Pioneering forensic anthropologist **Bill Bass** has had a building named after him on the campus of the UT Medical Center. Bass, professor emeritus in anthropology, created new ways to study human remains that are now standard procedures in criminal investigations. He also created the Donated Skeletal Collection, the largest collection of modern bones in the United States.

The American Physical Society has awarded UT physicist **Witek Nazarewicz** its Tom W. Bonner Prize for 2012. Described as the most prestigious nuclear physics prize in the United States, the honor recognizes outstanding experimental research in nuclear physics, including developments that further research in the field.

The **UT Team Living Light** took eighth place overall in the U.S. Department of Energy's 2011 Solar Decathlon, which included 20 university contestants from across the nation. The UT entry tied for first place in a subcategory – energy balance – in which it generated enough solar energy to supply the needs of the structure. The UT team placed fifth or better in three other categories. **Edward Stach, Richard Kelso, James Rose,** and **Barbara Klinkhammer** in the College of Architecture and Design, **Deb Shmerler** in the School of Art, **Leon Tolbert** in electrical engineering, and **Stan Johnson** and **Bill Miller** in mechanical engineering led the faculty team that involved two years of planning and design and the work of some 200 students in nine academic programs.
