Third Year Bachelor of Architecture Research + Design Studio Fall 2015
Marleen Kay Davis, FAIA, Professor

The James White Parkway corridor separated Downtown Knoxville from East Knoxville during the urban renewal period. ONE KNOXville intends to reconnect the neighborhoods while bringing many more people into the community by use of office and residential space, a community center, a baseball stadium, and a multipurpose sports arena. An interstate cap will literally bridge the gap between the two neighborhoods creating a bold and welcoming community for Knoxville.

Milwaukee Bucks Development

Scheels Arena

CHS Field

Community and Ice Center

Beijiao Sports Center

Margaret Hance Park

WRAPPER - The cor-ten steel occupiable zone will integrate with the rest of the ONE KNOXville masterplan.

ROOF- This roof's design is based on the Smokey Mountains located east of Knoxville.

WALLS- The arena is designed to allow for the feel of a large open, public space. However, the multipurpose arena can be closed off for private events.

PROGRAM- The multipurpose arena is home for the Knoxville Ice Bears while the other two rinks are used for team practice and public use.

STRUCTURE - The arena is supported by a column, floor-plate system.

Approaching arena from south.

Approaching arena from west.
