Clarke, director of the Center for Transportation Research, has been appointed to the Thought Leadership Council of the American High Speed Rail Alliance (AHSRA), a nonprofit advocacy organization dedicated to creating and sustaining a clean and energy-efficient advanced national high-speed rail system in the United States.

David Ilove, research professor in the Department of Electrical Engineering and Computer Science, recently represented UT at the annual meeting of Underwriters Laboratory (UL) in Chicago. UL is the leading international standards-based engineering testing organization. Ilove is a long-serving member of UL's Advisory Committee responsible for reviewing results of academic engineering research initiatives.

John Prados, professor emeritus in the Department of Chemical and Biomolecular Engineering, received the College of Engineering's prestigious Nathan W. Dougherty Award at the college's annual Faculty and Staff Awards Dinner. A former UT vice president, Prados has served at UT Knoxville for more than 50 years, beginning as a graduate assistant in 1953.

George Pharr, professor and head of the Department of Materials Science and Engineering, received the Innovation in Materials Characterization Award (IMCA) from the Materials Research Society. Pharr was recognized for "seminal contributions to the development of the instrumentation and analysis methods of nanoindentation for characterizing the mechanical properties of materials at the micrometer- and nanometer-length scales."

Shanfeng Wang, assistant professor in materials science and engineering, and his student, **Lei Cai**, received a STAR honorable mention in the 34th annual Meeting and Exposition of the Society for Biomaterials in Seattle. The recognition came for the outstanding quality of an abstract of their article to be published in Biomaterials journal in June 2010. COE JOINS ELITE GROUP

The UT Knoxville **College of Engineering** is the newest member of a consortium of engineering schools with an approved National Academy of Engineering (NAE) Grand Challenge Scholar Program (GCSP). As of May 2010, only six engineering schools in the country hold this designation. In 2008, the NAE identified 14 Grand Challenges for engineering in the 21st Century. These challenges represent the broad themes at the boundary of technology and society like solar energy and clean water. The GCSP is the companion program for engineering schools that have accepted the challenge of designing combined curricular

and extra-curricular programs to prepare students to be the generation that solves the grand challenges facing society.

FULBRIGHT SCHOLAR

Donald G. Hodges, professor of forest economics and policy, will travel to Slovenia as a Fulbright Scholar for six months, where he will teach and conduct research on forest management at the University of Ljubljana and the Jozef Stefan Institute. News of his appointment was not available when the other five UT Fulbright Scholars were announced in a previous issue of this newsletter.
