (Grifalconi), *Sometimes its Grandmas and Grandpas and Not Mommies and Daddies* (Byrne), *Shoebox Sam* (Barrett), and *Marching With Aunt Susan: Susan B. Anthony and the Fight for Women’s Suffrage* (Murphy). Anyone can nominate books for the award by contacting AGHE (<http://www.aghe.org>). The AGHE website also has a listing of selected children’s books with aging content.

Another resource for early children’s literature with positive aging content is the *A is for Aging, B is for Books* website by Lindsey McDivitt (<http://www.lindseymcdivitt.com>). McDivitt² provides reviews on children’s books with positive aging content and notes “Positive Aging picture books stay away from narrow portrayals of older adults and acknowledge the variety of interests, abilities, and talents that do not melt away with old age, but grow with experience.” McDivitt’s commentaries on this literature are interesting and informative. Please visit this website.

Some things to do:

- Contact your local schools and libraries to make sure these books are available
- Contact authors and publishers about the need for children’s books that promote positive aging and positive attitudes about aging
- Purchase and share books with children that promote positive aging

The following is a quote we should all take to heart: “Only as children view their own aging and the elderly positively will they be able to achieve the life, liberty, and pursuit of happiness that are considered rights of each in our society.”³ We have the potential to create a generation of Americans who see the potentials of old age and value older people. This is a legacy worth leaving.

If you have books you would like considered for the list, or comments about the list, please contact me at smcguire@utk.edu. I look forward to hearing from you. Thank you for visiting the booklist.

I would like to acknowledge the continuing support and assistance of Sarah Senter, Lincoln Memorial University librarian with this booklist.
