SCHOOL OF SOCIAL WORK
DEAN'S OFFICE

BANKING CHAIR HONORS BUTCHER

The United American Bank has given UT \$500,000 to support a chair of banking in the UT Knoxville College of Business Administration.

The contribution is the single largest corporate gift in the University's history. The chair will be named in honor of C.H. Butcher, Sr., a director of UAB and president of the City and County Bank of Union County.

Butcher's son, Jake, who is chairman and chief executive officer of UAB, is a former student of banking and finance in the UTK College of Business Administration. UAB has operations in Knoxville, Nashville, and Memphis.

The gift is part of the University's \$35 million *Tennessee Tomorrow* private gifts campaign. Area cochairmen have been appointed for the campaign: Knoxville, Robert A. Culver and James A. Haslam; Chattanooga, Scott L. Probasco, Jr., and Hugh O. MacLellan, Sr.; Memphis, Dr. Bland W. Cannon and Frank M. Norfleet; Martin, King W. Rogers, Jr., James M. Glasgow, and Ray Smith; and Nashville, Robert M. Condra.

RECORD CORPORATE GIFT—Shown at the recent press conference announcing the largest single corporate gift to UT—\$500,000 from the United American Bank—are UT and bank officials C.H. Butcher, Jr., youngest member of the banking family; UTK Chancellor Jack Reese; Jake Butcher, UAB chairman and chief executive officer; C.H. Butcher, Sr., a director of UAB; and UT President Edward J. Boling.

STRICT LAWS STIFLE TRADE

Strict occupational licensing laws restrict the availability of labor services to consumers and therefore lower overall quality of service, a study by UT Knoxville economists shows.

Drs. Sidney Carroll and Robert Gaston say the level of competence of licensed practitioners is irrelevant if consumers cannot find or afford someone to perform needed services.

"Our study is based on the assumption

RUNYAN PRAISED FOR PUBLIC SERVICE

Dr. John William Runyan, Jr., chairman of the Department of Community Medicine and director of the Division of Health Care Sciences in the UT College of Medicine, has won a 1977 Rockefeller Public Service Award.

His award is in the area of promotion of health, improved delivery of health services, and control of health costs.

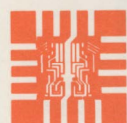

The awards are sponsored by John D. Rockefeller, III, and are administered by the Woodrow Wilson School of Public and International Affairs at Princeton University. Dr. Runyan received the award in ceremonies at Washington, D.C., on December 8.

Dr. Runyan was honored for the development and expansion of a low-cost health care delivery system which uses non-physician health care professionals to care for a significant portion of the Memphis population. The program is jointly operated by the Memphis and Shelby County Health Departments.

A grant of \$840,000 in 1974 from the Robert Wood Johnson Foundation enabled Dr. Runyan to expand his low-cost clinics.

The awards citation described Dr. Runyan's achievement as "the culmination of a professional lifetime of leadership and dedication."

WINS ROCKEFELLER AWARD—Dr. John William Runyan, Jr., of UTCHS has won a national Rockefeller Public Service Award for developing a low-cost health care program.

UTC, UTM Computers Win Top Award

The academic computing programs of the UT campuses at Chattanooga and Martin have been selected as outstanding examples of the use of computers for teaching and learning.

The selections were made as part of a research project sponsored by the National Science Foundation and conducted by the Human Resources Research Organization. The

RESEARCH GRANTS TOP \$16 MILLION

Research grants and contracts awarded to UT Knoxville totaled more than \$16 million in the year ending September 30, 1977, reports UTK Dean for Research Carl Thomas.

The total was \$767,021 higher than the amount received in the preceding October through September, which corresponds to the federal government's fiscal year.

The figure is well above the national average for universities and "is a tribute to the quality of the UTK faculty," said Dr. Thomas.

The average size of research grants, which come from business and industry, agencies of federal and state governments, and foundations, is about \$30,000. Some eighty percent of the total is from federal agencies.

Research grants and contracts provide the largest source of support for graduate students at the Knoxville campus. About 400 graduate students received stipends from research projects last year, Dr. Thomas said.

STUDENTS WORK WITH ASSEMBLY

Six UT students are working with members of the General Assembly in Nashville as legislative interns sponsored by the UT National Alumni Association.

Interns receiving the \$1,000 NAA stipends are: Lee Abernathy of Memphis, a junior in political science at UT Martin; Steven A. Goodman of Athens and Teresa A. Leadford of Nashville, both junior journalism majors at UT Knoxville; Julia A. McMinn of Franklin, a graduate student in the School of Social Work in Nashville; John M. Stein, Knoxville, a UTK senior in political science; and Gregg L. Sullivan of Oak Ridge, a political science junior at UTK.

Funding for the internships comes from gifts of UT alumni and other friends to the University's annual giving program.

TENNESSEE TOMORROW RECEIVES GIFT

The Zeta Chi chapter of Alpha Kappa Psi at UT Martin has donated \$400 to the University's *Tennessee Tomorrow* fund-raising campaign.

The gift will be used to help upgrade the UTM School of Business Administration. Alpha Kappa Psi is a national professional business fraternity.

★
Continued from page 1

that if a service is not available, the quality can't be lower," they say. The National Science Foundation funded the analysis of thirty-one licensed occupations in all fifty states.

The researchers say services in states with strict licensing regulations may be good, but the laws often produce a "Cadillac effect"—limited, high-quality services available only to high-income consumers.

●
Continued from page 1

UTC and UTM programs were designated "exemplars" which will serve as resources to institutions seeking guidance on academic computing.

Some 7,000 institutions were surveyed and 106 exemplars were selected.

Administrative Changes

Among recent administrative changes are the following:

SYSTEM

Moneymaker Heads Motor Pool

Michael Moneymaker, formerly with Colonial Refrigerated Transportation in Knoxville, has been appointed director of transportation services. He will supervise personnel and the operation and maintenance of UT's fleet vehicles. John Rutledge, who served for a short time as director, requested to return to his previous position as assistant director because of health reasons. Moneymaker is a 1971 graduate of the UT Knoxville College of Business Administration with a major in transportation.

UTCHS

Linton Heads Department

Dr. Eugene Bell Linton, formerly on the faculty of Bowman Gray School of Medicine at Wake Forest University, has joined the UT Center for the Health Sciences Knoxville Unit as professor and chairman of the Department of Obstetrics and Gynecology. Dr. Linton holds the bachelor's degree from Davidson College and the M.D. degree from the Medical College of Virginia.

Judkins in Development Post

Roger B. Judkins, former director of alumni development at the University of Oklahoma Health Sciences Center, has been appointed assistant director for development and public affairs at the UT Center for the Health Sciences. Judkins earned the B.S. in journalism from Northwestern University and has done graduate work at Boston University.

NASHVILLE

Koban Named Personnel Director

Pam Koban, former director of registration services, has been appointed director of personnel, succeeding Robert Craighead. She holds the bachelor's degree from UT

CHRISTMAS FESTIVAL—The sixth annual Madrigal Christmas Dinner, held in December at UT Martin, featured the colorful costumes and music of the Collegium Musicum. The event is sponsored by the UTM Department of Music and the University Center.

Knoxville and the master's degree in personnel management from Memphis State University. She taught at Middle Tennessee State University before joining the UTM staff last June.

MARTIN

Neilson Heads Recreational Sports

Robert Neilson, formerly of the Austin Peay State University staff, has been named director of recreational sports at UT Martin. He is responsible for organizing, scheduling, and supervising competitive intramural sports and scheduling leisure-time activities in the new physical education complex and other campus recreational areas. Neilson holds bachelor's and master's degrees from Austin Peay and is working toward a doctorate at Middle Tennessee State University.

MONEYMAKER LINTON JUDKINS

KOBAN NEILSON

TRACK REUNION

A reunion for former Volunteer track athletes will be held at Knoxville on May 13. Track alumni wishing to attend the banquet-dance reunion should contact Coach Stan Huntsman, Track Office, Box 46, University of Tennessee, Knoxville, Tennessee 37901.

Hesler Memorialized

Former students and friends of Dr. L. R. Hesler, dean of the UT Knoxville College of Liberal Arts from 1934 to 1958 who died November 20, may make contributions for library books in his memory.

Contributions should be made payable to the University of Tennessee, earmarked for the Hesler Memorial Fund, and sent to the UT Knoxville Development Office, 414 Student Services Building, Knoxville, Tennessee 37916.

DAM SAFETY IN DOUBT

Dam failures like the one in Toccoa Falls, Georgia, will continue to claim lives until a nationwide dam safety and inspection program is completed, a UT engineer and White House consultant says.

Dr. Bruce Tschantz, the only nonfederal engineer working on President Carter's dam safety program, said little has been done since Congress passed a dam safety bill in 1972 to protect lives and property.

Dr. Tschantz, a civil engineering professor at Knoxville, went to northeastern Georgia to inspect the Toccoa dam on the day after it collapsed in November, killing thirty-nine persons.

The UTK professor said there are about 47,000 private dams in the United States, of which about 20,000 pose some threat to people living downstream. About 10,000 dams are listed in the "high hazard" category.

In 1972 Dr. Tschantz did a thorough study of 19 private dams in one East Tennessee county. He found most potentially hazardous, and he reported that conditions similar to those at the 19 dams probably existed at all 716 private dams in Tennessee.

SPEAKERS TAKE FLOOR

A number of prominent speakers appeared on UT campuses in recent months. Among them are the following:

Newman Lectures on Language

Edwin H. Newman, NBC news commentator and author of two books on the use and misuse of language, spoke at a conference on "Writing in Tennessee" at the Knoxville campus last fall.

Nobel Laureate Lectures

Dr. George E. Palade, Nobel laureate from Yale University Medical School, delivered the keynote address at a symposium on biomembrane research at UT Knoxville in November. Dr. Palade won Nobel honors in 1974 for his contributions in cell biology and electron microscopy.

Kubler-Ross Speaks at Nashville

Dr. Elizabeth Kubler-Ross, internationally known authority on death and dying, was guest speaker at a symposium on that subject at UT's Nashville campus last fall.

Lieber Keynotes Seminar

Leonard Lieber, cofounder and national administrator of Parents Anonymous of Redondo Beach, California, and Dr. David Tepper of Tepper Clinic, Chattanooga, were keynote speakers for a child abuse seminar sponsored by UT's Center for Government Training at Chattanooga last fall.

British Writer Speaks at UTK

Robert Conquest, British writer and authority on Soviet affairs, initiated an "Evening with the Authors" program at UT Knoxville in November. A Fellow of the Hoover Institute at Stanford University, Conquest lectured on the Soviet poet Alexander Solzhenitsyn and his works.

Bailey Gives Talk

Charles-James N. Bailey, professor of linguistics at the Technical University of Berlin, lectured on "New Views of Dialects" at UT Knoxville last fall. He has taught at the University of Hawaii, Georgetown University, and the University of the Witwatersrand in Johannesburg.

Gayle Studies Heart Disease

A UT Knoxville graduate student is studying the relationship between physical activity and heart disease under a Fulbright-Hays grant.

Richard Gayle, a doctoral student in physical education, used the Fulbright award to study heart disease in Finland, which has the world's highest heart-related death rate. The United States is second.

Gayle recently returned from a nine-month stay at the University of Jyväskylä and the province of Karelia where he studied the Finnish government's methods of researching heart problems.

UTK's AVERY RETIRES

Dr. Robert S. Avery, UT Knoxville political science professor for thirty years and former UT assistant vice president for academic affairs, retired on December 31.

Dr. Avery, assistant vice president from 1963 to 1967, served as director of the Peace Corps in Brazil while on leave from UT from 1967 to 1971. He also has served as a consultant to governments in Latin America and has headed UT missions to Bolivia and Panama.

With Dr. Lee Greene of UTK, Dr. Avery coauthored *Government in Tennessee*, a textbook for university political science courses. He also is the author of *Experiment in Management*.

The Pittsfield, Ohio, native came to UT from the Tennessee Valley Authority. He holds degrees from Baldwin-Wallace College and Northwestern University. From 1954 to 1956 Dr. Avery was editor of *The Journal of Politics*.

Dr. Avery and his wife will make their retirement home in Florida.

IGLEHART KELLY

Louis T. Iglehart, first director of the UT Press and the Publications Service Bureau at the Knoxville campus and their chief administrator for more than twenty years, will retire May 31.

The UT Press, the University's book-publishing arm, and the Publications Service Bureau became separate administrative and budgetary units on January 1 after being jointly operated since 1957, when Iglehart was placed in charge of the combined operation.

James F. Kelly, associate director since 1975, became director of the Publications Service Bureau at the time of the separation. A search committee is seeking a successor to Iglehart as director of the UT Press.

A native of Hopkinsville, Kentucky, Iglehart came to UT in 1949 as editor of the News Bureau. He is a 1940 journalism graduate of the University of Kentucky and worked on Kentucky newspapers before coming to UT.

When Iglehart became director in 1957, the Press was publishing an average of one book a year. Today the annual production is about twenty books. A number of the almost 200 titles now bearing the UT Press imprint have won national awards for both design and content.

Kelly was born at Niagara Falls, New York, and earned the bachelor's degree in English at St. Bonaventure University. He did graduate work before joining the Publications Service Bureau staff in 1972.

The Bureau provides editorial and art design services to all departments and agencies of the University for publications ranging from one-page fliers to magazines.

FUNDS FOR NURSING COLLEGE

The College of Nursing at Knoxville has received a \$265,933 federal grant to train nurse practitioners.

The three-year grant is from the U.S. Department of Health, Education and Welfare. Dr. Sylvia Hart, dean of the college, said practitioners can be a valuable aid to physicians and can help improve the quality of health care in the nation.

"Nurse practitioners are prepared to assume more responsibility for health screening, health counseling, and health maintenance," Dr. Hart said. "They can be an invaluable aid to doctors by giving them more time to diagnose and solve medical problems."

Graduates of the practitioner program will be awarded a Master of Science in Nursing degree.

KANG TAKES HENCH AWARD

Dr. Andrew H. Kang, UTCHS professor of medicine and biochemistry and associate chief of staff and chief of the rheumatology section at the Veterans' Hospital at Memphis, received the 1977 Philip Hench Award at a special awards program in Washington last fall.

The honor is given annually in memory of Dr. Philip S. Hench, who first used cortisone in the treatment of arthritis. Dr. Kang received a \$1,000 honorarium and a plaque for "outstanding contributions in the field of rheumatology and arthritis."

'SPRING SING' TOUR SET

The UT Singers' spring tour in March will highlight the twenty-fifth anniversary of the internationally known group.

Theme of the Singers' silver anniversary show is romance, and their tour performances at schools and alumni meetings will include such favorites as "Let Me Call You Sweetheart," "The Look of Love," and "You Are My Sunshine."

Dolly Hough, a former UT Singer and an instructor in the UTK music department, directs the forty-member group. In the past twenty-five years, the Singers have given more than 1800 concerts and now average about 75 performances yearly.

Members of the group are selected on the basis of talent and scholarship, and the Singers come from all colleges within the University. They spend about ten hours a week rehearsing, traveling and performing.

A GIFT FOR UTC—Chancellor James E. Drinnon, Jr., of the UT Chattanooga campus examines audio-visual materials purchased with part of a \$7,000 gift to the UTC chemistry department from Drew E. Haskins, Jr., Chattanooga businessman and pharmacist. Shown with Chancellor Drinnon are, left to right, Thomas O. Duff, Sr., chairman, University of Chattanooga Foundation; Drew E. Haskins, Jr.; and Dr. Benjamin H. Gross, head, UTC chemistry department.

ALEWINE NAMED TO COMMITTEE

Jimmy R. Alewine, associate professor of sociology and director of the criminal justice program at UT Martin, has been appointed to the Committee on Corrections and the Community by Commissioner C. Murray Henderson of the State Department of Correction.

**GOODYEAR,
UTM
COOPERATE**

UT Martin and the Goodyear Tire and Rubber Company Radial Tire Plant in nearby Union City have developed an exemplary pattern of cooperation for business and higher education.

More than half of the plant's summer employees are UTM students, and about twenty-six percent of the college graduates in the company's managerial staff are from the Martin campus.

Of the cooperative education students who work annually at Goodyear, at least eighty percent are UTM students.

Goodyear generates about \$100,000 in annual earnings for Martin students, much of which is used to help finance their studies at the University. In return, says Union City plant manager Dick Davies, Goodyear receives "good employees for the summer" and a steady source of managerial prospects.

Goodyear supports University fundraising efforts and also donates surplus materials for student projects. UT Martin provides speakers and courses relating to industry for the plant's personnel.

RARE PRINTS DONATED

The UT Knoxville library has obtained nine rare imprints from the Knoxville press of George Roulstone, Tennessee's first printer.

The imprints were given by donors who wish to remain anonymous. The gift brings the number of Roulstone pieces in the UTK collection to twenty-two, comprising the most complete Roulstone collection to be found.

In 1971, UT purchased nine Southwest Territory and early Tennessee legislative journals, printed in 1794-96, from descendants of Roulstone.

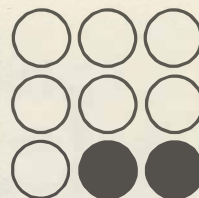

The recently acquired works are the acts of the Southwest Territory for 1794-95, the acts of the State of Tennessee for 1796-1801, and the U.S. Constitution, to which is prefixed the Constitution of the State of Tennessee, printed in 1799.

KEMP IS FACULTY FELLOW

Dr. B. Wayne Kemp of UT Martin will work for the Social Security Administration this summer under the 1977 Federal Faculty Fellowship Program. Sixteen faculty members received fellowships.

The grants enable the Fellows to work with federal agencies for periods ranging from three months to a year. Dr. Kemp, an associate professor in the UTM School of Business Administration, will work in Washington, D.C., as a consultant to the office of data development of the Social Security Administration.

BLACKS, WHITES GIVE VIEWS ON LIFE AT UT KNOXVILLE

Black students surveyed at UT Knoxville believe their biggest problem is achieving minority representation and visibility on a predominantly white campus.

Both black and white students, however, are generally satisfied with the quality of education they receive at UTK, a report from the UT Communications Research Center says.

The report is based on interviews with 205 black and 200 white students on topics ranging from academic programs to the use of University services and facilities. The survey was conducted for the UTK Commission for Blacks to identify problems and dissatisfactions of black students in order to solve problems and improve communication between blacks and whites on campus.

A majority of both black and white students, sixty-one and fifty-six percent respectively, said they noted positive changes in the campus racial atmosphere. Seventy-five percent of the black students said they would encourage other people in their community to attend UTK and sixty percent would give to their alma mater.

Both groups are generally satisfied with their lives, according to the report, and a high percentage of both are optimistic about the future.

SELLIN STUDIES ION COLLISIONS

Dr. Ivan Sellin, physics professor at the Knoxville campus, has received a 1977-78 Fulbright-Hays Award to further his studies of heavy ion collisions.

Unlike most recipients, who use their Fulbright grants for extended study in one or two locations, Dr. Sellin is using his award for travel to several research facilities in this country and in Europe. He spent most of last summer at the new German Heavy Ion Accelerator near Darmstadt after receiving the prestigious Alexander von Humboldt Senior U.S. Scientist Award from the West German government.

Dr. Sellin, a UTK Chancellor's Research Scholar in 1976, is one of two UT research scientists to receive the von Humboldt Award. Dr. B.H. Goethert, dean emeritus at the UT Space Institute, is the other Tennessee recipient.

Dr. Sellin's research, funded by the Office of Naval Research and the National Science Foundation, involves the study of collisions of high-speed atoms. These collisions are similar to what occurs on the sun, other stars, and in thermonuclear plasmas.

Information from similar research is used by scientists studying astrophysics and researchers trying to develop nuclear fusion as a source of energy. Much of Dr. Sellin's research is conducted at Oak Ridge National Laboratory.

ROUNDTABLE OFFICERS—Officers of the Chancellor's Roundtable at UT Chattanooga are, left to right, Whitney Durand, III, secretary; William Pettway, Jr., chairman; and Mrs. Bernard Hurley, vice chairman.

ROUNDTABLE ADDS MEMBERS

Dr. James E. Drinnon, Jr., chancellor of UT Chattanooga, has named fifteen new members to the UTC Chancellor's Roundtable, established in 1975 to provide citizen advice on University operations and to keep the institution abreast of community needs.

New members are Donald Blevins, chairman of the board and president of the Red Food Stores and director of First Federal Savings and Loan Association; A. Vincent Blunt, assistant secretary and personnel director of Volunteer State Life Insurance Company; James Davis, president of James A. Davis and Associates, Inc., and president of the Estate Planning Council of Chattanooga.

Alan Derthick, a partner in the architectural firm of Derthick and Henley; H. Don Gilbreath, president of H. Don Gilbreath and Associates; Howard Glover, III, president of

Fischer-Evans Jewelers.

Dr. James Henry, superintendent of Chattanooga public schools; James Lail, executive vice president and treasurer, Raines Brothers, Inc., General Contractors; Mrs. Nell Mohny, director of membership development, First Centenary United Methodist Church.

Z. Cartter Patten, III, principal member of Patten and Patten, Inc., and corporate director of the Chattanooga Choo Choo; A. Ward Peacock, senior vice president for finance and administration, Dixie Yarns, Inc.

Sam Powell, TVA engineer; Gilbert Stein, partner, Stein Construction Company; Robert Sudderth, vice president, American National Bank; and Ira Trivers, president of Ira Trivers, Inc.

ROBINSON GIFT TO UTM

UT at Martin has received a \$15,000 gift to endow a scholarship from Thomas L. Robinson of Daytona Beach, Florida.

The gift honors Robinson's half-brother, Matthew W. Robinson, a former top official of Hall-Moody Institute, the predecessor of UT Martin.

Thomas Robinson earned bachelor's and master's degrees at UT Knoxville and worked in the University extension service in the early 1920s.

VAN PLAN IS GRAND

The City of Knoxville and UT Knoxville's Transportation Center have won a national award for implementing a "transportation broker" system.

Knoxville Mayor Randy Tyree and UTK Chancellor Jack Reese went to Atlanta to accept the Administrator's Award for Outstanding Public Service from Richard Page, head of the Urban Mass Transportation Administration. UMTA is an agency of the U.S. Department of Transportation.

The UTK Transportation Center administered a \$1 million grant from UMTA to the City of Knoxville to develop a community transportation system, with an emphasis on van pooling.

SPECTROSCOPY STUDIED

Dr. Laszlo Adler, associate professor of physics at UT Knoxville, has received a \$25,000 grant from the Battelle Memorial Institute at Columbus, Ohio, to study the feasibility of using ultrasonic spectroscopy in industry.

Dr. Adler says spectroscopy could be useful in identifying defects in industrial components and materials.

UTK is one of six educational institutions in the nation to receive Battelle grants.

Nine New To UTN Group

UT Nashville Chancellor Charles Smith has added nine members to the UTN Associates, a group of community leaders who advise and aid the campus.

New members are: James Webb, president, Nashville City Bank and Trust Company, and president, Greater Nashville Chamber of Commerce; Erskine Lytle, director, Affirmative Action Division, Metropolitan Government; Mrs. Jo Welch, a director of the Middle Tennessee Heart Association; Lee Beaman, vice president, Beaman Pontiac; Mrs. Tish Hooker, associate, Jay Turman Interiors; John Sloan, president, First Tennessee Bank; Batey Gresham, partner, Gresham and Smith, Architects; John Sorey, president, Aladdin Electronics; and Frank Woods, president, United American Bank of Nashville.

TOURISM AIDED IN NASHVILLE

UT Nashville and the Metropolitan Tourist Commission are cooperating in a new project to help promote tourism in Nashville.

Ed Lejeune, program director, said conferences, printed information, audio-visual aids and training classes are planned to help people in the tourism industry become more knowledgeable about Nashville and more helpful to visitors.

The program is funded from Metro Nashville's hotel and motel tax receipts.

VILLAFLOL TO CHAIR TAHPER

Chris Villaflo of Paris, Tennessee, a sophomore in physical education and health at UT Martin, has been named chairman-elect of the student section of the Tennessee Association for Health, Physical Education and Recreation.

He was elected at the annual state convention of TAHPER in December. The Association's members are drawn from public and private schools, colleges and universities, and professional organizations in the state.

POLYMER RESEARCH 'GOES GULF'

The Gulf Oil Foundation has given UT Knoxville a \$6,000 grant for polymer research in the Department of Chemical and Metallurgical Engineering.

W.D. Bybee, manager of Gulf's Polypropylene Development Group in Baytown, Texas, presented the grant to Dr. Joseph Spruiell, UTK engineering professor.

Polymers are complex chains of molecules used in items ranging from plastics to fibers in radial tires.

Walker in UTC Program

Patricia Walker, assistant professor at UT Chattanooga, has been appointed to the faculty of the UT Graduate School of Social Work's off-campus program in Chattanooga.

Ms. Walker, who will serve as "resident UTK" faculty member for the Chattanooga program, will continue her position in the undergraduate social work program at UTC. Her new duties include advising students, consulting with field agencies, and teaching in the graduate social work program.

The UT School of Social Work has branches in Nashville and Memphis in addition to the Knoxville Branch and its off-campus program in Chattanooga. There are currently eighteen students in the Chattanooga program, and the first class of eight graduated last June.

Ms. Walker has been assistant professor at UTC since 1974. She formerly was field director of the UTC human services program. She holds the bachelor's degree from Butler University and the master's from the School of Social Work at Indiana University.

BAR LAUDS MILLER SPECIAL

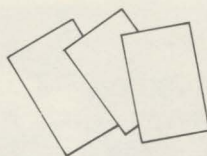

UT has received a 1977 citation from the American Bar Association for its half-hour television special about the late Judge William E. Miller of the U.S. Sixth Circuit Court of Appeals.

The program traced the history and impact of the landmark *Baker v. Carr* reapportionment case, which originated in Judge Miller's U.S. District Court at Nashville in 1959.

The film was produced by the UT central administration's Office of Public Relations. UT was the only university recognized in the ABA's annual awards competition.

Judge Miller was a UT alumnus and a member of the UT Board of Trustees.

DOUGHERTY PAPERS GIVEN

The family of Nathan W. Dougherty has donated the late engineer's papers to the UT archives.

Dean Dougherty headed the UT Knoxville College of Engineering for sixteen years and, except for a six-year interval, was associated with the University from the time he entered as a student in 1905 until his death on May 18. He also was a widely known sports figure, a founder of the Southeastern Conference, and a member of the national Football Hall of Fame.

JACKSON IS POETRY EDITOR

Dr. Richard Jackson of the UT Chattanooga English Department will edit this year's *Poetry Miscellany* magazine, which has received its fifth successive yearly grant from the Coordinating Council of Literary Magazines.

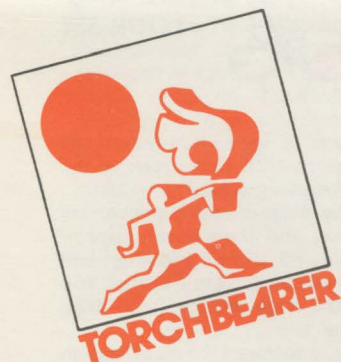

Founded in 1971, the magazine concentrates on publishing new and unknown poets, but it also includes works of several well-known poets. Among contributors to this year's magazine is Richard Eberhart, Pulitzer Prize and National Book Award winner.

Dr. Jackson, whose own poems have appeared in several leading poetry journals, is beginning his second year at UTC.

ALAS, POOR YORICK-
