The Department of Economics and the Department of Finance have collaborated in putting together this proposal. Corresponding proposals have been submitted at the graduate level, and likewise will be submitted for all versions of the BSBA in Economics and BSBA in Finance at the undergraduate level. Furthermore, a corresponding proposal for the BA in Economics through the College of Arts and Sciences is going through their curriculum processes.

Recommended Background

Comments

Registration Restriction(s) Majors in the Haslam College of Business.

Registration Permission

Equivalency

Rationale* Since internships after the sophomore year are becoming increasingly important, we'd like a clear path for Finance majors to take FINC 306 or 308 in the 2nd semester of their sophomore year. The current obstacles are prerequisites. We are proposing that we move both ECON 213 and STAT 201 from prerequisites to corequisites.

In addition, we have increased the use of Excel in all our classes. INMT 242 is a required course for business majors, but it isn't listed as a prerequisite or corequisite for our Finance courses. We propose that INMT 242 become a corequisite to FINC 306 and 308. We do not, however, want to change the showcase. We simply want a path for students who are trying to get ahead of the game.

### Course Description
Introduces students to the world of FinTech (Financial Technology). The course spends significant time on one of the most disruptive innovations in FinTech – blockchain technology. Students are introduced to blockchain mechanics (e.g., hashing, mining, proof-of-work (POW), proof-of-stake (POS), etc.), cryptocurrency, and decentralized finance (DeFi) applications. Students will also be exposed to technological innovations in securities trading, lending, raising capital, delegated asset management, advising (i.e., Robo-advising), and how many of these issues are currently being regulated.

<tbody>
<tr>
<td>The department currently offers this course under the “Special Topics” course number – FINC 402. Because of increased interest from industry partners and students alike along with the pending creation of a “Fin Tech Collateral” we need a permanent and unique</td>
</tr>
</tbody>
</table>
With the pending creation of a FinTech collateral, we need a permanent and unique course number for this course.

### Impact on Other Units

None immediately. However, the course is proposed as a part of a new FinTech collateral.

### Financial Impact

The department will immediately need to staff one additional section of this course during the spring semester. Depending on future demand (via both Finance majors seeking elective credit and Finance and other majors pursuing a FinTech collateral), the department will need to staff additional sections in the Fall and Spring semesters.

**Statement about Vol Core:**

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.
Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability  May be repeated. Maximum 3 hours.

Credit Restriction

Registration Enforced (RE)  FINC 306 or FINC 308 with a grade of B+ or better; FINC 420 or FINC 428 with a grade of B+ or better.

Department Enforced (DE)

Prerequisite(s)

Corequisite(s)

Recommended Background

Comments

Registration Restriction(s)

Consent of instructor.

Registration Permission

Equivalency

Rationale*  The comment is outdated given that all Finance majors are now required to take FINC 306 or 308 as a prerequisite/corequisite for Finance major courses. Although the prerequisite for FINC 495 was updated several years ago, the comment remained as an oversight.

Department*  Finance

Program Name*  Finance Major, BS in Business Administration - Business Analytics Concentration

Degree Type*  Bachelor of Science in Business Administration

Program Type*  Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
The Finance major offers students a skill set applicable to a broad range of careers across industries that are relevant to public and private businesses, non-for-profits, and government entities alike. General areas of study are how decision-makers evaluate, fund, and manage projects within an enterprise and how financial market participants process information to price risky assets such as stocks or bonds. Finance majors develop analytical skills useful in examining financial statements and evaluating the financial health of companies, assessing dimensions of business problems, evaluating financial implications of corporate and individual actions, and constructing investment portfolios. Finance majors develop the ability to utilize spreadsheets to process and present financial data. In addition, they may gain specialized training in real estate and Bloomberg, which is considered by finance professionals to be the gold standard for accessing current market, economic, and financial information.

Finance majors have flexibility to customize their studies through a broad array of electives, student organizations, experiential learning, and collaterals best suited to a particular career path. The department has course listings in investments, financial statement analysis, financial management, financial institutions, international finance, fixed income, real estate, risk and insurance, derivatives, and Bloomberg software training. The Finance department is certified as a Chartered Financial Analyst (CFA) Recognized University. As such, students pursuing a major in Finance gain valuable exposure to many topical areas required in sitting for the CFA designation, which is regarded as the key designation for investment professionals worldwide. Sponsorships are available to help cover costs for students sitting for the CFA exams. The Finance department also offers cutting edge resources through the Masters Investment Learning Center. In addition to specialized Bloomberg training, Finance majors gain real-world experiences in value investing or wealth management managing actual portfolios (via FINC 495). Finance majors may also enrich their experience through internships and participation in the CFA Global Investment Research Challenge, the Tennessee Capital Markets Society, the Financial Management Association, the Real Estate Club and the UT Investment Group.

Students who major in Finance need quantitative skills, problem solving skills, and communication skills.
### General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

Re: Accelerated/Combined Bachelor's/Master's Program: The proposed program will increase enrollment in existing 400- and 500-level finance courses. The two courses most impacted are Finance 525 and Finance 555. Finance 525 currently has excess capacity. Finance 555 is currently only offered once per year but will likely be offered twice per year irrespective of this program, opening additional capacity. As the Financial Economics program builds on existing courses, the direct costs for starting the program should be low.

<th>Requirements*</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Rationale</strong></td>
</tr>
<tr>
<td>Revise Economics collateral: The Economics department recommends ECON 381 would be useful for students who wish to enter the 4+1 Masters in Econ program.</td>
</tr>
<tr>
<td>Revise footnote to include FINC 460 as a course option: Reflects new FINC 460 course, FinTech, as an option for major electives.</td>
</tr>
<tr>
<td>Additionally, revised language to reflect 5-year accelerated/combined Bachelor's/Master's program between the Departments of Economics and Finance. The finance department currently does not offer a terminal master’s degree. Our graduate offerings currently focus on the MBA finance concentration and the Ph.D. program. By partnering with the economics department to create a cross-discipline program, this program will greatly expand the career opportunities and earnings potential for finance undergraduates. Other major universities in Tennessee offer terminal master’s degrees that require 1.5 to 2 years to complete. This program provides an opportunity for our students to earn an advanced degree on an abbreviated timeline, which further increases the return on investment. Last, graduates of this program will have a much better chance of admission to a top Ph.D. program, as there is a considerable gap between bachelor’s coursework and a Ph.D. program in finance.</td>
</tr>

### Course Description

Semester study abroad program approved by the Haslam College of Business Undergraduate Programs Office.
Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Statement about Crosslistings:

If course is to be crosslisted, then use the "Crosslistings" tab on menu to the right to bring in all applicable secondary courses. You must start a crosslisting with the primary course, and both courses must be new for crosslisting. If one of the courses (primary or secondary) already exists, you must complete an add course form for the new course and add the crosslisting after full approval of the new course.

This course is intended only for International Business majors in the Haslam College of Business.

A semester-length study abroad is a requirement of the International Business (IB) major. This zero-credit course will be used to designate an approved semester length study abroad experience for IB majors, and to distinguish the approved semester-long experience. The IB 489 designator for study abroad will continue to be used for all other IB collateral and concentration students to designate an approved study abroad for degree completion.

None expected.

None expected; this change is administrative in nature.

Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal?

- Arts and Humanities

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Global trade affects all businesses, even those focused on the domestic market. For students to succeed in this environment, they must have an understanding of cross-border political, legal, economic, social and financial issues. A worldwide perspective is necessary to meet the challenges of our current and developing global workplace, and a requisite knowledge and specialized skills are necessary to prosper in today’s global business environment.

A degree in International Business is designed to prepare students for an international career in variety of business fields. Haslam’s International Business degree is designed to accompany a second major within the Haslam College of Business, which equips them with specific functional skills that enhance their effectiveness as business professionals, while incorporating advanced foreign language requirements and a mandatory semester study abroad experience. Students will develop their international business knowledge, their intercultural fluencies, their technical functional skills, and their communication skills in both English and their chosen second language.

In addition to the double major, students are also required to complete a collateral in a foreign language. This collateral requires at least three courses at the 300+ level. Proficiency in a foreign language is integral to understanding social and historical nuances for foreign cultures. It also positions students to better integrate into their host countries and build meaningful working relationships and successful transcontinental careers.

Finally, students are also required to study abroad for a full semester in an approved destination and program. Through the study abroad requirement, students will gain a deeper knowledge, understanding, and open-mindedness for other cultures and their shared behaviors, beliefs and values. They will also develop different perspectives in regard to other nations and global issues while expanding their capacity to consider, appreciate, and analyze issues for different and even competing viewpoints.

Given the requirements for completion of all aspects of this degree, students must apply for and gain acceptance into the major to ensure appropriate and on-time progression through the coursework. Interested applicants should have a minimum GPA of 3.0 to ensure semester abroad viability. A typical application and selection process will occur in the first semester of the sophomore year, for full integration into the major beginning in the sophomore spring.

**Students pursuing the Bachelor of Science in Business Administration degree with a major in International Business must have a primary major elsewhere within the Haslam College of Business.**
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

<table>
<thead>
<tr>
<th>Requirements*</th>
</tr>
</thead>
</table>

| Rationale* | The addition of a new designator that satisfies a semester study abroad is necessary in the system to signify completion of degree requirements in the International Business Major. The addition of this new course replaces the use of IB 489, which can be used for any study abroad of any length for other (non-IB) business students. |

| Financial Impact* | None expected; simply replacing IB 489 with IB 490. |

| Impact on Other Units* | None expected. |

**Statement about Vol Core:**
If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.
Satisfies Volunteer Core Requirement:

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability

Credit Restriction  Students cannot receive credit for both MARK 350 and ENT 425.

Registration Enforced (RE) Prerequisite(s)  C or better in BUAD 332 or BUAD 338; ACCT 200 or ACCT 203; ECON 213; and STAT 201 (or honors equivalents).

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s)

Recommended Background

Comments

Registration Restriction(s)  Majors in the Haslam College of Business.

Registration Permission

Equivalency

Rationale*  Goes along with changes to BUAD 332 prereqs. These changes close loopholes so that a student who passes BUAD 332 but fails its co-requisites cannot move forward in the major until satisfactorily completing the co-requisite courses. The goal behind this change would be to ensure students have the foundational knowledge they need before advancing further in the program.

**Course Description:**
This course contributes to a professional selling and sales force management emphasis and complements MARK 471 (Sales Force Management) and MARK 469 (Professional Selling). This course complements knowledge obtained in MARK 469. Emphasis is placed on advanced and detailed selling challenges within specific business-to-business contexts such as consumer goods sold through retail, selling supply chain solutions, industrial/aerospace and complex services such as financial products.

Haslam College of Business - Management and Entrepreneurship - Management Major, BS in Business Administration - Collateral Option - Entrepreneurship and Emerging Enterprises Track

2024-2025 UG Revise Program

General Catalog Information

College* Haslam College of Business

Department* Management and Entrepreneurship

Program Name* Management Major, BS in Business Administration - Collateral Option - Entrepreneurship and Emerging Enterprises Track

Degree Type* Bachelor of Science  Program Type* Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Management is a broad field that focuses on the planning, organizing, leading, and controlling of an organization's resources where the ultimate objective is to ensure that the organization achieves and sustains a competitive advantage. The Management Major can be earned through three different tracks of study with distinct career outcomes. The Leadership and Organizational Effectiveness (LOE) track prepares students to create value within existing organizations by managing business opportunities that foster new revenue growth. Leadership and Organizational Effectiveness career outcomes include corporate management trainee programs, project-based work, consulting, and general management. The Entrepreneurship and Emerging Enterprises (EEE) track gives students the content and skills for creating and managing new, early-stage, and high-growth organizations. This track prepares students for opportunities in start-ups and growth businesses, and family-owned firms — including for-profit and not-for-profit organizations. A common thread throughout the Management Major is the development of important professional skills including: data-driven decision making, problem-solving, critical thinking, leadership, and communication. All students in each track are required to complete an internship.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

### Requirements*

#### Rationale*
Revise program description: Catalog clean-up. All Management majors are required to complete an internship, which is met by the MGT 489 course.

Revise Finance collateral: the Finance department will no longer offer FINC 450, which is required in the Finance collateral. This revision was recommended by the Finance Department.

#### Financial Impact*
Revise program description: None.

Revise Finance collateral: None; students will still complete three FINC courses for their collateral requirements.

#### Impact on Other Units*
Revise program description: None.

Revise Finance collateral: Minimal; it may increase demand slightly for FINC 425 and FINC 435 for the small number of students who will no longer be taking FINC 450.

#### Have you consulted with all programs/departments that will be impacted by this change?*

Yes ☐ No ☐

---

**ADMINISTRATIVE USE ONLY**

Haslam College of Business - Management and Entrepreneurship - Management Major, BS in Business Administration - Collateral Option - Leadership and Organizational Effectiveness Track

2024-2025 UG Revise Program

General Catalog Information

College* Haslam College of Business

Department* Management and Entrepreneurship

Program Name* Management Major, BS in Business Administration - Collateral Option - Leadership and Organizational Effectiveness Track

Degree Type* Bachelor of Science

Program Type* Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Management is a broad field that focuses on the planning, organizing, leading, and controlling of an organization's resources where the ultimate objective is to ensure that the organization achieves and sustains a competitive advantage. The Management Major can be earned through three different tracks of study with distinct career outcomes. The Leadership and Organizational Effectiveness (LOE) track prepares students to create value within existing organizations by managing business opportunities that foster new revenue growth. Leadership and Organizational Effectiveness career outcomes include corporate management trainee programs, project-based work, consulting, and general management. The Entrepreneurship and Emerging Enterprises (EEE) track gives students the content and skills for creating and managing new, early-stage, and high-growth organizations. This track prepares students for opportunities in start-ups and growth businesses, and family-owned firms – including for-profit and not-for-profit organizations. A common thread throughout the Management Major is the development of important professional skills including: data-driven decision making, problem-solving, critical thinking, leadership, and communication. All students in each track are required to complete an internship.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

<table>
<thead>

<td><strong>Rationale</strong></td>
<td></td>
</tr>
</tbody>
</table>
| Revise footnote: Catalog clean-up. The MGT 490 and MGT 492N courses were in place to enforce an internship requirement for these students. That requirement is now met by MGT 489.  
Revise program description: Catalog clean-up. All Management majors are required to complete an internship, which is met by the MGT 489 course.  
Revise Finance collateral: the Finance department will no longer offer FINC 450, which is required in the Finance collateral. This revision was recommended by the Finance Department. |

<table>
<thead>
<tr>
<th>Financial Impact*</th>
<th></th>
</tr>
</thead>
</table>
| Revise footnote: None.  
Revise program description: None.  
Revise Finance collateral: None; students will still complete three FINC courses for their collateral requirements. |

<table>
<thead>
<tr>
<th>Impact on Other Units*</th>
<th></th>
</tr>
</thead>
</table>
| Revise footnote: None.  
Revise program description: None.  
Revise Finance collateral: Minimal; it may increase demand slightly for FINC 425 and FINC 435 for the small number of students who will no longer be taking FINC 450. |

**Description**

Management is a broad field that focuses on the planning, organizing, leading, and controlling of an organization's resources where the ultimate objective is to ensure that the organization achieves and sustains a competitive advantage. The Management Major can be earned through three different tracks of study with distinct career outcomes. The Leadership and Organizational Effectiveness (LOE) track prepares students to create value within existing organizations by managing business opportunities that foster new revenue growth. Leadership and Organizational Effectiveness career outcomes include corporate management trainee programs, project-based work, consulting, and general management. The Entrepreneurship and Emerging Enterprises (EEE) track gives students the content and skills for creating and managing new, early-stage, and high-growth organizations. This track prepares students for opportunities in start-ups and growth businesses, and family-owned firms – including for-profit and not-for-profit organizations. The Workforce Analytics (WA) track combines data analytics and evidence-based practice to help managers effectively leverage the workforce. Career options in this track include business analyst, workforce analyst, workforce consultant, survey analyst, and assessment analyst. A common thread throughout the Management Major is the development of important professional skills including: data-driven decision making, problem-solving, critical thinking, leadership, and communication. All students in each track are strongly encouraged to complete an internship.
### Requirements

#### Rationale
This track is being dropped due to low student interest. There are currently four students in this program. Additionally, one of the required courses, MGT 465, will no longer be offered. Students currently in the program will be provided with alternate means to complete their requirements.

#### Impact on Other Units
This change has been discussed with the Department of Business Analytics and Statistics. They are also dropping their Workforce Analytics collateral.

#### Financial Impact
Minimal.

#### Have you consulted with all programs/departments that will be impacted by this change?
Yes ☑️ No

#### Number of students in program
4

### ADMINISTRATIVE USE ONLY

#### Impact Level
- Low ☑️

Management is a broad field that focuses on the planning, organizing, leading, and controlling of an organization's resources. A manager's ultimate objective is to help his or her organization achieve and sustain a competitive advantage. Careers in management have diverse starting points and trajectories. Management majors can be found working throughout the world in many different industries such as manufacturing, financial services, transportation, entertainment, health care, and many more. Some Management graduates start their own businesses while others spend their careers in governmental and non-profit organizations. One common thread is that people who work as managers depend heavily on their problem-solving and communication skills. The Management curriculum also prepares students for post-graduate work in business, law, health care, and other fields. All students in the program are required to complete an internship.

Haslam College of Business - Management and Entrepreneurship - Management Major, BS in Business Administration - Sales Concentration

2024-2025 UG Revise Program

General Catalog Information

College* Haslam College of Business
Department* Management and Entrepreneurship
Program Name* Management Major, BS in Business Administration - Sales Concentration
Degree Type* Bachelor of Science in Business Administration
Program Type* Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Management is a broad field that focuses on the planning, organizing, leading, and controlling of an organization's resources where the ultimate objective is to ensure that the organization achieves and sustains a competitive advantage. A common thread throughout the Management Major is the development of important professional skills including: data-driven decision making, problem-solving, critical thinking, leadership, and communication.

The Sales Concentration option is a distance education/fully-online option specifically designed for transfer students. Only transfer students who have earned 60 credit hours and an Associate of Art (A.A.), an Associate of Science (A.S.), an Associate of Fine Arts, or an Associate of Science in Teaching from a Tennessee Board of Regents institution are eligible to apply and participate in this program.

Current students who earn an A.A. or A.S. and 60 credit hours through the Tennessee Reverse Transfer process are eligible to apply as well.

Students will need to maintain a 2.5 cumulative UT GPA.

Marketing in an organization has responsibility for identifying who customers are, what they need and want, and how best to meet those needs/wants by creating and delivering superior value to them. Marketing professionals use strategy tools to target customers, create value propositions and positioning for each target, and deliver and communicate value to these customers through product design, pricing, advertising, personal selling, promotion, and distribution.

Marketing education enables one to pursue varied career opportunities critical to organizations. Typically, a career in marketing begins in either consumer or industrial sales or retailing, which eventually may lead to management positions in any of several areas. For example, marketing professionals may hold positions in advertising, brand management, sales management, promotion management, marketing research, distribution, and other related areas.

Students interested in a marketing career will have a broad-based business education, which includes financial management, supply chain management, operations, human resources, business strategy, economics, and statistics. In addition to a broad array of courses in arts and sciences, marketing students will obtain a strong grounding in the

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Supply chain management has responsibility for the movement of raw materials and component parts into and within a business firm and to the distribution of finished products and services to customers.

Because having products and/or services in the right place at the right time is critical for success in any business, supply chain management plays a critical role in a firm’s comprehensive supply chain. A career in supply chain management offers students the opportunity to make a significant contribution to corporate effectiveness in this area.

The internationally recognized Supply Chain Management program at the University of Tennessee is currently regarded as one of the most comprehensive and contemporary programs in the nation. The program offers a fundamental yet innovative curriculum. Students develop important skills required of supply chain management professionals as well as learn how supply chain management helps solve business supply chain management problems.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

<table>
<thead>
<tr>
<th>Requirements*</th>
</tr>
</thead>
</table>
| **Rationale**
Add Multidisciplinary Sustainability collateral: The concept is to create a multidisciplinary sustainability collateral with the Colleges of Agriculture and Geography. Approximately 30 students, 10 from each college. So, this should initially impact only 10 SCM major students, and will be a collateral for them only. They will take SCM 440 as an elective and then three courses: One of three options in Geography, Geography 333 – Climate Change and Human Responsibility, Geography 345 – People and the Environment, or GEOG 346 – Energy and Systems; one of three options in the Ag College: AREC 345- Renewable Energy and Climate Change Economics, AREC 350- Agricultural Marketing, or AREC 342- Farm Business Management; and a capstone course, SCM 493. This will serve as a model of a cross-disciplinary program, strongly supported by the Provost’s office.

Revise Finance collateral: The Finance Department will no longer offer FINC 450, which was formerly included in the collateral. FINC 435 is a survey-type course covering a broad array of topics on financial markets and institutions and would offer a nice compliment to the other courses within the collateral. This course was suggested by the Finance department.

<table>
<thead>
<tr>
<th>Financial Impact*</th>
</tr>
</thead>
</table>
Add Multidisciplinary Sustainability collateral: No additional faculty needed, but some ESP may be required.

Revise Finance collateral: none.

<table>
<thead>
<tr>
<th>Impact on Other Units*</th>
</tr>
</thead>
</table>
The Herbert College of Agriculture and the College of Arts and Sciences will be involved with the Multidisciplinary Sustainability collateral as described above. Document from AREC can be found in attached files.

Finance department suggested change to the Finance collateral.

**Rationale**

This course is being created to help incoming ALEC students and also those interested in ALEC majors become more familiar with careers, success strategies, self exploration and assist with seamless transition into ALEC.

**Impact on Other Units**

Minimal. ALEC students typically take either AGNR 100 or FYS 101 and the decrease enrollment will have minimal impact on other units.
**Financial Impact**

Minimal. ALEC students typically take either AGNR 100 or FYS 101 and the decrease enrollment will have minimal impact on other units.

### Course Description

Dive into the cutting-edge world of environmental and agricultural technology, from AI innovations to wearable advancements. Engage with experts from fields like Animal Science and Plant Science to see how technology is changing the face of agriculture. But it's not just about gadgets; we'll delve into the human aspect of this technological shift, examining perceptions, adaptation, and the global implications such as climate change and sustainability. As part of the Volcore "Social Science" curriculum, you'll hone your analytical skills, understanding societal behaviors and ethics in this evolving landscape. Equip yourself for the future — both the technological and the human aspects of it.

Herbert College of Agriculture - ALEC - 213
2024-2025 UG Add Course

General Catalog Information

College* Herbert College of Agriculture

Department (Acalog Hierarchy)* Agricultural Leadership, Education, and Communications

Subject/Prefix (choose from list)* ALEC

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 213

Course Title (max 100 characters)* Agricultural Mechanics Applications in Agriscience Education

Experience Learning Designation

- N (Internship)
- R (Research)
- S (Service Learning)

Variable Title?* Yes

Credit Hours* 3

Course Description

The course will focus on developing competencies related to agricultural mechanics applications with an emphasis on safety, skill development, and the management of facilities, equipment, and materials commonly found in agricultural mechanics laboratories in secondary school-based settings.

Will this course be crosslisted? Yes

If yes, what is the crosslisting relationship for this course? Primary

List all courses in this crosslisting relationship and note whether Primary or Secondary.

**Registration Restriction(s)**

**Registration Permission**

**Equivalency**
## Rationale*

Agricultural mechanics is a well-established content area in secondary agriscience education. However, preservice and early-career school-based agricultural education teachers frequently report agricultural mechanics as an area where they feel underprepared to teach, primarily due to a lack of exposure to necessary technical competencies before entering a teaching position. Since the last offering of BSET 202 in 2019, The University of Tennessee, Knoxville has become one of only nine institutions with agricultural education programs that does not offer a lab-based course dedicated to the competencies necessary to teach agricultural mechanics. ALEC 213 Agricultural Mechanics Applications in Agriscience seeks to fill this instructional gap by providing a course that prepares students with the foundational skills needed to operate a safe and effective agricultural mechanics teaching laboratory.

## Impact on Other Units*

Since this course is designed to meet the needs of ALEC students, the impact on other units is expected to be minor. This course will require lab space similar to that previously dedicated to BSET 202.

## Financial Impact*

None

### Comments

Animal Science Majors must earn a grade of C or better in this course or ANSC 150 to remain in the major.

<table>
<thead>
<tr>
<th>Registration Restriction(s)</th>
<th>Registration Permission</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Rationale*

ANSC 150 as EI has an extensive writing project that is too advanced for first-semester students. We have modified course content to focus on modern American practices in...
animal agriculture in a lecture-only format, omitting the project component. Will replace ANSC 150 as the second ANSC course in the major sequence.

<table>
<thead>
<tr>
<th>Impact on Other Units*</th>
<th>Other HCA majors/concentrations that require an introductory ANSC course (primarily ALEC). They have been notified.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financial Impact*</td>
<td>None. The current instructor of ANSC 150 will instruct ANSC 120 in Fall, and likely continue teaching ANSC 150 in the Spring with a smaller class size.</td>
</tr>
</tbody>
</table>

<tr>
<td>Course Description</td>
<td>The projected world population will grow to nearly 10 billion people by 2050. To sustain the nutritional needs of our populations, the demand for milk, eggs, meat, and other animal products will continue to grow. This requires an understanding of the balance needed among competing values of producing a safe, affordable food supply for everyone while sustaining livelihoods, human health, animal health and welfare (ONE-HEALTH) with a limited land base. Developing strategies and technologies to address these needs will be critical for the future. Students will develop the knowledge and skills to be able to investigate and critically evaluate the benefits, challenges, and needs associated with feeding the world with animal protein. If taken prior to Fall 2024, students must complete this course with a grade of C or better to remain in the major of Animal Science.</td>

Equivalency

Rationale*  The ANSC Peer Mentor programs assists new ANSC students negotiate the major requirements, extracurricular options, internships and job opportunities available to them. This credit was formerly offered under a variable-title course number, but the program has been successfully implemented for 3 years and a course number specifically for it would be helpful.

Impact on Other Units*  none.
Financial Impact

none. Course instructors choose and supervise Peer Mentors for that particular course.

Undergraduate students pursuing degrees in Agricultural and Resource Economics can benefit from a specialized approach to the study of financial and managerial controls that incorporates the intersection of biological production with financial management. This class will follow the Farm Financial Standards Councils Financial (FFSC) Guidelines for Agriculture documents, which was created to help farmers promote uniform financial reporting. The uniqueness of this industry has resulted in the FFSC being established in the 1980s to adapt general accounting principles to better fit the agricultural industry. Therefore, the content of this course will align with the industry and likely result in more workforce ready students.

Enrollment in ACCT 200 could decrease by approximately 25 students per academic year.

No short-term financial impact for the Department of Agricultural and Resource Economics due to a reallocation of teaching resources to develop and execute this course.

Only proposals originating from the College of Arts and Sciences should answer these questions.

### Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.
**Contact Hour Distribution (if more than one instructional method)**

2 hours lecture and one 2 hour lab.

**Grading Restriction**

**Repeatability**

**Credit Restriction**

**Registration Enforced (RE)**

**Prerequisite(s)** STAT 201*.

**Department Enforced (DE)**

**Prerequisite(s)**

**Registration Enforced (RE)**

**Corequisite(s)**

**Department Enforced (DE)**

**Corequisite(s)**

**Recommended Background**

**Comments**

**Registration Restriction(s)**

**Registration Permission**

**Equivalency**

**Rationale**

This course deals with topics related to data analysis and forecasting. While examples and problem sets are built around economic and business data, direct knowledge of microeconomic theory is not required for success in this course. Eliminating the ECON 211 Principles of Microeconomics prerequisite will aid in curricular advising for some programs and will open the course to other programs not requiring ECON 211 Principles of Microeconomics.

**Impact on Other Units**

AREC 324 is currently a prerequisite for AREC 444, however the elimination of the ECON 211 prerequisite will not cause advising or degree progression issues.

Current degree programs that require AREC 324 also require ECON 211. Therefore, there will be no decrease in enrollment in ECON 211 due to this change.
Financial Impact*  
In the event of increased demand for the course, additional instructional resources may be required.

Have you consulted with all programs/departments that will be impacted by this change?*  
- ☐ Yes  
- ☐ No  
- ☐ Minor changes only/Not Applicable

Herbert College of Agriculture - Agricultural Leadership, Education, and Communications - Agricultural Leadership, Education, and Communications Major, BS in Agriculture – Agricultural Education Concentration

2024-2025 UG Revise Program

General Catalog Information

College* Herbert College of Agriculture
Department* Agricultural Leadership, Education, and Communications
Program Name* Agricultural Leadership, Education, and Communications Major, BS in Agriculture – Agricultural Education Concentration
Degree Type* Bachelor of Science in Agriculture
Program Type* Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Advisor
Beasley, Granberry, Stripling, Lay

The Agricultural Leadership, Education, and Communications major is designed for students who want a broad, general background in agriculture and wish to develop their leadership and communication skills to pursue careers in business and industry, agricultural education, agricultural extension education and agricultural communications. The agricultural education concentration leads to teacher licensure in agricultural sciences in the State of Tennessee.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

---

**Requirements**

**Rationale**

We included ANSC 120 and FDSC 100 as "or" options in the curriculum to give our students more choices in how to fulfill the requirements.

We also added the BIOL sequence 113, 114, 115 back as an option now that 113 and 114 have Vol Core status.

Boyer, DeLong, Lay, and Walton

Students majoring in food and agricultural business are prepared for a wide variety of career opportunities. The focus of their studies is on the functioning of the agri-food sector in the global economic system and the economic principles for decision making by business managers, consumers, policymakers, and others within that sector. Students complete a curriculum designed to provide them with a broad-based education and the specialized skills necessary for a successful career in the agri-food industry or with a related organization or public agency. The curriculum builds upon the university-wide general education requirements by adding a set of directed electives from within the Herbert College of Agriculture, a set of core courses from within the Haslam College of Business, and a set of required courses within the Department of Agricultural and Resource Economics. Students customize their program by selecting among upper-division electives within the department. General elective hours in the curriculum allow flexibility for students to pursue a minor within some area of technical agriculture or another field such as communications. Students have ample opportunity to develop strong microcomputer skills and gain practical real-world experiences through case study analyses, the NAMA marketing team, internships, and extracurricular activities. Students must complete an experiential learning requirement involving either an internship, an undergraduate research project, or a study abroad experience.

Students graduating with a major in food and agricultural business have many career options. Many graduates take positions in management or marketing with businesses involved in the farm input supply sector. This would include large multinational corporations that manufacture inputs such as machinery, chemicals, and feed, as well as local retailers of such items. Other graduates manage operations involved in the production of agricultural commodities or the processing of food products. Graduates also find career opportunities with food distribution and retailing companies serving as managers, marketing representatives, or in areas of customer service and public relations. Graduates are employed in financial institutions, insurance agencies, or real estate companies. Many industry organizations and government agencies also have employment opportunities for our graduates. It is not uncommon for our graduates to take positions with businesses that are outside the agri-food industry. Graduates also find themselves well prepared for graduate study in agricultural and resource economics or agribusiness management, as well as for professional programs such as law.

Students who wish to target a specific career direction can choose to pursue one of the four optional concentrations: Agricultural Production and Technology Management, Law and Policy, Finance and Risk Management, and Food Industry Management. Because each of these concentrations requires students to complete a more specific set of courses than the base major, students must work closely with their advisor to assure that they schedule required courses prior to their planned graduation date. Many required courses are offered only once per academic year, while a few are offered only every other year. Students unable to complete the required courses as listed for one of the optional concentrations for any reason (e.g., scheduling conflicts with alternate-year courses) will revert to using the base Food and Agricultural Business major.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

---

**Requirements**

**Rationale**

The Department of Agricultural and Resource Economics is streamlining course offerings to best align teaching resources with degree programs and concentrations. ALEC 300 Careers and Professional Development was developed in cooperation with Agricultural and Resource Economics as a replacement for AREC 310 Careers and Placement. Faculty in the Department of Agricultural Leadership, Education, and Communication have the appropriate skills and competencies to more effectively teach topics related to career and professional preparation for students preparing to enter graduate study or the workforce in the fields of Agriculture and Natural Resources. Undergraduate students in Agricultural and Resource Economics begin taking this course in Fall 2022 as a direct substitute for AREC 310.

**Financial Impact**

None

**Impact on Other Units**

AREC 310 was last offered in Fall 2021. Starting in Fall 2022 all AREC majors took ALEC 300 as a substitute for AREC 310. Due to this enrollment in ALEC 300 increased by 30 students per academic year.

**Have you consulted with all programs/departments that will be impacted by this change?**

Herbert College of Agriculture - Agricultural and Resource Economics - Food and Agricultural Business Major, BS in Agricultural and Resource Economics -- Sustainable Supply Chain Management

2024-2025 UG Add Program

General Catalog Information

College* Herbert College of Agriculture

Department* Agricultural and Resource Economics

Program Name* Food and Agricultural Business Major, BS in Agricultural and Resource Economics -- Sustainable Supply Chain Management

Learning Outcomes Food and Agricultural Business Major Student Learning Outcomes

1. Students will be able to explain and illustrate economic concepts and principles related to the market system’s role in allocating society’s resources to and within the food and fiber system.
2. Students will be able to explain and illustrate economic concepts and principles related to decision-making by consumers and producers with regard to agricultural commodities, food products, and natural resources.
3. Students will be able to explain basic principles in the areas of management, marketing and finance, and apply them in the context of agribusiness decision making.
4. Students will be able to use economic logic and quantitative data to analyze problems and identify solutions related to the food and fiber system, the natural resource base, and environmental quality.

Degree Type* Bachelor of Science in Agricultural and Resource Economics

Program Type* Concentration
Description

Advisors

Boyer, DeLong, Lay, and Walton

Students majoring in food and agricultural business are prepared for a wide variety of career opportunities. The focus of their studies is on the functioning of the agri-food sector in the global economic system and the economic principles for decision making by business managers, consumers, policymakers, and others within that sector. Modern agricultural production operates in highly interconnected world markets to produce the food, feed, fiber, and fuel necessary for building and maintaining quality of life in the developed and developing world. The concentration in Sustainable Supply Chain Management gives students a specialized focus on the relationship between agricultural production, global markets, and the supply chains that interconnect them. An emphasis on sustainability provides students with relevant experience dealing with the most pressing issues facing society and the world. This concentration is appropriate for students seeking work in both the public sector and private industry.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*

Rationale*

Globalization has created complex networks of supply chains to provide affordable food and fiber products across the globe. These supply chains rely on the efficient flows of agricultural commodities through production, processing, manufacturing, and retailing sectors for food, fiber, and energy outputs. However, recently, governments and industries alike are placing increasing emphasis on the sustainability of these supply chains and their effects on populations, climate, and the environment. The goal of industries has expanded from optimizing efficient and low-cost supply chains to include sustainable, low-cost, and efficient supply chains. This creates new challenges for industries and the University of Tennessee is well-positioned to train students to be industry leaders in sustainable supply chain management. Students in this concentration will receive specialized training to prepare them for work in rapidly evolving world markets that demand both responsible and profitable solutions for the future.
Financial Impact* Negligible. Similar concentrations/collaterals are being proposed for majors in Supply Chain Management and Sustainability that include that include an equally weighted portfolio of coursework from the GEOG, SCM, and AREC course headings and their respective departments. Instructor resources and courses are already in place to make this concentration possible.

Impact on Other Units* Depending on cohort size, enrollment in certain SCM, GEOG, and AREC courses included in the concentration will increase. Supply Chain Management and Geography are aware of and have approved these additions.

</tbody>
</table>
The Department of Agricultural and Resource Economics offers an accelerated Five-Year Bachelors of Science and Masters of Science (BS-MS) Program for qualified students. Students obtain a BS degree in Agricultural and Resource Economics with a major in Food and Agricultural Business or Natural Resource and Environmental Economics in seven semesters by completing 120 credit hours, including 9 hours of graduate courses that count towards both the BS degree and the MS degree. Students then go on to obtain a thesis-based MS degree in Agricultural and Resource Economics (Agricultural Economics Concentration or Natural Resource Economics Concentration) in three semesters and one summer, completing an additional 22 credit hours of graduate work. Students are typically considered for conditional admission to the BS-MS Program during the third year of undergraduate studies at The University of Tennessee. The MS Program requires that a student complete a thesis project of original research. Therefore, a student is required to start developing a thesis research project in consultation with a thesis advisory committee immediately following their third year of undergraduate studies.

Students seeking admission into the Program must meet the following BS-MS Program requirements:

1. The applicant must have declared a major in Food and Agricultural Business.
2. The applicant must have a minimum GPA of 3.30.
3. The applicant must have completed MS Graduate Program prerequisites *MATH 125*, *STAT 201* or *STAT 207*, *ECON 311*, and *AREC 324* or *BAS 320* or *ECON 381* with a B or better in each course before taking graduate courses as an undergraduate.
4. The applicant must have completed at least 90 hours of coursework toward a BS degree with a major in Food and Agricultural Business.
5. The applicant must ask for three letters of recommendation to be sent directly from the letter writer to the Director of Graduate Studies in Agricultural and Resource Economics.
6. The applicant must complete an interview with the members of the Undergraduate and Graduate Committees in the Department of Agricultural and Resource Economics.
7. The applicant must obtain a commitment from a faculty member in Agricultural and Resource Economics to serve as their major professor and at least two other faculty members to serve on their thesis advisory committee. The major professor serves as mentor and advisor for the MS degree portion of the Program.

Besides the aforementioned BS-MS Program requirements, the department may consider other factors such as applicant maturity and work experience before conditionally admitting a student to the BS-MS Program. Conditional admission of a student into the BS-MS Program must be approved by both the Department of Agricultural and Resource Economics and the Graduate School. Applicants are informed of the admission decision before the beginning of the fourth year of their BS.

Any course taken for graduate credit before satisfying all of the requirements for the BS degree must be approved by both the Director of Graduate Studies in Agricultural and Resource Economics and the graduate council.
Resource Economics and the Graduate School. The courses must be identified in advance, in consultation with the undergraduate advisor, proposed major professor, and thesis advisory committee members. The form "Agricultural and Resource Economics Conditional Admission Five-Year BS-MS" is available from the Graduate Director and must be completed, signed by the student and the Graduate Director before submitting to the Graduate School for approval and processing. The University of Tennessee, Knoxville Senior Privilege rule imposes a maximum of 9 hours on the number of graduate-level hours that an undergraduate student may complete before completing an undergraduate degree and being formally admitted to the Graduate School. A student who is conditionally admitted to the BS-MS Program completes 9 hours of graduate credit during the student's fourth year of undergraduate study, and applies those 9 hours to satisfy both BS and MS degree requirements.

Conditional admission into the BS-MS Program does not guarantee acceptance into either the Graduate School or the MS Program. Students in the BS-MS Program must apply for admission to the Graduate School and to the MS Program during their fourth year of undergraduate study, following the same procedures that all other student applicants follow. Students will be fully admitted to the MS Program after they have been accepted both by the Graduate School and by the MS Program in Agricultural and Resource Economics. Students will not be eligible for graduate assistantships until they are enrolled as graduate students in the Graduate School.

**General Instructions for Requirements**

Description  Compared to the base major, this concentration requires departmental courses in food industry management and marketing as well as food policy. A course in food laws and regulations is also required. This concentration would be appropriate for students interested in employment with companies engaged in the processing of agricultural commodities or the manufacturing, wholesaling, or retailing of food products.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*
The Department of Agricultural and Resource Economics is streamlining course offerings to best align teaching resources with degree programs and concentrations. ALEC 300 Careers and Professional Development was developed in cooperation with Agricultural and Resource Economics as a replacement for AREC 310 Careers and Placement. Faculty in the Department of Agricultural Leadership, Education, and Communication have the appropriate skills and competencies to more effectively teach topics related to career and professional preparation for students preparing to enter graduate study or the workforce in the fields of Agriculture and Natural Resources. Undergraduate students in Agricultural and Resource Economics begin taking this course in Fall 2022 as a direct substitute for AREC 310.

**Financial Impact**

None

**Impact on Other Units**

AREC 310 was last offered in Fall 2021. Starting in Fall 2022 all AREC majors took ALEC 300 as a substitute for AREC 310. Due to this enrollment in ALEC 300 increased by 30 students per academic year.

Description

Advisors
Boyer, Clark, Lay, and Walton

Students majoring in natural resource and environmental economics are prepared for a variety of careers in both the private and public sectors. With increasing competition for limited land, water, and other natural resources in the U.S. and throughout the world, as well as growing concern about environmental degradation of various sorts, there is a growing need for professionals who can assist in the process of balancing economic and environmental tradeoffs. Private firms face serious challenges in meeting stricter environmental regulations and achieving self-imposed environmental goals. Public agencies must continually seek to design policies so that society's resource conservation or environmental quality goals are achieved in a cost-effective manner.

The curriculum builds upon the university-wide general education requirements with a set of core courses in business and economics. Students then take advanced and specialized coursework that focuses on the economic foundations for policies designed to foster natural resource conservation or enhance environmental quality. The curriculum is highly interdisciplinary. Courses are required in the physical and environmental sciences covering subject matter such as conservation, ecology, and forestry, as well as soil and water resource issues. Coursework is required in environmental ethics, environmental law, and other social science disciplines such as sociology. Students gain skills using tools such as geographic information systems for analysis of spatially-referenced data.

Students graduating with this major may find employment in private firms with environmental compliance activities or conservation initiatives directed toward energy or other natural resources. Opportunities also exist with consulting firms that assist clients in meeting environmental objectives. Many nonprofit environmental organizations seek to employ staff with economic training. Several federal government agencies, including the Environmental Protection Agency and the departments of Agriculture, Interior, and Energy, employ natural resource and environmental economists. State and local government agencies also provide opportunities for employment. The major provides a strong background for graduate studies in natural resource and environmental economics, leading to career opportunities in teaching and/or research, as well as high-level policy positions. Students would also be well prepared to pursue a professional program in environmental law.

Herbert College of Agriculture - Agricultural and Resource Economics - Natural Resource and Environmental Economics Major, BS in Agricultural and Resource Economics - Sustainable Supply Chain Management

2024-2025 UG Add Program

General Catalog Information

College*  Herbert College of Agriculture

Department*  Agricultural and Resource Economics

Program Name*  Natural Resource and Environmental Economics Major, BS in Agricultural and Resource Economics - Sustainable Supply Chain Management

Learning Outcomes  Natural Resource and Environmental Economics Student Learning Outcomes

1. Students will be able to explain and illustrate economic concepts and principles related to the market system’s role in allocating society’s resources to and within the food and fiber system.
2. Students will be able to explain and illustrate economic concepts and principles related to decision-making by consumers and producers with regard to agricultural commodities, food products, and natural resources.
3. Students will be able to identify and explain the market failures associated with environmental externalities, public goods, and scarce natural resources along with the array of policy tools that can be used to address these failures.
4. Students will be able to use economic logic and quantitative data to analyze problems and identify solutions related to the food and fiber system, the natural resource base, and environmental quality.

Degree Type*  Bachelor of Science in Agricultural and Resource Economics

Program Type*  Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Globally, natural resources such as land and water are becoming increasingly limited. Additionally, societies are becoming more interested in understanding the environmental impacts of policies and economic changes. Students majoring in natural resource and environmental economics are prepared for a variety of careers in both the private and public sectors addressing these concerns. There is a growing need for professionals who can assist in the process of balancing economic and environmental tradeoffs. Private firms face serious challenges in meeting stricter environmental regulations and achieving self-imposed environmental goals while remaining profitable. Public agencies must continually seek to design policies so that society's resource conservation or environmental quality goals are achieved in a cost-effective manner. The concentration in Sustainable Supply Chain Management requires specialized coursework that focuses on developing and analyzing how supply chains can reduce environmental impacts, efficiently use natural resources, and keep firms profitable. Students receive specialized training on the relationships between global markets and the ways in which they allocate scarce resources. This concentration is appropriate for students seeking work in both the public sector and private industry.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*

Rationale*

Globalization has created complex networks of supply chains dealing with natural resources, energy, and their respective markets and environmental impacts. Recently, governments and industries alike are placing increasing emphasis on the sustainability of these supply chains and their effects on populations, climate, and the environment. The goal of industries has expanded from optimizing efficient and low-cost supply chains to include sustainable, low-cost, and efficient supply chains. This creates new challenges for industries and the University of Tennessee is well-positioned to train students to be industry leaders in sustainable supply chain management. Students in this concentration will receive specialized training to prepare them for work in rapidly evolving world markets that demand both responsible and profitable solutions for the future.
that demand both responsible and profitable solutions for the future.

Financial Impact*  Negligible. Similar concentrations/collaterals are being proposed for majors in Supply Chain Management and Sustainability that include that include an equally weighted portfolio of coursework from the GEOG, SCM, and AREC course headings and their respective departments. Instructor resources and courses are already in place to make this concentration possible.

Impact on Other Units*  Depending on cohort size, enrollment in certain SCM, GEOG, and AREC courses included in the concentration will increase. Supply Chain Management and Geography are aware of and have approved these additions.

2024-2025 UG Revise Program

General Catalog Information

College* Herbert College of Agriculture

Department* Agricultural and Resource Economics

Program Name* Natural Resource and Environmental Economics Major, BS in Agricultural and Resource Economics – Five-Year BS/MS in Agricultural and Resource Economics – Natural Resource Economics

Degree Type* Bachelor of Science in Agricultural and Resource Economics

Program Type* Concentration
The Department of Agricultural and Resource Economics offers an accelerated Five-Year Bachelors of Science and Masters of Science (BS-MS) Program for qualified students. Students obtain a BS degree in Agricultural and Resource Economics with a major in Food and Agricultural Business or Natural Resource and Environmental Economics in seven semesters by completing 120 credit hours, including 9 hours of graduate courses that count towards both the BS degree and the MS degree. Students then go on to obtain a thesis-based MS degree in Agricultural and Resource Economics (Agricultural Economics Concentration or Natural Resource Economics Concentration) in three semesters and one summer, completing an additional 22 credit hours of graduate work. Students are typically considered for conditional admission to the BS-MS Program during the third year of undergraduate studies at The University of Tennessee. The MS Program requires that a student complete a thesis project of original research. Therefore, a student is required to start developing a thesis research project in consultation with a thesis advisory committee immediately following their third year of undergraduate studies.

Students seeking admission into the Program must meet the following BS-MS Program requirements:

1. The applicant must have declared a major in Food and Agricultural Business.
2. The applicant must have a minimum GPA of 3.30.
3. The applicant must have completed MS Graduate Program prerequisites MATH 125*, STAT 201* or STAT 207*, ECON 311, and AREC 324 or BAS 320 or ECON 381 with a B or better in each course before taking graduate courses as an undergraduate.
4. The applicant must have completed at least 90 hours of coursework toward a BS degree with a major in Food and Agricultural Business.
5. The applicant must ask for three letters of recommendation to be sent directly from the letter writer to the Director of Graduate Studies in Agricultural and Resource Economics.
6. The applicant must complete an interview with the members of the Undergraduate and Graduate Committees in the Department of Agricultural and Resource Economics.
7. The applicant must obtain a commitment from a faculty member in Agricultural and Resource Economics to serve as their major professor and at least two other faculty members to serve on their thesis advisory committee. The major professor serves as mentor and advisor for the MS degree portion of the Program.

Besides the aforementioned BS-MS Program requirements, the department may consider other factors such as applicant maturity and work experience before conditionally admitting a student to the BS-MS Program. Conditional admission of a student into the BS-MS Program must be approved by both the Department of Agricultural and Resource Economics and the Graduate School. Applicants are informed of the admission decision before the beginning of the fourth year of their BS.

Any course taken for graduate credit before satisfying all of the requirements for the BS degree must be approved by both the Director of Graduate Studies in Agricultural and Resource Economics and the Director of Undergraduate Studies.
Resource Economics and the Graduate School. The courses must be identified in advance, in consultation with the undergraduate advisor, proposed major professor, and thesis advisory committee members. The form "Agricultural and Resource Economics Conditional Admission Five-Year BS-MS" is available from the Graduate Director and must be completed, signed by the student and the Graduate Director before submitting to the Graduate School for approval and processing. The University of Tennessee, Knoxville Senior Privilege rule imposes a maximum of 9 hours on the number of graduate-level hours that an undergraduate student may complete before completing an undergraduate degree and being formally admitted to the Graduate School. A student who is conditionally admitted to the BS-MS Program completes 9 hours of graduate credit during the student's fourth year of undergraduate study, and applies those 9 hours to satisfy both BS and MS degree requirements.

Conditional admission into the BS-MS Program does not guarantee acceptance into either the Graduate School or the MS Program. Students in the BS-MS Program must apply for admission to the Graduate School and to the MS Program during their fourth year of undergraduate study, following the same procedures that all other student applicants follow. Students will be fully admitted to the MS Program after they have been accepted both by the Graduate School and by the MS Program in Agricultural and Resource Economics. Students will not be eligible for graduate assistantships until they are enrolled as graduate students in the Graduate School.

General Instructions for Requirements

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

To remain in the major, students must maintain at least a 2.0 cumulative GPA in ANSC courses by the end of semester three. Students must complete ANSC 100*, ANSC 120* (Fall 2024 onwards) or ANSC 150* (prior to Fall 2024), and ANSC 220 with minimum grades of C, C, and C- respectively to remain in the Animal Science Major.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
### Requirements

*Undergraduate Council*

**Rationale**

- Reflect change in introductory ANSC sequence from 100-150-250 to 100-120-250 effective Fall 2024. ANSC 150 will still count toward the sequence if taken prior to Fall 2024.

- Incorporates new ANSC 480.

- Adds ANSC 461, 470, 480, 493 and 499 to STEM list.

**Financial Impact**

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
For qualified students, the Department of Animal Science offers a Five-Year BS/MS accelerated degree program with a BS major in Animal Science and a thesis-based MS major in Animal Science. Central to this program is that a qualified student may take up to nine hours of graduate level courses for their senior undergraduate electives and have them count toward both the BS degree and the MS degree. Students are typically considered for conditional admission to the program during, or immediately following, their third year of undergraduate study at the University of Tennessee, Knoxville. Because the MS program requires that a student write a thesis based on original research, efforts related to developing and starting a research-based project in consultation with a graduate advisory committee (that meets MS committee requirements) is required immediately following their third year of undergraduate studies.

To be considered for conditional admission to the program:

- A student must be a declared Animal Science major with a minimum GPA of 3.4, must have completed at least 15 hours of credit in Animal Science, and must have completed at least 90 hours of the 120 hours of coursework required for the BS degree with a major in Animal Science.
- A student must provide three letters of recommendation and complete a personal interview with individuals comprising the Graduate and Undergraduate Committees in the Department of Animal Science.
- A student must obtain a commitment from an Animal Science graduate research faculty member to serve as his/her graduate mentor-advisor (i.e., major professor) and at least two other graduate research faculty members to serve on his/her graduate advisory committee.

Applicants are required to have completed at least six credit hours from the following Animal Science core courses (i.e., ANSC 320, ANSC 330, ANSC 340, ANSC 380, or their Honors counterparts). The department may consider other relevant factors such as an applicant's work experience and level of maturity before conditionally admitting a student to the BS/MS program. Conditional admission of a student into the Five-Year BS/MS program must be approved by the Department of Animal Science, and the Graduate School. Students will be typically informed of the outcome of their application before the beginning of their fourth year of undergraduate study.

Any graduate course that is to be counted towards both the BS degree and the MS degree must be approved by the student's graduate advisory committee, the departmental Graduate Director, and by the Graduate School. These courses must be identified in consultation with the graduate advisory committee members. The form "Animal Science Conditional Admission Five-Year BS-MS" is available from the Graduate Director and must be completed, signed by the student, the student's graduate advisory committee and the Graduate Director, and the Undergraduate Coordinator before submitting to the Graduate School for approval and processing.

A student that is conditionally admitted to the BS/MS program may complete up to nine credit hours of graduate level coursework during the student's undergraduate study, and apply those nine credit hours to satisfy both the BS degree requirements and the MS degree requirements, provided that these graduate credit hours were approved by both the Department and by the Graduate School. To receive graduate credit for up to the 9
credit hours listed on the Animal Science Conditional Application form and approved by their graduate advisory committee, and others granting approval by signing that form, the student must complete and submit the Senior Requesting Graduate Credit Form to the Graduate School. If courses are to be taken during different semesters, the student will need to submit this form before the start of each relevant semester.

Conditional admission into the BS/MS program does not guarantee acceptance into either the Graduate School or the MS program. Students in the BS/MS program must apply for admission to the Graduate School and to the MS program during their fourth year of undergraduate study, following the same procedures that all other student applicants follow. Students will be fully admitted to the MS program after they have been accepted both by the Graduate School and by the Animal Science MS program. Students will not be eligible for graduate assistantships until they are enrolled as graduate students in the Graduate School.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Veterinary Science – Stage I is a two-year plan for students seeking to progress to the Veterinary Science-Stage II or Veterinary Science 3+1 concentrations. Students must apply for entry into the Pre-Veterinary Medicine-Stage II or PVM 3+1 concentration after completion of 60 total credit hours with a minimum of 15 credit hours taken at UTK. Students must have a minimum cumulative UTK GPA of 3.0. Courses listed below must be completed with a minimum grade of C (or an S for AP courses):

- BIO 101
- BIO 102
- BIO 160
- BIO 150
- BIO 159
- BIO 160
- CHEM 122
- CHEM 123
- CHEM 132
- CHEM 133
- MATH 125
- MATH 132
- MATH 141
- MATH 151
- ANSC 220

If a student does not meet the above criteria after completion of 60 total credit hours with a minimum of 15 credit hours taken at UTK, the student cannot progress into STAGE II or 3+1 and must meet with their advisor to discuss changing concentrations or majors. A student may only apply once to progress to STAGE II or 3+1. If a Pre-Veterinary Medicine Stage I student receives a C– in ANSC 220, the student cannot progress into STAGE II or 3+1 and must meet with their advisor to discuss changing concentrations or majors. If a student in any concentration receives less than a C– in ANSC 220, they cannot progress in the major. Students must complete ANSC 100, ANSC 120 (or ANSC 150 if taken prior to Fall 2024), and ANSC 220 with minimum grades of C, C, and C– respectively to remain in the Animal Science Major.

To remain in the Animal Science Pre-veterinary medicine 3+1 concentration, students must maintain a 3.0 cumulative GPA.

### General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

### Requirements

### Rationale

Concentration name change from "Pre-Veterinary Medicine 3+1" to "Veterinary Science 3+1" to better reflect curriculum and intent.

Incorporates change of ANSC introductory sequence form 100-150-250 to 100-120-250

Incorporates new concentration names in Description

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

### Requirements*

#### Rationale*

Concentration name change from "pre-Veterinary Medicine" to "Veterinary Science" to better reflect curriculum and intent.

- New Introductory ANSC sequence 100-120-250 replaces old 100-150-250
- New STEM and Business additions to increase flexibility and reflect new ANSC courses
- 4 hr BIOL/EEB/MICR/BCMB requirement within STEM reduced to 3 hours to better reflect CVM requirements.

#### Financial Impact*

none

#### Impact on Other Units*

Course Description
This course provides students with the fundamentals of data science and modeling for analyzing environmental, ecological, and agricultural systems using the open-source software R. Note that prior programming experience is not required. This course is organized into the following sections: (1) introduction to programming in R, including the development of skills for cleaning environmental data, summarizing data, and creating visualizations, (2) overview of data-based and process-based modeling approaches, (3) applications, evaluation, and challenges of modeling in relation to environmental systems. Students will gain a broad understanding of different analytical tools and learn to apply such methods to agricultural and ecological data. This course is designed for students in a natural resources and life sciences discipline.
Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Undergraduate Council

February 20, 2024
The Herbert College of Agriculture, in cooperation with the Tickle College of Engineering, offers a four-year curriculum leading to the Bachelor of Science in Biosystems Engineering. The curriculum is accredited by the Engineering Accreditation Commission of ABET, [http://www.abet.org](http://www.abet.org). Overall goals of the program are emphasized in the educational objectives and program outcomes statements listed below. Program details are given in the showcase curricula and the individual course descriptions.

Career opportunities for graduates include the design, development, or management of practices that produce biofuels, minimize soil erosion, and conserve water resources and manage stormwater; biological waste treatment systems; safer machinery systems with lower environmental impact; and improved food and bio-processing systems. Employment opportunities are available in a wide variety of industries, government agencies, research and testing organizations, and educational and non-profit institutions.

The curriculum provides instruction in the analytical and design skills needed to solve engineering problems related to biological and agricultural systems. Comprehensive design of systems and their components is emphasized in the senior year. In addition to the standard biosystems engineering curriculum, a pre-professional concentration is available. The degree program has provisions for elective courses to be taken in specified subject areas. Proper scheduling of courses is very important since prerequisite requirements must be met. Students must consult with their advisors each semester to review their scheduling plan.

Students majoring in biosystems engineering are eligible to participate in the Engineering Cooperative Scholarship Program and other student activities in the Tickle College of Engineering. Biosystems engineering majors interested in the Engineering Cooperative Scholarship Program should consult with their faculty advisor or the head of the Biosystems Engineering and Soil Science Department, 865-974-7266; e-mail [bess@utk.edu](mailto:bess@utk.edu).

The biosystems engineering program at the University of Tennessee, Knoxville, provides an exceptional breadth of background in science and engineering, a strong emphasis on design throughout the curriculum, and a focused application of engineering principles to complex biological systems. The program enables its students to perform in a manner that reflects positively on the program and the institution's reputation.

The Biosystems Engineering Program has ABET Program Educational Objectives that align with the objectives of the University of Tennessee Institute of Agriculture. Graduates are prepared to:

- Successfully apply engineering principles to complex biological systems, with principles grounded in improving ecological systems and water quality, sustainable food and fiber production and processing, renewable energy production and implementation, efficient mechanical designs and automation, innovative instrumentation and sensors, or related fields,
- Continue developing as professionals and leaders in society, through
Incorporate a wide range of social and cultural issues and corresponding solutions into engineering and professional activities.

Student Outcomes

To achieve the program educational objectives listed above, a series of student outcomes have been adopted. These student outcomes provide specific measures to determine the degree of success in meeting each of the educational objectives. In order to be considered successful, at the time of graduation our students should demonstrate the following abilities:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

One of the primary tools engineers bring to the solution of many problems is a mastery of mathematics, so mathematical competence is a critical component of an engineering education. In order to graduate with a major in biosystems engineering, students must display this competence by achieving an average GPA of at least 2.0 in the required mathematics courses. Students have the responsibility to work with their academic advisor to assure that they meet this requirement.

In order to provide students with the best advice concerning course selection, general academic success, and career choices, the programs within the Department of Biosystems Engineering and Soil Science require that all undergraduate students meet with their academic advisors every semester before registering for classes.

In keeping with the general Tickle College of Engineering requirement, all Biosystems Engineering undergraduate students are expected to have their own laptop computer. Please see the minimum computer requirements described at http://www.engr.utk.edu/ithelp/computers/.

Requirements for Admission, Readmission, and Transfer to the Program

Because the biosystems engineering program is accredited through the Tickle College of
Because the biosystems engineering program is accredited through the Tickle College of Engineering, students entering, being readmitted to, or transferring into the program must meet the conditions specified in the Tickle College of Engineering requirements found on the main Tickle College of Engineering page under the titles of College Admission Requirements, Readmission, and Transfer Students.

Progression Policies and Requirements

Progression of students to departmental upper-division courses is competitive and is based on the space available in the department. Factors considered include overall grade point average, performance in selected lower-division courses, and evidence of satisfactory and orderly progress through the prescribed curriculum.

Requirements*

Rationale* We are replacing this program with a series of concentrations, which have already received approval from both the Tickle and Herbert Undergraduate Council / Committees. We now feel comfortable moving ahead with ending this "concentrationless" program

Impact on Other Units* None. Simply shifting students to the concentration programs

Financial Impact* This move is being made to allow us to better recruit by having more "self-evident" concentrations instead of the generic Biosystems Engineering that does no bring any images to mind

Have you consulted with all programs/departments that will be impacted by this change?* Yes  No

Number of students in program* about 60, but all can easily move to a concentration-based program.

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Advisors

Burk, Yoder

The Herbert College of Agriculture, in cooperation with the Tickle College of Engineering, offers a four-year curriculum leading to the Bachelor of Science in Biosystems Engineering, which is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org, under the General Criteria and the Biological Program Criteria. Overall goals of the program are emphasized in the educational objectives and program outcomes statements listed below. Program details are given in the showcase curricula and the individual course descriptions.

Career opportunities for graduates include the design, development, or management of practices that protect, enhance, and ameliorate ecological systems, including especially impacted watersheds, streams and rivers, and wetlands. Employment opportunities are available in a wide variety of industries, government agencies, research and testing organizations, and educational and non-profit institutions.

The curriculum provides instruction in the analytical and design skills needed to solve engineering problems related to biological and ecological systems. Comprehensive design of systems and their components is emphasized in the senior year. In addition to the standard biosystems engineering curriculum, a pre-professional concentration is available. The degree program has provisions for elective courses to be taken in specified subject areas. Proper scheduling of courses is very important since prerequisite requirements must be met. Students must consult with their advisors each semester to review their scheduling plan.

Students majoring in biosystems engineering are eligible to participate in the Engineering Cooperative Scholarship Program and other student activities in the Tickle College of Engineering. Biosystems engineering majors interested in the Engineering Cooperative Scholarship Program should consult with their faculty advisor or the head of the Biosystems Engineering and Soil Science Department, 865-974-7266; e-mail bess@utk.edu.

The biosystems engineering program at the University of Tennessee, Knoxville, provides an exceptional breadth of background in science and engineering, a strong emphasis on design throughout the curriculum, and a focused application of engineering principles to complex biological systems. The program enables its students to perform in a manner that reflects positively on the program and the institution's reputation.

The Biosystems Engineering Program has Program Educational Objectives that align with the objectives of the University of Tennessee. Graduates are prepared to:

A. Successfully apply engineering principles to complex biological systems, with principles grounded in improving ecological systems and water quality, sustainable food and fiber production and processing, renewable energy production and implementation, efficient mechanical designs and automation, innovative instrumentation and sensors, or related fields,

B. Continue developing as professionals and leaders in society, through professional involvement and/or lifelong learning, and
C. Incorporate a wide range of social and cultural issues and corresponding solutions into engineering and professional activities.

Student Learning Outcomes
Student learning outcomes (SLO) 1-7 have been chosen by the faculty to establish a framework for our students to realize the program educational objectives. For continuous improvement, each outcome has achievement measures taken throughout the course of study. This faculty feedback helps to ensure that our engineering students at their graduation have the necessary career skills and knowledge.

SLO 1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science, and mathematics
SLO 2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental, and economic factors
SLO 3. an ability to communicate effectively with a range of audiences
SLO 4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
SLO 5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
SLO 6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
SLO 7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

One of the primary tools engineers bring to the solution of many problems is a mastery of mathematics, so mathematical competence is a critical component of an engineering education. In order to graduate with a major in biosystems engineering, students must display this competence by achieving an average GPA of at least 2.0 in the required mathematics courses. Students have the responsibility to work with their academic advisor to assure that they meet this requirement.

In keeping with the general Tickle College of Engineering requirement, all Biosystems Engineering undergraduate students are expected to have their own laptop computer. Please see the minimum computer requirements described at http://www.engr.utk.edu/ithelp/computers/.

Requirements for Admission, Readmission, and Transfer to the Program

Because the biosystems engineering program is accredited through the Tickle College of Engineering, students entering, being readmitted to, or transferring into the program must meet the conditions specified in the Tickle College of Engineering requirements found on the main Tickle College of Engineering page under the titles of College Admission Requirements, Readmission, and Transfer Students.

Progression Policies and Requirements

Progression of students to departmental upper-division courses is competitive and is
based on the space available in the department. Factors considered include overall grade point average, performance in selected lower-division courses and evidence of satisfactory and orderly progress through the prescribed curriculum.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*

Rationale* We would like to add concentrations to better reflect what our students do, as “Biosystems Engineering”, is so broad as to not be descriptive. For each of these the two Technical Elective courses in the original program are replaced with selective electives, and two other courses are specified, so that each concentration varies from either the current “no concentration” or the current Pre-Professional concentration by 12 hours.

Financial Impact* Requires no new classes in the program that have not already been added for new faculty. Will hopefully attract additional undergraduate students to the program

Impact on Other Units* Contains several specified VolCore courses rather than having them as electives. The student numbers in the overall BSE program are not very large (50-60, so 12-15 in each cadre), so the number in this specific concentration is likely to be small. The ESS classes are in our department, and that has been approved

Have you consulted with all programs/departments that will be impacted by this change?* Yes No

ADMINISTRATIVE USE ONLY

For each of these the two Technical Elective courses in the original program are replaced with selective electives, and two other courses are specified, so that each concentration varies from either the current “no concentration” or the current Pre-Professional concentration by 12 hours.

Financial Impact* Requires no new classes in the program that have not already been added for new faculty. Will hopefully attract additional undergraduate students to the program

Impact on Other Units* Contains three FDSC courses (110, 410, 421), which has been approved by the HCA Undergraduate Council representative from FDSC. The student numbers in the overall BSE program are not very large (50-60, so 12-15 in each cadre), so the number in this specific concentration is likely to be small.

Have you consulted with all programs/departments that will be impacted by this change?* Yes

ADMINISTRATIVE USE ONLY

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Advisors

Buchanan, Burk, Sain, Smith, Whitman

The Bachelor of Science in Construction Science and Management prepares students for entry into the very broad and diverse range of careers related to construction, including residential, agricultural, commercial, roadway, and excavation construction. Students in this program typically enjoy the outdoors and the sense of accomplishment that comes from seeing a project grow from an idea to a finished product. This field relies on knowledge from engineering, technology, construction, and business, and combines those with important skills related to teamwork and leadership. The program provides a strong background in science and math, adds fundamental concepts from engineering, and provides exposure to relevant technology and techniques such as CAD, land surveying, and estimating. The major focuses on specific technical areas providing the skills required to manage the sophisticated technological systems increasingly essential in today’s construction world. Coursework in economics and the management of a small business are also included, along with oral and written communication. This program is designed to be less theoretical, more applied, and focused on the broad range of management opportunities within the construction industry.

Transfer or change of major students seeking admission into the Construction Science and Management degree program must be in good academic standing (2.00 or higher in the UT system).

Proper selection of business-related elective courses in the Construction Science and Management program may meet the coursework requirements for a Minor in Business Administration or for a Minor in Agricultural Business. This business background is supplemented with courses addressing construction-specific issues in accounting, finance, and law. Issues related to green/sustainable construction practices are also covered. Students are encouraged to identify experiences in construction practice such as internships or part time/summer work, which is facilitated through the very active Construction Science Student Club.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
Rationale*: Modify curriculum to reflect course Drops and Adds

Financial Impact*: None. Faculty have been recently hired to teach the new curriculum

Impact on Other Units*: Only impacted units would be those from whom a few students took Technical Electives, which are no longer required.

Have you consulted with all programs/departments that will be impacted by this change?*

**General Instructions for Description**

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Many human activities adversely impact soil, water, and environmental quality; and there is a constant need for experts in the technologies required to collect sound information and to provide food, fiber, and shelter in an environmentally-sound manner. The Bachelor of Science in Environmental and Soil Sciences provides students with a strong grounding in basic sciences to prepare them for a broad range of possible careers.

This program provides three concentrations: Soil Science, Environmental Science, and Conservation Agriculture and Environmental Sustainability. All provide a very strong basis in the natural sciences, as well as applied areas such as ecology, soil sciences, and natural resource policy. Students also build expertise with modern technologies such as geographical information systems, global positioning systems, and computer applications in natural resource management. Graduates are prepared to work in a wide variety of interesting and challenging career paths and to work with a broad variety of other professionals to solve complex problems. Examples of potential careers include soil and environmental specialists and scientists; state and federal regulatory agency work; private consulting in environmental and agricultural areas; and working with non-governmental organizations with interests in agriculture, environment, and natural resources. Students receiving this degree are also very competitive for placement in graduate programs in environmental and agricultural sciences and technology, as well as law school.

The conservation agriculture and environmental sustainability concentration is a multidisciplinary program for students interested in conservation of natural resources and sustainability of agricultural systems. This degree provides students with a wide array of skills and scientific training in identifying and understanding important issues in environmental sustainability. The focus will be on both the micro-scale and macro-scale of food production, as well as providing a solid introduction to technical skills such as surveying and machinery operations needed to fulfill current and future food demands. An undergraduate degree in this field is also a first step towards certification as a Professional Soil Scientist.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
| **Rationale** | Clean up; missed one place where the three options should be listed in Term 8 instead of just the two |
| **Financial Impact** | None |
| **Impact on Other Units** | None |

Rationale*: Replaces current CSM 222 with a course introducing a broader range of current software

Impact on Other Units*: None. Not taken by other students, nor is it a prerequisite for anything external

Financial Impact*: Taught by faculty currently teaching CSM 222, which is being dropped

Arts and Sciences Only

Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal?

- Arts and Humanities
- Natural Sciences
- Social Sciences

Select the checkbox if this course should be considered a Writing Emphasis course:

- Writing-emphasis course.
Should this course be considered for Connections?

- Yes
- No

If yes, which Connections category?

- Ancient Mediterranean Studies
- Biodiversity and Humans
- Cultural and Artistic Achievement: Arts in the United States
- Cultures and Societies
- Emerging Asia
- Environment and Society
- Geographic Information Science for Our Changing World
- Global Social Justice
- Health and Biophysics
- Health Care Perspectives
- How to Live in the Premodern World
- Humans Living on a Dynamic Earth
- Inequalities: Race, Ethnicity, Class, and Gender
- Mobility and Migration
- New Geographies of the Global Economy
- Our World: Contemporary Arts and Culture
- Rise and Decline of Premodern Complex Societies
- Shifting Borders and Cultures in Europe
- Understanding Climate Change
- Visual Cultures and Media Studies

February 20, 2024
Herbert College of Agriculture - CSM - 430
2024-2025 UG Drop/Archive Course

General Catalog Information

College* Herbert College of Agriculture

Department (Acalog Hierarchy)* Biosystems Engineering and Soil Science

Subject/Prefix (choose from list)* CSM

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 430

Catalog Name (max 100 characters)* Construction Field Operations and Sustainability

Credit Hours* 3

Change course status from active to:*
- Dropped (Inactive-Hidden)
- Archived

Course Description
Introduction to construction field operations and project organization. Integrates project management with field supervision, emphasizing the requirements normally associated with on-site commercial construction activities. Special attention will be given in areas of stakeholders, recordkeeping, mobilization, closeout, equipment, communication, and safety compliance. Additional considerations for energy efficiency and environmentally sustainable buildings, development practices, and the construction process.

Statement about Crosslistings
If course is crosslisted, then use the "Crosslistings" tab on menu to the right to bring in all applicable dropped courses. You must start a crosslist with the primary course, and all courses must exist before they can be crosslisted.

## Course Description

Introduction to the basic principles of sustainable construction with environmental impacts and considerations in the construction industry. Focus on technologies and practices to mitigate environmental impacts and programs that assess the environmental quality of construction projects. Additional consideration for evolving technologies to support sustainable construction.
Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Statement about Crosslistings:

If course is to be crosslisted, then use the "Crosslistings" tab on menu to the right to add all applicable secondary courses. You must start a crosslisting with the primary course, and all courses must be new before they can be crosslisted using this form. If any of the courses (primary or secondary) already exist, you must complete an Add Course form for the new course. Add the crosslisting with a Revise Course form after full approval of the new course.

#### Course Description
Applications of materials, methods, and equipment within the construction environment to facilitate field operations, including pre-construction planning and field operations during construction. Focuses on decision-making processes for construction sites challenges and common strategies to maintain project progression. Includes case study analysis of methods of sequencing, scheduling, site organization, site safety, and site logistics.

## Course Description

Forensic entomology is the study of insects and other arthropods in a criminal justice setting, specifically related to death, abuse, or neglect investigations. The topics covered in this class will serve as broad surveys of the various methods used in this field, as well as relevant research areas, future directions of the field, and the importance of this field to human society. This course will prepare students for higher level courses in biology and the forensic sciences.
Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Enforced (RE)
Prerequisite(s):

Department
There is a growing need to offer additional introductory classes in the Department of Entomology and Plant Pathology to support the undergraduate minor. Previously, a similar class was offered in the Department of Anthropology (College of Arts and Sciences), where it was very popular among undergraduates in the forensic concentration. By offering a forensic entomology class in EPP, we will be able to draw in a large cohort of CAS and HCA students who can apply knowledge gained from this class to a broad range of disciplines, including veterinary medicine, agriculture, and even food science. This course will support the EPP undergraduate minor and HCA VolCore offerings. Desired Outcomes: By the end of this course, students will understand the basic biology of forensically important arthropods, the basic trajectory of human and animal decomposition, and the applications and limitations of arthropod biology in legal investigations. Students in this online course will learn critical thinking skills that can be applied to any number of basic biological problems and courses.

Desired Outcomes: By the end of this course, students will understand the basic biology of forensically important arthropods, the basic trajectory of human and animal decomposition, and the applications and limitations of arthropod biology in legal investigations. Students in this online course will learn critical thinking skills that can be applied to any number of basic biological problems and courses.

This course will pique student interest in the broad discipline of entomology by first introducing them to an interesting and novel sub-field capable of attracting students into the Entomology and Plant Pathology minor.

Negligible. This course will be taught by a current employee.
Only proposals originating from the College of Arts and Sciences should answer these questions.

**Course Description**
The World of Fungi is a comprehensive exploration of the diverse fungal kingdom and the impact of fungi on human societies, plants, animals, and ecosystems, as well as their economic importance in various industries. The topics covered will broaden student knowledge on the benefits (food, medicines, waste decomposition), challenges (disease, toxins, food safety and security), and opportunities (industrial uses, environmental clean-up) created by fungi. This course will prepare students for higher level courses in biology, plant pathology, and microbiology.

Will this course be crosslisted?

### Course Description

Identification, biology, and control of arthropods that are parasites of humans and animals. The course focuses on arthropods and their biology, life histories, habitats, hosts, and options for management. Review and discussion of sampling/monitoring methods and decision-making guidelines to managing vector-borne diseases is also addressed.
Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Statement about Crosslistings

If course is to be crosslisted, then use the “Crosslistings” tab on menu to the right to bring in all applicable secondary courses. You must start a crosslisting with the primary course, and all courses must exist before they can be crosslisted.

**Rationale**
We are proposing to drop the laboratory component of the course. Lab is being dropped in effort to increase enrollment opportunity. Learning outcomes relating to this course's EI designation are completely independent of the laboratory section.

**Impact on Other Units**
None.

**Financial Impact**
None. Course will remain on the books and will be taught by existing instructor. Increased enrollment would benefit University, HCOA, and EPP.

**Have you consulted with all programs/departments that will be impacted by this change?**
Yes ☐ No ☐ Minor changes only/Not Applicable

**Arts and Sciences Only**
Only proposals originating from the College of Arts and Sciences should answer these questions.

February 20, 2024
Herbert College of Agriculture - EPP - 485
2024-2025 UG Revise Course

**General Catalog Information**

- **College**: Herbert College of Agriculture
- **Department (Acalog Hierarchy)**: Entomology and Plant Pathology
- **Subject/Prefix (choose from list)**: EPP
- **Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)**: 485
- **Catalog Name (max 100 characters)**: Advanced Forensic Entomology
- **Transcript Name (max 30 characters)**: Advanced Forensic Entomology
- **Variable Title?**: Yes
- **Credit Hours (max 8 characters)**: 4
- **Credit Type**: Or To N/A

**Course Description**
This course will take a deep dive into the field of forensic entomology, specifically examining the biology and ecology of relevant arthropods; currently accepted practices, methodologies, and research avenues; and ethical considerations for serving as an expert witness in the United States. Students will become familiar with the morphology and taxonomic identification of larval and adult stages of relevant arthropods and pertinent molecular methods to identify unknown samples through experiential learning conducted in the laboratory and at the Anthropology Research Facility (i.e., The Body Farm). Students will perform a mock minimum-time-since-death estimation and craft a written case report.

**Satisfies Volunteer Core Requirement:**

**Satisfies General Education Requirement:**

Contact Hour Distribution (if more than one instructional method)

3 hours lecture and a 1-hour lab.
There is a growing need to offer an advanced forensic entomology class in the Department of Entomology and Plant Pathology. Previously, such a class was only offered in the Department of Anthropology (CAS), where it was very popular among undergraduates in the forensic concentration. By offering this course EPP will be able to draw students from UTK (CAS+) and other Herbert College units. Knowledge gained from this class will aid students studying a broad range of disciplines, including veterinary medicine, agriculture, and even food science.

This course will pique student interest in the broad discipline of entomology by first introducing them to an interesting and novel sub-field. Like other introductory forensic entomology courses taught at US institutions (e.g., Texas A&M University, Purdue University), this class will attract students into the Entomology and Plant Pathology minor, where they will continue taking classes to improve their knowledge in entomology.

Negligible. This course will be taught by a current employee.

**Registration Permission**

| Consent of instructor |

**Equivalency**

**Rationale**

This course will provide students an avenue to receive course credit for experiential learning in entomology, plant pathology, and bioinformatics from approved industry, government, or educational mentors.

**Impact on Other Units**

The course is meant largely for EPP students to gain this type of experience but will also likely attract students from related disciplines.
Financial Impact
* None. Existing faculty will serve as instructor of record.

</tr>
</thead>
<tbody>
<tr>
<td>A new course proposal for Natural Science - Lab VolCore giving another option for non-science major to satisfy their VolCore requirement. The course will discuss different food ingredients and how they impact food characteristics as such will provide information on how food ingredients impact the quality of final products. This class will discuss the utilization of basic food ingredients in different food products. The class will consist of 2-hour lecture and 2-hour laboratory. Initial course offering will be up to 72 students to be divided into 4 lab sections of 18. In addition to Herbert College of Agriculture students, other enrollment can come from College of Education, Health, and Human Sciences, College of Arts and Sciences, and Interdisciplinary Programs.</td>
</tr>
</tbody>
</table>

<table>

Course Title (max 100 characters)* Wine Science

Experience Learning Designation

- N (Internship)
- R (Research)
- S (Service Learning)

Variable Title?*

- Yes
- No

Credit Hours* 3

Course Description
Overview of the winemaking process, components important in winemaking, and wine quality.

Will this course be crosslisted?

- Yes
- No

If yes, what is the crosslisting relationship for this course?

- Primary
- Secondary

List all courses in this crosslisting relationship and note whether primary or secondary.

</thead>
</table>

A new course proposal for Volcore - Natural Science non lab. This lecture only class will discuss physicochemical aspects of winemaking and the factors that affect the quality of wine. It will cover basic principles of winemaking thereby giving students a fundamental understanding of enology, its history, and modern processes for winemaking. Initial course offering will be for up to 100 students. Depending on demand, multiple sections and an online version may be offered/developed. The course would be open to students from all majors.
Impact on Other Units

Potential effect on enrollment to other Vol Core NS courses

Financial Impact*

A new faculty member will be hired with a 30% teaching appointment

Arts and Sciences Only

Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal?
- Arts and Humanities
- Natural Sciences
- Social Sciences

Select the checkbox if this course should be considered a Writing Emphasis course.

**Rationale**

This lecture only class will discuss different processes of producing non-alcoholic fermented foods. Demonstration of selected non-alcoholic food fermentation procedures will be conducted. Students will gain understanding of the biochemical changes involved in attaining final organoleptic and physicochemical properties of non-alcoholic fermented foods. Initial course offering will be for up to 50 students. In addition to Herbert College of Agriculture students, other enrollments can come from College of Education, Health, and Human Sciences, Department of Microbiology, and Interdisciplinary Programs. This class will discuss basic principles of processes involved in non-alcoholic food fermentation thereby giving students in these departments a fundamental understanding of food.
thereby giving students in these departments a fundamental understanding of food fermentation, its history, and technological development and advancement.

Impact on Other Units*  
Slight effect on enrollment as this course can be used as an elective.

Financial Impact*  
A new faculty will be hired with a 30% teaching appointment

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

Requirements*
Rationale*

Food fermentation is one of the oldest methods of food preservation. The process can be considered as the “first biotechnology” where microorganisms break down large organic molecules into simpler forms resulting in desirable biochemical changes that significantly affect the physicochemical and organoleptic properties of foods and food products. The global economic impact of the fermented food and beverage industry was approximately $1T dollar in 2022, with expected compound annual growth rate of 6.7% over the next five years. Further, scientific investigations are currently proving the purported health benefits associated with consumption of fermented foods. It is then expected that the demand for fermented foods will continue to increase driven by multiculturality of the world and beneficial health effects of fermented foods consumption being better established. This will likely increase the industry demand for people with knowledge and skills in food and beverage fermentation. To meet this, the Department of Food Science is proposing a minor in Food Fermentation which can serve as an impetus to develop a degree program in food fermentation.

Financial Impact*

A new faculty member will be hired with a 30% teaching appointment.

Impact on Other Units*

Slight effect as courses for this minor can be used to meet VolCore and elective requirements.

Have you consulted with all programs/departments that will be impacted by this change?*

Course Description
The practical and theoretical basis of recreational use of public and private lands is examined in the context of ecosystem management. The statutory and regulatory policies and current issues regarding the management and use of lands in wilderness systems, wild and scenic river corridors, parks, and open spaces are discussed in detail. The impacts of recreational uses on the environment and conflicts with other uses of land and resources are discussed. Land use planning policies and decisions, which respond to recreation, wilderness and open space issues will be examined.

Course Description
As part of the professional semester during the fall of their junior year, students will obtain three outdoor recreation related certification. These certifications will be professional in nature, be recognized by a national or international entity (e.g. SOLO, ACA, NOLS), provide a skill recognized as relevant to the outdoor recreation field, and provide an opportunity for the student to be more marketable upon graduation. Trainings can include, but are not limited to: swiftwater rescue, Leave No Trace, WFA, WFR, rock climbing instructor, trip leader, canoe/kayak instructor, etc.

**Course Description**

This course will explore the obstacles and opportunities of using ecotourism and agritourism to contribute to rural economic development. Examples of successful ecotourism projects both domestically and internationally will be presented with an emphasis on the role of National Parks as tourism destinations. Agritourism efforts in Tennessee will be highlighted and compared to similar efforts in other states and countries. Principles of attracting and managing tourists and park visitors in a sustainable manner also will be covered.

Rationale* 
This course forms part of a new major in Outdoor Recreation and Park Management that has been developed to address the growing demand for professionals in the field. A recent assessment of the demand for the major by Hanover Research revealed that the need for professionals in Outdoor Recreation and Park Management is projected to increase within Tennessee and the Southeast by more than 10%, double the projections for the US as a whole. Developing a major rather than a concentration allows for a much more focused program to better prepare the students. The new major is expected to draw new students to UT who otherwise would not be coming to the University.

Impact on Other Units* 
None. The program’s enrollment will be comprised of students in the current Wildland Recreation concentration and students who would otherwise not be attending the University.

Financial Impact* 
The course will require additional teaching FTEs. This has been approved by Herbert College and searches will begin as the approval process moves forward.

### Course Description

The practical and theoretical basis of recreational use of public and private lands is examined in the context of ecosystem management. The statutory and regulatory policies and current issues regarding the management and use of lands in wilderness systems, wild and scenic river corridors, parks, and open spaces are discussed in detail. The impacts of recreational uses on the environment and conflicts with other uses of land and resources are discussed. Land use planning policies and decisions, which respond to recreation, wilderness and open space issues will be examined.

Course Description
This course will introduce students to the vertebrate fauna of Tennessee and the Great Smoky Mountains ecoregion. Specifically, students will learn to identify the amphibians, reptiles, birds and mammals found regularly in Tennessee parks and wildlife areas. The course will help prepare students interested in taking the Tennessee Natural Resource Officer wildlife identification test as well as prepare park interpreters and managers to identify species found in their parks and educate the public about local species.

## Course Description

Outdoor recreation and natural resources provide a unique context for educating adults and children about environmental issues. This context provides a learning environment that is conducive to promoting environmental awareness and interpretation techniques. This course will include philosophies, concepts, and practical techniques of Environmental Interpretation (EI). This course will introduce students, through lectures, class activities, and projects, to individuals and agencies involved in EI. Students will learn the methods, principles, and philosophies of environmental interpretation in natural systems, with specific emphasis being placed upon the natural resource recreation context. The roles of environmental education and persuasive communication in promoting environmental attitudes and behaviors will also be emphasized.

**Rationale**

This course forms part of a new major in Outdoor Recreation and Park Management that has been developed to address the growing demand for professionals in the field. A recent assessment of the demand for the major by Hanover Research revealed that the need for professionals in Outdoor Recreation and Park Management is projected to increase within Tennessee and the Southeast by more than 10%, double the projections for the US as a whole. Developing a major rather than a concentration allows for a much more focused program to better prepare the students. The new major is expected to draw new students to UT who otherwise would not be coming to the University.

---

**Impact on Other Units**

None. The program’s enrollment will be comprised of students in the current Wildland Recreation concentration and students who would otherwise not be attending the University.

---

**Financial Impact**

The course will require additional teaching FTEs. This has been approved by Herbert College and searches will begin as the approval process moves forward.

---

**Arts and Sciences Only**

Only proposals originating from the College of Arts and Sciences should answer these questions.

**Course Description**

Physical impacts are an inevitable result of visitor use of outdoor environments. Much of the focus of outdoor recreation management is on reducing the scope of such impacts or on mitigating their effects. The literature on outdoor recreation management classifies impacts into two types: those affecting the resource itself (physical impacts), and those affecting visitors (social impacts). This class focuses primarily on physical impacts to the resource. Effective management must include anticipating and monitoring impacts and modeling potential solutions prior to implementing policies.

Subject/Prefix (choose from list)* PLSC

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 130

Course Title (max 100 characters)* Art and Science of Living with Plants

Experience Learning Designation
- N (Internship)
- R (Research)
- S (Service Learning)

Variable Title?* Yes

Credit Hours* 3

Course Description Working with plants is both art and science. Students will be introduced to the diversity of plants commonly used indoors. This will include conservation considerations, cultivation practices, and the history and art of incorporating plants into living spaces and workplaces, including prominent examples of interior plantscaping.

Will this course be crosslisted? Yes

If yes, what is the crosslisting relationship for this course?
- Primary
- Secondary

List all courses in this crosslisting relationship and note whether primary or secondary.
### Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

### Rationale*

Previous similar course (PLSC 230) was not well incorporated in Plant Sciences curriculum so was of limited use to degree requirements. apply for VolCore A&H status. As PLSC 230 covered topics relevant to A&H VolCore, a portion of this content will be reformulated into this lower level course with more emphasis on arts & humanities (and apply for VolCore A&H) to provide UT students with more opportunities to explore A&H concepts as related to plants.

### Impact on Other U

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 210

Course Title (max 100 characters)* Horticulture: Principles and Practices

Variable Title? Yes

Credit Hours* 3

Course Description
An introduction to the biology and technology underlying the use and production of horticultural crops and landscape plants. Structure, growth, and development of horticultural plants from a practical and scientific approach. Environmental effects, basic principles of propagation, and greenhouse and outdoor production. Nutrition, pruning and chemical control of growth. Pest control and branches of horticulture.

</tr>
</tbody>
</table>

### Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

### Equivalency
Course has been offered only on a limited basis as it is not required in any departmental concentration. As course already covers topics relevant to A&H VolCore, a portion of this content will be reformulated into a lower level course (PLSC 130) with more emphasis on arts & humanities (and apply for VolCore A&H) to provide UT students with more opportunities to explore A&H concepts as related to plants.

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

**Rationale**

Similar course previously offered as PLSC 485. New lower division course will give landscape design students a complete class dedicated representation and technical communication prior to their upper-level studios. Course will be a prerequisite for registration in PLSC 380.
Impact on Other Units*

None. See impact report for similar course, PLSC 485 below:

## Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

## Equivalency

## Rationale*

Course listing for international experience courses in Plant Sciences, but has had limited use. Other existing course listings (e.g., PLSC 491 and AGNR 491) can meet this need.
Impact Report for PLSC 391

Herbert College of Agriculture - PLSC - 421
2024-2025 UG Revise Course

General Catalog Information

College* Herbert College of Agriculture

Department (Acalog Hierarchy)* Plant Sciences

Subject/Prefix (choose from list)* PLSC

Course 421

Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)*

Course Title (max 100 characters)* Native Plants in the Landscape

Variable Title? Yes

Credit Hours* 3

Course Description
Native plants and plant communities as a basis for landscaping and environmental restoration. Weekly lecture coupled with either an outing or service practicum of invasive exotic plant removals or planting of natives. Study and work sites will primarily be demonstration projects of the University of Tennessee Environmental Landscape Design Lab. They include local schoolyard habitats, greenways, wetlands, streambanks, and...
Will this course be crosslisted? Yes ☐ No ☐

If yes, what is the crosslisting relationship for this course? Primary ☐ Secondary ☐

List all courses in this crosslisting relationship and note whether primary or secondary.

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

Contact Hour Distribution (if more than one instructional method)

One 1.5-hour lecture, one 3-hour lab.

Grading Restriction

Repeatability

Credit Restriction

Registration Enforced (RE) PLSC 320 or PLSC 321 or FWF 212 or EEB 330

Department Enforced (DE) Prerequisite(s)

Recommended Background Coursework or familiarity with general principles and practices in horticulture.

Comments Graduate standing or prior experience may satisfy prerequisite(s) with consent of instructor.
Equivalency

Rationale*  Contact hour distribution revised to meet UT guidelines. Additional satisfactory prerequisite options added.

| Corequisite(s): | ARCH 475 - Advanced Architectural Design: Landscape Architecture II |
| Programs | Animal Science Major, BS in Animal Science – Animal Industries Concentration |
| | Animal Science Major, BS in Animal Science – Bioscience Concentration |
| | Animal Science Major, BS in Animal Science – Five-Year BS/MS Program |
| | Animal Science Major, BS in Animal Science – Pre-Veterinary Medicine Concentration |
| | Architecture Major, Bachelor of Architecture - Master of Landscape Architecture Preparatory Track |
| | Architecture Major, Bachelor of Architecture – Traditional Track |
| | Forestry Major, BS in Forestry – Wildland Recreation Concentration |
| | Plant Sciences Major, BS in Plant Sciences – Sustainable Landscape Design Concentration |
| | Wildlife and Fisheries Science Major, BS in Wildlife and Fisheries Science – Wildlife and Fisheries Management Concentration |

Financial Impact*  None, minor changes to contact hours and additional prerequisites

## Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

## Equivalency

**Rationale**

PLSC 436 was taught by a now retired faculty member and the course is no longer offered. Needed content will be integrated into existing course PLSC 494.
## Impact Report for PLSC 436

There are no results for this report.

- Plant Sciences

**Subject/Prefix (choose from list)**
- PLSC

**Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)**
- 453

**Course Title (max 100 characters)**
- Introduction to Plant Breeding

**Variable Title?**
- Yes
- No

**Credit Hours**
- 3

**Course Description**
Introduction to general principles, practices and techniques used to breed plants, select traits, and develop crop cultivars: including biomass feedstock crops. Concepts discussed will range from quantitative and population genetics, historical through conventional plant breeding (through self- and cross-pollinations) and hybridization, then end with exploration of contemporary approaches to improve plant traits including molecular breeding and genetic engineering.

Herbert College of Agriculture - PLSC - 470
2024-2025 UG Drop/Archive Course

General Catalog Information

College*  Herbert College of Agriculture

Department (Acalog Hierarchy)*  Plant Sciences

Subject/Prefix (choose from list)*  PLSC

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)*  470

Course Title (max 100 characters)*  Professional Practices for the Green Industry

Credit Hours*  1

Change course status from active to:*  Dropped (Inactive-Hidden)

Course Description  Professionalism, ethics, sales, sales proposals, budgeting, managerial skills, estimating, and contract management in the green industry. Students will additionally learn about professional involvement in industry related organizations.

Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

Equivalency

Rationale*  Curriculum revised to remove this course from the Plant Sciences core major courses and to instead reformulate a portion of this content into a lower level course (PLSC 270) with more emphasis on oral communication (and apply for VolCore OC) to provide content earlier in degree progression.
Impact Report for PLSC 470

Herbert College of Agriculture - PLSC - 485

2024-2025 UG Drop/Archive Course

General Catalog Information

College*  Herbert College of Agriculture

Department (Acalog Hierarchy)*  Plant Sciences

Subject/Prefix (choose from list)*  PLSC

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)*

Course  485

Course Title (max 100 characters)*  Computer Aided Landscape Design

Credit Hours*  3

Change course status from active to:*  Dropped (Inactive-Hidden)

Archived

Course Description  Practical application of digital hardware and software as it relates to the exploration and synthesis of landscape design and planning projects.

Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

Equivalency

Rationale*  Course content is more appropriately offered before senior design studios, so will be modified to create a new lower-level course (PLSC 285) which will serve as a prerequisite for PLSC 380.
## Impact Report for PLSC 485

Course Description
Design thinking is a non-linear, iterative process used to challenge assumptions, redefine problems and create innovative solutions. Through the lens of design this international travel experience will provide opportunities to learn how historic and contemporary landscapes, estates, gardens, urban spaces, and arboreta reflect the climate, topography, and ecology of our world. As well as the historic, cultural, and scientific movements that informed their design at the time of their creation. The course will focus on observation and experience of different landscape design styles, gardens, local plant material, and will foster an appreciation of international cultures. This course is suitable for any major and individual students will reflect on how their experience can inform their future career. This course uses experiential learning practices focused on immersive experiences.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The horticulture science and production concentration is designed to provide students with the knowledge and skills needed for production, management and marketing of horticultural and specialty crops. This concentration also prepares students with strong interests in science and/or technology to pursue opportunities in research-related fields, including graduate studies. Careful selection of departmental courses and other electives in consultation with the assigned academic advisor will prepare graduates for the career of their choice. Employment prospects range from managing nursery and greenhouse businesses, to consulting and education, to marketing fruits and vegetables for healthier lifestyles.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Written Communication (WC) Elective 3 Credit Hours *, if needed

Credit Hours 13-15

Term 8 Milestone Notes

No milestones

Total Credit Hours 120-123
Required of freshmen only; requirement is waived for transfer students.

Chosen from the Volunteer Core* list after consultation with an advisor.

PLSC 320 may not be repeated for additional credit.

Chosen from any Plant Sciences courses not already required for the major.

Directed electives are courses that generally support and enhance a student’s academic goals. These multidisciplinary courses were chosen to provide students the opportunity to develop basic and advanced skills beyond Plant Sciences core requirements. The Plant Sciences Undergraduate Program Committee periodically reviews this list to identify appropriate courses for each concentration. If students believe that a course not on the list would meet this objective, they may propose this to their academic advisor to review before the start of the semester in which the student wishes to take the course. Additionally, AGRI 1030 taken at a Tennessee Board of Regents community college, or as a part of Statewide dual-credit (SDC) which transfers to UTK as PLSC LD, is acceptable for (3) credit hours in this category. The directed electives category can also be fulfilled by the completion of any minor or a second major/dual degree at the University of Tennessee. Choose Any Herbert College of Agriculture Course 200-level and above not required for major or concentration, excluding VolCore requirements, Any Architecture, Art Museum and Curator Studies, Biology, Biochemistry and Cellular and Molecular Biology, Business Analytics and Statistics, Business Administration, Chemistry, Ecology and Evolutionary Biology, Management, Geography, Geology, Marketing, Microbiology, Physics, or Statistics 200-level and above.

Any courses not already required for the major.

This requirement will be met if a transfer student transfers in any Biology class(es) with lab totaling at least 4 credit hours.

Selected from any of the following designations: Arts and Humanities (AH)*, Applied Arts and Humanities (AAH)*, Global Citizenship - International (GCI)*, Global Citizenship - United States (GCUS)*, or Social Sciences (SS)* (Applied Arts and Humanities (AAH)* (AAH) courses allow students to learn by doing through performances or creative activities).

Menu A: PLSC 410, PLSC 415, PLSC 430, PLSC 433, PLSC 434, PLSC 435, PLSC 455, PLSC 491

Menu B: PLSC 438, PLSC 443, PLSC 456, PLSC 473; EPP 313, EPP 321, EPP 410, EPP 411.

Menu C: PLSC 423, PLSC 426, PLSC 452, PLSC 453, PLSC 454
**Rationale**

Departmental faculty have developed these relatively minor changes in curriculum structure to help better meet student learning objectives for the Plant Sciences major, adjust requirements as impacted by added/deleted courses, and to address some existing scheduling bottlenecks.

**Financial Impact**

Minimal impact; changes largely relate to some restructuring of course options within existing and new proposed plant sciences courses. The only external course added (BCMB 321) is added as an option only, primarily geared toward students who already take this course as an elective for graduate school preparation or have transferred to the plant sciences major having taken this course so we anticipate minimal to no increased enrollment in that course.

**Impact on Other Units**

Potential minor impact on BCMB, with additional option for use of BCMB 321. Expectation is that fewer than 5 students per year would use this option as >95% of Plant Sciences students will still take PLSC 333. Other minor changes relate to slightly less restrictive VolCore course options so impacts will be spread across VolCore courses in multiple departments.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The plant genetics and biotechnology concentration is designed for students wishing to pursue advanced degrees in plant molecular biology, bioenergy, and biotechnology and/or careers in the plant biotechnology industry. For example, the curriculum will prepare students to be competitive for entrance into MS and PhD degree programs, which in turn, prepare students for life as professional scientists. Alternatively, the plant biotechnology industry and biotechnology-affiliated industries have recurrent demand for competent BS-level scientists. One hallmark of the degree is requirement for students to participate in research directly in an affiliated faculty member's lab or outside internship. This hands-on experience is reported by students to be a highlight of their degree program. A minimum grade point average of 2.25 is required for all plant sciences courses taken in the major.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

The public horticulture concentration is intended for students interested in professional careers that promote horticulture and emphasize people, their education, and their enjoyment of plants. Such careers include director of a botanical garden or park; city or urban horticulturist; extension agent, teacher, educational director, or program coordinator; professional garden writer/editor or publication manager; horticulture therapist; public garden curator; and plant collections manager. Technical electives allow students to concentrate in specialties of their interest while encouraging the development of strong communication skills. Students are encouraged to earn a minor degree in a supportive field such as education, communications, or journalism, or earn a Non-Profit Management Certificate. A minimum grade point average of 2.25 is required for all plant sciences courses taken in the major.

Description  The landscape is a life-sustaining ecosystem shared by all that inhabit the earth. It is the cities and towns where we live and work, the parks and gardens where we play, the fields that nourish our bodies and supply our economies, and the wilderness that restores us. Pressures from a growing population and a changing climate mandate that we look beyond the aesthetic potential of the designed landscape so as to engage it as a territory of experience, activity and interpretation, and a strategy through which contemporary challenges facing regions, cities and the people that inhabit them - access to healthy food and clean water, environmental degradation, public health - are addressed. The Sustainable Landscape Design Concentration positions students for careers through which they impact the way in which we live, work and play and shape the health of our environment through the applied arts and sciences of the designed landscape. Studies include plant materials, design development and communication, construction methods, environmental science, and ecological systems. Through strategic advising, students will be positioned for careers as design/build entrepreneurs, specialized consultants to professional design teams, or for advanced placement in UT’s School of Landscape Architecture.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSS

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Total Credit Hours 120-121

Footnotes

Required of freshmen only; requirement is waived for transfer students.

Chosen from the Volunteer Core list after consultation with an advisor.

Directed electives are courses that generally support and enhance a student's academic goals. These multidisciplinary courses were chosen to provide students the opportunity to develop basic and advanced skills beyond Plant Sciences core requirements. The Plant Sciences Undergraduate Program Committee periodically reviews this list to identify appropriate courses for each concentration. If students believe that a course not on the list would meet this objective, they may propose this to their academic advisor to review before the start of the semester in which the student wishes to take the course. Additionally, AGRI 1030 taken at a Tennessee Board of Regents community college, or as a part of Statewide dual-credit (SDC) which transfers to UTK as PLSC LD, is acceptable for (3) credit hours in this category. The directed electives category can also be fulfilled by the completion of any minor or a second major/dual degree at the University of Tennessee. Choose Any Herbert College of Agriculture Course 200-level and above not required for major or concentration, excluding VolCore requirements, Any Architecture, Art Museum and Curator Studies, Biology, Biochemistry and Cellular and Molecular Biology, Business Analytics and Statistics, Business
Management, Geography, Geology, Marketing, Microbiology, Physics, or Statistics 200-level and above. Any Plant Sciences courses not already required for the major. This requirement will be met if a transfer student transfers in any Biology class(es) with lab totaling at least 4 credit hours. Selected from any of the following designations: Arts and Humanities (AH), Applied Arts and Humanities (AAH), Global Citizenship - International (GCI), Global Citizenship - United States (GCUS), or Social Sciences (SS). (Applied Arts and Humanities (AAH) courses allow students to learn by doing through performances or creative activities).

Menu A: PLSC 410, PLSC 415, PLSC 430, PLSC 433, PLSC 434, PLSC 435, PLSC 455, PLSC 491
Menu B: PLSC 438, PLSC 443, PLSC 456, PLSC 473; EPP 313, EPP 321, EPP 410, EPP 411.
Menu C: PLSC 423, PLSC 426, PLSC 452, PLSC 453, PLSC 454

* Meets Volunteer Core Requirements.

Rationale*
Departmental faculty have developed these relatively minor changes in curriculum structure to help better meet student learning objectives for the Plant Sciences major, adjust requirements as impacted by added/deleted courses, and to address some existing scheduling bottlenecks.

Financial Impact*
Minimal impact; changes largely relate to some restructuring of course options within existing and new proposed plant sciences courses. The only external course added (BCMB 321) is added as an option only, primarily geared toward students who already take this course as an elective for graduate school preparation or have transferred to the plant sciences major having taken this course so we anticipate minimal increased enrollment in that course.

Impact on Other Units*
Potential minor impact on BCMB, with additional option for use of BCMB 321. Expectation is that fewer than 5 students per year would use this option as >95% of Plant Sciences students will still take PLSC 333. Other minor changes relate to slightly less restrictive VolCore course options so impacts will be spread across VolCore courses in multiple departments.

Have you consulted with all programs/departments that will be impacted by this change?*
☐ Yes ☐ No

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The turfgrass science and management concentration is designed for the student desiring to pursue professions that include growing and managing turfgrasses used for golf courses, parks, athletic fields, sports complexes, and residential and commercial lawns. This concentration also prepares students for graduate studies in turfgrass science. Students are encouraged to earn a minor degree in a supportive field such as agricultural economics or environmental and soil sciences. Careful selection of departmental courses and other electives in consultation with the assigned academic advisor will prepare graduates for the career of their choice. A minimum grade point average of 2.25 is required for all plant sciences courses taken in the major.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The organic production concentration is designed to create leaders in the field of organic and sustainable agriculture. Students will gain the knowledge and skills for production and management of organic cropping systems. Employment prospects include owning your own organic farm, consulting, agricultural extension, environmental education, government agencies, international agricultural development, and research. Careful selection of departmental courses and other electives in consultation with the assigned academic advisor will prepare graduates for the career of their choice. This concentration also prepares students with a strong interest in the science of organic crop production for graduate studies (M.S., Ph.D.) in horticulture, agronomy, or related disciplines. Classroom instruction is enhanced by the 90-acre Organic Crops Unit located near the University of Tennessee campus.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Footnotes

Required of freshmen only; requirement is waived for transfer students.
Chosen from the Volunteer Core* list after consultation with an advisor.
Directed electives are courses that generally support and enhance a student’s academic goals. These multidisciplinary courses were chosen to provide students the opportunity to develop basic and advanced skills beyond Plant Sciences core requirements. The Plant Sciences Undergraduate Program Committee periodically...
reviews this list to identify appropriate courses for each concentration. If students believe that a course not on the list would meet this objective, they may propose this to their academic advisor to review before the start of the semester in which the student wishes to take the course. Additionally, AGRI 1030 taken at a Tennessee Board of Regents community college, or as a part of Statewide dual-credit (SDC) which transfers to UTK as PLSC LD, is acceptable for (3) credit hours in this category. The directed electives category can also be fulfilled by the completion of any minor or a second major/dual degree at the University of Tennessee. Choose Any Herbert College of Agriculture Course 200-level and above not required for major or concentration, excluding VolCore requirements, Any Architecture, Art Museum and Curator Studies, Biology, Biochemistry and Cellular and Molecular Biology, Business Analytics and Statistics, Business Administration, Chemistry, Ecology and Evolutionary Biology, Management, Geography, Geology, Marketing, Microbiology, Physics, or Statistics 200-level and above. Any Plant Sciences courses not already required for the major. This requirement will be met if a transfer student transfers in any Biology class(es) with lab totaling at least 4 credit hours. Selected from any of the following designations: Arts and Humanities*, Applied Arts and Humanities*, Global Citizenship – International*, Global Citizenship – US*, or Social Sciences* (Applied Arts and Humanities* (AAH) courses allow students to learn by doing through performances or creative activities). Menu A: PLSC 410, PLSC 415, PLSC 430, PLSC 433, PLSC 434, PLSC 435, PLSC 455, PLSC 491
Menu B: PLSC 438, PLSC 443, PLSC 456, PLSC 473; EPP 313, EPP 321, EPP 410, EPP 411.
Menu C: PLSC 423, PLSC 426, PLSC 452, PLSC 453, PLSC 454

* Meets Volunteer Core Requirements.

Rationale*
Departmental faculty have developed these relatively minor changes in curriculum structure to help better meet student learning objectives for the Plant Sciences major, adjust requirements as impacted by added/deleted courses, and to address some existing scheduling bottlenecks.

Financial Impact*
Minimal impact; changes largely relate to some restructuring of course options within existing and new proposed plant sciences courses. The only external course added (BCMB 321) is added as an option only, primarily geared toward students who already take this course as an elective for graduate school preparation or have transferred to the plant sciences major having taken this course so we anticipate minimal increased enrollment in that course.
Impact on Other Units* Potential minor impact on BCMB, with additional option for use of BCMB 321. Expectation is that fewer than 5 students per year would use this option as >95% of Plant Sciences students will still take PLSC 333. Other minor changes relate to slightly less restrictive VolCore course options so impacts will be spread across VolCore courses in multiple departments.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Forest industry offers a number of employment opportunities for graduates from forestry, engineering, and other STEM degree programs. The forest industry minor is designed to prepare students in these disciplines with an introduction to the industry and skill set required to be competitive in this arena.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
Minor Requirements

The minor consists of **15 credit hours**. Prerequisites will not be waived.

Complete:

- FORS 331 Wood Science
- FORS 332 Forest Products Industry
- BAS 464 Operations Analytics

Select one course from the following:

- FORS 329 Forest Resource Inventory
- IE 200 Engineering Statistics
- STAT 251 Probability and Statistics for Scientists and Engineers

Select one from the following:

- AREC 324 Quantitative Methods
- BAS 310 Analytic Models for Decision Optimization
- IE 300 Quality Control and Management

Select one from the following:

- FORS 420 Forest Resource Management
- IE 405 Engineering Economic Analysis

Credit Hours 15-16
Rationale*  
Forest industry consistently provides a number of employment opportunities for graduates from engineering and natural resource degree programs. The proposed minor is designed to prepare students in these disciplines with an introduction to the industry and skill set required to be competitive in this arena.

Financial Impact*  
All courses required for the minor are offered currently, and the expected expansion of course offerings in data science will enhance the options within the minor. Most of the courses will be able to handle the increased enrollments, particularly with the incentives offered with the new budget model.

Impact on Other Units*  
Minimal. As described above, current enrollments in most of the required classes allow for additional students.

Have you consulted with all programs/departments that will be impacted by this change?*

**General Instructions for Description**

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Wise management of the nation's natural and recreational resources provides significant ecological, economic, and cultural benefits to the American citizenry. Use of these spaces for outdoor recreation can result in life enriching experiences for individuals and communities alike. Balancing use and protection of these valuable resources is challenging and requires the best efforts of dedicated professionals. The Outdoor Recreation and Park Management (ORPM) concentration will provide the highest level of professional training for students seeking employment in the park management field and those interested in tapping into the growing outdoor recreation economy.

The ORPM curriculum prepares students for careers as professionals in a variety of natural resource management agencies, non-profits, and small business operations. Many employment opportunities are in the public sector, including such agencies as the National Park Service, the U.S. Army Corps of Engineers, the U.S. Fish and Wildlife Service, the USDA Forest Service, state park departments, and city and county park and recreation departments. Students may also seek employment with non-profits such as the Nature Conservancy, Wilderness Society, and the Sierra Club. Additionally, the ORPM major will provide students with the necessary skills to be a part of the outdoor recreation economy through entrepreneurial training.

Graduates are employed as park managers, rangers, conservation officers, planners, naturalists, agency and unit directors, program specialists, outfitter owners/managers, small business owners and in other areas of outdoor recreation.

The university has over 21,000 acres of forest land available for teaching, research, and demonstration for ORPM majors. The Tennessee Valley Authority, Great Smoky Mountains National Park, Big South Fork National River and Recreation Area, Tennessee State Parks, Cherokee National Forest, and several areas within Knoxville (e.g. Ijams, Urban Wilderness, Tennessee Riverline) provide additional land, water and facilities available to the teaching program.

To remain in the ORPM concentration, students must maintain a 2.5 cumulative GPA and earn no less than a C grade in FORS 321. If a student does not meet the criteria, the student will be removed from the ORPM concentration, and the student must meet with their advisor to identify an alternative major.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

1. Any course approved as Volunteer Core Global Citizenship United States.
2. Any course approved as Volunteer Core Arts and Humanities.
3. Chosen from HRT 102, HRT 326, HRT 410, RSM 370, ADVT 250, MGT 336.
4. Any course approved as Volunteer Core Engaged Inquiries.
**Rationale**
The new concentration was developed to address the growing demand for professionals in Outdoor Recreation and Park Management. The current concentration in Wildland Recreation maintains an enrollment of approximately 35 students, but does not provide adequate training in all aspects of recreation and park management. Moreover, a recent assessment of the demand for the program by Hanover Research revealed that the demand for these professionals is projected to increase within Tennessee and the Southeast by more than 10%, double the projections for the US as a whole. Developing this concentration also allows for a much more focused program to better prepare the students. The new program is expected to draw new students to UT who otherwise would not be coming to the University. The Wildland Recreation concentration will be dropped after the new ORPM program is approved; students will have the option to finish out the Wildland Recreation concentration in the Forestry major or convert to the new ORPM concentration program.

**Financial Impact**
The proposed concentration will require additional teaching FTEs. This has been approved by Herbert College and searches will begin as the approval process moves forward.

**Impact on Other Units**
Nominal. The program’s enrollment will be comprised of students in the current Wildland Recreation concentration and students who would otherwise not be attending the University. A number of courses across the campus will have minor increases in enrollments as students take their general education courses from multiple colleges. Introductory English, Biology, Math and Chemistry will be the primary recipients.

## General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
The profession of forestry is the science, the art, and the practice of managing and using for human benefit the natural resources that occur on and in association with forest lands. Benefits are derived from the multiple resources of the forest – wood, water, wildlife, recreation, forage, and environmental amenities. Foresters are managers of these resources. Thus, our principal instructional objective is to provide the broad education needed to deal effectively with the complex of forest resources.

The forest resources management concentration provides an opportunity to obtain an education related to the management of the broad spectrum of wildland resources. In addition to the core of required courses, there are about 6 elective credit hours for broad studies or specialized training in one or more areas of forestry. These areas and examples of related fields of study are forest biology including plant physiology and morphology, ecology, genetics, tree nutrition, forest soils; forest business management including economics, accounting, finance, marketing, management science; forest economics including economics, business administration, social science; forest inventory including mathematics, statistics, computer science; wildland recreation including natural and social sciences; and wildlife management including ecology and botany.

The university has over 21,000 acres of forest land available for teaching, research, and demonstration. The Tennessee Valley Authority, Great Smoky Mountains National Park, and Cherokee National Forest provide additional land and facilities available to the teaching program. Contained within these areas is a wide variety of tree species and forest types ranging from elements of the boreal forest to southern pines and hardwoods.

Lumber, pulp and paper, and other wood-using industries cooperate in conducting tours and demonstrating industrial processes.

To remain in the Forest Resources Management concentration, students must maintain a 2.5 cumulative GPA and earn no less than a C grade in FWF 212. If a student does not meet the aforementioned criteria, the student will be removed from the Forest Resources Management concentration, and the student must meet with their advisor to identify an alternative major.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
The profession of forestry is the science, the art, and the practice of managing and using for human benefit the natural resources that occur on and in association with forest lands. Benefits are derived from the multiple resources of the forest – wood, water, wildlife, recreation, forage, and environmental amenities. Foresters are managers of these resources. Thus, our principal instructional objective is to provide the broad education needed to deal effectively with the complex of forest resources.

The conservation and restoration concentration is an interdisciplinary program emphasizing forestry, ecology, soil and waters, and wildlife. In addition to the general education courses, the conservation and restoration curriculum includes core courses in the traditional forestry discipline. The curriculum is designed to prepare graduates who can evaluate terrestrial ecosystems and plan for the conservation of healthy ecosystems, the improvement of degraded ones, and the reclamation or restoration of severely disturbed land. Students may choose from a broad range of technical courses, or may choose to focus their program on a particular aspect of restoring or conserving ecosystems such as wildlife habitat, watersheds, ecosystem construction, or ecology and biodiversity.

Students prepare for professional positions in the planning, development, and implementation of projects to maintain, improve, or restore ecosystem function and health on private and public lands. Foresters work closely with the public and private sector, so the development of excellent personnel management and communication skill is encouraged. In addition to the completion of courses, students are required to complete a six to ten week professional internship experience to address specific learning objectives established by the instructor and field supervisor.

To remain in the Forest Resources Management concentration, students must maintain a 2.5 cumulative GPA and earn no less than a C grade in FWF 212. If a student does not meet the aforementioned criteria, the student will be removed from the Forest Resources Management concentration, and the student must meet with their advisor to identify an alternative major.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
**Description**

The profession of forestry is the science, the art, and the practice of managing and using for human benefit the natural resources that occur on and in association with forest lands. Benefits are derived from the multiple resources of the forest—wood, water, wildlife, recreation, forage, and environmental amenities. Foresters are managers of these resources. Thus, our principal instructional objective is to provide the broad education needed to deal effectively with the complex of forest resources.

The urban forestry concentration is an interdisciplinary program emphasizing forestry, arboriculture, horticulture, urban forest management, and urban wildlife. In addition to the general education courses, the urban forestry curriculum includes core courses in the traditional forestry discipline. The curriculum is designed to prepare graduates who can evaluate, plan, and resolve problems in an urban and traditional forest.

Foresters work closely with the public and private sector, so the development of excellent personnel management and communication skill is encouraged. In addition to the completion of courses, students are required to complete a 6-10 week professional internship experience (2 credits) in the summer prior to their senior year. Internships are structured to address specific learning objectives established by the instructor and field supervisor.

To remain in the Urban Forestry concentration, students must maintain a 2.5 cumulative GPA and earn no less than a C grade in FWF 212. If a student does not meet the aforementioned criteria, the student will be removed from the Urban Forestry concentration, and the student must meet with their advisor to identify an alternative major.

---

**General Instructions for Requirements**

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Wildlife management is the science and art of maintaining populations of wild animals at levels consistent with the best interests of wild species and of the public. Management goals may be aesthetic, economic, or ecological. Success depends upon wildlife biologists providing assistance; scholarly application of scientific information and methods to these goals; ecological perspective; and execution of programs to maintain past successes, to prevent repetition of past failures, and to prepare for future needs.

To remain in the Wildlife Management concentration, students must maintain a 2.5 cumulative GPA; 2.5 major GPA, starting in Term 4; and earn no less than a B grade in FWF 250* and no less than a C grade in FWF 212. If a student does not meet the aforementioned criteria, the student will be removed from the Wildlife and Fisheries Science major, and the student must meet with their advisor to identify an alternative major. Courses to be counted towards the major GPA are all 300-level and above courses in WFS, FOR, and FWF.

Program Type* Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Fisheries management is the science and art of maintaining populations of fish at levels consistent with the best interests of wild species and of the public. Management goals may be aesthetic, economic, or ecological. Success depends upon fisheries biologists providing assistance; scholarly application of scientific information and methods to these goals; ecological perspective; and execution of programs to maintain past successes, to prevent repetition of past failures, and to prepare for future needs.

To remain in the Fisheries Science Management concentration, students must maintain a 2.5 cumulative GPA; 2.5 major GPA, starting in Term 4; and earn no less than a B grade in FWF 250* and no less than a C grade in FWF 212. If a student does not meet the aforementioned criteria, the student will be removed from the Wildlife and Fisheries Science major, and the student must meet with their advisor to identify an alternative major. Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

---

**Rationale**

The concentration in Wildlife and Fisheries Management under the major in Wildlife and Fisheries Science is being ended and replaced with two new concentrations, one in Wildlife Management and the other in Fisheries Management. Potential employers, graduate schools, etc., are increasingly expecting a more in-depth knowledge in these individual fields. The only way we can provide this in-depth knowledge is to separate into two concentrations, similar to many of our peer institutions.

Note: A number of courses have been submitted for Vol Core approval. A Vol Core Audit is included in the attachment.

---

**Financial Impact**

None. Creation of separate wildlife and fisheries concentrations will not require any additional resources. Teaching duties of wildlife and fisheries faculty have recently been re-distributed, to ensure that courses taught by faculty align with expectations. We have sufficient faculty to teach existing and new courses under these concentrations.

---

**Impact on Other Units**

None. All of the courses offered under the combined wildlife and fisheries concentration will continue to be offered under the new separate concentrations.

Rationale* This concentration in wildlife and fisheries management is being ended and replaced with two new concentrations, one in wildlife and the other in fisheries. Potential employers, graduate schools, etc., are increasingly expecting a more in-depth knowledge in these individual fields. The only way we can provide this in-depth knowledge is to separate into two concentrations, similar to many of our peer institutions.

Impact on Other Units* None. All of the courses offered under the combined wildlife and fisheries concentration will continue to be offered under the new separate concentrations.

Financial Impact* None. Creation of separate wildlife and fisheries concentrations will not require any additional resources. Teaching duties of wildlife and fisheries faculty have recently been re-distributed, to ensure that courses taught by faculty align with expectations. We have sufficient faculty to teach existing and new courses under these concentrations.

We anticipate the new concentrations will attract additional students not already enrolled at UT.

Have you consulted with all programs/departments that will be impacted by this change?* Yes ☐ No ☐

Number of students in program* 192

ADMINISTRATIVE USE ONLY

Impact Level ☐ Low ☐ Mid ☑ High

## General Catalog Information

### College
- Herbert College of Agriculture

### Department (Acalog Hierarchy)
- School of Natural Resources

### Subject/Prefix (choose from list)
- WFS

### Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)
- 340

### Course Title (max 100 characters)
- Wetlands Ecology and Management

### Variable Title?
- Yes
- No

### Credit Hours
- 2

### Course Description
- Ecology, restoration, and management of wetland ecosystems, including biotic and abiotic processes, functions, and wildlife considerations.

### Will this course be crosslisted?
- Yes
- No

### If yes, what is the crosslisting relationship for this course?
- Primary
- Secondary

### List all courses in this crosslisting relationship and note whether primary or secondary

### Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

## Course Description

Use of R, which is an open-source programming language useful for all aspects of data analysis, statistical analysis, and visualization. This course will cover the basics of the programming language, functions, and packages used in natural resource research and management. The course will use examples of data collected on wildlife studies and animal movements.

### Course Description

Data collection and management skills are crucial in fisheries. Contemporary fisheries research generates a multitude of data, and managing the data is becoming increasingly important in fisheries research and management. This course will introduce students to data management, and give them the skills needed to collect, and manage data in fisheries research or fisheries management. Concepts to be introduced include data collection methods, data integration methods, data management basics, and data quality assessment and quality control. This course will be divided into two daily sessions, one theoretical session in the morning and a practical session in the afternoons. All practical session will include data traditionally collected in fisheries management projects.

### Will this course be crosslisted?

<th>Course Description</th>
<th>This course will introduce students to the complete wildlife research process from idea development to reporting research results. Lecture topics will include idea development, literature review, formulation of testable hypotheses, study design, research methodology, funding sources (federal, state, non-profit, Pittman-Robertson, Dingell-Johnson, etc.), permitting and protocols (IACUC, IRB, federal, state, etc.), data management, basic data analysis, and various methods for reporting research results (conference posters and presentations, funding agency updates, annual reports, peer reviewed publications, etc.). At the end of the course, students should be able to broadly design the goals of a wildlife research project from start to finish. This course is designed for students who are interested in pursuing research scientist positions or attending graduate school.</th>

Recommended Background

Comments

Registration Restriction(s) Registration Permission

Equivalency

Rationale* Additional fall block elective for wildlife and fisheries majors interested in advancing their skills in research design for graduate school or their future professional career.
### Impact on Other Units

**N/A**

### Financial Impact

None. This course will not require any additional resources. Teaching duties of Wildlife and fisheries faculty have recently been re-distributed, to ensure that courses taught by faculty align with expectations. This class will be taught by Lindsay Phillips.

Herbert College of Agriculture - WFS - 452

2024-2025 UG Revise Course

General Catalog Information

College* Herbert College of Agriculture

Department (Acalog Hierarchy)* School of Natural Resources

Subject/Prefix (choose from list)* WFS

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 452

Course Title (max 100 characters)* Analysis & Interpretation of Fisheries Data

Variable Title? Yes

Credit Hours* 3

Course Description
This course will cover the theory and application of sample design, analysis, and interpretation of freshwater fisheries data. The course will provide students with the skills and knowledge to understand, evaluate, analyze, and interpret contemporary fisheries data. Topics will include fisheries management study design, recruitment, mortality, age and growth, abundance, biomass and production, size structure, bioenergetics, and development of management plans.

Will this course be crosslisted? Yes

If yes, what is the crosslisting relationship for this course? Primary

**General Instructions for Description**

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

**Description**

The Institute of American Civics in the Howard H. Baker Jr. School of Public Policy and Public Affairs (Baker School) offers an American Civics Certificate. The American Civics Certificate consists of 12 credit hours of coursework. Baker School majors in Public Affairs are not eligible to earn this certificate.

**General Instructions for Requirements**

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTAS
**Certificate Type**
Options should be entered from the following list: Add-On, Stand-Alone

**Requirements**

**Rationale**
To provide enrolled undergraduate students or members of the public an opportunity to demonstrate competency in a substantive area of interest.

It is anticipated that the availability of certificates will lead to increased accessibility and thereby enrollment in undergraduate education.

**Financial Impact**
See BSPA program revision proposal.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The Howard H. Baker Jr. School of Public Policy and Public Affairs offers a Public Policy Challenges Certificate. The Public Policy Challenges Certificate consists of 12 credit hours of coursework for non-Public Affairs majors. Public Affairs majors are not eligible for this certificate program.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI
Certificate Type options should be entered from the following list: Add-On, Stand-Alone

### Requirements*

#### Rationale*

To provide enrolled undergraduate students or members of the public an opportunity to demonstrate competency in a substantive area of interest.

It is anticipated that the availability of certificates will lead to increased accessibility and thereby enrollment in undergraduate education.

### Financial Impact*

See BSBAf proposal for details.

### Impact on Other Units*

N/A

### Have you consulted with all programs/departments that will be impacted by this change?*

- Yes
- No

### Course Description
Analyzing the causes, ethics, strategy, and experiences of war, as well as how wars are concluded and peace restored.
Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Statement about Crosslistings:

If course is to be crosslisted, then use the “Crosslistings” tab on menu to the right to add all applicable secondary courses. You must start a crosslisting with the primary course, and all courses must be new before they can be crosslisted using this form. If any of the courses (primary or secondary) already exist, you must complete an Add Course form for the new course. Add the crosslisting with a Revise Course form after full approval of the new course.

### Course Description

This course provides opportunities to gain a deeper understanding of Korean culture through Korean media and cultural products. Through examples of Korean culture in the media, students will discuss and analyze topics such as collectivism, work culture, elitism, or K-beauty. Students are not required to know the Korean language to take this class.

### Is this course seeking approval to be considered for Vol Core?

Yes No
If yes, which Vol Core categories?

- Applied Arts and Humanities
- Applied Oral Communication
- Arts & Humanities
- Engaged Inquiries
- Global Citizenship: International
- Global Citizenship: United States
- Natural Sciences
- Oral Communication
- Social Sciences
- Quantitative Reasoning
- Written Communication

Credit Restriction
### Rationale*
This course will add cultural content to our new Korean language classes. This is a response to student demand.

### Impact on Other Units*
N/A

### Financial Impact*
We are requesting a NTTF position for Korean for Fall 2023.

---

**Arts and Sciences Only**

Only proposals originating from the College of Arts and Sciences should answer these questions.

### Which CAS Committee(s) will be involved in this proposal?
- ✔ Arts and Humanities
- ⬜ Natural Sciences
- ⬜ Social Sciences
Select the checkbox if this course should be considered a Writing Emphasis course?

☐ Writing-emphasis course.

Should this course be considered for Connections?

☐ Yes
☐ No

If yes, which Connections category?

☐ Ancient Mediterranean Studies
☐ Biodiversity and Humans
☐ Cultural and Artistic Achievement: Arts in the United States
☐ Cultures and Societies
☐ Emerging Asia
☐ Environment and Society
☐ Geographic Information Science for Our Changing World
☐ Global Social Justice
☐ Health and Biophysics
☐ Health Care Perspectives
☐ How to Live in the Premodern World
☐ Humans Living on a Dynamic Earth
☐ Inequalities: Race, Ethnicity, Class, and Gender
☐ Mobility and Migration
☐ New Geographies of the Global Economy
☐ Our World: Contemporary Arts and Culture
☐ Rise and Decline of Premodern Complex Societies
☐ Shifting Borders and Cultures in Europe
☐ Understanding Climate Change
☐ Visual Cultures and Media Studies

New Prefix Code: STHS

General Catalog Information

College* College of Arts and Sciences

Title of Proposal* New Prefix Code: STHS

Instructions for Subject Changes

Changing a subject code requires full approval. New subject codes will be temporarily available in Curriculog before full approval, and will only be permanently available after full approval.

A new subject code must be verified for use before it can be used for new courses. This is done by completing the New Prefix/Subject Code form. The Curriculum and Catalog Management team (CCM) will research the availability of subject codes, suggest alternatives if necessary, and create a new subject code in the system for use on course forms.

Fill out Revise Course forms for equivalent courses (courses that switch from the old subject code to the new subject code).

Fill out Drop Course forms for courses that will no longer be active under either subject code.

Fill out Add Course forms for new courses to be active under the new subject code.

Include equivalent courses in this form’s equivalency table and in each applicable Revise Course form.

If the course that is being dropped carries a Vol Core designation, the department must submit a proposal to the Vol Core Committee asking that the equivalent course carry the same designation. Approval is not automatic.

If the old course had attached fees, then the fees for the new course will need to be approved by the Office of Budget and Finance. Please contact the CCM or the Bursar’s Office with any questions about these fees. Approval of fees is not automatic.

If cross-listed courses are included, all departments affected by the change must be informed so they may update their own courses. New course numbers for secondary cross-listed courses are NOT needed, however, both primary and secondary courses should be updated appropriately.

Level* Undergraduate (UG)

Graduate (GR)

New Prefix/Subject Code* STHS
### Full name of New Prefix/Subject Code
Science, Technology, Health, and Society

### Equivalency Table
No applicable. These will be new courses for a new program.

### Rationale
The new prefix code will match new, interdisciplinary programs in the College.

### Impact on other Units
None

## Administrative Use Only

**Rationale**
The School of Journalism & Media recently changed its name. The previous name was the School of Journalism & Electronic Media and the subject code was JREM.

**Impact on other Units**
None.

**Administrative Use Only**

**Admin Checklist**
- [x] New prefix added to Smartfield in Curriculog
- [x] New course type added to Smartfield in Curriculog
- [x] New course type added to Item Types in Acalog
- [ ] Form custom routed to college committees
- [ ] New prefix added to Banner
- [ ] Old courses added as new courses with new prefix/number with equivalency (Banner)
New Subject Code: Landscape Architecture for Non-Landscape Architecture Majors (LARN)

New Prefix/Subject Code

General Catalog Information

<table>

</table>

| Title of Proposal* | New Subject Code: Landscape Architecture for Non-Landscape Architecture Majors (LARN) |

Instructions for Subject Changes

Changing a subject code requires full approval. New subject codes will be temporarily available in Curriculog before full approval, and will only be permanently available after full approval.

A new subject code must be verified for use before it can be used for new courses. This is done by completing the New Prefix/Subject Code form. The Curriculum and Catalog Management team (CCM) will research the availability of subject codes, suggest alternatives if necessary, and create a new subject code in the system for use on course forms.

Fill out Revise Course forms for equivalent courses (courses that switch from the old subject code to the new subject code).

Fill out Drop Course forms for courses that will no longer be active under either subject code.

Fill out Add Course forms for new courses to be active under the new subject code.

Include equivalent courses in this form's equivalency table and in each applicable Revise Course form.

If the course that is being dropped carries a Vol Core designation, the department must submit a proposal to the Vol Core Committee asking that the equivalent course carry the same designation. Approval is not automatic.

If the old course had attached fees, then the fees for the new course will need to be approved by the Office of Budget and Finance. Please contact the CCM or the Bursar's Office with any questions about these fees. Approval of fees is not automatic.

If cross-listed courses are included, all departments affected by the change must be informed so they may update their own courses. New course numbers for secondary cross-listed courses are NOT needed, however, both primary and secondary courses should be updated appropriately.

Equivalency Chart
This course will introduce students to fundamental ethical and social issues related to the design, development, and use of technology. Students will develop an understanding of philosophical ethical theories as a resource for analyzing how technology impacts both individual and collective civil, political, and human rights and issues related to autonomy, privacy, and identity. Versions of this course are increasingly common in Philosophy departments at peer and aspiring-peer institutions. Philosophers are ideally situated to help students understand and reflect on ethical issues raised by emerging technologies. It is a timely course that will contribute to the Gen. Ed. Curriculum and attract students to Philosophy programs. It will enhance our new Philosophy of Science and Medicine Minor. It does not significantly overlap with our current course offerings (PHIL244 focuses on ethical issues in business, medicine, and other professions, while PHIL252 focuses on abortion, the death penalty, etc.).

The course will help students to accurately explain and critically evaluate philosophical texts and ideas. It will enhance their understanding of philosophical texts and ideas. It will also enhance their critical thinking skills. This course fits well with our existing lower-division undergraduate courses, especially our courses in Professional Responsibility, Contemporary Moral Problems, and Critical Thinking. It also fits squarely in our new minor in Philosophy of Science and Medicine, which requires 6 courses at the 200-level and above. And it will attract students to our major, including our Philosophy of Science and Medicine and Legal and Political Philosophy concentrations.

Our Assessment Activities include planning and implementing strategies for enhancing the Gen.Ed. curriculum through courses that emphasize the need for philosophical reflection on issues of pressing social interest. We also work to increase the number of Philosophy majors and minors and to complement other programs at the University. We hope to fill a gap at UTK that has been recently created by the explosion of AI and the important ethical issues it raises. We also hope to expose students to Philosophy more generally and to emphasize its practical implications.

The course will complement computer science, neuroscience, and other programs by providing ethics training in these areas. There is no comparable course of this sort at UTK.

Neutral. Philosophy will be able to field these courses from the existing tenure-stream faculty and lecturers. Adam Cureton (Professor) has research interests in this field and some informal computer science background. The course can also be taught by several other TT faculty and lecturers with interests in practical ethics. If the course is successful, we would ideally hire a TT faculty member who specializes in the ethics of emerging technologies.
Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal?
- Arts and Humanities
- Natural Sciences
- Social Sciences

Select the checkbox if this course should be considered a Writing Emphasis course?

ROTC Catalog Page Update
Content and Text Change (Non-Program Requirements)

General Catalog Information

Purpose of Form:
This form can be used for changes to pages such as "Academic Policies and Procedures", "About the University", and "Admission to the University", as well as faculty names, addresses, phone numbers, and websites on other pages.

Hierarchy Owner* Reserve Officers Training Corps (ROTC)

Title of Proposal* ROTC Catalog Page Update

Workflow Information

Level* Undergraduate (UG)

Indicate the type of UG change*
- About the University or Academic Policies and Procedures pages
- College or department pages
- Faculty changes, address edits, grammatical changes, etc.
- None (Select this for GR changes)

Indicate the type of GR change*
- About the University or Academic Policies and Procedures pages
- College or department pages
- Faculty changes, address edits, grammatical changes, etc.
- None (Select this for UG changes)

Catalog Information

Type of Change Requested*
- New Content to be Added to the Catalog
- Content to be Revised in the Catalog
### Page Information

- **Where will this NEW or REVISED content appear?**
  - [x] Existing Page
  - [ ] New Page

- **If content is being added to an existing page, copy & paste the URL of the catalog page where it will go.**
  - https://catalog.utk.edu/content.php?catoid=43&navoid=8330

- **Indicate the location on the page(s) where this information will appear.**

- **If an existing page should be removed entirely, copy & paste the URL here.**

- **If content is being added to a new page, indicate what the name of that page should be:**

### Approval Information

- **Additional approval(s) required?**
  - [x] Yes
  - [ ] No

- **If Yes is selected in the field above, please provide further information:**
Directions to Propose Content Changes:

1. Copy and Paste the current content from the Catalog as it appears online into the field below. Do NOT make any edits to the text until step 4.

2. Click on Save (this will ensure that original content is saved).

3. After you have completed all required fields, Validate and Launch your proposal.

4. Apply and format the changes directly to the text. Be sure to format the content exactly as it will appear online.

5. After you have completed all edits to the text, be sure to approve your proposal in the decisions tab on the right.

Requested Content Changes for Catalog

Reserve Officers Training Corps (ROTC)

Reserve Officers Training Corps (ROTC) at the University of Tennessee, Knoxville consists of two units:

- Air Force and Aerospace Studies
- Military Science and Leadership

Please see the individual pages to view details about these programs.

Additional Notes

ADMINISTRATIVE USE ONLY

Impact Level

- [ ] Low
- [ ] Mid
- [ ] High

The following UG actions have been completed:

- [ ] Content added to current published catalog
- [ ] Content added to next academic year's publication
- [ ] Content added to previous year's catalog
The following GR actions have been completed:

- [ ] Content added to current published catalog
- [ ] Content added to next academic year's publication
- [ ] Content added to previous year's catalog

Admin Routing Instructions:

About the University or Academic Policies and Procedures pages: to academic policy then to UG/GR council.

College or department pages: college level workflow then to curriculum committee.

Faculty changes, address edits, grammatical changes, etc.: no custom route necessary.
Reserve Officers Training Corps (ROTC) - Air Force and Aerospace Studies - Air Force Aerospace Studies Minor

2024-2025 UG Revise Program

General Catalog Information

College* Reserve Officers Training Corps (ROTC)

Department* Air Force and Aerospace Studies

Program Name* Air Force Aerospace Studies Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*
Rationale* The Air Force Leadership minor is designed to give students a fundamental understanding of Air Force officership. The courses are arranged in a phased approach that focuses on military history, followership, conflict resolution to military justice, leadership, and global power competition from a whole of government approach. As students progress from Air Force officer candidates to officers serving in the military, this curriculum will be studied again in greater detail throughout their career and serves as the framework for a Master's Degree in Military Operational Art.

Financial Impact* There is no financial impact.

Impact on Other Units* N/A

Have you consulted with all programs/departments that will be impacted by this change?* ☐ Yes ☐ No

**Registration Enforced (RE)**

CBE 201, CBE 240, and CBE 250 with a grade of C- or better.
Rationale* 
Previously, students would be disenrolled from our 300-level courses unless they had been approved for upper division status via application. Our practice has been to require C- or better grades in these three lower division courses before approving upper division status. We are eliminating our upper division status application progression requirement and replacing it with this simpler requirement for completing the 200-level prereq courses with at least a C-. In practice this does not amount to a change, but clarifies the requirements for progression, makes them more obvious to the students at registration, and eliminates the need to disenroll qualified students that have not submitted the upper division application.

Grading Restriction

Registration, CBE 201, CBE 240, and CBE 250 with a grade of C or better and MATH 241 or MATH 243.
### Registration Enforced (RE)

**Prerequisite(s):** CBE 201, CBE 240, and CBE 250 with a grade of C- or better; and MATH 241 or MATH 247.

### Department Enforced (DE)

**Corequisite(s):**

### Recommended Background

### Comments

### Registration Restriction(s)

### Registration Permission

### Equivalency

**Rationale**

Our assessments in our existing CBE 250 thermo course and subsequent lab courses indicate that we are unable to cover sufficient vapor-liquid equilibrium and nonideal solution thermodynamics in one 4 credit-hr course; therefore, we are reducing the existing course to 3 cr-hr, adding this new 3 cr-hr course covering the missing topics, and moving some of the related topics from CBE 250 to this new course. This will create a two-course thermodynamics sequence consistent with many of our peers and enhance our students’ understanding of this fundamentally critical subject.

### Impact on Other Units

**N/A**

### Financial Impact

This change will not lead to a net change in credit hours for the degree when combined with other changes. One credit comes from reduction of CBE 250 to 3, and the other two come from eliminating two of five credit hours of technical electives in our term 8 showcase.

### Corequisite(s)

### Recommended Background

### Comments

### Registration Restriction(s)

### Registration Permission

### Equivalency

### Rationale*

Previously, students would be unenrolled from our 300-level courses unless they had been approved for upper division status via application. Our practice has been to require C- or better grades in these three lower division courses before approving upper division status.

We are eliminating our upper division status application progression requirement and replacing it with this simpler requirement for completing the 200-level prereq courses with at least a C-. In practice this does not amount to a change, but clarifies the requirements for progression, makes them more obvious to the students at registration, and eliminates the need to unenroll qualified students that have not submitted the upper division application.

Tickle College of Engineering - COSC - 325
2024-2025 UG Revise Course

General Catalog Information

College* Tickle College of Engineering

Department (Acalog Hierarchy)* Electrical Engineering and Computer Science

Subject/Prefix (choose from list)* COSC

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 325

Catalog Name (max 100 characters)* Introduction to Machine Learning

Transcript Name Intro/Machine Learning

Variable Title? Yes

Credit Hours* 3

Credit Type* Or To N/A

Course Description Machine learning is concerned with computer programs that automatically improve their performance through experience. This course covers the theory and practice of machine learning from a variety of perspectives. We cover topics such as clustering, decision trees, neural network learning, statistical learning methods, Bayesian learning methods, dimension reduction, kernel methods, and reinforcement learning. Programming assignments include implementation and hands-on experiments with various learning algorithms.

## Course Description

A broad introduction to cybersecurity concepts. The class will introduce basic topics core to understanding computer security including security goals, threat modeling, software security, operating system security, cryptography, network security, and human factors. Coursework focuses on helping students adapt a security aware mindset when designing, developing, and testing systems.

<tbody>
<tr>
<td><strong>Registration Enforced (RE) Prerequisite(s)</strong> COSC 202 with a grade of C or better, and either ECE 256 or COSC 230 with a grade of C or better.</td>
</tr>
</tbody>
</table>
Change the pre-req from 302 to 202
Remove the restriction that credit cannot be received for ECE 461 and COSC 366
Pre-reqs better align with course materials.
Allows students to take the elective sooner (if desired).
Makes it easier for non-majors to take.
Allowing credit for both ECE 462 and COSC 366 is a better onboarding path into the minor for non CS-majors, as EE and non-EECS students are more likely to start with ECE 462.
Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal?
- Arts and Humanities

### Course Description

This is an advanced topic course focused on developing multi-disciplinary skills of discovering, retrieving, analyzing, and presenting operational data. Students will use critical thinking and intense practice solving real-world problems to recognize and address key operational issues: the lack of context, missing observations, and incorrect values. At the end of the course students will be able to discover operational data, to retrieve and store it, to recover context, to estimate the impact of missing events, to identify unreliable or incorrect values, and to present the results.

PROGRESSION POLICIES AND REQUIREMENTS

Progression to Upper Division

Progression of students in the Department of Chemical and Biomolecular Engineering to departmental courses numbered 310 and above requires satisfactory performance in foundational lower division course work. Factors considered include overall grade point average, performance in selected lower-division courses, and evidence of satisfactory and orderly progress through the prescribed curriculum. Students must complete CBE 201, CBE 240, and CBE 250 with a grade of C- or better to register for upper division courses.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

<table>
<thead>
<tr>
<th>Requirements*</th>
</tr>
</thead>
</table>
| **Rationale*** | Elimination of upper division status application: Previously, students would be unenrolled from our 300-level courses unless they had been approved for upper division status via application. Our practice has been to require C- or better grades in these three lower division courses before approving upper division status. We are eliminating our upper division status application progression requirement and replacing it with this simpler requirement for completing the 200-level prereq courses with at least a C-. In practice this does not amount to a change, but clarifies the requirements for progression, makes them more obvious to the students at registration, and eliminates the need to unenroll qualified students that have not submitted the upper division application.  
Course addition and change in Term 5: Added new CBE 330 thermo to degree requirements and to the term 5 showcase and removed VolCore AH elective (moved to term 8 on our showcase to balance the term credit hours). A VolCore GCUS elective was moved from another term to correct an error in the catalog compared to the curriculum guide we provide to our students and use for advising.  
Term credit hours: Some errors were noted in the term credit hours shown and were corrected to match the totals of the courses listed for each term, and some terms were adjusted due course changes altering term credit hours. |

| Financial Impact* | Credit hours are conserved by redistributing from technical electives to the free the 2 cr-hr needed to add the new required course and stay within the 128 cr-hr limit. |
| Impact on Other Units* | N/A |
| Have you consulted with all programs/departments that will be | Yes | No |
that will be impacted by this change?

Tickle College of Engineering - ECE - 459
2024-2025 UG Revise Course

General Catalog Information

College* Tickle College of Engineering

Department (Acalog Hierarchy)* Electrical Engineering and Computer Science

Subject/Prefix (choose from list)* ECE

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 459

Catalog Name (max 100 characters)* Secure and Trustworthy Computer Hardware Design

Transcript Name Secure/Trust Comp Hdwr Design

Variable Title? Yes

Credit Hours* 3

Credit Type* Or To N/A

Course Description In-depth introduction to a range of new developments for the design of secure and trustworthy computer hardware. Topics covered include physical and invasive attack models, side-channel analysis (SCA) attacks, physical unclonable functions, hardware-based random number generators, watermarking of intellectual property (IP) blocks, FPGA security, passive and active metering for piracy prevention, and hardware Trojan detection and isolation.

### Course Description

Introduction to vulnerabilities and threat vectors associated with mobile and embedded devices, such as smartphones, wearable devices, and IoT devices. Topics include security features and limitations of mobile operating systems, secure programming, mobile location and activity privacy, user/device authentication, IoT wireless security, side-channel attacks on mobile/wearable devices, and security and privacy breaches on smart home devices. Coursework focuses on improving knowledge and awareness of mobile and embedded systems' security issues, through individual homework assignments and an intensive group project involving hands-on research.

- N (Internship)
- R (Research)
- S (Service Learning)

Variable Title?* Yes

Credit Hours* 2

Course Description
This course will give students the opportunity to apply the engineering design process within the context of K-12 education through engagement with local schools. Students will develop, refine, and implement programming to teach K-12 students aspects of engineering. To support this process, students will learn basic education theory and read current scholarly articles on research-based practices to teach engineering in K-12.

Will this course be crosslisted? Yes

If yes, what is the crosslisting relationship for this course? Primary

List all courses in this crosslisting relationship and note whether primary or secondary

The Engineering Fundamentals (EF) department, within the Tickle College of Engineering, is requesting that EF 320 – Engineering Design in K-12 Education receive the university’s service-learning designation beginning with the 2024-2025 academic year and accompanying undergraduate catalog. EF 320, which is currently being taught as EF 327 - Honors: Engineering Design in K-12 Education will switch to the EF 320 course number/prefix in order to remove the honors concentration and become more inclusive to any engineering student that might be interested in service-learning and experiential education. The EF 320 course number/prefix is already available within the course catalog for 2023-2024 but is not currently being used as a course within the engineering fundamentals department.

The current course, EF 327-Honors: Engineering Design in K-12 Education, which meets simultaneously with TPTE 115 within the College of Education, Health, and Human Sciences offers engineering students and students enrolled in STEM fields of the teacher education program the experience to work within their community in the setting of K-12 education and outreach. The course provides students the opportunity to apply the human-centered design process and reflection to various service projects that are partnered with such organizations as the Knox County School District, TN STEM Hub, 4-H organizations across the state, and the Boys & Girls club. Following each service-learning project, the enrolled students will be expected to submit a written reflection via their course CANVAS site. In addition to the service projects and events, students will also practice teaching etiquette and procedures during their weekly class meetings on campus. Furthermore, students will learn basic education theory and read current scholarly articles on research based practices to teach engineering in K-12.

It should be noted that while the course meets concurrently with TPTE 115, the service-learning designation will have no effect on their course number or content, as they are not considered cross-listed within the university’s undergraduate catalog.

N/A

Only proposals originating from the College of Arts and Sciences should answer these questions.

Tickle College of Engineering - Electrical Engineering and Computer Science - Computer Engineering Major, BS in Computer Engineering

2024-2025 UG Revise Program

General Catalog Information

College*  Tickle College of Engineering

Department*  Electrical Engineering and Computer Science

Program Name*  Computer Engineering Major, BS in Computer Engineering

Degree Type*  Bachelor of Science in Computer Engineering

Program Type*  Undergrad (Major)

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description  Students may choose from a wide spectrum of courses covering various aspects of computer engineering, computer science, electrical engineering, and related fields.

Progression Policies and Requirements

The department requires at least a C in every computer engineering, computer science, electrical engineering, and mathematics course used for the undergraduate degrees.

Progression of departmental undergraduate students to the upper-division programs of the department is competitive and is based on the space available in the department. Factors considered in the decision include overall grade point average, grades earned in courses required in the lower-division curricula of the department and Tickle College of Engineering, and seriousness of purpose and interest in departmental programs as exemplified by regular and orderly progress through the prescribed curriculum without abuse of withdrawal and course repeat privileges.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

**Description**

The minor in Cybersecurity prepares graduates to be leaders in the protection of data assets. The curriculum focuses on the techniques, policies, operational procedures, and technologies that secure and defend the availability, integrity, authentication, confidentiality, and nonrepudiation of information and information systems, in local as well as more broadly based domains. The curriculum allows students to explore security of a variety of computing environments: embedded, mobile, server, datacenter, cloud, distributed, and special purpose (e.g. HPC). The minor helps prepare students for careers that address security in application design, information systems, infrastructure, system management, and policy.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

<table>
<thead>
<tr>
<th>Requirements*</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Rationale</strong></td>
</tr>
<tr>
<td>• Allows students outside the department to take the minor with lower buy-in</td>
</tr>
<tr>
<td>• Allowing credit for both ECE 462 and COSC 366 is a better onboarding path into the minor for non CS-majors, as EE and non-EECS students are more likely to start with ECE 462.</td>
</tr>
<tr>
<td>• Update required courses in line with changes to COSC 366</td>
</tr>
<tr>
<td>• Remove unrelated electives</td>
</tr>
<tr>
<td>• Add special topics in cybersecurity as option for elective hours</td>
</tr>

Tickle College of Engineering - Electrical Engineering and Computer Science - Electrical Engineering Major, BS in Electrical Engineering

2024-2025 UG Revise Program

General Catalog Information

College*  Tickle College of Engineering

Department*  Electrical Engineering and Computer Science

Program Name*  Electrical Engineering Major, BS in Electrical Engineering

Degree Type*  Bachelor of Science in Electrical Engineering

Program Type*  Undergrad (Major)

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Description
Students in the senior year may choose from a wide spectrum of courses covering all aspects of electrical and computer engineering. Students must meet the design, depth, and breadth requirements of the department in their selection of these courses. The design requirement is met through a major engineering design experience in ECE 402*, Senior Design, and through the design process being integrated into specified courses throughout the program. Students are encouraged to discuss an appropriate senior program with their advisors.

Progression Policies and Requirements
The department requires at least a C in every computer engineering, computer science, electrical engineering, and mathematics course used for the undergraduate degrees. Progression of departmental undergraduate students to the upper-division programs of the department is competitive and is based on the space available in the department. Factors considered in the decision include overall grade point average, grades earned in courses required in the lower-division curricula of the department and Tickle College of Engineering, and seriousness of purpose and interest in departmental programs as exemplified by regular and orderly progress through the prescribed curriculum without abuse of withdrawal and course repeat privileges.

Students who take ECE 202 will be evaluated during the semester they are registered for it. Transfer students for whom ECE 202 transfer credit is given may take 9 semester hours in departmental courses before progression evaluation. All students, whether or not they transfer in, who are not accepted into the upper-division program of the department will be put in either a temporary probationary status or a non-progressed status and will not be permitted to register for any upper-division courses within the department.

General Instructions for Requirements
All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Recommended Background
Comments
Registration Restriction(s) Registration Permission
Equivalency
Rationale* Manufacturing in the nation and Tennessee is booming and manufacturing companies expect students to use advanced systems modeling and analytics techniques to improve their manufacturing operations. The department has a graduate-level version (IE 544) already. We would like to extend this training to undergraduate students.
Impact on Other Units* None
Financial Impact* None because the course will be cross-listed with IE 544, which has been taught.
(Admin Note: Technically undergraduate and graduate courses cannot be cross-listed - but the content can be the same with a different audience)
Arts and Sciences Only

Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal?

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Progression Policies and Requirements

Progression of students to departmental upper-division courses is competitive. Factors considered include overall grade point average, performance in selected lower-division courses and evidence of satisfactory and orderly progress through the prescribed curriculum.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add On, Stand Alone
Requirements*

Rationale* Rationale: Some transfer students have taken COSC 102. The new EF 403 Pathways to Success for Engineers (one hour) is added to increase the flexibility of senior student scheduling, especially for scholarships.

Financial Impact* None

Impact on Other Units* None

Have you consulted with all programs/departments that will be impacted by this change?* Yes ☐ No ☐

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Come for a degree . . . leave with a company! The Engineering Entrepreneurship Minor provides students with exposure to the broad range of skills required to succeed in a technologically-based entrepreneurial endeavor including introduction to engineering entrepreneurs for mentoring, analysis of technology trends, fundamentals of intellectual property protection, ethics in business, practice in key communications skills, understanding of the due diligence process, exposure to proposal writing and management skills and involvement in basic elements of starting a company. Sixteen hours of coursework are required as listed below.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI
### Requirements

---

### Rationale

The NE 457 course, Engineering Entrepreneurship, has been inadvertently left out of the list of courses included within the Engineering Entrepreneurship Minor program. Therefore, it is herein being added to the list.

---

### Financial Impact

NE students can now include NE 457 and pursue that minor.

---

### Impact on Other Units

None

Recommended Background

Comments

Registration Restriction(s) Aerospace, Biomedical, Biosystems, or Mechanical engineering major.

Registration Permission

Equivalency

Rationale* Biosystems Engineering will add a concentration that would use ME/BME 363 (or ME/BME 367) as part of the concentration. The MABE faculty voted to allow BSE majors to take our System Dynamics course.

Impact on Other Units* Will enable Mechanical and Mechatronic Systems Concentration in BSE to take our ME/BME 363/367 course as part of concentration.

Financial Impact* Small - BSE estimates ~5 students/year might follow concentration, adding to the MABE students already taking this course.
Have you consulted with all programs/departments that will be impacted by this change?*

Recommended Background

Comments

Registration Restriction(s)
Aerospace, biomedical, or mechanical engineering major.

Registration Permission

Equivalency

Rationale*
MABE faculty voted to remove the MSE 201 prerequisite from ME 366 since AE majors no longer take MSE 201, thus requiring prerequisite waivers for AE majors taking ME 366/466 (its corequisite). However, we continue to require MSE 201 as a non-departmental, required course for the ME BS degree.

Impact on Other Units*
Negligible. MSE 201 is still a required course for ME majors, but may be taken concurrently or later. MSE 201 will remain as a recommended early course (2nd year) in the ME curriculum.

Financial Impact*
Negligible. MSE 201 is still a required course for ME majors, but may be taken
concurrently or later. MSE 201 will remain as a recommended early course (2nd year) in the ME curriculum.

### Course Description

This course is designed to provide the fundamental background of ML methods as applied to practical problems of materials discovery, characterization, and optimization. It covers the basics of the classification, regression, and dimensionality reduction methods, combined physics- and ML based workflows, and introduces the concepts of active learning, experimental planning, and causal learning as necessary elements of decision making. The emphasis is made on low-code hands-on practice.
Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Statement about Crosslistings:

If course is to be crosslisted, then use the “Crosslistings” tab on menu to the right to add all applicable secondary courses. You must start a crosslisting with the primary course, and all courses must be new before they can be crosslisted using this form. If any of the courses (primary or secondary) already exist, you must complete an Add Course form for the new course. Add the crosslisting with a Revise Course form after full approval of the new course.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

A minor in materials science and engineering is offered through the Tickle College of Engineering to those undergraduate students who have met the prerequisites for the courses required by the minor. The minor requires completion of a minimum of 13 hours in coursework which develops a foundation in materials science and engineering and allows concentration in materials science and engineering areas to be selected by the students (e.g., metallurgy, polymers, ceramics, composites, or electronic materials). Some of the courses used for the materials science and engineering minor may also satisfy requirements for the student's major.

Students may enroll in the minor program by meeting and discussing their intent and plan with the Materials Science and Engineering Academic Advisor who will communicate with the student's major departmental advisor.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

Recommended Background 
Comments 
Registration Enforced (RE) 
Corequisite(s)
Registration Restriction(s) Engineering major only. 
Registration Permission 
Equivalency 
Rationale* Following student feedback about not learning anything about NE until their second year, we are adding this course early into the NE program during Term 2 (spring of first year) to help students learn about the types of technical applications, and employment/research opportunities in the nuclear and radiological engineering fields. This will help avoid some of our students to feel "stuck" into NE by the time they learn more details about the field. 
Impact on Other Units* None 
Financial Impact* This will add one additional credit in Term 2.
This course will be managed by the Department Head and likely rotated through various current faculty members.

Prerequisite(s)
NE 470 is being added as a co-requisite. Most NE students take NE 470 in spring of junior year then NE 360 in fall of senior year. Since NE 470 provides background needed, this will avoid having students sign up for NE 360 without taking NE 470 at least concurrently.

### Course Description
An introduction to fundamentals principles of radiochemistry. This class will cover basic techniques and analytical measurements ranging from detection of radioactive material to design of experiments for modern applications, including medicine. This an undergraduate and graduate lab course (NE 516) taught concurrently, where graduate students will have additional requirements and assignments.

NE 415 is the course titled "Introduction to Radiochemistry" and needs to be taken prior to or concurrently with NE 416 which is the laboratory. Registration permission by instructor has also been added for this course because of limited seats available and departmental prioritizations.

**Registration**
<table>
<thead>
<tr>
<th>Registration Restriction(s)</th>
<th>Minimum student level - junior.</th>
</tr>
</thead>
</table>

**Equivalency**

**Rationale**
Department Enforced (DE) prerequisites are being removed. NE students in the nuclear safety and nuclear decommissioning minor tracks can take NE 485 without having to take NE 483 (or equivalent cross-listed courses). This will also facilitate adding NE 485 to the list of electives available for the new Nuclear Engineering Minor being added in a parallel proposal.

**Impact on Other Units**
Possible minor reduction in enrollment into NE 483 or equivalent cross-listed courses currently appearing as pre-requisites.

**Financial Impact**
None

**Have you consulted with all programs/departments that will be impacted by this change?**

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s)

Recommended Background

Comments

Registration Restriction(s) Minimum student level - junior.

Registration Permission

Equivalency

Rationale*
Modifying registration restriction from "juniors in NE" to "junior level." This will facilitate adding this course to list of electives for the new Minor in Nuclear Engineering being added to the catalog in a parallel proposal.

Impact on Other Units* This course can now be available to other engineering departments.

Financial Impact* Enrollment in this course could increase over time depending on popularity of minor in NE.

Have you consulted with all programs/departments that will be impacted by this change?*

</tbody>
</table>

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
PROGRESSION POLICIES AND REQUIREMENTS

Progression

The first two years of the curriculum are considered to be lower-division and the two remaining years upper-division. Students must apply for progression to departmental upper-division courses, which depends on academic performance. Factors considered include overall grade point average, performance in selected lower-division courses and evidence of orderly progression through the prescribed curriculum.

Full Status

A lower-division student may apply for progression to upper-division after completing CHEM 122* and CHEM 123* or CHEM 128*, CHEM 132* and CHEM 133* or CHEM 138*; MATH 132* or MATH 141* or MATH 147*, MATH 142* or MATH 148*, MATH 231 or MATH 237, EF 151* or EF 157*, EF 152* or EF 158*, and PHYS 231*, with a grade of C or better in each, and an overall GPA of at least 2.5.

Provisional Status

Students who have completed CHEM 122* and CHEM 123* or CHEM 128*, CHEM 132* and CHEM 133* or CHEM 138*; MATH 132* or MATH 141* or MATH 147*, MATH 142* or MATH 148*, MATH 231 or MATH 237, EF 151* or EF 157*, EF 152* or EF 158*, and PHYS 231* with a grade of C or better and have an overall GPA between 2.0 and 2.5 may apply for provisional status. The granting of provisional status is based on the availability of space in departmental programs after full status students have been accommodated. Provisional status students are required to demonstrate their ability to perform satisfactorily in upper-division by attaining a minimum GPA of 2.5 in the first 9 hours of 300-level required nuclear engineering courses. Award of upper-division full status is dependent upon this performance. Students who have not progressed to upper-division will be dropped from departmental courses.

Nuclear Engineering Graduation Requirements

Students are strongly recommended to meet with their advisor every semester. Students are required to maintain a cumulative grade point of at least 2.0 in all nuclear engineering courses taken at the University of Tennessee, Knoxville, used to satisfy the graduation requirements. No more than four credit hours of required nuclear engineering courses in which a C- or lower is the highest grade earned may be counted toward graduation. This is in addition to the university's graduation requirements.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

---

**Requirements**

**Rationale**

This proposal has 2 main changes:

1. A concurrent proposal has added a new 1 credit course, NE 101 - Survey of Nuclear and Radiological Engineering (1). This course has to be added to Term 2 of the schema and adds one extra hour that term and to the total number of credits.

2. The two courses for senior design project are NE 471 and NE 472, originally assigned as 1 and 3 credits, respectively. This is being changed to 2 and 2, respectively, to more accurately reflect the actual effort and lecture load of these two courses in each semester. This adds one credit to Term 7 and reduces one credit from Term 8.

**Financial Impact**

1. Term 2 will have one additional credit, as will the total number of credits for the major.

2. Term 7 will have one additional credit, while Term 8 will have one less credit.

**Impact on Other Units**

None

**Have you consulted with all programs/departments that will be impacted by this change?**

- Yes
- No

---

**ADMINISTRATIVE USE ONLY**

Factors considered include overall grade point average, performance in selected lower-division courses and evidence of orderly progression through the prescribed curriculum.

Full Status

A lower-division student may apply for progression to upper-division after completing CHEM 122* and CHEM 123* or CHEM 128*, CHEM 132* and CHEM 133* or CHEM 138*; MATH 132* or MATH 141* or MATH 147*, MATH 142* or MATH 148*, MATH 231 or MATH 237; EF 151* or EF 157*, EF 152* or EF 158*; and PHYS 231*, with a grade of C or better in each, and an overall GPA of at least 2.5.

Provisional Status

Students who have completed CHEM 122* and CHEM 123* or CHEM 128*, CHEM 132* and CHEM 133* or CHEM 138*; MATH 132* or MATH 141* or MATH 147*, MATH 142* or MATH 148*, MATH 231 or MATH 237; EF 151* or EF 157*, EF 152* or EF 158*; and PHYS 231* with a grade of C or better and have an overall GPA between 2.0 and 2.5 may apply for provisional status. The granting of provisional status is based on the availability of space in departmental programs after full status students have been accommodated. Provisional status students are required to demonstrate their ability to perform satisfactorily in upper-division by attaining a minimum GPA of 2.5 in the first 9 hours of 300-level required nuclear engineering courses. Award of upper-division full status is dependent upon this performance. Students who have not progressed to upper-division will be dropped from departmental courses.

Nuclear Engineering Graduation Requirements

Students are strongly recommended to meet with their advisor every semester. Students are required to maintain a cumulative grade point of at least 2.0 in all nuclear engineering courses taken at the University of Tennessee, Knoxville, used to satisfy the graduation requirements. No more than four credit hours of required nuclear engineering courses in which a C- or lower is the highest grade earned may be counted toward graduation. This is in addition to the university's graduation requirements.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

<table>
<thead>
<tr>
<th>Requirements*</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Rationale</strong></td>
</tr>
<tr>
<td>This proposal has 3 main changes:</td>
</tr>
<tr>
<td>1. A concurrent proposal has added a new 1 credit course, NE 101 - Survey of Nuclear and Radiological Engineering (1). This course has to be added to Term 2 of the schema and adds one extra hour to Term 2 and to the total number of credits.</td>
</tr>
<tr>
<td>2. IE 200 - Engineering Statistics is being added as an option to STAT 251. These two courses provide similar content and both provide the necessary background to move onto later Radiological Concentration courses. Term 6 is being updated to provide this new option.</td>
</tr>
<tr>
<td>3. The two courses for senior design project are NE 471 and NE 472, originally assigned as 1 and 3 credits, respectively. This is being changed to 2 and 2, respectively, to more accurately reflect the actual effort and lecture load of these two courses in each semester. This adds one credit to Term 7 and reduces one credit from Term 8.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Financial Impact*</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Term 2 will have one additional credit, as will the total number of credits for the major.</td>
</tr>
<tr>
<td>2. IE Department would be affected by additional enrollments from NE students, while Statistics Department would be affected by reduced enrollment from NE students. The impact is low because only about 9 students are currently in the Radiological Concentration, with the highest number in recent years being 14. Acknowledgment from IE is attached.</td>
</tr>
<tr>
<td>3. Term 7 will have one additional credit, while Term 8 will have one less credit.</td>
</tr>
</tbody>
</table>

<table>

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The minor in Nuclear Engineering prepares students pursuing majors in other engineering disciplines for a career in the nuclear industry. The grade in each of the required courses must be at least a C. Students should consult with their advisor for the appropriate elective courses in their major. The minor consists of at least 14 credit hours.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
**Rationale**
Most nuclear related industrial or research organizations include engineering disciplines other than nuclear engineering. A minor in nuclear engineering will prepare students pursuing majors in other engineering disciplines for a career in the nuclear industry.

**Financial Impact**
Students pursuing this minor will require 11 credits in nuclear engineering courses, some of which would count as electives in their own majors.

**Impact on Other Units**
This will add an additional option to students in all other engineering disciplines who may want to pursue a career in the nuclear industry.

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

**Description**

The University Exploratory program is housed within the Center for Career Development & Academic Exploration. Students in the program are advised by Academic & Career Exploration (ACE) Coaches who provide integrated academic and career planning support. The program is intended for students who have no clear idea which major to pursue or those who are trying to decide among majors that are not in a single college. It allows students to explore major options and make progress toward graduation through the completion of Vol Core courses. University Exploratory students are required to meet with their ACE coach every semester.

All UT Knoxville students admitted as University Exploratory Fall 2024 or after must declare a major by 45 attempted credit hours.

Transfer students with more than 24 transferable hours must be admitted directly into a college.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

<table>
<thead>
<tr>
<th>Requirements*</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Rationale</strong></td>
</tr>
</tbody>
</table>
| These edits reduce the credit hour limit for first time in college students in the University Exploratory major from 60 to 45 and reduce the credit hour limit for transfer students admitted into the University Exploratory major from 45 to 24. Changes are proposed based on UT data (from five consecutive cohorts) showing students in the University Exploratory major have lower retention and graduation rates:
| ○ 83% second year retention rate for University Exploratory vs. 87% for students who began in declared majors
| ○ 74% third year retention rate for University Exploratory vs. 81% for students who began in declared majors
| Additionally, students who begin in University Exploratory graduate in four and six years at lower rates than students who begin in declared majors:
| ○ 49% four year graduation rate for students who begin in University Exploratory vs. 55% for students who begin in declared majors
| ○ 66% six year graduation rate for students who begin in University Exploratory vs. 73% for students who begin in declared majors
| These edits communicate that students in University Exploratory programs will now be advised by Academic & Career Exploration (ACE) Coaches in the Center for Career Development & Academic Exploration where they will receive integrated advising and career planning support. The ACE Team will be staffed so coaches can provide longer appointment times (than traditional academic advisors) and will be housed in a central location to provide colleges more access to deciding students.

<table>
<thead>
<tr>
<th>Financial Impact*</th>
</tr>
</thead>
</table>
| The proposed changes will reduce the amount of time students will be housed in the University Exploratory major and increase the amount of time students will be assigned to academic colleges who will receive funding based on enrollment. Fall 2023 enrollment of first-year University Exploratory students was approximately 335.
Impact on Other Units

Moving University Exploratory advising to the Center for Career Development & Academic Exploration (CCDAE) impacts the College of Arts & Sciences Advising and Academic & Career Exploration (ACE) teams. RJ Hinde and Amber Williams conferred and communicated the move to impacted units. Leadership in both units (advising directors, executive director), along with leaders in Enrollment Management and the Transfer Center (executive directors, assistant director), served on a workgroup to propose credit hour limit edits.

3. After you have completed all required fields, Validate and Launch your proposal.

4. Apply and format the changes directly to the text. Be sure to format the content exactly as it will appear online.

5. After you have completed all edits to the text, be sure to approve your proposal in the decisions tab on the right.
University Honors

Dr. Pat Akos, Associate Vice Provost and Executive Director
Dr. Francis Canedo, Director

https://studentsuccess.utk.edu/honors/

University Honors serves a diverse group of highly accomplished, intellectually curious, and action-oriented students from across the university’s undergraduate colleges. The interdisciplinary and collaborative University Honors experience is designed to complement the depth of learning provided in students’ academic disciplines. University Honors brings together a community of Honors students, staff, faculty eager to learn together, hone their abilities to address complex problems, and make a positive difference on campus, in Tennessee, and beyond.

University Honors offers two programs: Chancellor's Honors and Haslam Leadership Scholars. Each program has its own eligibility requirements, program goals, and academic curriculum (see Academic Minor links below). Chancellor's Honors and Haslam Leadership Scholars are encouraged and supported to deepen their honors experience by participating fully in campus life, serving the community, and pursuing experiential learning opportunities, such as internships, research, and study abroad. University Honors students are also encouraged to participate in one or more of the University of Tennessee's many specialized college and departmental honors programs.

University Honors students are expected to make timely progress towards honors graduation while maintaining a minimum cumulative GPA of 3.5. Students not meeting expectations will be required to complete supplemental academic coaching with University Honors staff.

Benefits

Students in University Honors enjoy various privileges designed to facilitate their growth, learning, and achievement. University Honors students are granted priority registration, advanced library privileges, and specialized honors coaching to ensure access to the coursework and resources that an ambitious curriculum demands. In addition, University Honors students have access to exclusive study spaces and honors programming, competitive honors grants and scholarships, and the opportunity to live in the University Honors Living and Learning Community in their first year. In recognition of their exceptional academic achievement, University Honors students receive special graduation accolades.

Eligibility

Eligibility for University Honors programs is as follows:

Chancellor’s Honors: High school seniors with superior academic and extracurricular credentials are invited to apply to the Chancellor’s Honors Program. Current first-year students, as well as qualified transfer students, are also eligible to apply for membership.

Haslam Leadership Scholars: Only high school seniors are eligible to apply to Haslam Leadership Scholars. Highly accomplished students with demonstrated commitment to leadership, service, and civic engagement and who aspire to leverage their leadership to enrich the lives of the people and communities across the state of Tennessee and beyond are strongly encouraged to apply.
Additional Notes: The text below Academic Programs "Display programs for this school/college" and "Display courses for this school/college" will appear automatically through a filter. We have removed it from the Content field.

Learning Outcomes
Using the frameworks of human-centered design-thinking and problem-based learning, the minor prioritizes a collaborative and methodical approach to solving complex problems. The minor is designed to deliver knowledge, cultivate skills/practices, and develop dispositions needed for students to engage effectively as a multidisciplinary community of scholars.

Knowledge

- Understands the nuanced characteristics and components of complex problems—whether at the interpersonal, local, state, national, or global level
- Understands basics of human-centered design and problem-based learning, including models and specific techniques used to define complex problems and yield innovative solutions in service of communities and societies

Skills or Practices

- Able to provide and reflect on constructive, growth-oriented feedback from members of their multidisciplinary student teams
- Able to collaborate effectively with team members to identify and engage stakeholder groups
- Can apply design-thinking techniques appropriate to the characteristics, needs, considerations of, and consequences for stakeholder groups affected by a complex problem
- Can apply project management techniques to deliver solutions within time and resource constraints
- Able to communicate opportunities or solutions—orally, visually, and through writing—to stakeholders
- Demonstrates the ability to reflect on individual learning experiences, contribution to teamwork, and commitment to improvement, as well as the group’s iterative design-thinking process, over the course of a project

Dispositions

- Values of interdisciplinary learning, empathy, collaboration, humility, and patience in identifying and addressing complex problems
- Shows an affinity for iterative process-focused learning, valuing failure as a pathway to growth
- Demonstrates the ability embrace ambiguity and decision making under uncertainty

Degree Type*  Non-Degree
Program Type*  Undergrad (Minor)
Description

Chancellor's Honors Program Minor

The Chancellor's Honors Program Minor is designed to deliver key knowledge, skills, experiences, and dispositions needed for students to engage effectively—as a multidisciplinary community of scholars—with complex problems. Using the framework of human-centered design-thinking and problem-based learning, the minor prioritizes a collaborative and methodical approach to learning and ideation to address contemporary issues.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*

Rationale*

With college and campus partners/faculty, we finalized the signature problem-solving focused curriculum for the Chancellors Honors Program. It is listed as a new program and minor to award the credential for the 18 credit hours of curricular requirements.

New programming and credential was responsive to internal/external reviews to modernize the University Honors program, to further incentize high achieving students to come to the University of Tennessee and complete program requirements and prepared students for departmental or college honors programming.

*this minor will remain inactive for 2024-2025 catalog, and will become active in the 2025-2026 catalog to enable a recruitment cycle advertising the new minor

Financial Impact*

All University Honors tuition revenue - HALS or UNHO course codes - is redistributed to colleges through the Provost's office. No University Honors courses replace any general education or major requirements and the majority of courses in the minor are completed through existing courses in departments and colleges.

We believe the new minor will promote participation in departmental and college honors programs since we front load the interdisciplinary honors curriculum to make space for disciplinary depth later in the students career.
**Impact on Other Units***

Again - we believe the new minor will be a positive as it increases the ability and space for University Honors students to enroll in departmental/college honors programs. We will also explicitly promote those in our new UNHO 101 seminar.

**Learning Outcomes**

Haslam Leadership Scholars is a cohort-based program designed to deliver/instill key knowledge, skills, experiences, and dispositions needed for students to understand, hone, and apply their academic and leadership abilities to effect positive change for communities across Tennessee and beyond. Upon graduation, Haslam Leadership Scholars will be able to:

**Knowledge**

- Define different leadership styles and identify the strengths and weaknesses of each style
- Explain the nuanced characteristics and components of complex contemporary problems affecting the state and people of Tennessee

**Skills**

- Articulate their own style of leadership and understand how and when to adapt their leadership style to different situations/contexts
- Apply leadership, research, and collaborative problem-solving skills to develop sustainable solutions to complex contemporary problems in Tennessee
- Present their solutions—orally, visually, and through writing—to different stakeholder groups in Tennessee, both individually and in collaboration with colleagues
- Reflect continuously on the intersection of their major area of study and leadership studies, and apply those insights to engage in self-improvement as well as projects that support positive change in their communities
- Design and execute a self-directed research project that integrates research in their major with leadership studies and learning experiences in Haslam Leadership Scholars

**Dispositions**

- Recognize and appreciate their ability to address complex problems facing communities and use their leadership to effect positive change

The library is everywhere you are. Research assistance (lib.utk.edu/askusnow) is available by walk-in, e-mail, phone, chat and text, and by appointment with the librarian who specializes in your discipline (lib.utk.edu/librarians). The UT libraries provides access to over 3.7 million titles, including print and electronic books, journals, and media. Even when you are not on campus or at the library, we are available to answer questions and help you find the resources you need. Visit library.utk.edu to chat with a librarian, find books and electronic resources, or watch a video tutorial about using the library.

The John C. Hodges Library in the heart of campus houses the majority of the UT Libraries' collections and many unique services. In the Commons, on the second floor of Hodges Library, students can get help with research, writing, and academic support, as well as access to technology. Students may check out equipment such as laptops and cameras, use group study rooms, attend online classes, create videos or multimedia projects in The Studio, use a Practice Presentation Room, or visit the coffee shop and convenience store. Explore the University Libraries' outstanding spaces at lib.utk.edu/spaces. Visit lib.utk.edu/hours for the hours of library branches. departments, and online support.

Two branch libraries offer specialized collections, spaces, and services: the Webster C. Pendergrass Agriculture and Veterinary Medicine Library on the agriculture campus and the George F. DeVine Music Library in the Natalie L. Haslam Music Center. Other unique collections available to students include Special Collections (manuscripts and rare books) in Hodges Library and online digitized collections of some of the library's unique holdings at digital.lib.utk.edu.

The UT Libraries creates community with its inviting spaces and through hosting events such as the Lunch and Learn series that promotes belonging and engagement. Connect with us on Facebook, Instagram, Twitter, and YouTube (@utklibraries) to learn about library events, services, and resources.

</tr>
</tbody>
</table>

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

**Description**

The University Transition program is housed within the Center for Career Development & Academic Exploration. Students in the program are advised by Academic & Career Exploration (ACE) Coaches who provide integrated academic and career planning support.

The program includes two tracks: 1) University Early Transition for students with less than 60 credit hours and 2) University Advanced Transition for students with 60 or more credit hours.

Students may only enter the University Transition program if they are continuing students who become ineligible for their declared major. The University Transition program is not available for transfer nor readmitted students.

Students must declare a major after one full semester in the University Transition program.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

---

### Requirements

| Rationale* | These edits are being proposed to offer the transition program, which includes integrated advising and career services, only for first time in college students who become ineligible for their current majors. Changes are based on data that show transfer students who enter the transition program are retained at lower rates than transfer students admitted into majors. In Fall 2022, 69% of transfer students in university early transition remained enrolled after two semesters compared to 83% of non-transition transfer students. |

| Financial Impact* | Students previously admitted into the transition program will now be housed in academic colleges who will receive funding based on enrollment. |

| Impact on Other Units* | Colleges may expect a small boost in enrollment as transfer students previously admitted into the transition program may now be admitted into colleges. For reference in Fall 2023, 115 transfer students were admitted into the transition program. |

### Have you consulted with all programs/departments that will be impacted by this change?*

- Yes
- No

---

### ADMINISTRATIVE USE ONLY

| Impact Level | Low
- Mid
- High |

Directions to Propose Content Changes:

1. Copy and Paste the current content from the Catalog as it appears online into the field below. Do NOT make any edits to the text until step 4.

2. Click on Save (this will ensure that original content is saved).

3. After you have completed all required fields, Validate and Launch your proposal.

4. Apply and format the changes directly to the text. Be sure to format the content exactly as it will appear online.

5. After you have completed all edits to the text, be sure to approve your proposal in the decisions tab on the right.

Requested Content Changes for Catalog

The economics major provides an opportunity to apply the theoretical and analytical rigor of economic tools to social sciences. Students choose from a traditional option (27 hours in economics), or a concentration in Business Economics, Econometrics and Data Analysis or Economic Policy. The elective coursework covers topics including applied statistics, banking, environment, international, health, labor, quantitative economics, among others. The major coursework covers game theory, macroeconomic topics like the determinants of unemployment and inflation. Majors pursue careers in the traditional business disciplines, consulting, all levels of government service and policy advocacy, and a variety of other fields. The program provides excellent training for graduate work in economics, business, public policy, and law.

Courses offered in the Department of Economics, housed in the Haslam College of Business, provide an opportunity for a major or minor in economics in the College of Arts and Sciences.

In addition, certification to teach economics in secondary schools is available. Students with such interest should consult the College of Education, Health, and Human Sciences as early in their program as possible to determine the appropriate requirements.

Rationale* This course serves a need across the university: to allow students to learn basic communication and cultural skills in a new language. Some courses might be offered online and, possibly, in evenings and marketed to other colleges. They will focus on communicative skills and basic cultural knowledge.

Impact on Other Units* none

Financial Impact* This class will be developed and taught by current NTTF in WLC.

Arts and Sciences Only

Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal? 🌟 Arts and Humanities  □ Natural Sciences  □ Social Sciences

Z. Informational Item - Process to Handle Corrections to meet Urgent SACSCOC and Vol Core Requirements

Other Form

General Catalog Information

Hierarchy Owner* University of Tennessee, Knoxville

Important Note about this Form:

Please contact the CCM team (curriculum_help@utk.edu) before submitting this form so that an administrator can determine if there is a more suitable form for the proposal.

This form is for items that need to appear in an upcoming agenda but are not handled by any other form. Informational items (e.g., reactivating an archived course) can be handled through this form. For Committee Reports, please use the "Committee Reports" form.

Name of Proposal* Z. Informational Item - Process to Handle Corrections to meet Urgent SACSCOC and Vol Core Requirements

Level* Undergraduate (UG)  Graduate (GR)

Click here to add UG university workflow for curricular changes.* Yes  No

Click here to add GR university workflow for curricular changes.* Yes  No

Does this submission require approval by the Council?* Yes  No (informational only)

Which committee(s) must make a decision or be informed about this submission?
Minimum program hours for a baccalaureate degree

SACSCOC requires a minimum of 120 semester hours for a baccalaureate degree and, if we discover a program with fewer hours, we (1) inform the college, (2) correct the catalog using the solution the department/college suggests which may be a free elective or a required course that was inadvertently left out or a new course to replace a dropped course or whatever else the department/college thinks is appropriate, and (3) document this correction at the next meeting of the UG Curriculum Committee.

Minimum Vol Core hours

Vol Core has specific requirements. If those requirements are not met in a program, we (1) inform the college, (2) correct the catalog using the solution the department/college suggests which may be changing a free elective to be a Vol Core course, or if course ABC 123 has been submitted to Vol Core but the committee has not yet made a decision about the course, then the correction might indicate to take “ABC 123 or a Vol Core elective” or “free elective or Vol Core elective” or other appropriate solution and (3) document this correction at the next meeting of the UG Curriculum Committee.

Rationale

This is to raise awareness of the processes that our offices have been following when immediate urgent corrections have been required in the active catalog. This does not apply to anything other than urgent corrections noted above. These typically show as low-impact corrections in the last meetings of the spring or the early meetings of the fall. For an example of how this looked in the past, see the attachment that was taken from TRACE minutes of UG Council minutes of meeting April 12, 2022
https://trace.tennessee.edu/cgi/viewcontent.cgi?article=1124&context=utk_undergradcouncil.

Africana Studies is a multicultural, interdisciplinary, and transnational paradigm that anchors its scholarship on a local, regional, national, and global scale. It conceives of the Africana world as extending from Africa to North America, the Caribbean, South and Central America, Asia, and Europe. This provides students with a comprehensive education and critical knowledge, understanding, and appreciation of the Africana experience in its multiple dimensions.
