This 1985-86 Directory of Tennessee Municipal Officials is the 41st issue in the directory series. It is compiled from information submitted by the state's 334 municipal governments. Every effort has been made to make the entries current, complete, and correct. However, for cities that did not submit updated data, it was necessary to rely upon the latest information available in MTAS files.

To all city officials who contributed information, we are grateful. Without your cooperation, publication of the directory would not be possible. We appreciate the work of Jacqueline Kersh, our MTAS Special Projects Consultant, who has primary staff responsibility for the Directory and MTAS Word Processing Specialist Debe Linn, who maintains the directory and made valuable format suggestions.

Copies of the directory are available on a complimentary basis to officials of all Tennessee municipalities; to agencies of Tennessee state government, and to public libraries. Others wishing to obtain the directory may do so on a prepaid basis. Changes in municipal officials are provided through a prepaid subscription service from MTAS and also are published in Tennessee Town & City newspaper.

Comments and suggestions regarding the directory's use and improvement are welcomed.

GUIDE TO USE OF DIRECTORY

Under the name of each city is its address, zip code, and principal phone number. If there is no city hall or office, the number is for an official's home or place of business.

At the far right is the date of the next city election, the county in which the city is located, a letter (E, M, or W) for the grand division of the state in which the city is located, and the city's population (see below).

Below the solid line is first, the time and place of the regular meetings of the governing body and, second, any days city offices are closed (other than Sunday and holidays).

If phone numbers for departments differ from the principal city number, this information and appears in the department listing. The numbers are as they were submitted by each city and have not been verified by MTAS.

Population data for municipalities are given on the next four pages: first in alphabetical order, then in descending order, according to population. These population figures are as of July 1, 1985, as certified by the Tennessee Local Planning Assistance Office. The next nine pages list cities by counties, under the three grand divisions of the state, and counties and their populations, according to 1980 U. S. Census.
This is the key to the abbreviations used on the position titles.
