Smart Choices...

# How Your Baby Grows

## The First Trimester

*Janie Burney, PhD  
Associate Professor  
Family and Consumer Sciences*

The first three months are a very important time for you and your baby. Most of your baby's organs are forming early in pregnancy. Alcohol, drugs and tobacco can cause birth defects and miscarriages.

### Month 1

#### Your baby:

- is about 1/4 inch long
- weighs about 1/30 ounce
- has a heart, brain and lungs that are beginning to form

#### You:

- may have tender breasts
- may have an upset stomach

#### You should:

- try to eat several small meals and snacks each day
- not drink alcohol or smoke cigarettes
- not take any drugs until you see a doctor or nurse

**Month 1**

# Month 2

## Your baby:

- is about 1 inch long
- weighs about 1/3 ounce
- is beginning to form arms, legs (including knees, ankles and toes), hands and fingers
- is beginning to form a face, muscles and skin
- is beginning to form organs, like the brain, stomach and liver

# Month 2

## You:

- will have little if any weight gain
- will probably need to go to the bathroom more often
- may have an upset stomach and feel tired

## You should:

- try to eat several small meals or snacks each day
- call a clinic or doctor for a check-up

# Month 3

## Your baby:

- is about 2 to 3 inches long
- weighs about 1 ounce
- can open and close the mouth and swallow
- can move hands, kick legs and turn the head
- will close eyes and open them again in the seventh month

## You:

- may gain 2 to 4 pounds
- may have a poor appetite

## You should:

- continue to eat several small meals and snacks a day
- call a clinic or doctor for a check-up if you have not done so

# Month 3

Please remember, your baby is depending on you to make smart choices like:

- The right kinds and amounts of foods to eat.
- Making and keeping your appointments with the clinic or doctor.
- Not using tobacco, drugs or alcohol.
- Avoiding sexually transmitted diseases.
