LETTER OF TRANSMITTAL

Knoxville, Tennessee
January 2, 1980

To His Excellency, Lamar Alexander
Governor of Tennessee:

SIR: I have the honor of transmitting herewith, on behalf of the Board of
Trustees of the University of Tennessee, a report of the work and expenditures of
the Agricultural Experiment Station for the year 1979.

This report is submitted in accordance with the law requiring that such a report
be submitted annually by the administrators of the Experiment Station to the
Governor of the State.

Respectfully submitted,
Edward J. Boling, President

FOREWORD

Included in this report are listings by departments of the following information:
1) Research projects active as of December 31, 1979;
2) Research projects terminated during the calendar year 1979;
3) Bulletins, articles, and reports prepared by Experiment Station staff members and published during the calendar year 1979.

In addition, this report contains the financial statement for the Agricultural Experiment Station covering the period July 1, 1978 to June 30, 1979. Also included is a list of the Experiment Station personnel for the calendar year 1979.

Active Projects

As of December 31, 1979, there were 161 Hatch (TN) projects and nine State (S) projects. Hatch projects are supported in part with Federal-Grant funds made available by Congress to the Agricultural Experiment Stations of the country under the Hatch Act Amended. State projects are supported entirely by University funds. There were 11 McIntyre-Stennis (forestry) projects.

The headquarters of the Tennessee Agricultural Experiment Station is located on the agricultural campus of the University of Tennessee at Knoxville. The UT-Comparative Animal Research Laboratory is located some 20 miles distant at Oak Ridge, Tennessee. In addition, there are other research centers which represent soil and climate conditions in the major regions of Tennessee. These other research centers are listed at the end of this report, and their locations are shown on the inside front cover.

Projects Terminated

During 1979, 43 projects were terminated. Reports on these projects have either been published or are being prepared for publication.

Publications

Published reports on research of the Tennessee Agricultural Experiment Station appear in Station Bulletins, in Tennessee Farm and Home Science, as well as in professional and technical periodicals and in various popular publications. There were nine Station Bulletins published during the year. The number of technical, semi-technical, and popular articles prepared by staff members and published during 1979 was 183. In addition, staff members published 13 Extension-type publications, regional bulletins, and special reports.

Effects of Applied Wastes on Soils and Crops.

Availability of Secondary Nutrients in Tennessee Soils.

Cotton Production Practices.

Cotton Seed and Fiber Development.

Plant Response to Herbicides and Antidotes.

Plant Growth Regulator Effects on Fruit, Vegetable and Agronomic Crops.

Vegetable Crop Production.

Fertilization and Cultural Practices to Improve Tobacco Safety.

Effects of Soil pH Levels on Crop Growth.

Development and Evaluation of Rootstocks for Peaches (contributing to Regional Proj. S-97).

Projects Concluded in 1979

Soil and Plant Nutrient Status and Environmental Factors in Relation to Crop Yields.

Effect of Plant Environment on Its Photosynthetic Capability.

Cotton Seed and Fiber Development.

Cotton Production and Varietal Adaptation.

Forage Crop Production and Metabolic Patterns Under Different Management and Environmental Conditions.

Selectivity and Mode of Action of Herbicides and Antidotes.

Development and Evaluation of Rootstocks for Peach (contributing to Regional Proj. S-97).

Vegetable Crop Production.

Liming and Its Effect on Nutrient Availability.

Plant Growth Regulator Effects on Fruit, Vegetable, and Agronomic Crops.
