Rationale* Science and Technology Studies is an interdisciplinary field of inquiry that helps prepare students for jobs in science and health policy/law/government/nonprofit work, as well as supplementary training to inform careers in basic and applied STEM fields. STS is a growing field nationally and internationally as advances in technology and science, as well as global crises in health and climate, require serious inquiry into their ethical and social consequences. Currently, no organized curriculum in STS is offered at UT despite the campus’s unique position adjacent to one of the world’s largest and most historically laboratories (ORNL) and faculty across units in the College of Arts and Sciences who study the social and cultural dimensions of science, technology, health and medicine. This course will serve as the introductory course for the new proposed minor in Science, Technology, Health and Society (STHS). The course will be taught from a fundamentally interdisciplinary perspective while orienting students to the history and methods of STS. The course will survey classic and contemporary issues in the field and help prepare students for advanced study in STS across relevant disciplines, including anthropology, sociology, history, and philosophy, and other interdisciplines (e.g., women, gender, and sexuality studies, global studies, etc.). Topics include environmental justice, AI and the future of work, technology and social inequalities, and science and social movement activism.

Impact on Other Units* N/A, because there is not an equivalent course on campus.

Financial Impact* This course will be taught by core faculty in the new Interdisciplinary Program in Science, Technology, Health, and Society (STHS).

Arts and Sciences Only

Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal?
- [ ] Arts and Humanities

Equivalency

Rationale* This is not a techniques course. This course examines Science, Technology and Society through the lens of data. It delves into the power dynamics, ethical considerations, and the societal changes driven by the datafication of everyday life, preparing students to navigate and influence the evolving landscape of digital citizenship responsibly.

(NB: A.B. launching this on behalf of Nicholas Nagle, Geography)
Impact on Other Units*
There are no equivalent classes across campus. The closest course: DATA 301 Data Stewardship and Ethics covers many topics such as data storage, management, warehousing, metadata, and governance that are not covered by this course. While STHS 350 is related to ethics, it will cover these topics with a critical social science lens that is not part of DATA 301.

Financial Impact*
Negligible. This course is not a required course in any program. is a course that instructors and graduate students from multiple departments will be able to teach.

Student Information
System ID
Cinema Studies Major, BA

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Dr. Maria Stehle, Modern Foreign Languages and Literature, Co-chair
Dr. Paul Harrill, School of Art, Co-chair

The Cinema Studies major includes both Cinema History/Theory/Aesthetics courses and Production courses in film and/or video. Students may choose a greater emphasis in cinema history and aesthetics or in moving image production, although all majors will take courses in both areas.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI
### Requirements*

#### Rationale*
Cinema Studies is a growing program that seeks to be interdisciplinary and inclusive of new developments in production, history, theory, and aesthetics. These added courses are meant to advance that goal.

### Financial Impact*
N/A

### Impact on Other Units*
We are listing a course from Classics (CLAS 256) and a course from Asian Studies (ASST 301) as part of the Cinema Studies program. Both programs have been consulted.

### Have you consulted with all programs/departments that will be impacted by this change?*
- [ ] Yes
- [ ] No

## ADMINISTRATIVE USE ONLY

**General Instructions for Description**

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Continuing, returning, and transfer students must meet progression requirements before declaring a major in studio art.

To qualify for a BFA with a major in studio art, students must meet the progression requirements in their concentration. Contact specific program area faculty for review of schedules and details. It should not be assumed that a high grade point average in the concentration itself assures fulfilling progression requirement. Before choosing a concentration, students should contact their faculty advisor to see what options are offered in the event they do not fulfill progression requirements.

Students seeking the Bachelor of Fine Arts should also consider pursuing a minor in art history.

Transfer students are advised that a minimum of 20 hours in studio courses must be earned at the University of Tennessee, Knoxville. Students should be cautioned that art courses taken at another institution may not apply toward their concentration. ARTA 212* and ARTA 214 must be taken at the University of Tennessee, Knoxville, if they are to count toward the concentration. Courses not accepted for application toward a concentration may be counted toward other requirements.

No grade below C in art courses may be applied to the Bachelor of Fine Arts major. A minimum of 42 credit hours, 300-level or above, must be earned prior to graduation.

Excessive absences, withdrawals, incompletes, or repeated courses may result in denial of progression. Progression into the School of Art does not guarantee progression into a chosen concentration. Students may be accepted into advanced concentrations in two-dimensional, three-dimensional, and time-based arts after passing the appropriate progression requirements.

Art Education

The School of Art recommends the Bachelor of Fine Arts for those students pursuing licensure to teach art in schools K-12. Students must also contact the College of Education, Health, and Human Sciences for further requirements.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
**Rationale**
This is to correct an oversight. ARTB 446 has been offered and should be in the curriculum showcase.

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA.

uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

### Requirements*

#### Rationale*
This new schema provides more courses for time-based students, so they can graduate in a timely manner. This is a resubmission because we had to remove inactive courses from the core (ARTB 424 and ARTC 235). ARTB 424 and ARTC 235 have now been removed from the BFA core (in a previous proposal, per Registrar's request).

## General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

**Description**  
*Paul K. Gellert, Sociology*

The Global Studies major focuses on understanding connections between different parts of the world. The Global Politics and Economy concentration has a social sciences orientation and requires more coursework in the social sciences than the humanities. Globalization, or the trans-national exchange of investments, commodities, people, politics, technologies, and cultures, is both a characteristic of the contemporary world and the culmination of large-scale, long-term social change. Although globalization, at times, seems dominated by new economic and political formations more powerful than the traditional nation-state, it has also mobilized new expressions of local and transnational discontent and resistance.

The University of Tennessee, Knoxville, global studies curriculum helps students understand the implications of global change, allowing the university community to confront what is occurring in our immediate locale by examining what is going on elsewhere. Bringing together faculty and students from diverse perspectives creates an interdisciplinary understanding of the disruption and integration resulting from changing configurations of nations, global processes, and identities.

Program Type* Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description  Paul K. Gellert, Sociology

The Global Studies major focuses on understanding connections between different parts of the world. The Society and Culture concentration has a humanist orientation and requires more coursework in the humanities than the social sciences. Globalization, or the trans-national exchange of investments, commodities, people, politics, technologies, and cultures, is both a characteristic of the contemporary world and the culmination of large-scale, long-term social change. Although globalization, at times, seems dominated by new economic and political formations more powerful than the traditional nation-state, it has also mobilized new expressions of local and transnational discontent and resistance.

The University of Tennessee, Knoxville, global studies curriculum helps students understand the implications of global change, allowing the university community to confront what is occurring in our immediate locale by examining what is going on elsewhere. Bringing together faculty and students from diverse perspectives creates an interdisciplinary understanding of the disruption and integration resulting from changing configurations of nations, global processes, and identities.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

---

**Requirements***

**Rationale***
Global Studies relies on courses in various departments. The Global Studies Director requested that departments send new courses for inclusion, as well as deletions. The Global Studies Steering Committee examined course descriptions and syllabi and approved the following **changes to our course lists**. We also cleaned up previous changes to ensure that lists of types of courses (Politics & Economics; Society & Culture) are the same across concentrations.

**Financial Impact***
None

**Impact on Other Units***
Possible increase in enrollment because included on Global Studies course list. These units requested their courses be listed with GLBS.

**Have you consulted with all programs/departments that will be impacted by this change?***

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
The Department of Sociology at the University of Tennessee offers a Five-Year BA-MA program for highly motivated and academically outstanding students who are passionate about understanding and analyzing human societies. This program offers students the opportunity to earn both a Bachelor of Arts (BA) degree and a Master of Arts (MA) degree in Sociology within a five-year timeframe. The program is designed to provide students with the knowledge, skills, and advanced research experience required for a successful career in sociological research, social services, advocacy, and more.

The core component of the program is that qualified students can apply up to 9 credit hours of graduate courses toward both their undergraduate and graduate degrees. This not only accelerates their academic journey but also enhances their research and analytical capabilities.

**Program Components**

**Eligibility and Admission**

Students must have a declared major in Sociology with a specialization in Criminology and Criminal Justice.

Students must have an overall GPA of 3.4 in required coursework for admission to the program.

Conditional admission may be granted after the completion of 60 hours of coursework fulfilling requirements for the BA in Sociology, including a minimum of 15 credit hours in core Sociology courses.

Full admission to the program may be granted after the completion of 90 hours of required coursework for the BA in Sociology with a minimum GPA of 3.4, including at least 24 hours of core Sociology courses.

**Admission Process**

The admission process begins with application to the Sociology Undergraduate Program Director.

The admission decision will be based on coursework, letters of recommendation, and a personal interview with members of the Undergraduate and Graduate Committees in the Department of Sociology to determine the level of maturity and academic achievement.

Upon approval from the Undergraduate Program Director, students can submit an official application to the Graduate School.

**Coursework**

Students, once conditionally admitted to the program, may take up to 9 credit hours of approved graduate-level Sociology courses that count towards both their BA and MA degrees.

All courses taken for graduate credit must be approved by the student’s academic advisor and the Sociology Director of Graduate Studies.
Students must also request permission from the Graduate School to take approved courses for graduate credit and follow the regular admission process for the Sociology graduate program.

Assistantships

Students will be eligible for assistantship opportunities after they are formally enrolled as graduate-level students in the Sociology Graduate Program.

Thesis

Students in the Five-Year BA-MA program will complete a practicum and thesis as part of their Master of Arts requirements. This option allows for an in-depth exploration of the application of Criminology and Sociology to the wider community.

Faculty Mentorship

Students are required to obtain a commitment from a faculty member in the Sociology Department to serve as their major professor for the MA portion of the program. The major professor will act as a mentor and advisor.

Academic Advising

Students in the Five-Year BA-MA program will receive specialized academic advising to ensure a smooth transition between their undergraduate and graduate studies.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
Rationale*
The Five-Year BA-MA program in Sociology at the University of Tennessee is designed to provide an enriching and accelerated educational experience for exceptional students. We believe this program will empower students to excel in their Sociology studies, preparing them for diverse career paths in academia, writing, publishing, and beyond.

This accelerated program allows students to save time and money by earning both a BA and an MA in Sociology within five years. Students will have access to a wide range of advanced courses and research opportunities. The program prepares students for a competitive job market and future academic pursuits. Successful completion of the program enhances students’ critical thinking, research, and writing skills. We look forward to welcoming dedicated students into this program and helping them achieve their academic and professional goals in the field of Sociology.

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

- **Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSM
- **Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

**Requirements**
Rationale* The Five-Year BA-MA program in Sociology at the University of Tennessee is designed to provide an enriching and accelerated educational experience for exceptional students. We believe this program will empower students to excel in their Sociology studies, preparing them for diverse career paths in academia, writing, publishing, and beyond.

This accelerated program allows students to save time and money by earning both a BA and an MA in Sociology within five years. Students will have access to a wide range of advanced courses and research opportunities. The program prepares students for a competitive job market and future academic pursuits. Successful completion of the program enhances students' critical thinking, research, and writing skills. We look forward to welcoming dedicated students into this program and helping them achieve their academic and professional goals in the field of Sociology.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
The Department of Sociology at the University of Tennessee offers a Five-Year BA-MA program for highly motivated and academically outstanding students who are passionate about understanding and analyzing human societies. This program offers students the opportunity to earn both a Bachelor of Arts (BA) degree and a Master of Arts (MA) degree in Sociology within a five-year timeframe. The program is designed to provide students with the knowledge, skills, and advanced research experience required for a successful career in sociological research, social services, advocacy, and more.

The core component of the program is that qualified students can apply up to 9 credit hours of graduate courses toward both their undergraduate and graduate degrees. This not only accelerates their academic journey but also enhances their research and analytical capabilities.

Program Components

Eligibility and Admission

Students must have a declared major in Sociology with a specialization in Environmental Sociology.

Students must have an overall GPA of 3.4 in required coursework for admission to the program.

Conditional admission may be granted after the completion of 60 hours of coursework fulfilling requirements for the BA in Sociology, including a minimum of 15 credit hours in core Sociology courses.

Full admission to the program may be granted after the completion of 90 hours of required coursework for the BA in Sociology with a minimum GPA of 3.4, including at least 24 hours of core Sociology courses.

Admission Process

The admission process begins with application to the Sociology Undergraduate Program Director.

The admission decision will be based on coursework, letters of recommendation, and a personal interview with members of the Undergraduate and Graduate Committees in the Department of Sociology to determine the level of maturity and academic achievement.

Upon approval from the Undergraduate Program Director, students can submit an official application to the Graduate School.

Coursework

Students, once conditionally admitted to the program, may take up to 9 credit hours of approved graduate-level Sociology courses that count towards both their BA and MA degrees.

All courses taken for graduate credit must be approved by the student's academic advisor and the Sociology Director of Graduate Studies.
Students must also request permission from the Graduate School to take approved courses for graduate credit and follow the regular admission process for the Sociology graduate program.

Assistantships

Students will be eligible for assistantship opportunities after they are formally enrolled as graduate-level students in the Sociology Graduate Program.

Thesis

Students in the Five-Year BA-MA program will complete a practicum and thesis as part of their Master of Arts requirements. This option allows for an in-depth exploration of the application of environmental issues within Sociology.

Faculty Mentorship

Students are required to obtain a commitment from a faculty member in the Sociology Department to serve as their major professor for the MA portion of the program. The major professor will act as a mentor and advisor.

Academic Advising

Students in the Five-Year BA-MA program will receive specialized academic advising to ensure a smooth transition between their undergraduate and graduate studies.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

The admission process begins with application to the Sociology Undergraduate Program Director.

The admission decision will be based on coursework, letters of recommendation, and a personal interview with members of the Undergraduate and Graduate Committees in the Department of Sociology to determine the level of maturity and academic achievement.

Upon approval from the Undergraduate Program Director, students can submit an official application to the Graduate School.

**Coursework**

Students, once conditionally admitted to the program, may take up to 9 credit hours of approved graduate-level Sociology courses that count towards both their BA and MA degrees.

All courses taken for graduate credit must be approved by the student’s academic advisor and the Sociology Director of Graduate Studies.
Students must also request permission from the Graduate School to take approved courses for graduate credit and follow the regular admission process for the Sociology graduate program.

Assistantships

Students will be eligible for assistantship opportunities after they are formally enrolled as graduate-level students in the Sociology Graduate Program.

Thesis

Students in the Five-Year BA-MA program will complete a practicum and thesis as part of their Master of Arts requirements. This option allows for an in-depth exploration of the application of critical race and ethnic studies within Sociology.

Faculty Mentorship

Students are required to obtain a commitment from a faculty member in the Sociology Department to serve as their major professor for the MA portion of the program. The major professor will act as a mentor and advisor.

Academic Advising

Students in the Five-Year BA-MA program will receive specialized academic advising to ensure a smooth transition between their undergraduate and graduate studies.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSA

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*
Rationale*
The Five-Year BA-MA program in Sociology at the University of Tennessee is designed to provide an enriching and accelerated educational experience for exceptional students. We believe this program will empower students to excel in their Sociology studies, preparing them for diverse career paths in academia, writing, publishing, and beyond.

This accelerated program allows students to save time and money by earning both a BA and an MA in Sociology within five years. Students will have access to a wide range of advanced courses and research opportunities. The program prepares students for a competitive job market and future academic pursuits. Successful completion of the program enhances students' critical thinking, research, and writing skills. We look forward to welcoming dedicated students into this program and helping them achieve their academic and professional goals in the field of Sociology.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
The Department of Sociology at the University of Tennessee offers a Five-Year BA-MA program for highly motivated and academically outstanding students who are passionate about understanding and analyzing human societies. This program offers students the opportunity to earn both a Bachelor of Arts (BA) degree and a Master of Arts (MA) degree in Sociology within a five-year timeframe. The program is designed to provide students with the knowledge, skills, and advanced research experience required for a successful career in sociological research, social services, advocacy, and more.

The core component of the program is that qualified students can apply up to 9 credit hours of graduate courses toward both their undergraduate and graduate degrees. This not only accelerates their academic journey but also enhances their research and analytical capabilities.

Program Components

Eligibility and Admission

Students must have a declared major in Sociology with a specialization in Honors Environmental Sociology.

Students must have an overall GPA of 3.4 in required coursework for admission to the program.

Conditional admission may be granted after the completion of 60 hours of coursework fulfilling requirements for the BA in Sociology, including a minimum of 15 credit hours in core Sociology courses.

Full admission to the program may be granted after the completion of 90 hours of required coursework for the BA in Sociology with a minimum GPA of 3.4, including at least 24 hours of core Sociology courses.

Admission Process

The admission process begins with application to the Sociology Undergraduate Program Director.

The admission decision will be based on coursework, letters of recommendation, and a personal interview with members of the Undergraduate and Graduate Committees in the Department of Sociology to determine the level of maturity and academic achievement.

Upon approval from the Undergraduate Program Director, students can submit an official application to the Graduate School.

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

**Description**

The Sociology major consists of 31 hours. Ideally, students will take SOCI 321 and SOCI 331* no later than their junior year. SOCI 480 will be taken in the senior year. Students may declare a concentration in either Criminology and Criminal Justice, Environmental Issues, or Critical Race and Ethnic Studies, and in Honors.

### General Instructions for Requirements

### Rationale*

Students require familiarity with a range of dramatic literature and analytical skills in the study of plays earlier than we have done in the past. Along with 210/220/230, a Play Analysis class at the 200 level can serve as an introductory course to the major and minor. This will replace Theatre 100 (Theatre appreciation) as a prerequisite to the major and minor.

### Impact on Other Units*

N/A
Financial Impact*  N/A - internally covered course.

**Arts and Sciences Only**

Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal?
- [ ] Arts and Humanities
- [ ] Natural Sciences
- [ ] Social Sciences

Select the checkbox if this course should be considered a Writing Emphasis course.
- [ ] Writing-emphasis course.

Should this course be considered for Connections?
- [ ] Yes
- [ ] No
If yes, which Connections category?

- Ancient Mediterranean Studies

Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal?
- Arts and Humanities
- Natural Sciences
- Social Sciences

Select the checkbox if this course should be considered a Writing Emphasis course.
- Writing-emphasis course.

Should this course be considered for Connections?
- Yes
- No

If yes, which Connections category?
- Ancient Mediterranean Studies
- Biodiversity and Humans
- Cultural and Artistic Achievement: Arts in the United States
- Cultures and Societies
- Emerging Asia
- Environment and Society
- Geographic Information Science for Our Changing World
- Global Social Justice
- Health and Biophysics
- Health Care Perspectives
- How to Live in the Premodern World
- Humans Living on a Dynamic Earth
- Inequalities: Race, Ethnicity, Class, and Gender
- Mobility and Migration
- New Geographies of the Global Economy
- Our World: Contemporary Arts and Culture
- Rise and Decline of Premodern Complex Societies
- Shifting Borders and Cultures in Europe
- Understanding Climate Change
- Visual Cultures and Media Studies

## Course Description

An interdisciplinary introduction to key concepts and methods in lesbian, gay, bisexual, and transgender studies, including scholarship on asexuality, intersexuality, and 2SQ (Two-Spirit/Queer) sexualities. Students will examine the history of sexuality studies, including connections between colonialism and the gender binary; the role of science in the social construction of sexuality and gender categories; and the relationship among sexuality, gender embodiment and expression, and intersecting forms of structural violence such as racism, capitalism, and ableism. Emphasis will vary according to the interdisciplinary expertise of the instructor.
Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Statement about Crosslistings:

If course is to be crosslisted, then use the “Crosslistings” tab on menu to the right to bring in all applicable secondary courses. You must start a crosslisting with the primary course, and both courses must be new for crosslisting. If one of the courses (primary or secondary) already exists, you must complete an add course form for the new course and add the crosslisting after full approval of the new course.

| Prerequisite(s):          |                     |
Rationale*  WGS is introducing a new Minor in LGBTQ+ Studies, and this will be a required course. WGS students and CAS students more generally will benefit from the opportunity to learn from critical texts written primarily by LGBTQ+ scholars that deconstruct the many sets of assumptions that are placed on those with non-normative sexualities. This course is especially necessary given the current political attacks on the LGBTQ+ community in our state and in the US at large.

Impact on Other Units*  None

Financial Impact*  None. This course will be taught by the WGS Associate Director.

Arts and Sciences Only

### Course Description

- Will this course be crosslisted? Yes
- If yes, what is the crosslisting relationship for this course? Primary
- List all courses in this crosslisting relationship and note whether primary or secondary: AFST 375 (primary) HIUS 376 (secondary) WGS 376 (secondary)

### Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

**Satisfies Volunteer Core Requirement:**
Rationale*: Course will become an offering with the Department of Africana Studies as a primary (and not secondary) course.

Impact on Other Units*: The course can be used to support the curriculum of the Department of Africana Studies, whereas the support had been primary with the Department of History. WGS 376 will remain a secondary designation.

Financial Impact*: Course funds will route primarily to the Department of Africana Studies.
Have you consulted with all programs/departments that will be impacted by this change?*

- Yes
- No
- Minor changes only/Not Applicable

**Arts and Sciences Only**

Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal?

- Arts and Humanities
- Natural Sciences
- Social Sciences

Select the checkbox if this course should be considered a Writing Emphasis course.

- Writing-emphasis course.

Should this course be considered for Connections?

- Yes
- No
If yes, which Connections category?

- Ancient Mediterranean Studies
- Biodiversity and Humans
- Cultural and Artistic Achievement: Arts in the United States
- Cultures and Societies
- Emerging Asia
- Environment and Society
- Geographic Information Science for Our Changing World
- Global Social Justice
- Health and Biophysics
- Health Care Perspectives
- How to Live in the Premodern World
- Humans Living on a Dynamic Earth
- Inequalities: Race, Ethnicity, Class, and Gender
- Mobility and Migration
- New Geographies of the Global Economy
- Our World: Contemporary Arts and Culture
- Rise and Decline of Premodern Complex Societies
- Shifting Borders and Cultures in Europe
- Understanding Climate Change
- Visual Cultures and Media Studies

**Course Description**

Read interdisciplinary texts exploring relationships among gender, patriarchy, colonialism, racism, and environmental degradation. Intersectional feminist analyses of contemporary environmental justice issues and environmental philosophies from Indigenous, WoC, queer, and disabled feminist perspectives.
Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Statement about Crosslistings:

If course is to be crosslisted, then use the “Crosslistings” tab on menu to the right to bring in all applicable secondary courses. You must start a crosslisting with the primary course, and both courses must be new for crosslisting. If one of the courses (primary or secondary) already exists, you must complete an add course form for the new course and add the crosslisting after full approval of the new course.

</table>
Our current climate moment mandates an expansive focus on alternative ways of relating to the environment, which feminist environmental philosophies can offer. Indigenous, queer, and disabled feminisms, as well as women of color feminisms offer a wide range of sustainable practices, orientations, and epistemologies that many can benefit from. WGS is also in need of more feminist philosophy classes, as WGS 382 fills every time it is offered and often sparks further interest in feminist philosophies among students. Further, WGS would like to eventually offer an online major, which this class will be a part of.

None. Course will be taught by various qualified NTT faculty, either as an overload or as part of a regular course load.

College of Arts and Sciences - WLC - 394
2024-2025 UG Revise Course

General Catalog Information

College* College of Arts and Sciences

Department (Acalog Hierarchy)* World Languages and Cultures

Subject/Prefix (choose from list)* WLC

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 394

Course Title (max 100 characters)* Experiential Learning in Foreign Language Classroom

Variable Title? Yes

Credit Hours* 1

Course Description
Course enhances academic learning with the added practicum experience in a language classroom in the first or second year language courses. Students are placed in lower level foreign language courses as peer mentors in order to apply previously studied content and skills while simultaneously engaged in reflection on practices in foreign language learning. Students are required to attend 1 hour of class per week in addition to a practicum in a language course.

Will this course be crosslisted? Yes

If yes, what is the crosslisting relationship for this course? Primary

List all courses in this crosslisting relationship and note whether primary or secondary

### Course Description
This course introduces students to research methods used in applied linguistics. The course enhances academic learning with project-based learning and the added practicum experience in a language classroom in the first or second-year language courses. Students are placed in lower-level foreign language courses as peer mentors to apply previously studied content and skills. Simultaneously, students are engaged in a research project related to their practicum experience, reflection on practices in foreign language learning and language pedagogy.

College of Arts and Sciences - World Languages and Cultures - Arab Studies Minor

2024-2025 UG Revise Program

General Catalog Information

College* College of Arts and Sciences

Department* World Languages and Cultures

Program Name* Arab Studies Minor

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The minor consists of 18 hours of coursework in Arabic and Middle-East related courses. At least 12 hours should be at the 300 or 400 level.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
Minor Requirements:

The minor consists of **18 hours** of coursework in Arabic and Middle-East related courses.

Complete:

ARAB 331 Culture and Daily Life in the Arab World  
[Right] *
ARAB 332 Contemporary Issues and Current Events in the Arab World  
[Right] *

Select 6 hours:

ARAB 200 Everything you Wanted to Know about the Arab World  
ARAB 215 Human Rights in the Middle East  
[Right] *
ARAB 251 Whole New Worlds: Fantasy, Sci-Fi, and Dystopia in the Middle East  
[AFTER] Any 300 or 400 level Arabic courses  
[Right] *

Select 6 hours:

ARAB 200 Everything you Wanted to Know about the Arab World  
ARAB 215 Human Rights in the Middle East  
[Right] *
ARAB 251 Whole New Worlds: Fantasy, Sci-Fi, and Dystopia in the Middle East  
[AFTER] Any 300 or 400 level Arabic courses
Rationale*  This change allows two new courses, ARAB 200 and ARAB 215, to be used as options for the Arab Studies minor.

Financial Impact*  None.

Impact on Other Units*  None.

Have you consulted with all programs/departments that will be impacted by this change?*  Yes  No

Rationale* This was a procedural error. Last curricular cycle for AY 2023-2024, the College reviewed and approved the transfer of Asian Studies from the Department of Interdisciplinary Programs to the Department of World Languages and Cultures. Paperwork was completed for the majors but not for the minor. This proposal completes the proposed changes from AY 2023-2024.

Financial Impact* None

Impact on Other Units* The Department of Interdisciplinary Programs approved this move.

Have you consulted with all programs/departments that will be impacted by this change?* Yes ☐ No ☑

</tbody>
</table>

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
Requirements*

**Minor Requirements**

The minor consists of 17 hours.

**Prerequisites**

CHIN 231 Intermediate Chinese I  
CHIN 232 Intermediate Chinese II  
[Right] * (or equivalents)

**Required Courses**

**Complete:**

CHIN 331 Advanced Chinese I  
[Right] *  
CHIN 332 Advanced Chinese II  
[Right] *

**Select 3 hours**

CHIN 401 Contemporary Chinese Studies I  
CHIN 402 Contemporary Chinese Studies II  
CHIN 431 Chinese Literature and Culture  
CHIN 432 Advanced Reading and Composition

**Select 6 hours:**

ARTH 413 Art of China: Neolithic Period Through the Song Dynasty  
ARTH 416 Chinese Art of the 20th and 21st Centuries
Rationale*

1. CHIN 300 had been approved to be added to the Chinese minor requirement starting in 2022 fall, but it is not listed in the curriculum scheme. It has been added now.

2. Changing the “Select 9 hours” to “Select 3 hours” (from CHIN 401, CHIN 402, CHIN 431, CHIN 432) + “Select 6 hours” (from the original Select 9 hours list). This change ensures that Chinese minor students take at least one 4th-year Chinese language class to complete their minor.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The minor consists of 18 hours of coursework in Hebrew and Middle-East related courses.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
Requirements*

Complete:

HEBR 241 Intermediate Modern Hebrew I
HEBR 242 Intermediate Modern Hebrew II
HEBR 341 Advanced Modern Hebrew I
HEBR 342 Advanced Modern Hebrew II

Select 6 hours:

HEBR 200 Israeli Culture through Media
HEBR 215 Food Cultures of Israel
HEBR 315 Introduction to Israeli Culture and Society
HEBR 320 Linguistic Landscapes of Israel
HEBR 321 The Israeli-Palestinian Conflict in Literature, Film, and Popular Culture
HEBR 351 Languages of the Middle East and North Africa
HIME 382 Archaeology of Ancient Israel
REST 221 Intermediate Biblical Hebrew I
REST 222 Intermediate Biblical Hebrew II
REST 311 Hebrew Bible/Old Testament
REST 312 Early Judaism
REST 405 Modern Jewish Studies
REST 413 Seminar in Early Judaism

*Meets Volunteer Core Requirements.

Rationale* The Hebrew minor will build on the recent addition of advanced Hebrew courses to allow students to complete a concentration that focuses on the language and culture of modern Israel.

Financial Impact* None.

Description
Minors who study a semester or more abroad must take **SPAN 312** prior to studying abroad and at least two additional 300/400-level courses in Spanish at the University of Tennessee (prior to or after studying abroad). Students whose level of proficiency in Spanish is superior as defined by the ACTFL Proficiency Guidelines may substitute a 400-level course for **SPAN 312** with consent of the department. **SPAN 311** and **SPAN 312** are not available to native Spanish speakers or Spanish/English bilinguals, who should instead take **SPAN 309** and an additional 300/400-level course with consent of the department. Notes: **SPAN 401**, **SPAN 402**, and **SPAN 465** do not count toward the minor. **SPAN 311** may not be taken after completion of **SPAN 312**.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
Requirements*

**Minor Requirements**

The minor consists of **18 hours** in courses numbered above 300.

---

**Complete the Following Courses:**

- SPAN 312 Language in Context II
- [Right] *
- SPAN 330 Textual Analysis
- SPAN 331 Introduction to Hispanic Culture

**Select 9 credit hours of SPAN courses numbered above 300**

At least 3 of these 9 credit hours must be at the 400-level. SPAN 311 * cannot be taken after SPAN 312 * or SPAN 309 *.

* Meets Volunteer Core Requirement.

---

**Rationale**

The change will allow to add or drop courses to the minor without the need to submit a curriculum change form. Also, it will make it easier to transfer study abroad credit hours.

**Financial Impact**

none.

**Impact on Other Units**

none

---

**Have you consulted with all programs/departments that will be impacted by this change?**

☐ Yes ☐ No

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
Requirements*

A. International Business – 25 hours

ACCT 200 Foundations of Accounting
ECON 201 Introductory Economics: A Survey Course
[After]
[Right] *
ECON 322 The Global Economy: Trade and Development
[Right] or
IB 409 International Business
[After]
FINC 300 Fundamentals of Finance
MARK 300 Marketing and Supply Chain Management
MGT 201 Introduction to Business Management for Non-Majors
MGT 472 Managing People in the Global Environment
STAT 201 Introduction to Statistics
[Right] *

B. International Retail Merchandising – 24 hours

ACCT 200 Foundations of Accounting
MARK 300 Marketing and Supply Chain Management
MGT 201 Introduction to Business Management for Non-Majors
RMM 210 Introduction to Retail Management
RMM 310 Retail Buying and Merchandising
RMM 341 Consumers in the Global Marketplace
[Right] *
RMM 421 Global Retailing and Sourcing
[Right] *
[After] and 3 additional hours from:
RMM 320 Product Development
RMM 410 Strategic Retail Planning
RMM 411 Entrepreneurship and Small Business Management
RMM 412 Digital Retailing
RMM 493 Directed Study
C. International Agricultural Economics – 25 hours

ACCT 200 Foundations of Accounting
[After]
AREC 201 Economics of the Global Food and Fiber System
[Right] * or
ECON 201 Introductory Economics: A Survey Course
[After]
[Right] *
AREC 212 Introduction to Agribusiness Management
AREC 342 Farm Business Management
[Right] *
AREC 350 The Food and Agricultural Marketing System
[Right] *
AREC 420 International Agricultural Trade and Marketing
ECON 311 Intermediate Microeconomics
STAT 201 Introduction to Statistics
[After]
[After] * Meets Volunteer Core Requirements.
[Right] *

Rationale* We are adding RMM 320 to the electives of "Professional Emphasis" Part B. RMM 320 (Product Development, 3 credits) is an acceptable elective class if an LWB student is interested in learning about the design and manufacturing process involved in bringing retail products to the market. This course has global implications as well because of all of the sourcing of various product components from different countries.

Financial Impact* None.

Impact on Other Units* None.

Have you consulted with all programs/departments that will be impacted by this change?* ☐ Yes ☐ No

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
Minor Requirements

The Italian minor consists of 18 hours.

Complete:

ITAL 211 Intermediate Italian
ITAL 212 Intermediate Italian

Select 12 hours:

ITAL 314 Highlights of Italian Civilization, Culture, and Identity
ITAL 315 Special topics in Italian History, Literature, and Culture
ITAL 341 Intermediate Grammar, Composition and Conversation
ITAL 342 Intermediate Grammar, Composition and Conversation
ITAL 400 The Italian Renaissance through Popular Culture
ITAL 401 Dante and Medieval Culture
ITAL 405 Topics in Italian Culture, History, and Literature
ITAL 406 Italian History through Art
ITAL 409 Directed Readings
ITAL 410 Gender and Sexuality in Italian Literature, Media, and Culture
ITAL 412 Advanced Literary Reading and Conversation
ITAL 413 A journey through Italian novels, poems, and short stories from the Middle Ages to the Present
ITAL 414 Italian Cultural Studies
ITAL 415 History of Italian Theatre and Performance
ITAL 422 Topics in Italian Cinema
ITAL 442 Special Topics in Italian Culture
ITAL 442 Special Topics in Italian Culture

ITAL 491 Foreign Study

ITAL 493 Independent Study

Only one of the following may count toward the 12 hours:

ARTH 451 The Art of Italy, 1250-1450
ARTH 452 Art of Italy, 1475-1600
HIEU 320 Contemporary Europe
MUTH 305 Italian Musical Styles

[After]

[After] * Meets Volunteer Core Requirements.
[Right] *

Rationale* 

There was a name & content change to ITAL 402, and the creation of a new class, ITAL 413. We need to update the name change to ITAL 402 and include the new ITAL 413 to the curriculum list and the schema.

Financial Impact*

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
Minor Requirements

The minor in Japanese consists of 18 hours of Japan-related courses.

Prerequisites

- JAPA 251 Intermediate Japanese I
- JAPA 252 Intermediate Japanese II

Required Courses

Complete:

- JAPA 351 Advanced Japanese I
- JAPA 352 Advanced Japanese II

Select 12 hours (at least 9 hours from List A):

List A:

- JAPA 213 Introduction to Japanese Culture
- JAPA 313 Premodern Japanese Culture
- JAPA 314 Food, Fiction, and Film in Modern Japan
- JAPA 315 Asian Film
- JAPA 321 Japanese Popular Media
JAPA 365 Japanese for Business
JAPA 413 Topics in Japanese Literature

[Right] *
JAPA 451 Introduction to Classical Japanese
JAPA 452 Reading in Modern Japanese Texts
JAPA 493 Independent Study

[After] any Japanese courses above 300

List B:

ARTH 419 Art of Japan
GEOG 374 Emerging Landscapes of East Asia

[Right] *
HIAS 392 History of Pre-Modern Japan
HIAS 393 History of Modern Japan
HIAS 494 History of Tokyo

[Right] *
REST 380 American Buddhism

[Right] *
REST 383 Japanese Religions
REST 479 Seminar in East Asian Religions

[Right] *
POLS 454 Politics in China and Japan: Culture, Power and Competition

[After]

* Meets Volunteer Core Requirements.

Rationale* We have submitted a proposal for a new class: JAPA 213 - Introduction to Japanese Culture. This new course needs to be added to the curriculum courses listed.

We have also submitted name/content change proposals for JAPA 313, JAPA 321 and JAPA 451. The changes should carry over to the curriculum courses listed and List A of the curriculum schema.

JAPA 300 Kanji for Japanese
JAPA 365 Japanese for Business
JAPA 491 Japanese Foreign Study
JAPA 493 Independent Study
[After] * Meets Volunteer Core Requirements.
Rationale*
(1) WLC Japanese Major will be an alternative for students in the Japanese Minor, LWB Japanese Major, and Asian Studies Major/Minor. Enrollments have been strong for the past 10 years. In fall 2023, a total of 89 UT students are majoring or minoring in these fields (49 in Japanese, 18 in LWB Japanese, 22 in Asian Studies). (2) Japanese Major is crucial for UT students to further their academic and professional career opportunities in local, national, and global communities. WLC Japanese is situated in a unique regional context in which Japan is number 1 in FDI (Foreign Direct Investment) in the state of Tennessee: 200+ Japanese-owned companies, 56,000+ employed (highest number in the US), and $20+ billion invested (second largest in the US). Japanese Major is also the highest paying humanities major in the US (Forbes and Business Insider, 2019).

Financial Impact*
In addition to our current faculty, we are requesting one additional fill-time NTTF (PhD) in Japanese who can teach at all levels of language and content courses is needed.

Impact on Other Units*
None.

Have you consulted with all programs/departments that will be impacted by this change?*

## General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements (College of Arts and Sciences)

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Following the sample academic plan and its uTrack milestones will help students stay on track to graduate in four years. For specific course requirements, refer to the description of the major and the Arts and Sciences requirements listed in the Catalog, and consult an academic advisor.

Term 8 Milestone Notes
Completion of at least 42 total upper-division (300-400) hours

Total Credit Hours 120-123
Footnotes

All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

The Connections requirement may be satisfied in one of three ways: (1) by completing 9 hours from one of the approved Connections packages, (2) by completing the requirements for a second major or minor, or (3) by completing 9 hours of study abroad coursework. All students must complete at least 42 upper-division (300-400 level) hours in order to receive a degree from the College of Arts and Sciences.

* Meets Volunteer Core Requirements.

Rationale* This proposal matches the newly proposed WLC major in Japanese Studies Concentration.

Financial Impact* None

Impact on Other Units* None

Have you consulted with all programs/departments that will be impacted by this change?* Yes

ADMINISTRATIVE USE ONLY

Impact Level Low

If approved, will this need notification/approval from any agency outside of UTK? Yes No

- [ ] THEC approved (new majors only)
Students pursuing a major in Modern Foreign Languages and Literatures who wish to prepare for careers in international business may complete a special concentration in Arabic, Chinese, French and Francophone Studies, German, Hispanic Studies, Italian, Japanese, Portuguese or Russian Studies. The concentration offers a professional emphasis in international business, international retail merchandising, or international agricultural economics, and some form of practical experience related to the concentration.

Students interested in the language and world business program should contact the department of Modern Foreign Languages and Literatures as early as possible in their college careers.

Continuing, returning, and transfer students must meet progression requirements before declaring a concentration in language and world business.

Minimum requirements for entrance and progression to the major are a 2.7 cumulative average in all courses and a 3.0 average in language courses. Students must meet these requirements for progression prior to the completion of 75 hours. MFL 199 is a requirement for the program. Program standards are adjusted periodically, and current requirements are available from the Director of the Language and World Business Program. For further information, inquire at 701 McClung Tower.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
College Requirements

Arts and Sciences

I. Language Requirement: Spanish – 30 hours

Students whose level of proficiency in Spanish is superior as defined by the ACTFL Proficiency Guidelines may substitute a 400-level course for SPAN 312* with consent of the department. SPAN 311* and SPAN 312* are not available to native Spanish speakers or Spanish/English bilinguals, who should instead take SPAN 309 and an additional 300/400-level course with consent of the department. Notes: SPAN 401, SPAN 402, and SPAN 465 do not count toward the major. SPAN 311* may not be taken after completion of SPAN 312*.

A. Complete:

PORT 300 Portuguese for Speakers of Another Romance Language
[After]
SPAN 312 Language in Context II
[Right] *
[Right] or
SPAN 309 Spanish for Bilinguals
[After]
SPAN 330 Textual Analysis
SPAN 331 Introduction to Hispanic Culture
SPAN 346 Language and Culture of the Hispanic Business World

B. Select 15 credit hours in SPAN courses numbered above 300**

• At least 6 of these 15 credit hours must be at the 400-level.

** SPAN 311 cannot be taken after SPAN 312 or SPAN 309.

II. Practical Experience – 3 hours
II. Practical Experience  3 hours

Select 3 hours from:

SPAN 490N Internship
SPAN 491 Foreign Study
SPAN 493 Independent Study
SPAN 495 Understanding Culture Through Service in a Hispanic Country
SPAN 495S Understanding Culture Through Service in a Hispanic Country

[Right] *

Notes:

Students whose level of proficiency in Spanish is superior as defined by the ACTFL Proficiency Guidelines may substitute a 400-level course for SPAN 312* with consent of the department.

Students undertaking an internship are required to purchase professional liability insurance coverage before beginning service.

III. Professional Emphasis (select one)

A. International Business – 25 hours

ACCT 200 Foundations of Accounting
ECON 201 Introductory Economics: A Survey Course
[After]
[Right] *
ECON 322 The Global Economy: Trade and Development

Course Description
This course will focus on the importance of culture in our everyday lives and the ways in which culture influences communication processes. In today’s era of rapid globalization, being able to communicate across cultures is imperative to one’s ability to function in a diverse workplace, city, and world. Unique relational beliefs, perceptions, and norms profoundly affect communication and the goals of this class are to develop perspectives on the influence of culture on communication and to build skills for improving one’s own intercultural interactions.

Will this course be crosslisted?  Yes

If yes, what is the crosslisting relationship for this course?  Primary

Rationale* In today’s era of rapid globalization, being able to communicate across cultures is imperative to one’s ability to function in a diverse workplace, city, and world. Unique relational beliefs, perceptions, and norms profoundly affect communication and the goals of this class are to develop perspectives on the influence of culture on communication and to build skills for improving one’s own intercultural interactions.

Impact on Other Units* No impact report on other units is needed for this proposal.

Financial Impact* Students will enroll in this course when they are going on a study abroad trip led by a Communication Studies faculty member or when they are taking this class as a regular course offering on UTK’s campus. The tuition students pay for this course will be directed to the College of Communication and Information, consistent with UTK’s new budget model. No financial impacts on other units across campus are anticipated.

Rationale

This will be one of three required courses for a new Concentration in the Bachelor of Science in Information Sciences. This course is being added to address a gap in our Bachelor of Science in Information Sciences (BSIS) program and meet the demands of our undergraduate students based on feedback we received from current and previous students. The course builds on the school’s strong programs and curriculum in Data, Information Management, and Analytics; User Experience Design; and Applied Data Analytics and User Experience. While one or two similar courses across campus (e.g., COSC 366) provide the conceptual, practical, and theoretical foundations of cybersecurity in the context of information and data life cycles, they tend to be more technical and require multiple prerequisites. This course complements cybersecurity courses and programs in units such as the College of Emerging and Collaborative Studies (CECS) and the Min H. Kao Department of Electrical Engineering and Computer Science (EECS) by providing unique perspectives on cybersecurity in the context of information and data security and integrity.

Impact on Other Units

None

Financial Impact

We will hire one non-tenure-track faculty member to start on August 1, 2024.

**Rationale**

This course is being added to address an opportunity presented by our curriculum. SIS has strengths in data management and use with courses such as INSC 380 (Information Management in Organizations), INSC 486 (Data Analytics), and INSC 489 (Information Visualization). This course would build upon and add to the skills and knowledge developed through these courses by engaging students with advanced concepts and ethical issues relating to the lifecycle of data. This addresses a gap in the curriculum by presenting an alternative view of data – rather than focusing on how students can find, manage, and work with data. They will learn how they fit into the lifecycle of data to become more sophisticated and ethical users and stewards of data. This course will be
Becoming more sophisticated and ethical users and stewards of data. This course will be submitted as a possible elective in the interdisciplinary Data Science major.

Rationale

This will be one of three required courses for a new Concentration in the Bachelor of Science in Information Sciences. This course is being added to address a gap in our Bachelor of Science in Information Sciences (BSIS) program and meet the demands of our undergraduate students based on feedback we received from current and previous students. The course builds on the school’s strong programs and curriculum in Data, Information Management, and Analytics; User Experience Design; and Applied Data Analytics and User Experience. The course is intended to cover advanced topics and techniques in information, data, and cybersecurity, and cybersecurity tools and controls necessary to safeguard information and data - something lacking from other courses in SIS and other programs. By building on the foundational concepts and policy and governance-related topics in their other courses in the concentration (INSC 312, 412, and others), students will gain a deeper understanding and knowledge of the advanced topics and techniques. This course complements cybersecurity courses and programs in units such as the College of Emerging and Collaborative Studies (CECS) and the Min H. Kao Department of Electrical Engineering and Computer Science (EECS) by providing unique perspectives on cybersecurity in the context of information and data security and integrity.

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Description
This online-only degree concentration is designed for students interested in developing or enhancing skills for communication careers. Students will gain knowledge and skills in advertising, public relations, organizational communication, journalism and media and information sciences. It is specifically designed for transfer students. Students who have an Associate of Arts (A.A.), Associate of Fine Arts (A.F.T), Associate of Science (A.S.), or Associate of Science in Teaching degree (A.S.T), from a Tennessee accredited community college may complete the distance education Communication and Information bachelor's degree program.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Term 1

Tennessee community college courses for A.A., A.F.A., A.S., or A.S.T. degree

Term 2

Tennessee community college courses for A.A., A.F.A., A.S., or A.S.T. degree

Term 3

Tennessee community college courses for A.A., A.F.A., A.S., or A.S.T. degree

Term 4

Tennessee community college courses for A.A., A.F.A., A.S., or A.S.T. degree

Term 4 Milestone Notes

Conferral of A.A., A.F.A., A.S., or A.S.T. degree from a TN community college with a minimum of 60 credit hours

Term 5

1 Unrestricted Elective 3 Credit Hours

ADPR 375 Integrating Communication Channels
CMST 446 Leadership
INSC 305 Internet and Society
JREM 416 Audience Analytics

Credit Hours 15

Term 8 Milestone Notes

No milestones
Total Credit Hours 120

Footnotes

Any courses not already required for the major.

Rationale*
The major provides an opportunity for transfer students who have earned an AA, AS, AFA, and AST degree from a TN community college to complete an online, asynchronous degree from UT. The college has had success with our interdisciplinary master's program and believes that this undergraduate degree would assist students who are interested in pursuing entry level careers in communication and information as well as those who are bound in their career and would like to complete a bachelor's degree meet their career objectives. Please note: All JREM courses will be JMED courses. We are working through the THEC approval process as well. Aiming for approval by Fall 2024 to begin accepting students Spring 2025.

Financial Impact*
There will be medium financial impact to CCI as we work with faculty to develop coursework in asynchronous formats.

Impact on Other Units*
Minimal - 12 hours of electives are built into the major and would benefit other units who are offering distance education courses and have capacity to allow our students to take their courses.

Impact Audit Complete. No impact outside of CCI.

Have you consulted with all programs/departments that will be impacted by this change?*
- Yes
- No

ADMINISTRATIVE USE ONLY

Impact Level
- Low
- Mid
- High
If approved, will this need notification/approval from any agency outside of UTK?

- Yes
- No

ACALOG Program Status

- Active-Visible

Admin Checklist

- Banner entries completed
- Reported to Provost/THEC
- THEC approved (new majors only)
General Catalog Information

College*  College of Communication and Information
Department*  Interdepartmental
Program Name*  Corporate Event Strategy, Promotion, and Production Minor

Learning Outcomes  Program Learning Outcomes for the minor:
1. Students will understand the strategic planning and execution of corporate events as well as how to engage media and other communication channels to promote them.
2. Students will learn production techniques for event coverage as well as receive technical training for all aspects of corporate event execution.

Degree Type*  Non-Degree  Program Type*  Undergrad (Minor)

General Instructions for Description
This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description  The corporate event strategy, promotion, and production minor is open to undergraduate students interested in careers in corporate event management and is offered jointly through the College of Communication and Information and College of Education, Health, and Human Sciences. Students will develop and apply skills to effectively plan, execute, promote, and produce corporate events through hands-on training. The minor is open to students pursuing an undergraduate degree in any major at the University of Tennessee. The minor consists of 15 credit hours.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

### Requirements*

#### Core Courses (Complete 12 hours of required courses):

- HTM 212 Event Planning and Design
- HTM 435 Advanced Event Planning and Design
- PBRL 270 Public Relations Principles
- JREM 331 Digital Content Creation

#### Select One Course (3 hours):

- ADPR 216 Special Topics in Advertising and Public Relations
- ADPR 365 Social Media Strategy
- ADPR 375 Integrating Communication Channels
- HTM 102 Introduction to Travel and Tourism
- HTM 326 Cost Controls in Hospitality and Tourism Operations
- HTM 445 Restaurant and Catering Management and Execution
- JREM 260 Studio Production
- JREM 330 Communication for Media
Rationale* This minor will be a collaboration between the College of Communication and Information's Tombras School of Advertising and Public Relations and School of Journalism and Media and the College of Education, Health, and Human Sciences’ Retail, Hospitality, and Tourism Management. This minor provides opportunities for students to develop skills and knowledge in corporate event management. These skills are also complimentary to disciplines outside of the majors. Please note: JREM courses will turn to JMED prefix once the change is approved in cycle 4.

Financial Impact* Little financial impact to the units. These are existing course offerings for both colleges.

Impact on Other Units* These are existing courses taught in the College of Communication and Information and the College of Education, Health, and Human Sciences. HRT and JEM are willing participants in the collaborative minor. See attached affirmative responses.

Outside of Proposing Unit:
CEHHS
HTM - 102 - Introduction to Travel and Tourism
HTM - 212 - Event Planning and Design
HTM - 326 - Cost Controls in Hospitality and Tourism Operations
HTM - 435 - Advanced Event Planning and Design
HTM - 445 - Restaurant and Catering Management and Execution

Within Proposing Unit:
CCI
ADPR - 216 - Special Topics in Advertising and Public Relations
ADPR - 365 - Social Media Strategy
ADPR - 375 - Integrating Communication Channels
JREM - 260 - Studio Production
JREM - 330 - Communication for Media
JREM - 331 - Digital Content Creation
PBRL - 270 - Public Relations Principles

College of Communication and Information - JMED - 366
2024-2025 UG Revise Course

General Catalog Information

College* College of Communication and Information

Department (Acalog Hierarchy)* School of Journalism and Media

Subject/Prefix (choose from list)* JMED

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 366

Course Title (max 100 characters)* Media and Democracy

Variable Title? Yes

Credit Hours* 3

Course Description
Media and Democracy is a course in media literacy and media effects. We take a fresh look at traditional, social, and digital media, with an emphasis on audience skills in understanding the messages we create, encounter, and evaluate. The course explores the crosscurrents of influence in several areas, including the role of public opinion and the media in the formation of democratic systems. Students will become better global citizens by being able to identify democratic operation differences between the U.S. and other countries. Class work also will address social class, ethnicity, gender, language, race, and religion as related to voting behavior, campaign strategies, and constituent services.

Will this course be crosslisted? Yes

If yes, what is the crosslisting relationship for this course? Primary

List all courses in this crosslisting relationship and note whether primary or secondary

College of Communication and Information - JMED - 400

2024-2025 UG Revise Course

**General Catalog Information**

**College**
College of Communication and Information

**Department (Acalog Hierarchy)**
School of Journalism and Media

**Subject/Prefix (choose from list)**
JMED

**Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)**
400

**Course Title (max 100 characters)**
Mass Communication Law and Ethics

**Variable Title?**
- Yes
- No

**Credit Hours**
3

**Course Description**
Emphasis on legal issues affecting print and electronic media, including libel, privacy, copyright, free press-fair trial, governmental regulations of advertising, electronic media, and public relations. Also includes ethical standards and practices.

**Will this course be crosslisted?**
- Yes
- No

**If yes, what is the crosslisting relationship for this course?**
- Primary
- Secondary

**List all courses in this crosslisting relationship and note whether primary or secondary**

**Statement about Vol Core:**
If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.
Satisfies Volunteer Core Requirement:

Contact Hour Distribution (if more than one instructional method)

Grading Restriction

Repeatability

Credit Restriction

Registration Enforced (RE) Prerequisite(s)

Department Enforced (DE) Prerequisite(s)

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s)

Recommended Background

Comments

Registration Restriction(s) Registration Permission

Equivalency JREM 400

Rationale* New subject/prefix code to reflect new name of school and major

College of Communication and Information - JMED - 419
2024-2025 UG Revise Course

General Catalog Information

College*  
College of Communication and Information

Department (Acalog Hierarchy)*  
School of Journalism and Media

Subject/Prefix (choose from list)*  JMED

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)*  419

Course Title (max 100 characters)*  Communicating with Data

Variable Title?  
Yes  
No

Credit Hours*  3

Course Description  
Students will use a variety of tools and software to acquire and analyze data to produce news stories and data visualizations. Also, student will learn data and programming concepts related to new media and emerging technologies. This course will provide students with hands-on experience collecting, analyzing and interpreting data.

Will this course be crosslisted?  
Yes  
No

If yes, what is the crosslisting relationship for this course?  
Primary  
Secondary

List all courses in this crosslisting relationship and note whether primary or secondary

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

General Catalog Information

College* College of Communication and Information

Department (Acalog Hierarchy)* School of Journalism and Media

Subject/Prefix (choose from list)* JMED

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 430

Course Title (max 100 characters)* Advanced Reporting

Variable Title? Yes

No

Credit Hours* 3

Course Description
This course will hone students' skills at in-depth, enterprise reporting. Specifically, students will use skills acquired in earlier classes (e.g. news judgment, interviewing, information gathering, and analysis) to produce journalistic works of regional significance. Topics may vary but could include data journalism, investigative journalism or business journalism.

Will this course be crosslisted? Yes

No

If yes, what is the crosslisting relationship for this course? Primary

Secondary

List all courses in this crosslisting relationship and note whether primary or secondary

</table>

### Course Description

This seminar will examine how and why media construct health and medicine in the ways that they do and how audiences process those messages. We will explore mediated health and science from theoretical perspectives such as cultivation, social comparison, agenda setting, priming, social cognitive theory, and more.

### Will this course be crosslisted?

College of Communication and Information - JMED - 456
2024-2025 UG Revise Course

General Catalog Information

College* College of Communication and Information

Department (Acalog Hierarchy)* School of Journalism and Media

Subject/Prefix (choose from list)* JMED

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 456

Course Title (max 100 characters)* Science Writing as Literature

Variable Title? Yes

Credit Hours* 3

Course Description A survey of important science writing for the general public across the spectrum of science, engineering, and medicine. Works by authors such as Arthur C. Clarke, David Quammen, and Richard Selzer are analyzed for literary qualities in a quest to understand why some science writing succeeds.

Will this course be crosslisted? Yes

If yes, what is the crosslisting relationship for this course? Primary

**Registration Permission**

**Equivalency**
Rationale* With WUOT moving under CCI leadership, there is an opportunity to connect with the news and production team there to mutually-beneficial outcomes. Through conversations with the CCI Media Integration Committee, WUOT representatives have expressed an eager desire to work with JEM students. JEM students can benefit from working in partnership with a professional organization, and hopefully see their work land on their site or over the airways that they can then use when applying for jobs and internships.

Students in this course will be able to apply what they have learned in foundational JEM courses that teach aspects of reporting, understanding audiences, research and storytelling on a platform where students themselves regularly engage.

The JEM Undergraduate Committee believes this course should be cross-listed at the 500 level. Proposed graduate level syllabus is attached

Impact on Other Units* None. This course will be offered by Journalism and Media faculty and will primarily be a course for Journalism and Media students.

Financial Impact* None

**Course Description**

This course will expose students to multiple theoretical perspectives designed to aid in their evaluation of sports media industry organizations, practices, and structures. Students will critically analyze the economic landscape and business operations of sports media and contemporary practices, including the intersection of sports media and politics, identity, science, community, and religion. Students will gain an understanding of the role sports media plays in cultural understandings of gender, race, sexuality, class, nationalism, consumerism, and other prominent concepts of contemporary community and civic life.

**Will this course be crosslisted?**

- Yes
- No

**If yes, what is the crosslisting relationship for this course?**

- Primary
- Secondary

**List all courses in this crosslisting relationship and note whether primary or secondary**

**Description**

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Term 1

1. **Arts and Humanities** Elective 3 Credit Hours *

2. **Natural Sciences** Elective 3-4 Credit Hours *

The Information Security and Cybersecurity concentration is designed for students interested in careers in cybersecurity with an emphasis on information and data integrity and security. This concentration provides students with the knowledge and skills necessary to understand cybersecurity’s conceptual, practical, theoretical, and policy underpinnings in the context of information and data life cycles. The program will prepare students to apply their knowledge and skills to assess and recognize evolving security vulnerabilities, threats, attacks, and risks to information and data; implement effective policies and governance frameworks; and manage their implementations to mitigate the threats to ensure information and data integrity.

The program and courses in the curriculum will cover topics including information and data security applications, ethics, privacy, accountability, bias, copyright and intellectual property, defamation, confidential information, electronic communication, compliance, audit, legal issues related to privacy and security, and advanced topics such as cybersecurity tools and controls (administrative, physical, and technical), unauthorized access, encryption/decryption, authentication, anonymity, ethical hacking, and security and risk analysis.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

Footnotes

Select courses from the Volunteer Core list.

Select two courses from the Volunteer Core list. At least one of the courses must have a laboratory.

Select three courses from the Volunteer Core list from at least two subject areas.

Any courses not already required for the major.

Two courses chosen from advertising, advertising and public relations, communication and information, communication studies, journalism and electronic media, and/or public relations.

INSC courses not already required for the major. Students may elect to take DATA 301 as an INSC elective.

* Meets Volunteer Core Requirements.

Rationale*

The School of Information Sciences has strong programs and curricula in Data, Information Management, and Analytics; User Experience Design; and Applied Data Analytics and User Experience. Beyond a strategic reason to offer innovative programs in cutting-edge areas, an Information Security and Cybersecurity Concentration will address a gap in our Bachelor of Science in Information Sciences (BSIS) program and meet the demands of our undergraduate students based on feedback we received from current and previous students. The program will also complement other cybersecurity programs in units such as the College of Emerging and Collaborative Studies (CECS) and the Min H. Kao Department of Electrical Engineering and Computer Science (EECS) by providing unique perspectives on cybersecurity in the context of information and data security and integrity. The demand for cybersecurity professionals who can develop, implement, and assess policies and procedures and run information and data security operations in 21st-century information and technology environments is growing. This unique cybersecurity program emphasizing information and data integrity and security will attract students interested in cybersecurity's social, technical, and human aspects, expanding options for UTK students to fill various job openings for cybersecurity professionals.

Financial Impact*

Three of the courses in this concentration are new and will need additional resources to hire full-time and part-time faculty. We plan to hire one non-tenure-track faculty member to
Elective options offered through CECS and TCE may impact their units. See attached letter of support from CECS.

Outside of Proposing Unit:
CECS
AI - 311 - AI for Cybersecurity
CYBR - 302 - Cybersecurity Risk Management
CYBR - 465 - Cybersecurity for Network-Controlled Systems
TCE

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSM

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Select two science courses from the University Volunteer Core list. At least one course must be a lab science.

Choose one course from MATH 113*, MATH 117*, MATH 115*, MATH 123*, MATH 125*, MATH 141*, MATH 147*, MATH 142* or MATH 148*, MATH 151*, MATH 152*; STAT 201* or STAT 207*. The second course can be chosen from the University Volunteer Core list.

Fifteen hours in the College of Arts and Sciences.

Choose one course from the University Volunteer Core list.

Choose from any course not taught in advertising, communication and information, journalism and electronic media, or public relations.

Six hours in the College of Communication and Information, including Journalism and Electronic Media.

Choose from the University Volunteer Core list.

Select four JREM courses from: JREM 320, JREM 415, JREM 416, JREM 420, JREM 441, or JREM 480.

Choose from any upper-division political science course.

* Meets Volunteer Core Requirement.

Rationale* The School of Journalism and Media changed names in Spring 2023, dropping the word "electronic" to be more reflective of the current trends in journalism and media. The major name now needs to change to Journalism and Media.

| Program Type* | Concentration |

Description

This concentration is designed for students interested in producing specialized content in the areas of the hard sciences, agriculture, health, environment, and technology. The School of Journalism and Electronic Media is home to the Hill Chair of Excellence in Science Writing and hosts internationally known guest lecturers in science communication each year.
Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Statement about Crosslistings:

If course is to be crosslisted, then use the “Crosslistings” tab on menu to the right to add all applicable secondary courses. You must start a crosslisting with the primary course, and all courses must be new before they can be crosslisted using this form. If any of the courses (primary or secondary) already exist, you must complete an Add Course form for the new course. Add the crosslisting with a Revise Course form after full approval of the new course.

Summer practicum placement begins the Monday after spring commencement and concludes the last day of the summer session. Minimum grade of C in all child and family studies courses prior to enrolling.

**Rationale**
This is to add the N designation to the internship course.

**Impact on Other Units**
None – this is a redesignation and the course will be taught in the same way by the same faculty members.

**Financial Impact**
None – this is a redesignation of the course and there will be no changes to the structure.

**Arts and Sciences Only**

Only proposals originating from the College of Arts and Sciences should answer these questions.
Select the checkbox if this course should be considered a Writing Emphasis course?

Should this course be considered for Connections?

February 20, 2024
Program Policies and Progression Requirements

The department's major is designed for students whose educational and career goals are focused on studying and working with children and families within educational programs, community services, and other professional settings. The major is designed to accommodate the special interests or strengths of students to allow for flexibility and individualization. Students design a program of study in consultation with their advisor that includes a set of required courses, a complement of courses across the social sciences that support individual interests, and a 12-hour practicum that will complete their program of study. All students graduating with a child and family studies major will have in-depth knowledge about children and families, a broad integrative perspective, and means for application. Students must complete a total of 15 credits of Advanced Social Science coursework. Advanced Social Science courses may not be used to fulfill any other elective requirement. This required program of coursework meets the current eligibility requirements for certification as a "Certified Family Life Educator" (CFLE) through the National Council on Family Relations' approved program mechanism. Students interested in applying for provisional certification as a Family Life Educator are encouraged to pursue the steps indicated at ncf.org.

Progression Requirements

Students are expected to know the criteria they must meet in order to progress into a practicum (CFS 470, CFS 472, CFS 480, or CFS 490) and to regularly monitor their progress in meeting these criteria. Students will not be allowed to progress into the practicum until these criteria are met. If students do not appear able to meet these criteria, they are encouraged to work closely with their advisor to plan an alternative educational program. Specific information on how to apply for the practicum is available from the student's advisor. Students must work closely with their advisor to ensure that they understand the requirements for progression and that they strictly follow the application process for the practicum experience of their choice.

College of Education, Health and Human Sciences Honors Program

Child and Family Studies majors have the opportunity to participate in the college's honors program. For eligibility and requirements, see College of Education, Health and Human Sciences Honors Program.
The Department of Child and Family Studies will be dissolved in fall 2024 in association with a significant restructuring of departments in CEHHS. As a result, the formerly constituted CFS programs at the undergraduate level will be moved. The ECE Undergraduate Programs (B-K and PK-3) have been moved to existing majors in TPTE. The CFS Undergraduate Program, “Community Outreach”, will be moved to Counseling, Human Development, and Family Science (CHDFS). We will withdraw this request if the new major isn’t approved by THEC in time for the 2024-2025 catalog and we will reactivate the request once we have THEC approval for the new major. We are adding an identical program with a different name, so the courses these students will need will be available for them to take.

There are no anticipated impacts on other units. The programs have been moved to TPTE and CHDFS and will continue to be taught in these departments. The curriculum for these programs will remain unchanged and thus will not impact other units.

The programs will continue to use courses from other departments outside of CHDFS and TPTE, but because the curriculum is not changing these units will not experience any changes in financial impact.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Program Policies and Progression Requirements

The Child and Family Studies major is designed for students whose educational and career goals are focused on studying and working with children and families within community services and other professional settings. The major is designed to accommodate the special interests or strengths of students to allow for flexibility and individualization. Students design a program of study in consultation with their advisor that includes a set of required courses, a complement of courses across the social sciences that support individual interests, and a 12-hour practicum that will complete their program of study. All students graduating with a child and family studies major will have in-depth knowledge about children and families, a broad integrative perspective, and means for application. Students must complete a total of 15 credits of Advanced Social Science coursework. Advanced Social Science courses may not be used to fulfill any other elective requirement. This required program of coursework meets the current eligibility requirements for certification as a "Certified Family Life Educator" (CFLE) through the National Council on Family Relations' approved program mechanism. Students interested in applying for provisional certification as a Family Life Educator are encouraged to pursue the steps indicated at ncf.org.

Progression Requirements

Students are expected to know the criteria they must meet in order to progress into a practicum (CFS 480 or CFS 490) and to regularly monitor their progress in meeting these criteria. Students will not be allowed to progress into the practicum until these criteria are met. If students do not appear able to meet these criteria, they are encouraged to work closely with their advisor to plan an alternative educational program. Specific information on how to apply for the practicum is available from the student's advisor. Students must work closely with their advisor to ensure that they understand the requirements for progression and that they strictly follow the application process for the practicum experience of their choice.

College of Education, Health and Human Sciences Honors Program

Child and Family Studies majors have the opportunity to participate in the college's honors program. For eligibility and requirements, see College of Education, Health and Human Sciences Honors Program.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

---

**Requirements**

**Rationale**
The Department of Child and Family Studies will be dissolved in fall 2024 in association with a significant restructuring of departments in CEHHS. As a result, the formerly constituted CFS programs at the undergraduate level will be moved. The ECE Undergraduate Programs (B-K and PK-3) have been moved to existing majors in TPTE. The CFS Undergraduate Program in this proposal, "Community Outreach", will be moved to Counseling, Human Development, and Family Science (CHDFS). The curriculum and program requirements remain unchanged. A THEC proposal will be submitted for a new major for this program to be renamed as "Human Development and Family Science Major, BS". If the THEC proposal is approved in time for the 2024-2025 catalog, we will withdraw this current Revise Program proposal. These changes have been done in consultation with Dean Ellen McIntyre, Dr. Casey Barrio Minton (EPC IDH), and the CFS HDFS program faculty. These changes have also been done under the direction and guidance of Molly Sullivan with the UTK registrar's office.

**Financial Impact**
The program will continue to use courses from other departments outside of CHDFS, but because the curriculum is not changing these units will not experience any changes in financial impact. CFS will no longer exist and the course prefix proposals have been submitted in order to ensure that CHDFS is the recipient of student credit hour revenue generation associated with this program. The new department, CHDFS, will continue to teach courses that are required for the program.

**Impact on Other Units**
CHDFS will be impacted by this change, as it will be the new home for this doctoral program. These changes have been recommended by the Dean McIntyre, Dr. Casey Barrio Minton (EPC IDH) and under the guidance of Molly Sullivan from the UTK registrar's office. Other units will not be impacted by the movement of this program from CFS to CHDFS.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Program Policies and Progression Requirements

The Human Development and Family Science major is designed for students whose educational and career goals are focused on studying and working with children and families within community services and other professional settings. The major is designed to accommodate the special interests or strengths of students to allow for flexibility and individualization. Students design a program of study in consultation with their advisor that includes a set of required courses, a complement of courses across the social sciences that support individual interests, and a 12-hour practicum that will complete their program of study. All students graduating with a Human Development and Family Science major will have in-depth knowledge about children and families, a broad integrative perspective, and means for application. Students must complete a total of 15 credits of Advanced Social Science coursework. Advanced Social Science courses may not be used to fulfill any other elective requirement. This required program of coursework meets the current eligibility requirements for certification as a "Certified Family Life Educator" (CFLE) through the National Council on Family Relations' approved program mechanism. Students interested in applying for provisional certification as a Family Life Educator are encouraged to pursue the steps indicated at ncfr.org.

Progression Requirements

Students are expected to know the criteria they must meet in order to progress into a practicum (CFS 480 or CFS 490) and to regularly monitor their progress in meeting these criteria. Students will not be allowed to progress into the practicum until these criteria are met. If students do not appear able to meet these criteria, they are encouraged to work closely with their advisor to plan an alternative educational program. Specific information on how to apply for the practicum is available from the student's advisor. Students must work closely with their advisor to ensure that they understand the requirements for progression and that they strictly follow the application process for the practicum experience of their choice.

College of Education, Health and Human Sciences Honors Program

Human Development and Family Science majors have the opportunity to participate in the college's honors program. For eligibility and requirements, see College of Education, Health and Human Sciences Honors Program.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

---

**Rationale***

The Department of Child and Family Studies will be dissolved in fall 2024 in association with a significant restructuring of departments in CEHHS. As a result, the formerly constituted CFS programs at the undergraduate level will be moved. The ECE Undergraduate Programs (B-K and PK-3) have been moved to existing majors in TPTE. The CFS Undergraduate Program in this proposal, "Community Outreach", will be moved to Counseling, Human Development, and Family Science (CHDFS). Although this is an "Add Program" proposal, only the name has been revised (Child and Family Studies Major - Community Outreach) to Human Development and Family Science. The curriculum and program requirements remain unchanged. This change in name is necessary to reduce confusion with the former child and family studies programs and is consistent with the names of programs at peer and aspiration programs. A THEC proposal will be submitted for a new major. If the THEC proposal is not approved in time for the 2024-2025 catalog, we will retain the current name of the program for the upcoming catalog and change to the new major in 2025-2026. These changes have been done in consultation with Dean Ellen McIntyre, Dr. Casey Barrio Minton (EPC IDH), and the CFS HDFS program faculty. These changes have also been done under the direction and guidance of Molly Sullivan with the UTK registrar's office.

---

**Financial Impact***

The program will continue to use courses from other departments outside of CHDFS, but because the curriculum is not changing these units will not experience any changes in financial impact. CFS will no longer exist and the course prefix proposals have been submitted in order to ensure that CHDFS is the recipient of student credit hour revenue generation associated with this program. The new department, CHDFS, will continue to teach courses that are required for the program.

---

**Impact on Other Units***

CHDFS will be impacted by this change, as it will be the new home for this doctoral program. These changes have been recommended by the Dean McIntyre, Dr. Casey Barrio Minton (EPC IDH) and under the guidance of Molly Sullivan from the UTK registrar's office. Other units will not be impacted by the movement of this program from CFS to CHDFS.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*
Rationale* 
CEHHS is restructuring, and this minor need to move with HDFS faculty and the HDFS curriculum to the new department, CHDF. This minor name change is to modernize nomenclature consistent with norms in the discipline.

CFS 330 (soon to be IEC 330 in TPTE) was removed as an option for the minor because this course will no longer be taught in CFS, and it will not transfer to CHDF but will transfer to TPTE. Given the restructuring, this was the only course that was dropped from the available options for the minor in what will now be HDFS.

Financial Impact* 
Because CFS is dissolving and the minor is transferring to CHDF, there are no financial impacts on other units.

Impact on Other Units* 
Because CFS is dissolving and the minor is transferring to CHDF, there are no impacts on other units.

**Contact Hour Distribution (if more than one instructional method)**

A leadership skills and practices seminar (one credit hour) and two applied leadership experiences – 30-74 hours of positional leadership practicum (one credit hour) or 75+ hours of positional leadership practicum (two credit hours).

**Grading Restriction**

**Repeatability**

May be repeated. Maximum 6 credit hours.

**Credit Restriction**

**Registration Enforced (RE)**

**Prerequisite(s)**

**Department Enforced (DE)**

**Prerequisite(s)**

**Registration Enforced (RE)**

**Corequisite(s)**

**Department Enforced (DE)**

**Corequisite(s)**

**Recommended Background**

**Comments**

As the prerequisite to ELPS 351 and recommended for ELPS 352, all students must complete the one credit hour leadership skills and practices seminar and at least 1 credit hour of applied leadership experiences including technical competence training in a college student leadership positions/roles with a minimum of 30 practicum hours. If registering for 3 credit hours practicum hours should exceed 75.

**Registration Restriction(s)**

**Registration Permission**

Consent of instructor.

**Equivalency**

**Rationale**

ELPS 350 should have been added in Fall 2021 as a recommended background course for ELPS 352 when it was added as a course alternate to ELPS 351. This revision addresses that mistake.

**Impact on Other Units**

This change does not impact other units, as it is a low impact change.
**Financial Impact**

None, as this is a low impact change.

**Have you consulted with all programs/departments that will be impacted by this change?**

- Yes
- No
- Minor changes only/Not Applicable

**Course Description**
Applications of descriptive and inferential statistics to problems in the educational, behavioral, and social sciences. Topics include data visualization, central tendency, variability, correlations, introduction to probability, sampling distributions, interval estimation, and univariate hypothesis testing. Statistical software is used to analyze data through hands-on activities.

**Satisfies Volunteer Core Requirement:**

### Rationale*
More department - In August 2023, the ESM programs and faculty relocated to ELPS. The department change allows this course to relocate with them.

Course Number Change - This course is intended for first-year and sophomore students and the course number change is designed to reflect more accurately that it is an introductory course. This introductory course does not have any prerequisites.

Course Name Change - The course title will be changed from "Applied Statistical Concepts for Educators" to "Applied Statistical Concepts for Decision Makers". The course content is directly applicable to problems in the educational, social, and behavioral sciences; but would prepare student to use statistics when making decisions in any setting. However, the current course title limits application solely to educational issues. The course title change will better reflect the nature of the course and be more attractive to all students.

### Impact on Other Units*
This course may have an effect on other units since it will be an elective to meet the Vol Core requirement for QR only in the need to know the number is changed. We have no knowledge of a program including it in their course study to date.

### Financial Impact*
This course is currently being taught as part of the course load of existing faculty and graduate students, therefore, there is no financial request or demand on the department or college budget. This change may impact financially other units across campus, as it may be taken to meet QR requirement for Vol Core.

### Have you consulted with all programs/departments that will be impacted by this?
- Yes
- No
- Minor changes only/Not Applicable
Arts and Sciences Only

Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal?

General Catalog Information

College*  College of Education, Health, and Human Sciences
Department*  Educational Leadership and Policy Studies
Program Name*  Leadership Studies Minor
Degree Type*  Non-Degree
Program Type*  Undergrad (Minor)

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Description
The Department of Educational Leadership and Policy Studies, through its Leadership Studies minor, offers a 12-hour curriculum of applied leadership education within the collegiate setting. This minor is open to students of every major. This experiential learning approach to leadership education (i.e., knowledge, disposition, and skill development) combines seminar, coached experiences, and lecture formats with mentoring and portfolio-based self-assessment, skill development and application in a capstone project – either self-directed or faculty guided experiential learning course.

Admission
Student applications to the minor are accepted throughout the year. The application packet includes a completed application (e.g., contact information, references, a list of leadership activities and involvements), and permission to access student records. An admissions committee comprised of ELPS faculty and instructors teaching in the program conduct a holistic review of the applications with the goal of creating a diverse cohort of students with demonstrated academic and experiential leadership success. Students are admitted into the minor based on the following criteria:

- Academic potential as demonstrated by the GPA or leadership coursework;
- Proven ability and preparation to lead a self-directed project;
- Demonstrated passion for engaging in leadership, social change, and/or service;
- Positional and/or non-positional leadership while in college;
- Evidence of commitment to developing leadership potential; and
- Unique contributions to the leadership learning cohort.

Minimally, students must be and remain in good standing with the university and Leadership Studies. The Leadership Studies minor must be declared and passed with a B or better before beginning a self-directed leadership capstone project. Students must pass the ELPS 499 Proficiency course requirements to graduate.

Additional admission, timeline, curricular, and program contact information is available at: https://elps.utk.edu/leadership-studies-minor/.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
**Rationale**

Additional of ESM 250 as Elective: ESM 250 (previously ESM 350) as an elective because its learning goals are consistent with our elective requirements - it informs leaders decisions and empowers leaders to use data to communicate their messages.

Capstone Language Amendments: Capstone Project included in Group 2 and Co-Curricular Requirements to make all language about the Capstone requirement consistent.

Approved Capstone Course Additions: Added the newest approved Capstone Project Courses. This will reduce petition paperwork and increase the efficiency within the program administration and make for a better student experience.

**Financial Impact**

This course (ESM 250) is currently being taught as part of the course load of existing faculty and graduate students, therefore, there is no financial request or demand on the department or college budget.

**Impact on Other Units**

None. ESM has agreed to be included as an elective. This addition will assist them in filling this course.

**Have you consulted with all programs/departments that will be impacted by this change?**

Yes

**ADMINISTRATIVE USE ONLY**

**Impact Level**

- Low
- Mid
- High

**ACALOG Program OID** 31845

**ACALOG Program Status** Active-Visible

If approved, will this need notification/approval from any agency outside of UTK?

Yes

No

Admin Checklist

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The Department of Educational Leadership and Policy Studies, through its Leadership Studies Minor – Honors, offers a 13-hour curriculum of applied leadership education within the collegiate setting. This minor is open to students of every major. This experiential approach to leadership education (i.e., knowledge, disposition, and skill development) combines seminar, experiential learning, and lecture formats with mentoring and portfolio-based self-assessment, skill development and application in a capstone project – either self-directed or faculty guided experiential learning course.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
Requirements*

Rationale*  Additional of ESM 250 as Elective: ESM 250 (previously ESM 350) as an elective because its learning goals are consistent with our elective requirements - it informs leaders decisions and empowers leaders to use data to communicate their messages.

Capstone Language Amendments: Capstone Project included in Group 2 and Co-Curricular Requirements to make all language about the Capstone requirement consistent.

Approved Capstone Course Additions: Added the newest approved Capstone Project Courses. This will reduce petition paperwork and increase the efficiency within the program administration and make for a better student experience.

Financial Impact*  This course (ESM 250) is currently being taught as part of the course load of existing faculty and graduate students, therefore, there is no financial request or demand on the department or college budget.

Impact on Other Units*  None. ESM has agreed to be included as an elective. This addition will assist them in filling this course.

### Rationale

CEHHS is restructuring, and these courses need to move with HDFS faculty to the new department, CHDF. This prefix change is to modernize nomenclature consistent with norms in the discipline and differentiate these courses from Integrated Childhood Education courses moving to TPTE.

**Recommended Background**

**Comments**

**Registration Restriction(s)**

**Registration Permission**

**Equivalency**

**Rationale**

This proposal moves to remove the DE (departmentally enforced) prerequisites of ENGL 101 and 102 as these courses are already enforced in Banner by way of the RE prerequisite. Thus, the DE duplication of RE is not necessary.

**Impact on Other**

None
Financial Impact*  None.

## Course Description

Introduction to current theories and practices associated with the development and enhancement of language in young children (birth through 8) from diverse backgrounds and ability levels. Specifically, this course will focus on issues related to the development of receptive and expressive language. Further, this course will build understandings of instructive practices and assessment approaches to support children in these early phases of language and explore language interactions in the classroom both teacher-child and child-child interactions.

Course Description  This course examines the practice of assessing young children (birth-3rd grade) with disabilities. Topics include gathering information to assist in the development of tiered interventions and the process of making referrals. Students will explore informal assessment techniques, standardized assessments, and screening instruments. Students will analyze the purpose and limitations of assessment instruments and engage in instructional planning based on assessment data.

Will this course be crosslisted?  Yes

If yes, what is the crosslisting relationship for this course?  Primary

List all courses in this crosslisting relationship and note whether primary or secondary

Recommended Background

Comments  Fall and spring practicum placements begin on the first day of registration and end on the last day of the final examination period. The practicum follows the Early Learning Center for Research and Practice calendar. Summer practicum begins the day following spring commencement and ends on the last day of summer term. Priority for summer practicum is given to students who have completed all other program requirements, except practicum, prior to the summer session.

</table>

Previous prerequisite: KNS 200 or RSM 250

New prerequisite: none

By removing the prerequisites, this will allow graduate students to take this course without having to also then take the KNS 200 or RSM 250. Currently this course is offered to undergraduate students, and the hope is to open it up to graduate students for graduate credit, but the prerequisites hang them up. Removing these prerequisites for students allow more students to register for the course.
Impact on Other Units*  No anticipated impact.

Financial Impact*  This is an existing course using existing resources. No additional resources are expected to be needed.

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
The Kinesiology major prepares students for a variety of careers in health-related fitness and for graduate or professional study in various fields within kinesiology (exercise physiology, biomechanics, sport psychology, motor behavior, physical activity epidemiology, etc.), allied health professions (physical therapy, occupational therapy, physician assistant, chiropractic, athletic training, etc.) and medicine. Incoming freshmen ("first year students") can enter the Kinesiology major when they start at UT, or during their first two years. Transfer students can enter the Kinesiology major when they start at UT.

If a chosen career path will require graduate school, a student should know that planning for that starts now. Educational preparation as an undergraduate is an essential part of success later on. Many students arrive at the university with the goal to become a physician, physical therapist, or other health professional, but they have little knowledge of what the profession is really like or of its demands. Because competition is so intense in medicine and other health professions, students should become as familiar as possible with the career they are pursuing, including the additional education requirements and the minimum GPA and grades in specific courses to be competitive for admission to graduate study.

Major Requirements and Rules

Advising Transition

Academic advising for freshmen, sophomores, and new transfer students in the Kinesiology major occurs in the College of Education, Health, and Human Sciences Office of Advising & Student Services (BEC 332). A student will transition to KRSS Department advising after he/she completes the following U-track milestones:

- Maintains a minimum cumulative UT GPA of 2.5 after a minimum of 60 hours of coursework.
- Completes MATH 125* or MATH 141* or MATH 147*, KNS 200, CHEM 132*, CHEM 133*, and BCMB 230. These are the uTrack milestones for the first four terms.
- All of these courses must be completed with a C or better to remain in good standing and continue in the major.

At the end of each semester, staff of the CEHHS Office of Advising and Student Services will compile a list of students ready to change to departmental advising. Students will be emailed a letter with the name and contact information of their new department advisor. Students will then be responsible for scheduling a meeting with their new advisor to complete this transition.

Minimum Grades and Required GPA for Continuation in the Major

Students who do not earn a C or better in MATH 125* or MATH 141*, PHYS 221*, and KNS 332* will not be allowed to take KNS 422 - Biomechanics of Human Movement*.

Students who do not earn a C or better in CHEM 122* and CHEM 123*, CHEM 132* and CHEM 133*, and BCMB 230 will not be allowed to take KNS 414 - Fitness Testing and Exercise Prescription or KNS 480 - Physiology of Exercise*.
All Kinesiology courses, Professional Electives, Department Electives, MATH 125 or MATH 141, CHEM 122 and CHEM 123, CHEM 132 and CHEM 133, PHYS 221, and BCMB 230 (or any course(s) used as a substitute for these requirements) must all be passed with a C or better to graduate.

Professional Science Elective, and BCMB 230 (or any course(s) used as a substitute for these requirements) must all be passed with a C or better to graduate.

Kinesiology majors must maintain a cumulative UT GPA of 2.5 or better to register for any required 400-level Kinesiology courses (KNS 414, KNS 422*, and KNS 480*) and to graduate.

**College of Education, Health and Human Sciences Honors Program**

Kinesiology majors have the opportunity to participate in the college's honors program. For eligibility and requirements, see College of Education, Health and Human Sciences Honors Program.

**General Instructions for Requirements**

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

<table>
<thead>
<tr>

</table>

| Rationale* | This adjustment helps to correct a discrepancy between the current catalog and the DARS system. Correcting this will help bring the two in line, which will more accurately reflect the requirements of the major, helping both students and advisors to stay on track. |

| Financial Impact* | This adjustment is not anticipated to require additional financial resources. |

| Impact on Other Units* | We do not anticipate this change having an impact on other units. |

Have you consulted with all programs/departments that will be impacted by this change?*

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The SCUBA minor program allows students to progress from beginner through advanced diving training. Students completing the minor have the opportunity to earn a professional certification, NAUI Divemaster, allowing them to work anywhere worldwide.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
We propose the SCUBA minor as an opportunity for students in majors across the university to earn an immediately marketable skillset for their initial and future careers. Students completing the minor earn a professional certification, NAUI Divemaster, allowing them to work anywhere worldwide. Based on the course roster makeup in the current and past semesters, the SCUBA minor would appeal to students across disciplines. Surveyed in Spring 2023, students throughout the 5 classes responded favorably in regard to their interest in a SCUBA minor (79 out of 87 total responses). This minor will consist of 14 credit hours. All required courses are currently offered in each fall and spring semester. Additionally, if designated as a minor, students wishing to complete the entire course sequence can use each course in their course program of study (CPOS) for financial aid purposes.

We do not anticipate this change having an impact on other units.

This adjustment is not anticipated to require additional financial resources.

## General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Description
The Sport Management major prepares students interested in working in the sport industry. The program combines the sport management curriculum with a minor in business administration. The program concludes with a semester-long internship experience.

Major Requirements and Rules

Advising Transition

Academic advising for freshmen, sophomores, and transfer students in the Sport Management major occurs in the College of Education, Health, and Human Sciences (CEHHS) Office of Advising and Student Services (BEC 332). If you have not been advised by anyone in CEHHS Advising before, please visit their website for more information about scheduling an appointment with their office. The KRSS Advising Staff is not able to review a student's academic history if they are not currently a Sport Management major.

A student will transition from CEHHS Advising to KRSS Department Advising after he/she completes the following:

- Maintains a minimum UT GPA of 2.5 after a minimum of 30 hours of coursework
- Completion of RSM 250 with a grade of C or better
- Successful completion of ENGL 101* and ENGL 102*, and one Quantitative Reasoning Elective*

At the end of each semester, staff of the CEHHS Office of Advising and Student Services will compile a list of students ready to change to departmental advising. Students will be emailed an advising transition letter with the name and contact information of their new department advisor. Students will then be responsible for scheduling a meeting with their new advisor to complete this transition. Scheduling with KRSS Advisors should be done via email by contacting your new advisor directly.

Minimum Grades and Required GPA for Continuation in the Major

Any Recreation and Sport Management course taken must be passed with a minimum grade of C. A 2.5 GPA is required to register for RSM 290N*, RSM 390N*, and RSM 490N and to graduate.

College of Education, Health and Human Sciences Honors Program

Recreation and Sport Management majors have the opportunity to participate in the college's honors program. For eligibility and requirements, see College of Education, Health and Human Sciences Honors program.
## General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

Learning Outcomes
Learning objectives of the Recreation and Sport Management minor program:

1. Students will apply sport management principles in professional settings.
2. Students will illustrate current knowledge and skills necessary for practice in a sport management setting.
3. Students will understand the foundational knowledge and skills needed in the sport management profession.
4. Students will demonstrate capacity for critical thinking.

---

**Requirements**

**Rationale**

The Sport Management Program offered a minor through the early years of the program and through the 1990’s. The minor was eventually phased out due to lack of the faculty resources and ability to accommodate the demand by students. The Sport Management Program faculty has more than doubled since 2001 and the establishment of the Sport Management Doctoral Program (2007) has also provided resources for additional class offerings. Anecdotal evidence from students in advising sessions and class discussions suggest there would be interest in pursuing this option. The curriculum changes for the Sport Management major in 2020 allows for the reinstitution of the Sport Management minor. The Sport Management minor will have five required classes and one elective RSM class.

**Financial Impact**

Classes in the minor are currently being offered and taught by current faculty and department resources. We do not anticipate additional resources being needed.

**Impact on Other Units**

This will allow students in other majors to pursue a minor in Sport Management.

**Have you consulted with all programs/departments that will be impacted by this change?**

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Therapeutic Recreation major prepares students for employment in a variety of health care settings including programs for mental health and intellectual disabilities, physical rehabilitation centers, drug and alcohol treatment centers, and community-based programs. The program requires several out-of-class commitments, including overnight and weekend day commitments, and students should be prepared to complete background checks, drug screens, and other organizational requirements. Additionally, this program requires three field experiences that must be taken in sequence. The first two are part-time practicum experiences and the program concludes with a semester-long internship experience. Graduates fulfill the eligibility requirements for National Council for Therapeutic Recreation Certification.

Major Requirements and Rules

Advising Transition

Academic advising for freshmen, sophomores, and transfer students in the Therapeutic Recreation major occurs in the College of Education, Health, and Human Sciences (CEHHS) Office of Advising and Student Services (BEC 332). If you have not been advised by anyone in CEHHS Advising before, please visit their website for more information about scheduling an appointment with their office. The KRSS Advising Staff is not able to review a student's academic history if they are not currently a Therapeutic Recreation major.

A student will transition from CEHHS Advising to KRSS Department Advising after he/she completes the following:

- Maintains a minimum UT GPA of 2.5 after a minimum of 30 hours of coursework
- Completion of RSM 201 with a grade of C or better
- Completion of ENGL 101* and ENGL 102*, and one Quantitative Reasoning course

At the end of each semester, staff of the CEHHS Office of Advising and Student Services will compile a list of students ready to change to departmental advising. Students will be emailed an advising transition letter with the name and contact information of their new department advisor. Students will then be responsible for scheduling a meeting with their new advisor to complete this transition. Scheduling with KRSS Advisors should be done via email by contacting your new advisor directly.

Minimum Grades and Required GPA for Continuation in the Major

Any Recreation and Sport Management course taken must be passed with a minimum grade of C. A 2.5 GPA is required to register for RSM 294N*, RSM 394N*, and RSM 494N and to graduate.

College of Education, Health and Human Sciences Honors Program

Sport Management majors have the opportunity to participate in the college's honors program. For eligibility and requirements, see College of Education, Health and Human Sciences Honors Program.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements

Rationale*  This catalog adjustment will help to correct an discrepancy between the catalog and DARS, and will ensure students are being advised and directed correctly.

Financial Impact*  This adjustment is not anticipated to require additional financial resources.

Impact on Other Units*  We do not anticipate this change having an impact on other units.

Have you consulted with all programs/departments that will be impacted by this change?*  Yes  No

Administrative Use Only

Registration Enforced (RE) Corequisite(s)

Department Enforced (DE) Corequisite(s)

Recommended Background

Comments  Priority should be given to nutrition students first

Registration Restriction(s)  Registration Permission

Equivalency
**Rationale**

Implement a registration restriction to prioritize Nutrition students due to the course becoming a required course for dietetics majors and to guarantee on-time graduation.

**Impact on Other Units**

Since this course is only required for the nutrition students, dietetic concentration only, the proposed modifications will not impact other programs as this course was exclusively available to nutrition students specializing in dietetics.

**Financial Impact**

No impact. This modification will not have a financial impact on other units across campus, as this course was exclusively available to nutrition students specializing in dietetics.

Registration Enforced (RE)

BIOL 160* or BCMB 230
**Rationale**

*CHEM 260*

**NUTR 311 – Physiological Biochemistry**

(RE) Prerequisite(s): BIOL160* or BCMB 230, Recommended Background CHEM 260.

Formerly: NUTR 311 – Physiological Biochemistry

(RE) Prerequisite(s): BIOL160* or BCMB 230

**Rationale:** In the 2023-2024 catalog, we removed CHEM 260 as a prerequisite to provide students with more flexibility in their course selections. However, we are now proposing to add CHEM 260 as Recommended Background based on recent evidence we have gathered regarding student performance in both CHEM 260 and other NUTR courses. Our findings indicate that students who completed CHEM 260 before enrolling in NUTR 311 performed significantly better compared to those who took NUTR 311 without prior CHEM 260 experience. This disparity in performance had a noticeable impact on the overall learning experience for all students in the class and their progress through the course material.

**Impact on Other Units**

Low impact. The proposed modification has no impact on other units

**Financial Impact**

Low impact. This change will not affect overall faculty course load, therefore, there is no financial impact expected on either the department or college budgets. This change; however, may impact financially other units across campus, as it may be taken as an elective.
Have you consulted with all programs/departments that will be impacted by this change?*

**NUTR 314 – Energy Metabolism and Metabolic Integration**

*(RE) Prerequisite(s): NUTR 311 or BCMB 401, and CHEM 260.*

*Formerly: NUTR 420 – Nutrition Research Design & Methods II (2)*

*(RE) Prerequisite(s): NUTR 311 or BCMB 401.*

In the 2023-2024 catalog, we removed CHEM 260 as a prerequisite to provide students with more flexibility in their course selections. However, we are now proposing to reinstate it based on recent evidence we have gathered regarding student performance in both CHEM 260 and other NUTR courses. Our findings indicate that students who completed CHEM 260 before enrolling in NUTR 311 (a prerequisite for NUTR 314) performed significantly better compared to those who took NUTR 311 without prior CHEM 260 experience. This disparity in performance had a noticeable impact on the overall learning experience for all students in the class and their progress through the course material.

This prerequisite change was approved by the Nutrition faculty. No additional approvals are required for this change. The change is not substantive and does not need to be reported to SACSCOC.

NUTR 321 – Vitamins in Human Nutrition

(RE) Prerequisite(s): NUTR 100* and BCMB 230. (RE) Corequisite(s): NUTR 322.

Formerly: NUTR 321 – Vitamins in Human Nutrition

(RE) Prerequisite(s): NUTR 100*. (RE) Corequisite(s): NUTR 322.

Supporting Information

Rationale: The inclusion of BCMB 230 (Fundamentals of human physiology, primarily focusing on cellular and organ-system interactions) as a prerequisite for NUTR 321 arises from routine curriculum evaluation and faculty input. These assessments have revealed that current students enrolled in NUTR 321 and NUTR 322 (both of which are co-requisites) lack fundamental knowledge in human physiology, particularly at the cellular and organ-system levels. This foundational understanding is essential for comprehending and mastering the course content. Notably, BCMB 230 is already a mandatory course for all nutrition majors. Therefore, we are proposing that students complete this course before taking NUTR 321 and NUTR 322. This adjustment aims to enhance student success in NUTR 321 and NUTR 322 by ensuring they have a solid foundation in human physiology.

Impact on Other Units*

Low impact. The proposed modifications could have implications for other programs in which students might consider taking NUTR 321 as an elective.
Financial Impact*

Low impact. This will not affect overall faculty course load, therefore, there is no financial impact expected on either the department or college budget. This change may impact financially other units across campus, as it may be taken as an elective.

Minerals in Human Nutrition

Nutritional and biochemical significance of minerals as it pertains to human health and disease. Second session semester course.
Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Statement about Crosslistings

If course is to be crosslisted, then use the "Crosslistings" tab on menu to the right to bring in all applicable secondary courses. You must start a crosslisting with the primary course, and all courses must exist before they can be crosslisted.

Rationale*

**NUTR 322 – Minerals in Human Nutrition**

(RE) Prerequisite(s): NUTR 100* and BCMB 230. (RE) Corequisite(s): NUTR 321.

*Formerly: NUTR 321 – Vitamins in Human Nutrition*

(RE) Prerequisite(s): NUTR 100*. (RE) Corequisite(s): NUTR 321.

The inclusion of BCMB 230 (Fundamentals of human physiology, primarily focusing on cellular and organ-system interactions) as a prerequisite for NUTR 322 arises from routine curriculum evaluation and faculty input. These assessments have revealed that current students enrolled in NUTR 321 and NUTR 322 (both of which are co-requisites) lack fundamental knowledge in human physiology, particularly at the cellular and organ-system levels. This foundational understanding is essential for comprehending and mastering the course content. Notably, BCMB 230 is already a mandatory course for all nutrition majors. Therefore, we are proposing that students complete this course before taking NUTR 321 and NUTR 322. This adjustment aims to enhance student success in NUTR 321 and NUTR 322 by ensuring they have a solid foundation in human physiology.

This prerequisite change was approved by the Nutrition faculty. No additional approvals are required for this change. The change is not substantive and does not need to be reported to SACSCOC.
Financial Impact*

Low impact. This will not affect overall faculty course load, therefore, there is no financial impact expected on either the department or college budget. This change; however, may impact financially other units across campus, as it may be taken as an elective.

Have you consulted with all programs/departments that will be impacted by this change?*

</table>

| **Rationale** |
| Reinstating faculty permission as a requirement in the course description of NUTR 493 – Directed Study is essential to ensure guided academic oversight. Faculty permission warrants that each iteration of NUTR 493 undergoes careful customization of learning objectives, allowing the course to be tailored to meet the specific needs and interests of individual students. This approach facilitates a more focused and meaningful learning experience, incorporating projects closely aligned with a student's academic and career goals. Moreover, it aids in ensuring that students are adequately prepared for the responsibilities and expectations associated with a directed study course, contributing to the maintenance of the overall quality of academic work produced within the course. |

| **Impact on Other Units** |

**Student Information System ID**
The Nutrition major is designed for students interested in basic and applied sciences, and students are able to pursue one of three concentrations: the Biomedical Nutrition Science Concentration, the Community Nutrition Concentration, or the Dietetics Concentration. The Biomedical Nutrition Science Concentration of the Nutrition Major prepares students for graduate study in biological and health sciences or for health professional programs, such as pharmacy and medicine. This concentration also prepares students for careers as laboratory technicians, research assistants, technical consultants, and sales representatives in the biomedical and nutrition industries. Additional coursework may be necessary to meet health professional program prerequisites and integration of this coursework should be coordinated closely with the academic advisor and/or pre-health advising as these requirements will vary by program. Students completing this track are not eligible to apply to any ACEND-accredited supervised practice programs.

Requirements for Transition to Upper Division

In order to graduate with a major in nutrition, regardless of concentration, students must earn a grade of C or better in every required nutrition course.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Select any courses not already required for the major. Some pre-health tracks specifically require SOCI 120*, PHYS 221*, and PHYS 222*. Students pursuing a health professional career may choose to complete the pre-health professions minor and should consult with their advisor, relevant pre-health guide, and undergraduate catalog in selecting electives to fulfill requirements. Students NOT pursuing a health professional career, should consult with their advisor in selecting electives. Course recommendations include NUTR (any 200+ not already required for the major), NUTR 412, NUTR 415*, NUTR 416, and NUTR 493; BIOL (any 200+); BCMB (any 200+); KNS (any 200+); MICR (any 200+ not already required); EEB (any 200+ not already required); FDSC courses; ANSC 320, ANSC 330, ANSC 380; CFS 210*, CFS 211, CFS 213, or CFS 240; PSYC 301, PSYC 370, PSYC 385*, PSYC 445, PSYC 450, PSYC 459, or PSYC 461; PUBH 202, PUBH 315, PUBH 401, or PUBH 420.

Students pursuing a pre-health track should consult with their advisor and the relevant pre-health guide for Quantitative Reasoning Elective recommendations/requirements.

Select courses from the Volunteer Core list.

Students in some pre-health tracks are required to also take the lab class (CHEM 269) associated with CHEM 260 and should consult with their advisor and the relevant pre-health guide.

Students in some pre-health tracks are required to also take the lab class (CHEM 359) associated with CHEM 360 and should consult with their advisor and the relevant pre-health guide.

Must be taken at UTK.

Some pre-health tracks require SOCI 120*, which also meets the Global Citizenship – US Volunteer Core requirement.
The addition of ENGL 255 as an option to fulfill the WC requirement (along with ENGL 295 and 360) was suggested by the Assistant Director of Undergraduate Studies in the English Department after discussion about the intent for nutrition students to develop "communication and documentation skills sufficient for entry into professional practice," specifically by "demonstrating effective and professional oral and written communication and documentation." This course achieves those outcomes with a particular focus on communicating with a public audience, which is particularly relevant to nutrition professionals who work in public-facing positions (see attached document and approval from the English Department).

No impact. This modification will not have a financial impact on other units across campus.

No impact. The suggested alterations will not have any repercussions on other programs. Students majoring in nutrition are currently mandated to enroll in an English communication course (ENGL 255 or ENGL 295/360). Approval for this modification has already been granted by the English department.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
For qualified students, the Department of Nutrition offers a 5-year BS/MS accelerated degree program with a major in Nutrition and a concentration in Biomedical Nutrition Science. Central to this program is that a qualified student may take up to 9 credit hours of approved graduate courses for their senior undergraduate electives and have them count toward both the BS degree and the MS degree. Students will be considered for conditional admission to the program by the end of their junior year of undergraduate study at UT. Students can choose from a project option or a thesis option, based on their original research. Those who choose the thesis option will begin working on their research project not later than the beginning of their senior year of undergraduate studies by enrolling in NUTR 493 and/or NUTR 499. For each student in the program, a graduate advisory committee composed of a minimum of three faculty members must be established before completion of Term 7. To be considered for conditional admission to the program:

- A student must be a declared Nutrition major, Biomedical Nutrition Science Concentration, with a minimum GPA of 3.30, must have completed at least 15 credit hours of Nutrition courses, and must have completed at least 90 credit hours of the 120 credit hours of coursework required for the BS degree with a major in Nutrition.
- A student must provide three letters of support from Nutrition faculty members serving on the graduate and undergraduate committees.
- A student must obtain a commitment from a Nutrition graduate research faculty member to serve as their graduate mentor-advisor (i.e., major professor) and as the chair of their graduate advisory committee.
- The Department may consider other relevant factors such as an applicant's work experience and level of maturity before conditionally admitting a student to the BS/MS program. Conditional admission of a student into the 5-year BS/MS program must be approved by both the Department of Nutrition and the Graduate School. Students will be typically informed of the outcome of their application before they start their senior year of undergraduate study.

Any graduate course taken before satisfying all requirements for the BS degree must be approved by the student's graduate advisory committee, the Director of Graduate Studies, and the Graduate School. These graduate courses must be identified in advance in consultation with the undergraduate advisor and the graduate advisory committee.

A student that is conditionally admitted to the BS-MS program may complete up to 9 credit hours of graduate level coursework during the student's undergraduate study and apply those 9 credit hours to satisfy both the BS degree requirements and also the MS degree requirements, provided that these graduate credit hours were approved by both the Department and by the Graduate School.

The form "Nutrition Conditional Admission 5 Year BS-MS" is available from the Director of Graduate Studies and must be completed and signed by the undergraduate advisor, undergraduate coordinator, and graduate advisory committee by May 1 of their junior year. After review by the Department, the form will be signed by the Director of Graduate Studies and submitted to the Graduate School for approval and processing.

To receive graduate credit for the 9 credit hours listed on the Nutrition Conditional
Admission Form and approved by their graduate advisory committee, and others granting
approval by signing that form, the student must complete and submit the Senior
Requesting Graduate Credit Form to the Graduate School. If the graduate courses are to
be taken during different semesters, the student will need to submit this form per each
relevant semester.

Conditional admission into the BS/MS program does not guarantee acceptance into either
the Graduate School or the MS program. Students in the BS/MS program must submit an
application for admission to the Office of Graduate Admissions and to the MS program
during their senior year of undergraduate study for the term immediately following the
completion of their undergraduate study, following the same procedures of all other
student applicants. Students will be fully admitted to the MS program after they have been
accepted both by the Graduate School and by the Nutrition Department. Students will not
be eligible for graduate assistantships until they are enrolled as graduate-level students in
the Graduate School.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they
are listed using the content exactly as it appears below. For additional information or examples, please see
the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville
Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Select any courses not already required for the major. Some pre-health tracks specifically require SOCI 120*, PHYS 221*, and PHYS 222*. Students pursuing a health professional career may choose to complete the pre-health professions minor and should consult with their advisor, relevant pre-health guide, and undergraduate catalog in selecting electives to fulfill requirements. Students NOT pursuing a health professional career, should consult with their advisor in selecting electives. Course recommendations include NUTR (any 200+ not already required for the major), NUTR 412, NUTR 415*, NUTR 416, and NUTR 493; BIOL (any 200+); BCMB (any 200+); KNS (any 200+); MICR (any 200+ not already required); EEB (any 200+ not already required); FDSC courses; ANSC 320, ANSC 330, ANSC 380; CFS 210*, CFS 211, CFS 213, or CFS 240; PSYC 301, PSYC 370, PSYC 385*, PSYC 445, PSYC 450, PSYC 459, or PSYC 461; PUBH 202, PUBH 315, PUBH 401, or PUBH 420.

Students pursuing a pre-health track should consult with their advisor and the relevant pre-health guide for Quantitative Reasoning Elective recommendations/requirements.

Select courses from the Volunteer Core list.

Students in some pre-health tracks are required to also take the lab class (CHEM 269) associated with CHEM 260 and should consult with their advisor and the relevant pre-health guide.

Students in some pre-health tracks are required to also take the lab class (CHEM 359) associated with CHEM 360 and should consult with their advisor and the relevant pre-health guide.

Must be taken at UTK.
Some pre-health tracks require SOCI 120*, which also meets the Global Citizenship – US Volunteer Core requirement.

| * | Meets Volunteer Core Requirement. |
| ** | Students interested in completing the 5-year BS/MS program must complete and submit the "Nutrition Conditional Admission 5 Year BS-MS" form available from the Director of Graduate Studies by May 1st of their junior year. |
| *** | Students accepted into the 5-year accelerated BS/MS program, with approval from their Graduate Committee, should use these Unrestricted Electives to enroll in 9 hours of graduate level coursework in their senior year. This will allow these courses to count toward both the BS degree and the MS degree. |

**Rationale**

1- Rationale for changing the name: During the prior curricular revisions to the program, the word "Program" was inadvertently omitted. According to the Office of the University Registrar, this alteration necessitates prior approval from the CRC committee.

1- Rationale for adding English 255/257: The addition of ENGL 255 or ENGL 257(Honors) as an option to fulfill the WC requirement (along with ENGL 295 and 360) was suggested by the Assistant Director of Undergraduate Studies in the English Department after discussion about the intent for nutrition students to develop "communication and documentation skills sufficient for entry into professional practice," specifically by "demonstrating effective and professional oral and written communication and documentation." This course achieves those outcomes with a particular focus on communicating with a public audience, which is particularly relevant to nutrition professionals who work in public-facing positions (see attached document demonstrating the approval from the English Department).

**Financial Impact**

No impact. This modification will not have a financial impact on other units across campus.

**Impact on Other Units**

No impact. The suggested alterations will not have any repercussions on other programs. Students majoring in nutrition are currently mandated to enroll in an English communication course (ENGL 255 or ENGL 295/360). Approval for this modification has already been granted by the English department.

- Reported to SACS
The Nutrition major is designed for students interested in basic, applied, and community nutrition sciences, and students are able to pursue one of three concentrations: The Biomedical Nutrition Science Concentration, the Community Nutrition Concentration, and the Dietetics Concentration. Each concentration includes a foundation in the basic sciences and introductory nutrition coursework which is built upon through advanced concentration-specific coursework, including nutrient metabolism, nutrition in disease prevention and treatment, elements of community nutrition, and interpretation of nutrition research literature. Students pursuing the Community Nutrition Concentration are trained in competencies needed to become a Certified Health Education Specialist (CHES) and to work in the community in a variety of roles, such as nutrition educators, WIC nutritionists, health and wellness coaches, and worksite wellness program coordinators, and in a variety of settings, such as public health departments, community agencies, and Extension programs. Individuals with CHES certifications are commonly employed in healthcare, government, university, business, community/non-profit, and K-12 education settings. For qualified students, the Department of Nutrition offers a 5-year BS/MS accelerated degree program with a major in Nutrition and a concentration in Community Nutrition. Interested students should see the section of the catalog specific to this program or see the Nutrition program information in the Graduate Catalog. This can lead to the Public Health Minor, but

1. Select courses from the Volunteer Core* list.

2. Select any Quantitative Reasoning* course from the Volunteer Core* list that is not already required for the major.

3. Select any courses not already required for the major.

5. Must be taken at UTK.

6. Directed study with a faculty member in Public Health Nutrition for 6 hours per week in Term 6 and 9 hours per week in Terms 7 and 8.

7. Professional Electives (14 credit hours): Choose from the list of Professional Electives in Nutrition (below) and/or complete coursework in any of the Suggested Focus Areas (below). Students may choose to complete a minor in any of the suggested focus areas or may take selected courses across the focus areas to fulfill the 14-hour requirement. Professional Electives in Nutrition: NUTR 311, NUTR 314*, NUTR 415*, NUTR 416*, NUTR 450. Unrestricted electives may be used to fulfill prerequisites. Suggested Focus Areas: Agricultural Leadership; Business; Communication Studies; Child and Family Studies; Culinary Arts; Food and Agriculture Business; Food Science; Journalism and Electronic Media; One Health; Psychology; Public
Courses approved from these Suggested Focus Areas: ACCT 200; AGNR 101, AGNR 180, AGNR 217, and AGNR 480; ALEC 102, ALEC 150, ALEC 202, ALEC 211, ALEC 303, ALEC 340, ALEC 441, ALEC 450, ALEC 483, and ALEC 485; ANSC 150; AREC 201, AREC 212, AREC 270, AREC 342, AREC 345, AREC 350, and AREC 470; BCPP 101, BCPP 480, and BCPP 481; BIOL 105; BUAD 202; CCI 150; CFS 210, CFS 211, CFS 213, CFS 220, CFS 240, CFS 320, CFS 330, CFS 345, CFS 360, and CFS 385; CMST 235, CMST 250, CMST 312, CMST 342, CMST 410, CMST 412, CMST 414, CMST 416, CMST 419, CMST 426, CMST 429, CMST 442, CMST 444, CMST 446, and CMST 449; ECON 201, ECON 211, ECON 311, ECON 331, ECON 362, ECON 381, ECON 421, ECON 436, ECON 441, ECON 471, and ECON 472; EEB 306 and EEB 450; EPP 123, EPP 201, EPP 313, EPP 410, EPP 412, and EPP 425; ESS 110, ESS 220, ESS 454, and ESS 462; FDSC 100, FDSC 150, FDSC 241, FDSC 410 (or FDSC 418), and FDSC 421 (or FDSC 428); FINC 300; FORS 335 and FORS 422; FWF 250, FWF 320, and FWF 420; GEOG 204, GEOG 212, GEOG 333, GEOG 345, GEOG 346, GEOG 430, GEOG 433, GEOG 436, GEOG 443, GEOG 446, and GEOG 451; GEOI 201; GEOL 206, GEOL 454, GEOL 456; HBS 481 and HBS 482; HIAF 480; HIEU 430 and HIEU 432; HIST 365 and HIST 410; HIEU 433; HTM 101, HTM 210, HTM 212, HTM 225, HTM 311, HTM 335, HTM 435, HTM 445, HTM 450, and HTM 484; JREM 175, JREM 200, JREM 230, JREM 367, JREM 400, JREM 410, JREM 445, JREM 456, and JREM 466; MARK 300; MICR 330, MICR 420, MICR 431, MICR 459, and MICR 470; MGT 300; PHIL 346 and PHIL 441; PLSC 115 and PLSC 250; POLS 240, POLS 311, POLS 350, POLS 366, POLS 370, POLS 441, POLS 442, POLS 456, POLS 461, POLS 463, POLS 470, POLS 473, and POLS 479; PSYC 211, PSYC 235, PSYC 301, PSYC 335, PSYC 360, PSYC 409, PSYC 434, PSYC 435, PSYC 471, and PSYC 491; PUBH 330, PUBH 401, and PUBH 420; RMM 210, RMM 225, RMM 310, RMM 311, RMM 320, RMM 341, RMM 346, RMM 376, RMM 411, RMM 421, RMM 425, RMM 435, and RMM 441; SOCI 110, SOCI 341, SOCI 343, SOCI 345, SOCI 360, SOCI 361, SOCI 363, SOCI 375, SOCI 422, SOCI 446, SOCI 449, SOCI 452, SOCI 456, SOCI 460, SOCI 461, SOCI 465, and SOCI 472; SOWK 200, SOWK 250, SOWK 314, SOWK 316, SOWK 318, SOWK 324, SOWK 416, SOWK 418, and SOWK 444; WGS 370.

* Meets Volunteer Core Requirements.
Rationale

These are predominantly housekeeping items, reflecting minor revisions throughout the "showcase" for this concentration. Specific to terms 6-8, the revision to credit counts is to assure that students have the required 90 credits necessary at the end of their junior year that qualify them for applying for Senior Standing in Term 7, should they decide to pursue the 5-year accelerated BS/MS in Community Nutrition.

Term 1: We have removed 1 credit of unrestricted electives and NUTR 100 (3). We have added 3 credits of GC-US elective and CMST 240/247 (3 credits). Therefore, the overall credits in Term 1 have increased by 2 (totaling 16 credits).

Term 2: We removed the Expanded Perspectives Elective (3), as this requirement is met other required coursework. We replace these credits with 3 credits of Unrestricted Electives. No change to overall term credit hours.

Term 3: We removed 3 credits of Professional Electives and replaced these with 3 credits of Unrestricted Electives (increasing flexibility for students). We also added NUTR 100 to this term (from Term 1). No change to overall term credit hours.

Term 4: We replaced NUTR 200 (3) and NUTR 216 (3) with NUTR 220 (3) and NUTR 285 (3). No change to overall term credit hours.

Term 5: We replaced NUTR 220 (3) and NUTR 285 (3) with NUTR 200 (3) and NUTR 216 (3). In addition, we have revised the course name for NUTR 272, reflecting the course title revision brought forward on this same agenda. Finally, we have added an asterisk to the PUBH 320 entry, to reflect it's designation as a Volunteer Core course. No change to overall term credit hours.

Term 6: We replaced 3 credits of Professional Electives with 3 credits of Unrestricted Electives. We also added ENGL 255/257 as an option for completing the required WC coursework for Vol Core. Support from the offering department is included in supplementary materials. Finally, we added a statement alerting interested and eligible students to apply for the Accelerated Combined BS/MS Program during this term. No change to overall term credit hours.

Term 7: We replaced the PUBH elective (3) with Professional Elective (3) credits, and reduced the existing Professional Elective to 2 credits (for a total of 5 credits of Professional Electives). We added 3 credits of NUTR 493. This resulted in an overall reduction in term hours by one credit (now 15 credits).

Term 8: We removed GCUS elective (3) (now in Term 1) and added 2 additional NUTR 493. Therefore, the overall term credits dropped by one (now 14).

Footnote superscripts and content have been revised to reflect these showcase changes.
Financial Impact*

WC requirement: Adding ENGL 255/257 to list of options as an option to fulfill the WC requirement will not have any financial impact on other units across campus. Students majoring in nutrition are currently mandated to enroll in an English communication course (ENGL 255 or ENGL 295/360). Approval for this modification has already been granted by the English department.

All other changes are housekeeping items.

Impact on Other Units*

Adding ENGL 255/257 to list of options as an option to fulfill the WC requirement will not have any repercussions on other programs. Students majoring in nutrition are currently mandated to enroll in an English communication course (ENGL 255 or ENGL 295/360). Approval for this modification has already been granted by the English department.

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
For qualified students, the Department of Nutrition offers a 5-year BS/MS accelerated degree program with a major in Nutrition and a concentration in Community Nutrition. Central to this program is that a qualified student may take up to 9 credit hours of approved graduate courses for their senior undergraduate electives and have them count toward both the BS degree and the MS degree. Students will be considered for conditional admission to the program by the end of their junior year of undergraduate study at UT. Students can choose from a project option or a course-only, no comprehensive exam option. Those who choose the project option will begin working on their project not later than Term 6 of undergraduate studies by enrolling in NUTR 493 with Public Health Nutrition faculty. For each student in the program, a graduate advisory committee composed of a minimum of three faculty members must be established before completion of Term 7. To be considered for conditional admission to the program. This can lead to the Public Health Minor, but the student must declare it.

- A student must be a declared Nutrition major, Community Nutrition Concentration, with a minimum GPA of 3.30, must have completed at least 15 credit hours of Nutrition courses, and must have completed at least 90 credit hours of the 120 credit hours of coursework required for the BS degree with a major in Nutrition.
- A student must provide three letters of support from three Community Nutrition faculty members.
- A student must obtain a commitment from a Nutrition graduate research faculty member to serve as their graduate mentor-advisor (i.e., major professor) and as the chair of their graduate advisory committee.
- The Department may consider other relevant factors such as an applicant's work experience before conditionally admitting a student to the BS/MS accelerated degree program. Conditional admission of a student into the 5-year BS/MS accelerated degree program must be approved by both the Department of Nutrition and the Graduate School. Students will be typically informed of the outcome of their application before they start their senior year of undergraduate study.

Any graduate course taken before satisfying all requirements for the BS degree must be approved by the student's graduate advisory committee, the Director of the Program in Public Health Nutrition, the Department Director of Graduate Studies, and the Graduate School. These graduate courses must be identified in advance in consultation with the undergraduate advisor and the graduate advisory committee.

A student that is conditionally admitted to the BS-MS accelerated degree program may complete up to 9 credit hours of graduate level coursework during the student's undergraduate study and apply those 9 credit hours to satisfy both the BS degree requirements and also the MS degree requirements, provided that these graduate credit hours were approved by both the Department and by the Graduate School.

The form "Nutrition Conditional Admission 5 Year BS-MS" is available from the Director of Graduate Studies and must be completed and signed by the undergraduate advisor, undergraduate coordinator, and graduate advisory committee by May 1st of their junior year. After review by the Department, the form will be signed by the Director of Graduate Studies and submitted to the Graduate School for approval and processing.
To receive graduate credit for the 9 credit hours listed on the Nutrition Conditional Admission Form and approved by their graduate advisory committee, and others granting approval by signing that form, the student must complete and submit the Senior Requesting Graduate Credit Form to the Graduate School. If the graduate courses are to be taken during different semesters, the student will need to submit this form per each relevant semester.

Conditional admission into the BS/MS accelerated degree program does not guarantee acceptance into either the Graduate School or the MS program. Students in the BS/MS accelerated degree program must submit an application for admission to the Office of Graduate Admissions and to the MS program during their senior year of undergraduate study for the fall term immediately following the completion of their undergraduate study, following the same procedures of all other student applicants. Students will be fully admitted to the MS program after they have been accepted both by the Graduate School and by the Nutrition Department. Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

**General Instructions for Requirements**

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

1. Select courses from the Volunteer Core* list.

2. Select any Quantitative Reasoning* course from the Volunteer Core* list that is not already required for the major.

3. Select any courses not already required for the major.

4. Select from PUBH 315, PUBH 350, PUBH 401, PUBH 420, PUBH 430.

5. Must be taken at UTK.

6. Directed study with a faculty member in Public Health Nutrition for 6 hours per week in Terms 6 and 7 and 9 hours per week in Term 8.

7. Professional Electives (6 credit hours): Choose from the list of Professional Electives in Nutrition (below) and/or complete coursework in any of the listed focus areas (below). Students may choose to work toward a minor in any of the suggested focus areas or may take selected courses across the focus areas to fulfill the 6-hour requirement. **Professional Electives in Nutrition:** NUTR 311, NUTR 314*, NUTR 415*, NUTR 416*, NUTR 450. Unrestricted electives may be used to fulfill prerequisites. **Suggested Focus Areas:** Agricultural Leadership; Business; Communication Studies; Child & Family Studies; Culinary Arts; Food and Agriculture Business; Food Science; Journalism and Electronic Media; One Health; Psychology; Public Policy Analytics; Retail and Consumer Sciences; Sustainability; Social Justice; Tourism and Hospitality Management.

**Courses approved from these Suggested Focus Areas:** ACCT 200; AGNR 101, AGNR 180, AGNR 217, and AGNR 480; ALEC 102, ALEC 150, ALEC 202, ALEC 211, ALEC 303, ALEC 340, ALEC 441, ALEC 450, ALEC 483, and ALEC 485; ANSC 150; AREC 201, AREC 212, AREC 270, AREC 342, AREC 345, AREC 350, and AREC 470; BCPP 101, BCPP 480, and BCPP 481; BIOL 105;
BUAD 202; CCI 150; CFS 210, CFS 211, CFS 213, CFS 220, CFS 240, CFS 320, CFS 330, CFS 345, CFS 350, and CFS 385; CMST 235, CMST 250, CMST 312,

CMST 342, CMST 410, CMST 412, CMST 414, CMST 416, CMST 419, CMST 426, CMST 429, CMST 442, CMST 444, CMST 446, and CMST 449; ECON 201, ECON 211, ECON 311, ECON 331, ECON 362, ECON 381, ECON 421, ECON 436, ECON 441, ECON 471, and ECON 472; EEB 306 and EEB 450; EPP 123, EPP 201, EPP 313, EPP 410, EPP 411, and EPP 425; ESS 110, ESS 220, ESS 454, and ESS 462; FDSC 100, FDSC 150, FDSC 241, FDSC 410 (or FDSC 418), and FDSC 421 (or FDSC 428); FINC 300; FORS 335 and FORS 422; FWF 250, FWF 320, and FWF 420; GEOG 204, GEOG 206, GEOG 333, GEOG 345, GEOG 346, GEOG 430, GEOG 433, GEOG 436, GEOG 443, GEOG 446, and GEOG 451; GEOL 202S, GEOL 206, GEOL 454, GEOL 456; HBS 481 and HBS 482; HIAF 480; HIAF 480; HIEU 430 and HIEU 432; HIST 365 and HIST 410; HIUS 443; HTM 101, HTM 210, HTM 212, HTM 225, HTM 311, HTM 335, HTM 435, HTM 445, HTM 450, and HTM 484; JREM 175, JREM 200, JREM 230, JREM 367, JREM 400, JREM 410, JREM 455, JREM 456, and JREM 466; MARK 300; MICR 330, MICR 420, MICR 431, MICR 459, and MICR 470; MGT 300; PHIL 346 and PHIL 441; PLSC 115 and PLSC 250; POLS 240, POLS 311, POLS 350, POLS 366, POLS 370, POLS 441, POLS 442, POLS 456, POLS 461, POLS 463, POLS 470, POLS 473, and POLS 479; PSYC 211, PSYC 235, PSYC 301, PSYC 335, PSYC 360, PSYC 409, PSYC 434, PSYC 435, PSYC 471, and PSYC 491; PUBH 330, PUBH 401, and PUBH 420; RMM 210, RMM 225, RMM 310, RMM 311, RMM 320, RMM 341, RMM 346, RMM 376, RMM 411, RMM 412, RMM 421, RMM 425, RMM 435, and RMM 441; SOCI 110, SOCI 341, SOCI 343, SOCI 345, SOCI 360, SOCI 361, SOCI 363, SOCI 375, SOCI 442, SOCI 446, SOCI 449, SOCI 452, SOCI 456, SOCI 460, SOCI 461, SOCI 465, and SOCI 472; SOWK 200, SOWK 250, SOWK 314, SOWK 316, SOWK 318, SOWK 324, SOWK 416, SOWK 418, and SOWK 444; WGS 370.

8. Students will work with their Public Health Nutrition faculty member to identify appropriate courses.

* Meets Volunteer Core Requirements.
These are predominantly house-keeping items, reflecting minor revisions throughout the "showcase" for this concentration. Specific to terms 6-8, the revision to credit counts is to assure that students have the required 90 credits necessary at the end of their junior year that qualify them for applying for Senior Standing in Term 7, should they decide to pursue the 5-year accelerated BS/MS in Community Nutrition.

Term 1: We have removed 1 credit of unrestricted electives and NUTR 100 (3). We have added 3 credits of GC-US elective and CMST 240/247 (3 credits). Therefore, the overall credits in Term 1 have increased by 2 (totaling 16 credits).

Term 2: We removed the Expanded Perspectives Elective (3), as this requirement is met other required coursework. We replace these credits with 3 credits of Unrestricted Electives. No change to overall term credit hours.

Term 3: We removed 3 credits of Professional Electives and replaced these with 3 credits of Unrestricted Electives (increasing flexibility for students). We also added NUTR 100 to this term (from Term 1). No change to overall term credit hours.

Term 4: We replaced NUTR 200 (3) and NUTR 216 (3) with NUTR 220 (3) and NUTR 285 (3). No change to overall term credit hours.

Term 5: We replaced NUTR 220 (3) and NUTR 285 (3) with NUTR 200 (3) and NUTR 216 (3). In addition, we have revised the course name for NUTR 272, reflecting the course title revision brought forward on this same agenda. Finally, we have added an asterisk to the PUBH 320 entry, to reflect it's designation as a Volunteer Core course. No change to overall term credit hours.

Term 6: We replaced 3 credits of Professional Electives with 3 credits of Unrestricted Electives. We also added ENGL 255/257 as an option for completing the required WC coursework for Vol Core. Support from the offering department is included in supplementary materials. Finally, we added a statement alerting interested and eligible students to apply for the Accelerated Combined BS/MS Program during this term. No change to overall term credit hours.

Term 7: We removed the PUBH elective (3) and added 2 credits of NUTR 493. We replaced the prescribed two 500-level NUTR courses with “Approved Graduate Course” (6 total credits). This resulted in an overall reduction in term hours by one credit (now 15 credits).

Term 8: We removed GCUS elective (3) (now in Term 1) and added 2 additional NUTR 493 credits. In addition, we replaced NUTR 507 (3) with “Approved Graduate Course” (3 credits). Therefore, the overall term credits dropped by one (now 14).

Footnote superscripts and content have been revised to reflect these showcase changes.
### Financial Impact*

WC requirement: Adding ENGL 255/257 to list of options as an option to fulfill the WC requirement will not have any financial impact on other units across campus. Students majoring in nutrition are currently mandated to enroll in an English communication course (ENGL 255 or ENGL 295/360). Approval for this modification has already been granted by the English department.

All other changes are housekeeping items.

### Impact on Other Units*

Adding ENGL 255/257 to list of options as an option to fulfill the WC requirement will not have any repercussions on other programs. Students majoring in nutrition are currently mandated to enroll in an English communication course (ENGL 255 or ENGL 295/360). Approval for this modification has already been granted by the English department.

### Have you consulted with all programs/departments that will be impacted by this change?*

College of Education, Health, and Human Sciences - Nutrition - Nutrition Major, BS in Health and Human Sciences – Dietetics Concentration

2024-2025 UG Revise Program

General Catalog Information

College* College of Education, Health, and Human Sciences

Department* Nutrition

Program Name* Nutrition Major, BS in Health and Human Sciences – Dietetics Concentration

Degree Type* Bachelor of Science in Health and Human Sciences

Program Type* Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
## Description

The Nutrition major is designed for students interested in basic and applied sciences, and students are able to pursue one of three concentrations: the Biomedical Nutrition Science Concentration, the Community Nutrition Concentration, or the Dietetics Concentration. The Dietetics Concentration of the Nutrition Major is accredited as a Didactic Program in Dietetics (DPD) by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics, 120 S. Riverside Plaza, Suite 2190, Chicago, Illinois 60606-6995, (312) 899-0040 ext. 5400, url [https://www.eatrightpro.org/acend](https://www.eatrightpro.org/acend). As such, graduates are eligible to apply for ACEND-accredited supervised practice programs and, following successful completion are eligible to take the Registration Examination for Dietitians to become Registered Dietitian Nutritionists (RDNs) and active members of the Academy of Nutrition and Dietetics. RDNs are food and nutrition professionals who unite the science of nutrition with the application of nutrition principles to improve health through interventions, including education and counseling, at the community and individual levels or by addressing nutritional aspects of medical problems in clinical practice. Many work in acute care hospitals, long-term care, and medical offices as members of the health care team or in community-based settings. Other areas of practice include corporate wellness, journalism, sports nutrition, the food and nutrition industry, and others.

The accelerated combined bachelor’s/master’s program leading to a B.S. in Health and Human Sciences – Nutrition major, Dietetics concentration/M.S. in Nutrition, concentration in Clinical Nutrition and Dietetics [HPMB1](#)

Students enrolled in the Bachelor of Science program with a Nutrition-Dietetics major or who are completing all coursework consistent with requirements of the Nutrition-Dietetics major who are interested in clinical nutrition practice as a RDN are eligible to apply.

### General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

1. Select any QR courses not already required for the major.

2. Select courses from the Volunteer Core* list.

3. Fulfills GCI requirement. Alternative courses may be considered to meet this requirement upon request, provided that students consult with their academic advisor.

4. Select any courses not already required for the major.

5. Select from FDSC 100*, FDSC 241, or HTM 101.

6. Must be taken at UT.

7. At the completion of term 6 – Students meeting eligibility requirements may apply for the accelerated combined bachelor’s/master’s program to pursue the M.S. Program in Nutrition, Clinical Nutrition and Dietetics Concentration, or continue on in the traditional Dietetics Concentration.

8. This course requirement is waived for students accepted to the accelerated combined bachelor’s/master’s in program to pursue the M.S. in Nutrition, Clinical Nutrition and Dietetics concentration, who are not in the Service Learning Honors program as associated competencies will be completed in a graduate course.

9. Students accepted to the accelerated combined bachelor’s/master’s program to pursue the M.S. in Nutrition, Clinical Nutrition and Dietetics concentration, must enroll in HTM 445 and approved graduate coursework.

* Meets Volunteer Core Requirements.
Rationale: The addition of ENGL 255 or ENGL 257 (Honors) as an option to fulfill the WC requirement (along with ENGL 295 and 360) was suggested by the Assistant Director of Undergraduate Studies in the English Department after discussion about the intent for nutrition students to develop "communication and documentation skills sufficient for entry into professional practice," specifically by "demonstrating effective and professional oral and written communication and documentation." This course achieves those outcomes with a particular focus on communicating with a public audience, which is particularly relevant to nutrition professionals who work in public-facing positions (see attached document demonstrating the approval from the English Department).

Rationale for removing FDSC 415: The decision to remove FDSC 415 from the dietetics curriculum as an option to fulfill the "food science" required element is supported by the Department of Food Science. This decision aims to ensure that the available course options optimally address the essential learning elements for aspiring dietetics professionals. The low enrollment of dietetic students in FDSC 415, coupled with its lack of coverage of fundamental food science principles compared to other available courses, further justifies its exclusion. The recent addition of HTM 101 as an alternative option enhances our capacity to streamline and improve the curriculum by eliminating FDSC 415 as a choice (see attached document demonstrating the approval from the Food Science Department).

Rationale for adding NUTR 216 or AGNR 180 on the list with an asterisk denoting fulfillment of the GCI requirement: Requiring dietetics students to choose between NUTR 216 and AGNR 180 to fulfill the "Global Citizenship – International" VolCore requirement better fulfills both the "global nutrition" and "environmental sustainability" required elements of the accredited undergraduate dietetics curriculum. Currently, these required elements are found minimally in other coursework, and this change would provide a better exposure to these required elements of the dietetics curriculum.

Rationale for Substituting "KNS 350" with the option "KNS 250, KNS 350, or NUTR 200": Incorporating KNS 250 and NUTR 200 as alternatives, in addition to KNS 350, for the physical activity course in the dietetics undergraduate curriculum offers students a broader range of choices. Notably, the inclusion of KNS 250 enhances the synergy between the Nutrition-Dietetics major and the Nutrition and Physical Activity for Health minor. Unlike the previous scenario where only KNS 350 was available, the expanded options now fulfill the necessary physical activity component in the curriculum. Detailed discussions in email threads support the rationale behind including both courses (see attached document demonstrating the approval from the Kinesiology Department).
Financial Impact

1. WC requirement: Adding ENGL 255/257 to list of options as an option to fulfill the WC requirement will not have any financial impact on other units across campus. Students majoring in nutrition are currently mandated to enroll in an English communication course (ENGL 255 or ENGL 295/360). Approval for this modification has already been granted by the English department.

2. Removing FDSC 415 may have financial implications for the Food Science Department. Approval for this change has been obtained from the Food Science Department (please refer to the attached document).

3. Including AGNR 180 on the list with an asterisk denoting fulfillment of the GCI requirement may have financial implications for the School of Natural Resources, which has given its approval to the proposed changes (please see the attached document).

4. Substituting "KNS 350" with the option "KNS 250, KNS 350, or NUTR 200 may have implications for the Kinesiology Department, which has given its approval to the proposed changes (please see the attached document).

Impact on Other Units

1. Removing FDSC 415 could have implications for the Food Science Department. Approval for this change has been obtained from the Food Science Department (please refer to the attached document).

2. Including AGNR 180 on the list with an asterisk denoting fulfillment of the GCI requirement may have implications for the School of Natural Resources, which has given its approval to the proposed changes (please see the attached document).

3. Substituting "KNS 350" with the option "KNS 250, KNS 350, or NUTR 200 may have implications for the Kinesiology Department, which has given its approval to the proposed changes (please see the attached document).

4. Adding ENGL 255/257 to list of options as an option to fulfill the WC requirement will not have any repercussions on other programs. Students majoring in nutrition are currently mandated to enroll in an English communication course (ENGL 255 or ENGL 295/360). Approval for this modification has already been granted by the English department.

Learning Outcomes

1. Students enrolled in the dietetics concentration will effectively and professionally communicate career goals and relevant experience to demonstrate readiness for and attain acceptance to an accredited supervised practice program.

2. Students will demonstrate ability to use evidence-based guidelines for health intervention as preparation for successful entry into graduate study or health professional programs.

3. Upon completing the program the student will be able to apply critical thinking skills to solve problems.

Degree Type* Bachelor of Science in Health and Human Sciences
Program Type* Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
For qualified students, the Department of Nutrition offers an accelerated combined bachelor’s/master’s program leading to a Bachelor of Science degree with a major in Nutrition, concentration in Dietetics, and Master of Science degree with a major in Nutrition, concentration in Clinical Nutrition and Dietetics. These two degree programs combined comprise prerequisites for and completion of the ACEND-accredited Graduate Program in Nutrition and Dietetics (GP). This program is accredited for a maximum of 20 students per cohort. Admission is competitive and enrollment depends upon availability of placements. Completion of this combined program leads to eligibility to take the national registration exam to become credentialed as a registered dietitian nutritionist (RDN). Central to this program is that a qualified student may take up to 9 credit hours of approved 400- or 500-level courses for graduate credit during their senior year and have them count toward both the BS degree and the MS degree. Students must apply for conditional admission to the master’s program by the end of their junior year of undergraduate study at UT. The two degrees can be completed within five years. Adding additional majors, minors, or concentrations or missing sequential coursework may extend length of the degree programs. To be considered for conditional admission to the program:

- A student must be a declared Nutrition major, Dietetics concentration, or must be completing all coursework required within the Dietetics concentration, with a minimum GPA of 3.30, must have completed at least 15 credit hours of Nutrition courses, and must have completed at least 90 credit hours of the 120 credit hours of coursework required for the BS degree with a major in Nutrition and concentration in Dietetics. Required Nutrition coursework must have been completed with a grade of “C” or better. Applicants must have completed or be currently enrolled in organic chemistry, food science, and microbiology at the time of application for full consideration.

The form “Nutrition Conditional Admission Accelerated Combined Bachelor’s/Master’s Programs” must be submitted to the Director of Graduate Studies in the Department of Nutrition by April 1 of the junior year. After review by the department is complete, students who meet the minimum admission requirements will be invited to submit an application to the Office of Graduate Admissions for the MS program with an entry term of fall senior year.

- Graduate program application submission requirements include:
  - Completed UT Graduate School application
  - Resume
  - Current academic history
  - Personal statement that addresses the prompt within the application
  - Professional recommendations

- Additional steps:
Students being considered for selection must participate in an interview process, typically taking place in May shortly following the application deadline.

Community partners involved in supervising experiential learning of graduate students may participate in student selection if that is a defined role in their respective affiliation agreements.

Any graduate course taken before satisfying all requirements for the BS degree must be approved by the Graduate Concentration Coordinator for Clinical Nutrition and Dietetics, the course instructor, and the Graduate School by the start of each semester in which graduate courses are taken by completing the university's "Senior Requesting Graduate Credit" form.

Conditional admission to the accelerated combined bachelor’s/master’s degree program with a major in Nutrition, concentration in Clinical Nutrition and Dietetics, does not guarantee acceptance into either the Graduate School or the MS program. Students will be fully admitted to the MS program after they have been accepted by both the Graduate School and by the Nutrition Department. Students will not be eligible for graduate assistantships until they are enrolled as graduate-level students in the Graduate School.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

Footnotes

1. Select any QR courses not already required for the major.
2. Select courses from the Volunteer Core* list.
3. Select any courses not already required for the major.

4. Fulfills GCI requirement. Alternative courses may be considered to meet this requirement upon request, provided that students consult with their academic advisor.

5. Select from FDSC 100*, FDSC 241, or HTM 101.

6. Must be taken at UT.

7. At the completion of term 6 – Students meeting eligibility requirements may apply for the accelerated combined bachelor’s/master’s program to pursue the M.S. Program in Nutrition, Clinical Nutrition and Dietetics Concentration, or continue on in the traditional Dietetics Concentration.

8. This course requirement is waived for students accepted to the accelerated combined bachelor’s/master’s in program to pursue the M.S. in Nutrition, Clinical Nutrition and Dietetics concentration, who are not in the Service Learning Honors program as associated competencies will be completed in a graduate course.

9. May be taken for graduate credit. Students accepted to the accelerated combined bachelor’s/master’s program to pursue the M.S. in Nutrition, Clinical Nutrition and Dietetics concentration, may enroll in up to 9 credit hours of graduate coursework. Any graduate course taken before satisfying all requirements for the BS degree must be approved by the Graduate Concentration Coordinator for Clinical Nutrition and Dietetics, the course instructor, and the Graduate School by the start of each semester in which graduate courses are taken by completing the university’s “Senior Requesting Graduate Credit” form.

10. Students accepted to the accelerated combined bachelor’s/master’s program to pursue the M.S. in Nutrition, Clinical Nutrition and Dietetics concentration, must enroll in HTM 445 and approved graduate coursework.

* Meets Volunteer Core Requirements.
The addition of a Five-Year Accelerated Combined Bachelor's/Master's Program option streamlines entry from the existing Bachelor of Science with a concentration in Dietetics to the Master of Science with a concentration in Clinical Nutrition and Dietetics such that both may be completed within five years to better meet the high demand for qualified registered dietitian nutritionists (RDNs) in the competitive field of dietetics and nutrition. It also assures compliance with new accreditation guidance from the Accreditation Council for Education in Nutrition and Dietetics (ACEND) that requires a minimum 1,000 hours of supervised experiential learning to be provided at the graduate level. Currently, approximately 300 hours of supervised experiential learning are at the undergraduate level and much of this must be transitioned to graduate level to maintain accreditation. Adding this program option allows students to achieve this while still completing all requirements within a five-year timeframe. This approach also ensures the department's ability to attract top talent, meet industry demand, and efficiently utilize resources, thereby strengthening its commitment to offering high-quality education in this critical healthcare discipline. Alternatively, students could complete the Bachelor's degree program then complete the separate master's degree program in an additional two years.

Financial Impact

No impact. This will not affect overall faculty course load, therefore, there is no financial impact expected on either the department or college budget.

Impact on Other Units

No impact. Students who wish to enroll in the Five-Year BS/MS Program are already required to complete all necessary courses during their undergraduate studies.

## Course Description

The Advanced SCUBA Diver course is for existing certified divers who desire additional training and introduction to a variety of diving sites and conditions. This course prepares students for certification as an Advanced Diver through NAUI (The National Association of Underwater Instructors) and allows individuals to learn about specialties and diving activities to further their diving knowledge and diving skills. Student must have taken **PYED 261** SCUBA Diving or obtain permission of the instructor.

**Course Description**
This course is to prepare candidates for the certification of NAUI Divemaster. The NAUI Divemaster rating is the highest NAUI leadership-level certification, with the exception of NAUI Instructor. The course is designed to train experienced and knowledgeable divers to organize and conduct enjoyable open water dives for certified divers. During this course, students will be trained and in turn help train others in safe diving practices. A certification of Divemaster from NAUI (National Association of Underwater Instructors) can be awarded at the end of the semester. Students must have completed PYED 265 or have permission from the instructor.

**Satisfies Volunteer Core Requirement:**

**Satisfies General Education Requirement:**
Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Statement about Crosslistings

If course is to be crosslisted, then use the “Crosslistings” tab on menu to the right to add all applicable secondary courses. You must start a crosslisting with the primary course, and all courses must exist before they can be crosslisted using this form.

**Equivalency**

**Rationale**

This is an intensive course that currently exceeds the classroom meeting hour amounts for a two credit class. Adjusting the credit hours to 3 more accurately reflects the student hours required for the course. This change will help students registering for the course to understand the rigor and time requirement more accurately.

**Impact on Other Units**

We do not anticipate this change having an impact on other units.

**Financial Impact**

This adjustment is not anticipated to require additional financial resources.

**Have you consulted with all programs/departments that will be impacted by this change?**

- **Yes**
- **No**
- **Minor changes only/Not Applicable**

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Description

The Public Health major with an emphasis in Population Health Sciences provides students with a broad-base of science, math and social sciences curriculum grounded in a public health core. Population health is an organizing framework that integrates the healthcare delivery system with the broader public health, social, economic and political systems that contribute to health. Students develop the knowledge and skills needed to apply an evidence-based approach to address complex problems.

This major is appropriate for students planning to enter the workforce in public health, research, healthcare, social justice and social services, non-profit, community-based or policy-focused careers as well as preparation for graduate training in public health, pre-med, pre-health professional, allied health, or other related fields.

Students have opportunities to integrate, synthesize and apply knowledge through cumulative and experiential activities that may include but are not limited to volunteering, internships, service-learning projects or research.

Progression Requirements

Progression to the BSPH requires a 2.8 cumulative GPA after Term 4. Students admitted to the program must maintain a minimum cumulative GPA of 2.8 while in the program. Students must earn a grade of C or better in all Public Health courses and professional electives to graduate. Students who do not meet milestones for the program will be redirected to other options. Students who fail to meet the standards for professional conduct during the practice experience or who do violate UT's Student Conduct and Community Standards will not be retained in the major.

Academic advising occurs in the College of Education, Health, and Human Sciences' Office of Advising and Student Services.

As a graduation requirement, BSPH majors will complete a practice experience that integrates, synthesizes and applies knowledge from prior courses and experiences and demonstrates mastery of the foundational and concentration degree competencies.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
Requirements

Foundational public health courses (24 credit hours) – all BSPH students complete eight foundational courses:

- PUBH 201 Introduction to Public Health
- PUBH 202 Introductory Epidemiology
- PUBH 320 Social and Behavioral Theories in Public Health
- PUBH 336 Introduction to Research Methods in Public Health
- PUBH 340 Data Management in Public Health
- PUBH 400 Comparative Healthcare Systems
- PUBH 401 Global Public Health
- PUBH 420 Environmental Public Health

Intermediate Foreign Language (6 credit hours)

Population Health Sciences concentration courses - (12 credit hours):

Complete:

- PUBH 315 Health of Adolescents
- PUBH 350 Public Health Aspects of Aging
- PUBH 430 Suicide and Suicide Prevention Across the Lifespan
- PUBH 440 Population Health

Practice Experience – (3 credit hours)

- PUBH 489 Practice Experience
Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Unrestricted Electives: Select any courses (14 credit hours) not
Unrestricted Electives. Select any courses (14 credit hours) not already required for the major.

Any student who completes ASL 211 and ASL 212 for the language requirement will have met the Global Citizenship – US requirement and will need to complete a Global Citizenship – International course. Students who complete any other language will have met the Global Citizenship – International requirement and will need to complete a Global Citizenship – US course.

Engaged Inquiries (EI) course. At least 9 credits are required from at least two departments.

Professional Electives. Choose any courses (18 credit hours) from this list: AGNR 101, ANTH 480, BIOL 105*, BIOL 106, BIOL 150*, BIOL 159*, BIOL 160*, BIOL 220, BIOL 229, BIOL 240; BCMB 230, BCMB 330, BCMB 401, BCMB 402, BCMB 412, BCMB 440; CHEM 122, CHEM 123, CHEM 132, CHEM 133, CHEM 260, CHEM 269, CHEM 360, CHEM 359; EEB 250 and EEB 251, EEB 310*; EMT 410S; EPP 425*; GEOG 311, GEOG 344, GEOG 409; INPG 100, INPG 210; JREM 455; KNS 380, KNS 350; MATH 125*, MATH 141*; MICR 210, MICR 305, MICR 330, MICR 420; NURS 319; NUTR 285; PHYS 221*, PHYS 222*; POLS 240; PSYC 110*, PSYC 430, PSYC 434*, PSYC 435, PSYC 440; PUBH 215, PUBH 330; SOCI 110, SOCI 120*, SOCI 341*, SOCI 345*, SOCI 361, SOCI 375*, SOCI 410, SOCI 465; completion of a minor (from any academic unit). Accelerated BS/BA-MPH students should choose PUBH 510, PUBH 520, PUBH 530. Students must earn a C or better in professional electives courses. Other courses not listed here may be petitioned to count as public health professional electives with approval of the assigned advisor. Check with advisor prior to taking the course. Courses selected as professional electives cannot be used to fulfill additional requirements in the program.

* Meets Volunteer Core Requirements.

Rationale* In term 4, we are adding two options (MATH 152 Calculus for Life Sciences and ESM 250 Applied Statistical Concepts for Decision Makers) to the current list of three QR courses, which will give students a choice of five QR courses. This change directs public health majors to desirable, relevant QR courses and adds flexibility to accommodate student schedules and interests.

In the showcase footnotes, add to the Professional Electives list, "completion of a minor (from any academic unit)." This addition formalizes and better conveys to public health majors the opportunity to satisfy up to 18 hours of Professional Electives through completion of a minor. Public health already allows this, and adding it to the catalog will streamline communication and better serve students.
**Financial Impact**
Financial impact will be minimal since we are simply adding two QR course options.

**Impact on Other Units**
Math
Evaluation, Statistics, and Measurement (in CEHHS)

Grading Restriction

Repeatability

Credit Restriction

Registration Enforced (RE) Prerequisite(s) RMM 210 or MGT 201
### Equivalency

RMM 312 will be equal to RMM 412.

### Rationale

We propose changing the number of this course from 412 to 312 because we plan to develop a more advanced digital retailing course that will use a 4XX number. This 312 course will become a prerequisite for the 4XX course.

Grading Restriction

Repeatability

Credit Restriction

Registration Enforced (RE) Prerequisite(s)
Assuming the program addition of the sport management minor is accepted, there would need to be a slight adjustment to this sport management registration restriction. Currently this course has a registration restriction for sport management majors, but would now need to also have the sport management minor restriction as well.

This will allow students in other majors to pursue a minor in sport management.

We do not anticipate additional resources being needed to make this adjustment.

Registration Enforced (RE)

RSM 201 or RSM 250.

Prerequisite(s)
### Registration

**Restriction(s)**
- Sport management major or minor or Therapeutic Recreation major

**Permission**

### Equivalency

**Rationale**
Assuming the program addition of the sport management minor is accepted, there would need to be a slight adjustment to the sport management registration restrictions. Currently the above courses have a registration restriction for sport management majors, but would now need to also have the sport management minor restriction as well. This was passed in the April 2023 meeting, but is moving its way through the new system.

### Impact on Other Units

**This will allow students in other majors to pursue a minor in sport management.**

### Financial Impact

**We do not anticipate additional resources being needed to make this adjustment.**

Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Statement about Crosslistings:

If course is to be crosslisted, then use the “Crosslistings” tab on menu to the right to add all applicable secondary courses. You must start a crosslisting with the primary course, and all courses must be new before they can be crosslisted using this form. If any of the courses (primary or secondary) already exist, you must complete an Add Course form for the new course. Add the crosslisting with a Revise Course form after full approval of the new course.
**Registration Enforced (RE) Prerequisite(s):**
RSM 201 or RSM 250.

**Registration Enforced (RE) Corequisite(s):**

**Recommended Background**

**Comments**
Sport Management majors must earn a C or better to advance toward the major.

**Registration Restriction(s)**
Sport Management major or minor or Therapeutic Recreation major

**Registration Permission**

**Equivalency**

**Rationale**
This course has been taught for several sessions as a special topics course. Feedback from students suggests strong support for the course indicating making it a permanent course would be welcomed.

**Impact on Other Units**
We do not anticipate adding this course having any impacts on other units on campus.

**Financial Impact**
We do not anticipate adding this course demanding additional financial resources.

**Equivalency**

**Rationale**  
Assuming the program addition of the sport management minor is accepted, there would need to be a slight adjustment to the sport management registration restrictions. Currently the above courses have a registration restriction for sport management majors, but would now need to also have the sport management minor restriction as well. This was passed in the April 2023 meeting, but is moving its way through the new system.

**Impact on Other Units**  
This will allow students in other majors to pursue a minor in sport management.

**Financial Impact**  
We do not anticipate additional resources being needed to make this adjustment.

Course Description
This course prepares students to be leaders in a dynamic sport industry by developing their understanding and abilities in the areas of strategic leadership, planning, decision-making, and creativity. Students are required to think critically and are encouraged to begin the transition process from learning to application. Upon completion of the course, students will be able to create and implement effective strategies for various strategic issues facing the sport industry. The course embraces a case method style and emphasizes critical thinking, teamwork, effective writing, and presenting.

Sport Management majors must earn a C or better to advance toward the major.

Assuming the program addition of the sport management minor is accepted, there would need to be a slight adjustment to the sport management registration restrictions. Currently the above courses have a registration restriction for sport management majors, but would now need to also have the sport management minor restriction as well. This was passed in the April 2023 meeting, but is moving its way through the new system.

This will allow students in other majors to pursue a minor in sport management.

We do not anticipate additional resources being needed to make this adjustment.

Have you consulted with all programs/departments that will be impacted by this change?*

General Catalog Information

| College* | College of Education, Health, and Human Sciences |
| Department* | Retail, Hospitality, and Tourism Management |
| Program Name* | Hospitality and Tourism Management Major, BS in Retail, Hospitality, and Tourism Management |
| Degree Type* | Bachelor of Science in Retail, Hospitality, and Tourism Management |
| Program Type* | Undergrad (Major) |

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Description
The hospitality and tourism management major focuses on meeting the middle- and upper-level management needs of the food, lodging, and event planning industry. It is a program that assists students in getting the breadth of knowledge, responsibility, and creativity to meet the changing environment of complex management problems in industry. A business minor is built into the degree requirements.

The major requires extensive field experience. The curriculum provides a strong base in management and practical application of these skills. The general education electives help students to sharpen their analytical, conceptual, and communications abilities. Graduates may start as management trainees in restaurants, foodservice, hotels, support industries, or in tourism operations with subsequent upward mobility into management positions.

Progression Requirements

Students should apply for progression into the major after completing at least three of the following HTM 102*, HTM 210, HTM 211, HTM 212. Applications for progression are available in the departmental office.

For progression into the major, students must meet the following criteria.

- Cumulative grade point average 2.3 or greater for at least 30 semester hours completed.
- Grade of C or better in all hospitality and tourism management prefix courses.
- Successful completion of ENGL 101*, ENGL 102*, and MATH 125*.
- Complete 300 post-secondary school hours of industry related work for the chosen major. A complete list of appropriate work experiences is available in the departmental office.

For graduation, students must earn a grade of C or better in all hospitality, and tourism management courses.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSM

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Select courses from the Volunteer Core list. Select any courses not already required for the major. Business administration minor requirement. Must be taken at UTK. Choose from HTM 225, HTM 299, HTM 312, HTM 335, HTM 435, HTM 440, HTM 445, HTM 450, HTM 484*, HTM 493, HTM 494, HTM 495; RMM 411, RMM 412.

Recommended major electives for specialized career interests:

Tourism Management: HTM 435, HTM 450, HTM 484*.

Restaurant/Culinary: HTM 101, HTM 225 or HTM 335, HTM 299, HTM 445, RMM 411.

Hotel and Resort Management: HTM 299, HTM 445, HTM 450, RMM 411.

Must be a non-HTM prefix course.

* Meets Volunteer Core Requirements.
Rationale* As part of modernizing our curriculum in preparation for ACPHA (Accreditation Commission for Programs in Hospitality Administration), we are revising our required internship credits from 6 credits to 2 credits. The remaining four credits will be distributed to the proposed course HTM 392 (1 credit) and to making HTM 101 (3 credits) a required course for the program.

To accommodate students on pre-2024 catalogs, we are proposing HTM 495 (3 credits) as a repeatable course for up to 6 credits.

Specific changes to curriculum core will be in Term 7 (Changing HTM 492 from 6 credits to 2 credits; Adding HTM 392, proposed course for 1 credit) and Term 3 (adding HTM 101 as a required course). This will also involve footnote changes including removing HTM 101 from the list of potential electives and adding HTM 495 to that list.

College of Education, Health, and Human Sciences - Retail, Hospitality, and Tourism Management - Retail Technology Minor

2024-2025 UG End Program

General Catalog Information

College* College of Education, Health, and Human Sciences

Department* Retail, Hospitality, and Tourism Management

Program Name* Retail Technology Minor

Instructions:

This form is intended to end (drop) the following programs: Major, Minor, Certificate, or Concentration.

Degree Type* Non-Degree

Program Type* Undergrad (Minor)

Description

Requirements*

Rationale*

The Retail Technology minor has not been popular among students. With the proposal of the new Merchandising Analytics concentration for Retail and Merchandising Management majors, we would like to ensure that seats in courses are available to accommodate all of our majors who wish to pursue the Merchandising Analytics concentration. The few students currently pursuing the Retail Technology minor will still be accommodated in completing that minor.

Impact on Other Units* None.

Financial Impact* None.

Have you consulted with all programs/departments that will be impacted by this change?* Yes

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Through a combination of classroom instruction and field-based experience, students prepare for entry-level positions in diverse occupations and advanced education. Retailing is one of the fastest growing segments of our economy, and opportunities for careers will continue to be excellent through the 21st century.

Retail and merchandising management provide students with knowledge of the retailing industry and the principles and theories involved in managing personnel and merchandising goods for the consumer. A business minor is built into the degree requirements. The progressive direction that this program takes provides graduates with excellent management opportunities in the retail sector.

This program requires field study experiences where students are guided by faculty in the selection of locations for on-the-job experiences related to their career area as a part of their educational program. Professional contacts made in field study experiences often lead to opportunities for career placement upon graduation.

Students may choose to use the required RMM elective credits to pursue a concentration in either Fashion Retailing or Merchandising Analytics.

For graduation, students must earn a grade of C or better in all retail and merchandising management courses.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSC

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
**Rationale**

We are reducing the required internship credits (RMM 422) from 6 credits to 3 credits to provide our students with more flexibility to pursue one of our proposed new concentrations - Fashion Retailing or Merchandising Analytics.

Based on the Revise Course proposal for RMM 422 to go from 6 credits to 3 credits, there will be 3 credits freed up in Term 7 of the Core. This will result in the addition of a RMM Elective (3 credits) to this term. This will mean there will be a total of two RMM Electives (3 credits each) in this term.

Lastly, a Revise Course proposal to change RMM 412 to RMM 312 will necessitate a change in Term 8.

We have also proposed several new courses: RMM 200, 300, 380, and 423. The first three are to support the proposed new concentrations in the major. RMM 423 is proposed as a means for students on pre-2024 catalogs to complete the required 6 credits of internship under those catalogs, as well as for future students to have an elective option if they desire to obtain more internship experience than the required 3 credits under the new catalog.

**Financial Impact**

None.

**Impact on Other Units**

The impacts have been reported on a course by course basis in all of the Add Course or Revise Course proposals submitted.

Have you consulted with all programs/departments that will be impacted by this change?*

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*

Rationale*

Our students have persistently requested a way to earn a specialization in fashion retailing and this concentration is our means to make that a reality. Many of our students end up working in the fashion industry after graduation. With our concurrently proposed change to decrease our required internship (RMM 422) credits to 3, students will have a total of 15 credits available for RMM electives. Those 15 credits can be used to earn the Fashion Retailing concentration.

Please note that because of a concurrent proposal to decrease our RMM 422 internship (6 credits) to 3 credits, Term 7 would remain a total of 15 credits even with the addition of an RMM elective here. Once RMM 422 becomes 3 credits, those 3 credits would become one of the two RMM Electives shown in Term 7.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Through a combination of classroom instruction and field-based experience, students prepare for entry-level positions in diverse occupations and advanced education. Retailing is one of the fastest growing segments of our economy, and opportunities for careers will continue to be excellent through the 21st century.

Retail and merchandising management provide students with knowledge of the retailing industry and the principles and theories involved in managing personnel and merchandising goods for the consumer. A business minor is built into the degree requirements. The progressive direction that this program takes provides graduates with excellent management opportunities in the retail sector.

This program requires field study experiences where students are guided by faculty in the selection of locations for on-the-job experiences related to their career area as a part of their educational program. Professional contacts made in field study experiences often lead to opportunities for career placement upon graduation.

For graduation, students must earn a grade of C or better in all retail and merchandising management courses.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

---

**Requirements**

**Rationale**
RMM students with an interest in a retail buying or planning career can follow this track to earn a concentration in Merchandising Analytics, which will give them specialized skills for merchandising jobs within the industry.

**Financial Impact**
None. We have sufficient faculty to teach the courses to support this concentration.

**Impact on Other Units**
None.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSM

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*
Rationale* Concurrent with our proposals of the new concentrations in Fashion Retailing and Merchandising Analytics, we are revising the list of electives for the RMM minor to reserve seats for RMM majors in specific courses required to earn each of the concentrations. We are removing 3 courses from the list of electives for the minor and adding three courses. RMM 412 is being removed because of the proposal to change the course number to RMM 312.

Financial Impact* None.

Impact on Other Units* None.

Have you consulted with all programs/departments that will be impacted by this change?* Yes No

| Comments | Students in Communication Disorders or Educational Interpreting should register for SPED 470* instead of SPED 303. |

| Registration Restriction(s) | Students must be pursuing a major or minor that leads to teacher licensure |

<table>
<thead>
<tr>
<th>Registration Permission</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Equivalency</th>
</tr>
</thead>
</table>

| Rationale* | Change in Registration Permission. Currently "Admission to Teacher Education" Revising to "Student must be pursuing a degree in the College of Education, Health, and Human Sciences" Purpose of change is to allow non-teaching licensure students to enroll in the course. This is part of a proposed new Education concentration in Educational Studies as an introduction for new students and transfers. Also as an alternative to Junior or Senior level students who are unable to meet Tennessee teacher licensure requirements and still graduate in a timely manner instead of having to meet additional requirements in a major outside of teaching. |

College of Education, Health, and Human Sciences - Theory and Practice in Teacher Education - Deaf Studies Major, BS in Education – ASL Education Concentration (Graduate Internship Program)

2024-2025 UG Revise Program

General Catalog Information

College* College of Education, Health, and Human Sciences
Department* Theory and Practice in Teacher Education
Program Name* Deaf Studies Major, BS in Education – ASL Education Concentration (Graduate Internship Program)
Degree Type* Bachelor of Science in Education
Program Type* Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

Progression Requirements

Progression to the ASL Education concentration requires a 2.75 cumulative GPA after a minimum of 12 semester credits and completion of ASL 111*. Students in the program must maintain a cumulative GPA of 2.75 while in the program. Students must earn a grade of B or better in ASL 111, ASL 112, ASL 211*, ASL 212*, ASL 310, and ASL 311*, and a C or better in all teacher education and major courses. Students with less than a 2.75 GPA for two consecutive semesters will be dropped from the program. Students who fail to meet the standards for professional conduct during the course of their fieldwork will not be retained in the major. Program coursework will allow students to obtain an ASL education license (Pre K-12) at the conclusion of the post-baccalaureate professional year.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

### Requirements*

#### Rationale*

Change in Progression Requirements "Progression to the ASL Education concentration requires a 2.75 cumulative GPA after a minimum of 12 semester hours of coursework and completion of ASL 111" This is to ensure licensure students are admitted into their specialization so they can take courses in Term 3 that require this status

Previously ",...after a minimum of 45 semester hours of coursework and completion of ASL 211"*

College of Education, Health, and Human Sciences - Theory and Practice in Teacher Education - Deaf Studies Major, BS in Education – Deaf Education Concentration (Early Childhood Education Specialization) Undergraduate Internship

2024-2025 UG Add Program

General Catalog Information

College* College of Education, Health, and Human Sciences

Department* Theory and Practice in Teacher Education

Program Name* Deaf Studies Major, BS in Education – Deaf Education Concentration (Early Childhood Education Specialization) Undergraduate Internship

Learning Outcomes

1. Proposes appropriate curricular objectives based on State and/or Common Core Standards.

2. Develops instructional activities that take into account students’ strengths, interests, and needs to enable each student to advance and accelerate his/her learning.

3. Combines formative and summative assessment as appropriate to support, verify, and document learning.

4. Uses current technologies to maximize content learning in varied contexts.

5. Designs a safe, positive learning climate of openness, mutual respect, support, and inquiry.

6. Uses understanding of individual differences and diverse cultures and communities to promote inclusive learning and/or social environments that enable all individuals to meet high standards.

Degree Type* Bachelor of Science

Program Type* Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Description

Deaf Studies Major, BS in Education – Deaf Education Concentration (Early Childhood Education Specialization) Undergraduate Internship

Progression Requirements

Progression to the Deaf Education concentration with specialization in early childhood education requires a 2.75 cumulative GPA after a minimum of 12 semester hours of coursework and completion of ASL 211*. Once candidates formally progress to the specialization, they must maintain a cumulative GPA of 2.75 while in the program. Students must earn a grade of B or better in ASL 211*, ASL 212*, ASL 311*, and EDDE 310, and a C or better in all teacher education courses. Students with less than a 2.75 GPA for two consecutive semesters will be dropped from the program. Students who fail to meet the standards for professional conduct during the course of their fieldwork will not be retained in the major.

Coursework will allow students to obtain a deaf education license (Pre K-12) and an early childhood education license (Birth-K) at the conclusion of the program.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Rationale*

We are adding a 4-year Deaf Education Concentration and Early Childhood Education Specialization to the Deaf Studies Major. Students who successfully complete this major will be able to obtain a deaf education license (Pre K-12) and an early childhood education license (Birth-K). The addition of this specialization is needed because the schools for the deaf in the state of TN require deaf education teachers to have dual license—deaf education and general education licensure. While we already have a dual licensure program with elementary education, the elementary license only covers grades K-5. Teachers working with deaf children between birth to kindergarten currently do not have an avenue for obtaining the licenses required.

Administrators from the TN Schools of the Deaf have requested UTK to establish this licensure pathway to address their needs.
Financial Impact*

No new courses or staffing will be needed. This is not expected to create a large impact on already existing courses or faculty work load since we anticipate no more than 5 students a year in this specialized area.

Impact on Other Units*

This will impact Child & Family Studies (CFS) program. We have an email from the acting director of CFS, Dr Samara Akpovo agreeing to this new program. Email is attached to this proposal.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
This Theory and Practice in Teacher Education major can provide the undergraduate preparation needed for a student who would like to be licensed to teach Early Childhood Education Integrated PreK-3 (teach children from birth to grade 3 in private and public school systems) in the State of Tennessee. The early childhood education licensure option is offered in conjunction with a master's degree in Theory and Practice in Teacher Education (Interdisciplinary Early Childhood Integrated PreK-3). The Interdisciplinary Early Childhood Concentration (Integrated PreK-3 Fifth Year Internship Specialization) is designed with an emphasis on an inclusive, unified, and integrated curriculum in which early childhood and special education content are purposefully blended into courses/clinical experiences in the early childhood and elementary classroom. The overarching goal of the program is to prepare candidates to teach all children from an integrated lens through which early childhood and special education are no longer viewed as separate. The program objectives center on preparing candidates who understand children and families in a cultural context to meet a diverse set of needs (i.e., racial, linguistic, economic, and ability) across a range of early childhood settings. The strength of the program includes a series of integrated early childhood and special education clinical experiences that happen "early and often," from which candidates benefit from hands-on practical experiences that use an embedded instruction approach with principles of universal design.

The PreK-3 teacher candidates must complete university-required general education courses in the first terms of their program. The education core comprises courses in educational psychology, educational technology, and an introductory-level special education course. TPTE has additional integrated early childhood core courses that are required of candidates and focus solely on the scope of an integrated early childhood program to teach children from birth to grade 3. These courses provide foundational knowledge of integrated curriculum and blended designs for teaching young children, partnering with families, and collaboration with professionals in the community. The PreK-3 teacher candidates’ graduate level clinical experience consists of a full academic year (fall and spring semesters) internship in public school settings (kindergarten to grade 3) under the guidance and supervision of a professional team that has knowledge of an integrated and blended program design.

Learning Objective for Interdisciplinary Early Childhood Concentration (Integrated PreK-3 Fifth Year Internship Specialization)

1. Demonstrate expertise in Integrated Early Childhood Education birth to third grade content and child-centered pedagogy.
2. Provide research-based instruction and leadership in recognition and support of accountability measures facing today's educators.
3. Engage as active members of learning communities through a commitment to ongoing professional development and collaboration.
4. Actively pursue evidenced-based initiatives in educational settings to promote continuous improvement to instruction that facilitate learning for all children.
5. Model the professional dispositions that are characteristic of successful educators.
Undergraduate Progression Requirements: Undergraduate Portion of Interdisciplinary Early Childhood Concentration (Integrated PreK-3 Fifth Year Internship Specialization)

Students interested in this licensure should work closely with their advisor to ensure that they understand and meet Teacher Education program requirements and that they strictly follow the application process. Students will complete the admission to Teacher Education process for the Interdisciplinary Early Childhood Concentration (Integrated PreK-3 Fifth Year Internship Specialization) licensure program upon completion of 12 undergraduate hours.

A student desiring to be admitted into the Interdisciplinary Early Childhood Concentration (Integrated PreK-3 Fifth Year Internship Specialization) teacher education program must meet the following admission requirements including, but not limited to the following:

- Academic achievement – minimum 2.75 cumulative GPA.
- 12 credit hours completed
- Tennessee state law (TCA 49-5-5610) requires that students wishing to enter an approved higher education educator preparation program must submit to a criminal history background check. Admission to the program is dependent on clearance of any conviction(s) as referenced to a list of crimes that would prohibit a person from being licensed in Tennessee.

Students are expected to know the criteria they must meet in order to progress into a practicum (IEC 470, IEC 472, HDFS 480, or HDFS 490) and to regularly monitor their progress in meeting these criteria. Students will not be allowed to progress into the practicum until these criteria are met. If students do not appear able to meet these criteria, they are encouraged to work closely with their advisor to plan an alternative educational program. Specific information on how to apply for the practicum is available from the student's advisor. Students must work closely with their advisor to ensure that they understand the requirements for progression and that they strictly follow the application process for the practicum experience of their choice.

Prior to the Practicum

1. Apply for the practicum by completing the application one year prior to the intended practicum semester.
2. Complete the self-disclosure forms allowing university personnel to obtain student conduct and criminal background information one year prior to the intended practicum semester. The department's undergraduate committee will evaluate any negative background check.

Prerequisites for the Practicum

1. Completion of all prerequisites enforced by the registration system.
2. A cumulative GPA of at least 2.5 (A cumulative GPA of at least 2.75, including transfer credits, is required for students electing the IEC 470 practicum option).
3. A minimum grade of C in all Theory and Practice in Teacher Education courses.

Graduate Progression Requirements: Interdisciplinary Early Childhood Concentration (Integrated PreK-3 Fifth Year Internship Specialization)

This TPTE major can provide the undergraduate preparation needed for a student who would like to be licensed to teach Interdisciplinary Early Childhood Education in private and public school systems in the State of Tennessee. The interdisciplinary early childhood integrated PreK-3 licensure option is offered in conjunction with a master's degree in TPTE (Interdisciplinary Early Childhood Integrated PreK-3 Professional Internship Concentration). Upon attainment of junior status (i.e., 60 hours), students will complete an additional admission process to the Interdisciplinary Early Childhood Integrated PreK-3 Professional Internship Concentration teacher education graduate portion of the program (see details in the Teacher Education section of this catalog) and simultaneously make application for admission to the MS in Teacher Education (see the Graduate Catalog for details). Acceptance into the graduate portion of Interdisciplinary Early Childhood Integrated PreK-3 Professional Internship Concentration teacher licensure program is contingent upon acceptance into the department's master's program. Students interested in this option should work closely with their advisor to ensure that they understand and meet the Teacher Education program requirements and the requirements for graduate study and that they strictly follow the application process.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
Rationale*

The Department of Child and Family Studies will be dissolved in fall 2024 in association with a significant restructuring of departments in CEHHS. As a result, the formerly constituted ECE programs at the undergraduate level will be moved to TPTE as Education Majors with a BS in Education. The program name needed to be revised in order to align with the change in prefixes for courses in the ECE program (from CFS to IEC). None of the program requirements or courses will change. Only the name of the major will be adjusted, as well as the name of the concentration, and it will then be moved to TPTE under an existing major. These changes have been done in consultation with Associate Dean David Cihak, Dr. Lynn Hodge (TPTE DH), and the CFS ECE program faculty. Karen Galicia indicated that we do not need THEC approval in order to make these program adjustments and to move the programs to TPTE. These changes have also been done under the direction and guidance of Jonathan Hughes with the registrar's office.

Financial Impact*

The program will continue to use courses from other departments outside of TPTE, but because the curriculum is not changing these units will not experience any changes in financial impact. The TPTE department will be receiving a new concentration which will generate revenue for the department. CFS will no longer exist and the course prefix proposals have been submitted in order to ensure that TPTE is the recipient of student credit hour revenue generation associated with this concentration. The new department, CHDF, will continue to teach courses that are required or part of the curriculum, but these adjustments will not have any negative financial impact on the new department.

Impact on Other Units*

TPTE will be impacted by this change, as it will receive a new concentration. These changes have been recommended by the TPTE DH (Dr. Lynn Hodge) and under the guidance of Associate Dean Cihak in CEHHS. Other units will not be impacted by the movement of this specialization to TPTE from CFS.

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

### Description

**Progression Requirements**

Progression to Middle Grades Math specialization requires a 2.75 cumulative GPA after a minimum of 12 semester hours of coursework. Once candidates formally progress to the specialization, they must maintain a minimum cumulative GPA of 2.75 while in the program. Students must earn a grade of C or better in all teacher education courses. Students with less than a 2.75 GPA for two consecutive semesters will be dropped from the program. Students who fail to meet the standards for professional conduct during the course of their fieldwork will not be retained in the major.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

College of Education, Health, and Human Sciences - Theory and Practice in Teacher Education - Education Major, BS in Education – Interdisciplinary Early Childhood Concentration (Integrated Birth to Kindergarten (B-K) Undergraduate Student-Teaching Specialization)

2024-2025 UG Revise Program

General Catalog Information

| College* | College of Education, Health, and Human Sciences |
| Department* | Theory and Practice in Teacher Education |
| Program Name* | Education Major, BS in Education – Interdisciplinary Early Childhood Concentration (Integrated Birth to Kindergarten (B-K) Undergraduate Student-Teaching Specialization) |
| Degree Type* | Bachelor of Science in Education |
| Program Type* | Concentration |

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
This Theory and Practice in Teacher Education (TPTE) major provides the undergraduate preparation needed for a student who would like to be licensed to teach Early Childhood Education Integrated Birth to Kindergarten (B-K) in the State of Tennessee. The Interdisciplinary Early Childhood Integrated B-K track is a concentration designed with an emphasis on an inclusive, unified, and integrated curriculum in which early childhood and special education content are purposefully blended into courses/clinical experiences. The overarching goal of this program is to prepare candidates to teach all children from an integrated lens through which early childhood and special education are no longer viewed as separate. The program objectives center on preparing candidates who understand children and families in a cultural context to meet a diverse set of needs (i.e., racial, linguistic, economic, and ability) across a range of early childhood settings. The strength of the program includes a series of integrated early childhood and special education clinical experiences that happen "early and often," from which candidates benefit from hands-on practical experiences that use an embedded instruction approach with principles of universal design. Outside of the Vol Core curriculum, courses in this program are offered in distance education and campus-based formats to allow for enrollment of both types of students.

Interdisciplinary Early Childhood Integrated B-K candidates must complete university-required general education courses in the first terms of their program. The education core comprises courses in educational psychology, educational technology, and an introductory-level special education course. TPTE has additional integrated early childhood core courses that are required of candidates and focus solely on the scope of an integrated early childhood program age range (birth to kindergarten). These courses provide foundational knowledge of integrated curriculum and blended designs for teaching young children, partnering with families, and collaboration with professionals in the community. B-K candidates complete clinical experiences in a variety of collaborative and inclusive early childhood settings (birth to age 3; 3 to 5 years old). The student teaching course is the culminating/capstone full-time clinical practice for candidates that also includes a seminar experience.

Learning Objective for Interdisciplinary Early Childhood Integrated B-K (Birth to Kindergarten) Concentration

1. Demonstrate expertise in Integrated Early Childhood Education birth to kindergarten content and child-centered pedagogy.
2. Provide research-based instruction and leadership in recognition and support of accountability measures facing today's educators.
3. Engage as active members of learning communities through a commitment to ongoing professional development and collaboration.
4. Actively pursue evidenced-based initiatives in educational settings to promote continuous improvement to instruction that facilitates learning for all stakeholders.
5. Model the professional dispositions that are characteristic of successful educators.
6. Value diversity among students, colleagues, community members, and others by promoting diversity as a means for strengthening the educational experiences of all students.
Prior to the Practicum

7. Demonstrate those skills necessary to promote continuous improvements to curriculum, instruction, use of high quality instructional materials, and the use of technology and assessment.

Progression Requirements

Students interested in this licensure should work closely with their advisor to ensure that they understand and meet Teacher Education program requirements and that they strictly follow the application process. Students will complete the admission to Teacher Education process for the Interdisciplinary Early Childhood Integrated B-K licensure program upon completion of 12 undergraduate hours.

A student desiring to be admitted into the Interdisciplinary Early Childhood Integrated Birth-Kindergarten teacher education program must meet the following admission requirements including, but not limited to the following:

- Academic achievement – minimum 2.75 cumulative GPA.
- 12 credit hours completed
- Tennessee state law (TCA 49-5-5610) requires that students wishing to enter an approved higher education educator preparation program must submit to a criminal history background check. Admission to the program is dependent on clearance of any conviction(s) as referenced to a list of crimes that would prohibit a person from being licensed in Tennessee.

Prior to the Practicum

1. Apply for the practicum by completing the application one year prior to the intended practicum semester.
2. Complete the self-disclosure forms allowing university personnel to obtain student conduct and criminal background information one year prior to the intended practicum semester. The department's undergraduate committee will evaluate any negative background check.

Prerequisites for the Practicum

1. Completion of all prerequisites enforced by the registration system. Students in the Interdisciplinary Early Childhood Integrated B-K Concentration are required to obtain a minimum 21 ACT (enhanced version) composite score; 1020 SAT (revised version) total score; or State Board of Education determined passing scores on PRAXIS Core (contact the college's Student Services Center for current PRAXIS Core score requirements).
2. A cumulative GPA of at least 2.5 (A cumulative GPA of at least 2.75, including transfer credits, is required for students electing the IEC 472 practicum option).
3. A minimum grade of C in all TPTE courses.

Students are expected to know the criteria they must meet in order to progress into a practicum (IEC 470, IEC 472, HDFS 480, or IEC 490) and to regularly monitor their progress in meeting these criteria. Students will not be allowed to progress into the practicum until these criteria are met. If students do not appear able to meet these criteria, they are encouraged to work closely with their advisor to plan an alternative educational program. Specific information on how to apply for the practicum is available from the Undergraduate Council.
Specific information on how to apply for the practicum is available from the student’s advisor. Students must work closely with their advisor to ensure that they understand the requirements for progression and that they strictly follow the application process for the practicum experience of their choice.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

**Requirements**

**Rationale**

The Department of Child and Family Studies will be dissolved in fall 2024 in association with a significant restructuring of departments in CEHHS. As a result, the formerly constituted ECE programs at the undergraduate level will be moved to TPTE as Education Majors with a BS in Education. The program name needed to be revised in order to align with the change in prefixes for courses in the ECE program (from CFS to IEC). None of the program requirements or courses will change. Only the name of the major will be adjusted, as well as the name of the concentration, and it will then be moved to TPTE under an existing major. These changes have been done in consultation with Associate Dean David Cihak, Dr. Lynn Hodge (TPTE DH), and the CFS ECE program faculty. Karen Galicia indicated that we do not need THEC approval in order to make these program adjustments and to move the programs to TPTE. These changes have also been done under the direction and guidance of Jonathan Hughes with the registrar’s office.

**Financial Impact**

The program will continue to use courses from other departments outside of TPTE, but because the curriculum is not changing these units will not experience any changes in financial impact. The TPTE department will be receiving a new concentration which will generate revenue for the department. CFS will no longer exist and the course prefix proposals have been submitted in order to ensure that TPTE is the recipient of student credit hour revenue generation associated with this concentration. The new department, CHDF, will continue to teach courses that are required or part of the curriculum, but these adjustments will not have any negative financial impact on the new department.

**Impact on Other Units**

TPTE will be impacted by this change, as it will receive a new concentration. These changes have been recommended by the TPTE DH (Dr. Lynn Hodge) and under the guidance of Associate Dean Cihak in CEHHS. Other units will not be impacted by the movement of this specialization to TPTE from CFS.

### Description

**Progression Requirements**

Progression to World Language Education and English as a Second Language specialization requires a 2.75 cumulative GPA after a minimum of 12 semester hours of coursework and language placement exam. Once candidates formally progress to the specialization, they must maintain a minimum cumulative GPA of 2.75 while in the program. Students must earn a grade of C or (AH) in all teacher education courses. Students with less than a 2.75 GPA for two consecutive semesters will be dropped from the program. Students who fail to meet the standards for professional conduct during the course of their fieldwork will not be retained in the major.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

College of Education, Health, and Human Sciences

**Department**  
Theory and Practice in Teacher Education

**Program Name**  
Special Education Major, BS in Education - Teacher Education (Graduate Internship Program)

**Degree Type**  
Bachelor of Science in Education

**Program Type**  
Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

**Description**

In this program, students complete practical teaching experiences during the senior year (terms 7 and 8) and spend a graduate year completing their year-long teaching internship. Internship placements begin when the assigned school system requires teachers to report (pre-planning) and end when the school system concludes for teachers (post-planning). Students are recommended for licensure only after completion of the internship year and all state requirements (e.g., passing Praxis exams and edTPA.) This program results in the Bachelor of Science degree, Master of Science degree, and teaching endorsements in Interventionist K-8, Interventionist 6-12, and Comprehensive K-12.

Progression Requirements

Progression to the Special Education major requires a 2.75 cumulative GPA after a minimum of 12 semester hours of coursework. A Board of Admissions will meet fall, spring, and summer to review applications and conduct interviews with each applicant. Students admitted to the program must maintain a minimum cumulative GPA of 2.75 while in the program. Students must earn a grade of C or better in all Teacher Education courses. Students with less than a 2.75 GPA for two consecutive semesters will be dropped from the program. Students who fail to meet the standards for professional conduct during courses and/or fieldwork will not be retained in the major.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

### Requirements*

#### Rationale*

Moving several courses around in program of study and updating to reflect one course name change.

We want to make sure that our students have the SPED 453 (assessment) before they complete their edTPA (Assessment is the edTPA area where candidates have performed the lowest);

Changes made in consultation with the Elementary Education team; Moved some courses around to better meet the sequencing/staffing/ and faculty capacity needs of both programs. We changed REED 428 to REED 434 for undergraduate students and graduate reading options to REED 537 in consultation with ELED because they believe those courses are needed to meet state literacy standards.

Added SPED 555 (Autism) as a required course to replace a course that used to be offered as a graduate course that we have moved into the UG program (SPED 453). We had a graduate elective as a placeholder for the previous catalog, but we have decided to teach 555 every year instead of every other year because our students need that content.

### Financial Impact*

Positive impact: May reduce staffing demands

### Impact on Other Units*

This change only impacts the department

### Have you consulted with all programs/departments that will be impacted by this change?*

<td>Course Description</td>
<td>Students will embark on a comprehensive exploration of the transformative potential of artificial intelligence in the medical and healthcare sectors. The course delves into the practical application of AI algorithms and tools for diagnosing diseases, predicting patient outcomes, optimizing treatment plans, and enhancing patient care. Students will be introduced to real-world clinical problems and collectively explore potential AI-related solutions for those problems. This collaborative approach ensures that all students gain exposure to various clinical scenarios. It also lays the groundwork for individual project work, which becomes the focal point in subsequent advanced courses like AI 451.</td>

## Course Description

Building upon foundational knowledge, this advanced course offers a deep dive into the multifaceted role of artificial intelligence across various medical disciplines. Rather than adhering to a traditional structure, students will immerse themselves in collaborative research projects, gaining hands-on experience in real-world healthcare settings. This course aims to refine students' skills and understanding, preparing them for leadership roles in AI-driven medical innovations. Through hands-on projects and real-world case studies, students will develop AI-driven solutions to address pressing clinical challenges. Collaborative group projects will provide opportunities for students to design, implement, and evaluate AI models tailored for specific clinical scenarios. In addition to technical skills, emphasis will be placed on the ethical considerations, data privacy issues, and the patient-centric approach required when integrating AI into clinical settings. By the end of the course, students will be equipped with the skills and knowledge to innovate and contribute meaningfully to the rapidly evolving landscape of AI in medicine.

### Course Description

Special Topics in Applied Cybersecurity is a course designed to explore emerging trends, cutting-edge technologies, and specialized areas within the field of cybersecurity. This course offers students the opportunity to delve deeply into specific topics of relevance to contemporary cybersecurity challenges. Through a combination of theoretical discussions, hands-on exercises, and practical applications, students will gain expertise in areas that extend beyond the traditional cybersecurity curriculum.

### Will this course be crosslisted? Yes

## Course Description

The Junior Capstone in Applied Cybersecurity is a culminating experience designed to integrate and apply the knowledge and skills acquired throughout the cybersecurity curriculum. This course serves as a bridge between foundational and advanced cybersecurity concepts, providing students with an opportunity to tackle real-world cybersecurity challenges in a simulated environment. Emphasizing practical applications, critical thinking, and teamwork, the course prepares students for the dynamic and ever-evolving field of cybersecurity.
List all courses in this crosslisting relationship and note whether primary or secondary.

## Course Description

Special Topics in Applied Cybersecurity is an advanced-level course designed to explore emerging trends, cutting-edge technologies, and specialized areas within the field of cybersecurity. This course offers students the opportunity to delve deeply into specific topics of relevance to contemporary cybersecurity challenges. Through a combination of theoretical discussions, hands-on exercises, and practical applications, students will gain expertise in areas that extend beyond the traditional cybersecurity curriculum.

College of Emerging and Collaborative Studies - College of Emerging and Collaborative Studies - Applied Artificial Intelligence Certificate

2024-2025 UG Add Program

General Catalog Information

College* College of Emerging and Collaborative Studies

Department* College of Emerging and Collaborative Studies

Program Name* Applied Artificial Intelligence Certificate

Learning Outcomes

1. Gain a comprehensive understanding of the fundamental concepts and principles of artificial intelligence, including machine learning, deep learning, and natural language processing.

2. Develop proficiency in using popular AI libraries, tools, and frameworks like TensorFlow, PyTorch, and scikit-learn for building AI applications.

3. Discuss the ethical and legal aspects of AI, including issues related to bias, privacy, transparency, and responsible AI development and deployment.

4. Understand how AI is applied in various industries such as healthcare, finance, autonomous vehicles, and customer service.

5. Acquire skills in data collection, data cleaning, and feature engineering, which are critical for effective machine learning model development.

6. Explore case studies and practical examples of AI solutions and their impact.

7. Apply AI knowledge through hands-on projects and case studies, allowing students to gain practical experience and develop a portfolio of work.

Degree Type* Undergraduate Certificate

Program Type* Undergraduate Certificate

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and
This undergraduate certificate in Applied Artificial Intelligence is a focused program that equips students with the knowledge and practical skills needed to understand and work with artificial intelligence (AI) technologies in various real-world applications. This certificate program is designed to gain a fundamental understanding of AI and its practical uses. The curriculum is designed to align with the current demands and trends in the AI industry. Upon completion, students should have gained a foundational understanding of AI concepts and practical skills, preparing them to pursue entry-level positions in AI-related roles or continue their education in AI at a higher level if desired.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*

Rationale* This is a new undergraduate certificate offered by the College of Emerging and Collaborative Studies.

Financial Impact* The cost of the instructor is covered by CECS.

Impact on Other Units* None.

Have you consulted with all programs/departments that will be impacted by this change?* Yes

College of Emerging and Collaborative Studies - Applied Artificial Intelligence Minor

2024-2025 UG Add Program

General Catalog Information

College*  
College of Emerging and Collaborative Studies

Department*  
College of Emerging and Collaborative Studies

Program Name*  
Applied Artificial Intelligence Minor

Learning Outcomes

1. Define and explain fundamental concepts in artificial intelligence, including machine learning, deep learning, neural networks, and natural language processing.
2. Demonstrate proficiency in programming languages commonly used in AI applications, such as Python, and be able to implement AI algorithms and models.
3. Apply techniques for data preprocessing and exploration to prepare datasets for AI modeling, including handling missing data, normalization, and feature engineering.
4. Develop skills in evaluating and validating AI models, including metrics for performance assessment, cross-validation, and avoiding overfitting.
5. Recognize and address ethical and legal implications associated with AI technologies, including bias, privacy concerns, and responsible AI development.
6. Apply AI techniques to solve real-world problems, demonstrating the ability to identify suitable AI approaches for different scenarios.
7. Complete a comprehensive capstone project that applies AI techniques to solve a complex, real-world problem, showcasing the integration of knowledge and skills acquired throughout the program.

Degree Type*  
Non-Degree

Program Type*  
Undergrad (Minor)

Learning Outcomes

1. Demonstrate a foundational understanding of cybersecurity concepts, define key cybersecurity terms and concepts, and explain the importance of cybersecurity in protecting digital assets.

2. Identify common cybersecurity threats and assess vulnerabilities in various systems and networks.

3. Apply cybersecurity best practices and conduct risk assessments for IT assets and processes.

4. Manage incident response and recovery by developing incident response plans and procedures.

5. Execute incident response strategies to minimize damage and recovery time.

6. Communicate effectively about cybersecurity issues and prepare clear and concise reports on security assessments and incidents.

7. Collaborate with technical and non-technical stakeholders to convey security-related information.
### Description
This undergraduate certificate in applied cybersecurity is a stackable certificate designed to equip students with practical knowledge and skills in the field of cybersecurity. This certificate program focuses on real-world applications of cybersecurity principles and practices, preparing students for entry-level positions in the cybersecurity industry.

College of Emerging and Collaborative Studies - College of Emerging and Collaborative Studies - Applied Cybersecurity Minor

2024-2025 UG Add Program

General Catalog Information

College* College of Emerging and Collaborative Studies

Department* College of Emerging and Collaborative Studies

Program Name* Applied Cybersecurity Minor

Learning Outcomes

1. Demonstrate an understanding of the fundamental concepts and principles of cybersecurity.

2. Identify common cybersecurity threats, vulnerabilities, and attack vectors.

3. Gain knowledge of various cybersecurity technologies, tools, and software used in real-world scenarios.

4. Identify and analyze network-based attacks and propose countermeasures.

5. Develop skills in detecting, responding to, and mitigating cybersecurity incidents.

6. Understand the importance of incident response planning and execution.

7. Develop hands-on skills in identifying and exploiting vulnerabilities for the purpose of securing systems.

8. Understand the principles of cryptography and its role in securing information and apply cryptographic techniques in securing data and communication.

9. Demonstrate knowledge of cybersecurity policies, standards, and procedures.

10. Adapt to emerging technologies and methodologies in the rapidly evolving cybersecurity landscape.

Degree Type* Non-Degree

Program Type* Undergrad (Minor)
General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description
The Applied Cybersecurity minor program for undergraduate students offers specialized knowledge and skills in the realm of cybersecurity, emphasizing practical, operational applications. The curriculum has been specifically created to provide students with the necessary knowledge and skills to effectively tackle the ever-changing issues within the cybersecurity field. The applied cybersecurity curriculum incorporates courses and knowledge from multiple disciplines to develop skills in applied and operational cybersecurity for undergraduate students. The minor requires at least 18 credits and includes a 3 credits industry sponsored junior capstone project.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

## Learning Outcomes

- Demonstrate a solid understanding of the fundamental concepts and principles of data science, including data manipulation, analysis, and interpretation.
- Acquire proficiency in programming languages commonly used in data science, such as Python or R, to manipulate and analyze data.
- Master techniques for cleaning, transforming, and preprocessing raw data to make it suitable for analysis.
- Understand and apply machine learning algorithms for tasks such as classification, regression, clustering, and feature selection.
- Create effective data visualizations to communicate insights and patterns discovered in data analysis.
- Understand and adhere to ethical considerations in data science, including privacy, bias, and responsible data handling.

## Description

The Undergraduate Certificate in Data Science is a comprehensive program designed to equip students with the knowledge and skills necessary to thrive in the dynamic field of data science. This program integrates foundational principles with hands-on, practical experience to prepare students for careers in data analysis, machine learning, and other data-driven roles across diverse industries.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Program Type* Undergraduate Certificate

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
The undergraduate certificate in Game Craft is a focused and hands-on academic program that provides students with a comprehensive introduction to the art and science of game design and development. This program is designed to equip individuals with the foundational skills and knowledge needed to enter the dynamic and rapidly evolving field of game development.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

---

**Rationale**

This is a new undergraduate certificate developed by the College of Emerging and Collaborative Studies.

---

**Financial Impact**

Course with GAME prefix will be taught by CECS faculty.

---

**Impact on Other Units**

The units impacted by this certificate are:

- COSC
- MUTC
- ARTH

These unit department heads have been informed about the inclusion of their courses in the certificate. Their approvals are attached with this proposal.

---

**Have you consulted with all programs/departments that will be impacted by this change?**

- Yes
- No
### Impact Level
- [ ] Low
- [x] Mid
- [ ] High

### If approved, will this need notification/approval from any agency outside of UTK?
- [ ] Yes
- [x] No

### ACALOG Program Status
- [x] Active-Visible

### Admin Checklist
- [ ] Banner entries completed
- [ ] Reported to Provost/THEC
- [ ] THEC approved (new majors only)
Learning Outcomes

Literacy of emerging topics requires a balance of foundational knowledge, critical thinking skills, and practical application. This certificate is created to achieve the following learning outcomes:

1. Define and explain key concepts related to emerging topics and navigate the connected world within the chosen field.

2. Evaluate the credibility and reliability of information related to emerging topics including blockchain, artificial intelligence, etc.

3. Critically analyze and compare different perspectives and viewpoints on emerging issues.

4. Create and execute a research plan to investigate specific aspects or trends within emerging topics.

5. Effectively communicate complex ideas related to emerging topics through written reports, presentations, and other mediums.

6. Demonstrate proficiency in using digital tools and platforms to access, analyze, and disseminate information related to emerging topics.

7. Integrate knowledge from multiple disciplines to gain a holistic understanding of emerging topics.

8. Develop practical skills that are directly applicable to careers or further study within the field of emerging topics.
General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

**Description**
The Undergraduate Certificate in Emerging Topics Literacy is designed to equip students with the essential skills and knowledge required to navigate, critically analyze, and communicate effectively about emerging issues within their chosen field. In an ever-evolving landscape, this program provides a foundation for understanding the dynamic nature of emerging topics, fostering adaptability, and promoting interdisciplinary perspectives.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

</tr>
</thead>
<tbody>
<tr>
<td>Department*</td>
<td>College of Emerging and Collaborative Studies</td>
</tr>
<tr>
<td>Program Name*</td>
<td>Sustainable Development Certificate</td>
</tr>
</tbody>
</table>

**Learning Outcomes**

1. Gain a comprehensive understanding of the principles and concepts of sustainable development, including the three pillars of sustainability: economic, social, and environmental.

2. Develop an awareness of global sustainability challenges and an understanding of the interconnectedness of social, economic, and environmental issues on a global scale.

3. Acquire knowledge about environmental systems, ecosystems, biodiversity, and the impact of human activities on the natural environment.

4. Develop a systems thinking approach to analyze complex issues and understand the interconnected nature of social, economic, and environmental factors in sustainable development.

5. Encourage a reflective practice and a commitment to continuous learning in the context of evolving sustainability challenges and solutions.

**General Instructions for Description**

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
The Sustainable Development Certificate is intended for working professionals, graduate, and undergraduate students interested in incorporating the United Nations Sustainable Development Goals (UN SDGs) into their current practice and skills. This certificate is intended to increase sustainable development competency both internationally and domestically, and to prepare students for a career in private industry, the government, or a non-governmental organization. This certificate is intended to be an accelerated program and students can complete the certificate within an academic year. The certificate is available to individuals who are 1) pursuing any academic programs at the University of Tennessee or 2) a current student at an outside accredited 4-year post-secondary institution or 3) post-baccalaureate and enrolled solely in the certificate program.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

---

**Rationale**

This certificate is being moved over to CECS.

**Financial Impact**

The new SUST course will be taught by CECS and all the other courses are existing.

**Impact on Other Units**

Other units have been consulted.

Registration Permission

Equivalency

Equivalent to DATA 301. We are changing the number of the course from DATA 301 to DATA 102. No other changes other than the number.

Rationale

A few DATA courses are being renumbered in building the Data Science B.S. program, which includes renumbering DATA 301 as DATA 102. It has no prerequisites, so should sit easily as an introductory course.
Impact on Other Units*  
This course will remain a required core course for:

- Data Science Major, BA, which was approved by Faculty Senate on October 16 (Cycle 1).
- Data Science Major, BS in Data Science, which was approved by UG Curriculum Committee on Oct 4.

Financial Impact*  
No financial impact

### Course Description

Designed to offer students practical work experience related to Data Science in a professional setting. This course facilitates applying classroom learning to real-world situations, fostering personal and professional growth. Students will work closely with industry professionals, apply their knowledge and skills, and reflect on their experiences to enhance their readiness for future career opportunities. Prerequisite: completion of required and pertinent advanced courses relevant to student's internship. Written permission of advisor and approval of internship coordinator. May be repeated with written permission.
Statement about Vol Core:

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Statement about Crosslistings:

If course is to be crosslisted, then use the "Crosslistings" tab on menu to the right to add all applicable secondary courses. You must start a crosslisting with the primary course, and all courses must be new before they can be crosslisted using this form. If any of the courses (primary or secondary) already exist, you must complete an Add Course form for the new course. Add the crosslisting with a Revise Course form after full approval of the new course.

Course Description
Gateway to Future Digital Technologies is a foundational course designed to provide students with a comprehensive understanding of the key concepts, principles, and emerging trends in the rapidly evolving landscape of digital technologies. This course serves as an entry point for individuals aspiring to embark on a journey in fields such as computer science, information technology, data science, artificial intelligence, and related disciplines. Through a combination of theoretical learning and hands-on practical experiences, students will gain insight into the transformative power of digital technologies and their applications in various industries.

### Course Description
Navigating the Connected World and Internet of Everything is designed to explore the transformative impact of connected technologies on our daily lives, businesses, and society at large. This course provides a comprehensive overview of the Internet of Everything (IoE), examining the convergence of people, processes, data, and things in an interconnected ecosystem. Through a combination of theoretical discussions, case studies, and hands-on activities, students will gain insights into the opportunities and challenges presented by the connected world.

| **Course Description** | Blockchain Technology Application: From Theory to Industry Impacts is an advanced course designed to provide students with a deep understanding of blockchain technology and its diverse applications across various industries. The course combines theoretical foundations with practical insights to explore the transformative potential of blockchain, from its origins as the underlying technology for cryptocurrencies to its broader implications for sectors such as finance, supply chain, healthcare, and beyond. Students will engage in hands-on exercises, case studies, and projects to bridge the gap between theoretical knowledge and real-world blockchain applications. |

## Course Description

Collaborative Game Design is an intermediate-level course that focuses on the collaborative and interdisciplinary aspects of designing digital games. In this course, students from across the campus will work together to understand, ideate, and implement creative game concepts. The emphasis is on teamwork, effective communication, and leveraging the diverse skills of team members to produce innovative and engaging game experiences. Through a combination of theoretical discussions, practical exercises, and group projects, students will develop the collaborative and problem-solving skills essential for successful game development in a team environment.

### Course Description
Games for Training and Teaching is an innovative course designed to explore the intersection of game design and training and teaching. This course focuses on leveraging game mechanics, interactive simulations, and immersive experiences as powerful tools for training and education. Through a blend of theoretical discussions, hands-on activities, and collaborative projects, students will delve into the design, development, and implementation of games to enhance learning outcomes in various educational settings.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
The College of Music Exploratory program is designed for students who are deciding among one or more majors in the College. It allows students to explore major options as well as make progress toward graduation through the completion of Volunteer Core courses and some music courses. Exploratory students are required to meet with their advisor every semester.

Acceptance into this program does not require successful acceptance into the College of Music. If students wish to take MUPF applied lessons they must be admitted to the College. Some other courses (e.g., Music Ensembles) are by audition only and some courses (e.g., Music Theory) require the completion of placement tests.

Before changing their major from Music Exploratory to another program in Music, students must be accepted into the College of Music. Application information is available on the College of Music website.

All full-time, degree-seeking UT Knoxville students who first entered Fall 2024 or later must transition out of the exploratory track into a major no later than the end of their third tracking semester. Transfer students with less than 45 hours of transferrable work who are admitted as exploratory students must transition out of the exploratory track into a major no later than the end of their second full semester at UT. The showcase below assumes Term 1 occurs in a Fall semester.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Formerly as a member of the College of Arts & Sciences, students who intended to study music – but had not yet auditioned or selected a specific program within music – were placed in the Arts & Sciences Exploratory Program. Now as an independent College of Music, there is no equivalent program in music and we are missing students. We believe that by having a college exploratory program for music we will be able to identify these students, guide them on a path towards the most appropriate major, and enable them to be part of the College of Music community, improving retention.
Financial Impact
No significant financial or other impact.

Impact on Other Units*
Courses from other units do show up in Terms 2 and 3 of this showcase. However, all of these courses are already included in a variety of our majors that would follow the Exploratory path, including Music Performance, Studio Music & Jazz, Applied Music, and Sacred Music, in our Professional Skills baskets. Other courses, such as those with ACCT, ECON, STAT, BUAD, GT, ENT, CCI, ADVT, JREM, and PSYC prefixes are already part of curricular options in our Music Business Administration, (Music) Advertising and Public Relations, and (Music) Journalism and Media programs, which have agreed partnerships with the impacted colleges.

College of Music - College of Music - Music Major, BA – Journalism and Media Concentration

2024-2025 UG Add Program

General Catalog Information

College*  College of Music

Department*  College of Music

Program Name*  Music Major, BA – Journalism and Media Concentration

Learning Outcomes

Degree Type*  Bachelor of Arts

Program Type*  Concentration

Description  This new concentration is built in full partnership with the College of Communication and Information, housed in the College of Music. The concentration's blend of music and communication students is uniquely positioned in the state of Tennessee, and it expands the breadth of BA options at the intersection of these disciplines.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*

Rationale*  Our curriculum will be located in the College of Music, not Arts and Sciences and thus requires new core requirements.
Financial Impact*: None

Impact on Other Units*: College of Communication & Information

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone

Requirements*

Rationale* With the growing number of music business majors and minors, we do not have enough internship opportunities to offer one to every minor. No other minor that we've found on campus has an internship component.

### General Catalog Information

**College***
- College of Music

**Department (Acalog Hierarchy)**
- College of Music

**Subject/Prefix (choose from list)**
- MUED

**Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)**
- 212

**Course Title (max 100 characters)**
- Class Woodwind Methods III

**Variable Title?**
- Yes
- No

**Credit Hours**
- 1

**Course Description**
Structure, use, and techniques of playing. Care and repair of the oboe and bassoon in school instrumental organizations. Emphasis on techniques necessary for basic understanding and effective teaching of the instruments. Practical use of current instructional materials.

**Will this course be crosslisted?**
- Yes
- No

**If yes, what is the crosslisting relationship for this course?**
- Primary
- Secondary

**List all courses in this crosslisting relationship and note whether primary or secondary**

---

**Statement about Vol Core:**

If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.
Satisfies Volunteer Core Requirement:

Contact Hour Distribution (if more than one instructional method)

**Grading Restriction**  Letter grade only.

**Repeatability**

**Credit Restriction**

**Registration Enforced (RE)**
- MUED 210, MUED 211

**Department Enforced (DE)**

**Recommended Background**

**Comments**

**Registration Restriction(s)**
- Bachelor of Music – music majors only.

**Registration Permission**

**Equivalency**

**Rationale**
- We need better control of the flow into MUED 212. Adding MUED 210 and MUED 211 as prereqs should resolve the composition minor/major issues we are experiencing currently.

**Impact on Other Units**
- None

**Financial Impact**
- None
Have you consulted with all programs/departments that will be impacted by this change?* 

- Yes
- No
- Minor changes only/Not Applicable

Arts and Sciences Only

<table>
<thead>
<tr>
<th>Contact Hour Distribution</th>
<th>May be repeated. Maximum 10 hours.</th>
</tr>
</thead>
</table>

### Grading Restriction

**Repeatability**

May be repeated. Maximum 10 hours.

### Credit Restriction

**Registration**

Enforced (RE)

Prerequisite(s):

<table>
<thead>
<tr>
<th>Department</th>
<th>Enforced (DE)</th>
<th>Corequisite(s)</th>
</tr>
</thead>
</table>

**Recommended Background**

- There is a need for a 4th concert ensemble because of the growth in numbers. Students have class conflicts (especially non-majors, who then can't fulfill their scholarship requirement) with current afternoon rehearsal times; this ensemble would meet one evening per week. Band Conducting GAs would be primary conductors (with a band faculty member as faculty of record), and this would also serve as an ensemble for Mus Ed students to play secondary instruments.

### Equivalency

**Rationale**

None

### Financial Impact

None

**Recommended Background**

**Comments** Students will need to supply their own guitar.

**Registration Restriction(s) | Registration Permission**

**Equivalency** None

**Rationale** We have had students asking for introductory courses in guitar performance for a while. Due to the fact that lessons are offered as one-on-one lessons, we do not have the faculty to offer such beginning lessons. This sequence of courses (MUSC 111, 112, 113) helps to fill this need.

**Impact on Other Units** None
Arts and Sciences Only

<tr>
<th>Equivalency</th>
</tr>
</thead>
</table>

**Rationale**  We are changing the composition minor and need to reorganize our Composition Class (taken by both majors and minors, an introduction to compositional techniques) and create a smooth path to the new MUTH 252 Composition Seminar (which will be for minors). The adjustment in variable credit hours is cleaned up so that there is no longer confusion for students registering for the Composition Class 250.

Equivalency

**Rationale**  Our minors are ever-growing, and with difficulty offering private lessons to all of them, we propose this new MUTH 252 Composition Seminar for a class instructional setting for minors. This will remove the capacity we currently put on the composition minor, and allow for interactive group composition lessons. Primarily for minors, but could be taken by majors as well.

Impact on Other Units  None
Financial Impact

None

Arts and Sciences Only

Only proposals originating from the College of Arts and Sciences should answer these questions.

Which CAS Committee(s) will be involved in this proposal?
- [ ] Arts and Humanities
- [ ] Natural Sciences
- [ ] Social Sciences

Select the checkbox if this course should be considered a Writing Emphasis course.

College of Music - MUTH - 255
2024-2025 UG Drop/Archive Course

General Catalog Information

College* College of Music

Department (Acalog Hierarchy)* College of Music

Subject/Prefix (choose from list)* MUTH

Course Number/Code (max 4 characters: 3 numerals and optional 1 letter: N, R, S)* 255

Course Title (max 100 characters)* Composition Class II

Credit Hours* 2-3

Change course status from active to:* Dropped (Inactive-Hidden)

Archived

Course Description A continuation to the introduction of compositional techniques.

Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

Equivalency

Rationale* Related to the MUTH 250 change, this will remove the second of the 2-course sequence in Composition Class, which is taken by both majors and minors. Since the course is naturally taught non-sequentially, students can now take MUTH 250 twice without one semester being pre-req for another, alleviating the problem we sometimes have where students wish to start the sequence in the second semester (which we override).
Impact on Other Units*  None

Financial Impact*  None

Have you consulted with all programs/departments that will be impacted by this change?*  Yes  No

<td>Bachelor of Science in Nursing</td>
</tr>
<tr>
<td>Program Type*</td>
<td>Undergrad (Major)</td>
</tr>
</tbody>
</table>

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Accelerated Track for Bachelor of Science in Nursing

An accelerated track is available for non-nurses with a prior baccalaureate degree.

Accelerated Track Admission

Students will be selected on the basis of the following criteria:

- Cumulative GPA for all courses completed.
- Cumulative GPA in required prerequisite courses.
- Number of course withdrawals and repetitions.
- Grade improvement over time.
- Probability of completing all required prerequisite courses prior to fall semester.
- Interest in and commitment to nursing.
- Availability of space.

The admission process is highly selective, with more qualified applicants than spaces available. If a student is selected for admission but then fails to successfully complete all required prerequisites with a grade of C or better prior to beginning the nursing sequence, the student will not progress into the accelerated BSN program.

Accelerated Continuing Education (ACE) Application Process

For applicants seeking to enroll in a College of Nursing Graduate Program directly after the conclusion of the ABSN program, applicants would notate this track on their University of Tennessee Application. Applicants will then complete the necessary admission requirements set forth by the Graduate Programs. (Not applicable for BSN-DNP Nurse Anesthesia Concentration)

Students in the accelerated track must complete the following prerequisite courses prior to admission:

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
### Rationale*
Allow students more course opportunities to allow students to meet prerequisite requirements.

### Financial Impact*
Allow students more course opportunities to allow students to meet prerequisite requirements.

### Impact on Other Units*
Allow students more course opportunities to allow students to meet prerequisite requirements.

### Have you consulted with all programs/departments that will be impacted by this change?*
- Yes
- No

## General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
RN Track for Bachelor of Science in Nursing

Distance Education (DE) programs in the College of Nursing that lead to professional licensure or that require clinical placements or clinical coursework must abide by board and state regulations in the state where the student resides and/or will be completing the clinical experiences.

Students who reside outside of Tennessee who plan to complete a clinical placement in a state other than Tennessee, will need to take additional steps to comply with the requirements of that state. Before applying to and beginning a program, you should become familiar with your state’s licensing and professional requirements and that of the state in which you plan to reside as a practitioner. You may also reach out to the College of Nursing and speak to an advisor by calling (865) 974-7606. The university cannot guarantee that its DE programs in the College of Nursing will meet all the requirements for licensure in any particular state. If the student moves from the state of Tennessee after admission to the program, continuation in the program will depend on the availability of the program within the new state where the student physically resides. It is the student’s responsibility to notify the UTK College of Nursing of a change in physical residence.

Distance Education programs at the University of Tennessee cannot currently admit students from the state of California.

You can find additional information about pre-licensure distance education requirements in individual states, visit the National Council of State Boards of Nursing (NCSBN): [https://www.ncsbn.org/671.htm](https://www.ncsbn.org/671.htm).

1. RNs must meet university general education requirements or be a graduate of a Tennessee Board of Regents school. Students will be given proficiency credits based on RN status. (Satisfactory/No Credit.)
2. Students starting upper division coursework will receive proficiency credit for select clinical nursing courses (26 credit hours). Courses for which credit will be attained include didactic courses equivalent to NURS 321, NURS 411, NURS 412, NURS 461 as well as Clinical Immersion courses equivalent to NURS 362S*, NURS 405, NURS 462S*, and NRSP 495N*. These credits will be held in escrow until the graduating semester for a student. (Satisfactory/ No Credit.)
3. All students take the community course NURS 383.
4. RN-BSN students are required to take NURS 334 - Health Assessment for the Registered Nurse.
5. Proficiency credit can be obtained in several other courses by passing instructor-made exams or preparing other work as specified by the faculty. These courses include NURS 320 - Pathophysiology for the Registered Nurse and NURS 401 - Pharmacotherapeutics for the Registered Nurse (indicated by an asterisk). All proficiency credit not designated as Satisfactory/No Credit carries a letter grade.
6. The entire upper-division nursing curriculum can be completed in one calendar year. Students not enrolled in nursing courses for two consecutive semesters will be administratively removed from the program.
Calendar year. Students not enrolled in nursing courses for two consecutive semesters, excluding summer, will be administratively withdrawn from the program. Those seeking reentry must reapply to the College of Nursing.

Accelerated Continuing Education (ACE) Application Process

For applicants seeking to enroll in a College of Nursing Graduate Program directly after the conclusion of the RN to BSN track, applicants would notate on their University of Tennessee Application this track. Applicants will then complete the necessary admission requirements set forth by the Graduate Program. (Not applicable for BSN-DNP Nurse Anesthesia Concentration).

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Students enrolled in the Traditional Bachelor of Science in Nursing (TBSN) program are required to successfully complete eight semesters of full-time study or the equivalent in part-time study, of prescribed coursework, for a total of 120 semester hours.

**Freshman Admission**

Selection is highly competitive and based primarily on academic achievement at the high school level and scores on the ACT and/or SAT, as well as interest in and commitment to nursing.

**Change of Major or Transfer Students**

Students currently enrolled at the University of Tennessee in another college/major may apply for an open position in the nursing program.

**Nursing Substitutions**

- CFS 210* or PSYC 300; MICR 210* or BIOL 220 with BIOL 229 lab.

**Progression Policies and Procedures**

Students admitted into the College of Nursing are eligible to continue into upper-division nursing courses if they meet the following criteria:

- complete all required courses in the freshman and sophomore curriculum by July 15th, prior to fall of junior year.
- earn a minimum of 3.20 cumulative grade point average at the conclusion of all required lower-division coursework, including NURS 201 and NURS 319. (Excess elective credit will not be counted toward this GPA requirement.)
- earn a minimum grade of “C” or better in all courses.
- Submit an Intent to Progress form by the noted deadline in sophomore year.

*Failure to fulfill these requirements and deadlines will make a student ineligible to progress to upper-division coursework, and the student will be released from the College of Nursing.

**General Instructions for Requirements**

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
**Rationale**

A more flexible curriculum will allow students in the nursing major to self-select courses that will meet the VOLcore requirements.

Students with an Associate of Science would also meet the VOLcore requirements.

**Financial Impact**

A more flexible curriculum will allow students in the nursing major to self-select courses that will meet the VOLcore requirements.

Students with an Associate of Science would also meet the VOLcore requirements.

**Impact on Other Units**

A more flexible curriculum will allow students in the nursing major to self-select courses that will meet the VOLcore requirements.

Students with an Associate of Science would also meet the VOLcore requirements.

College of Nursing - Nursing Major, BS in Nursing - Honors Concentration

2024-2025 UG Revise Program

General Catalog Information

College* College of Nursing

Department* College of Nursing

Program Name* Nursing Major, BS in Nursing - Honors Concentration

Degree Type* Bachelor of Science

Program Type* Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Nursing Honors Program

The University of Tennessee's Nursing Honors Program (NHP) includes academically enhanced nursing seminars, courses, and a scholarly project.

The NHP is designed to create an intellectual adventure and enhance the educational experience of high-achieving undergraduate nursing majors. Collaborative relationships with nursing faculty, academically enhanced nursing courses, and small-group seminars provide students with opportunities to develop a scholarly project and disseminate the findings at university, regional, and national forums. The program provides a strong foundation for baccalaureate students planning to pursue graduate education. The NHP complements university-level honors programs such as the Haslam Scholars and Chancellor's Honors Programs.

Benefits

- Build relationships with nurse scientists in the College of Nursing and have the opportunity to begin a unique and individual area of scholarship.
- Receive recognition on your transcript that you have completed the honors program.
- Earn an honors medallion to be worn during commencement.
- Prepared for graduate education.

If students are requiring additional coursework for the Haslam Scholars and Chancellor's Honors Programs, N482 Population Health will be modified to meet those criteria.

Admission Requirements

An invitation to apply to the NHP will be sent to full-time sophomore BSN students in the top 10% of their class by the NHP coordinator. To apply to the program, invited students need to:

- Complete the Nursing Honors Program application by April 1 of their sophomore year
- Submit a short essay.
- Submit a letter of recommendation from a UT faculty member or UT instructor

Note: All students in the Chancellor's Honors and Haslam Scholars program are automatically eligible for the NHP provided they are in good academic standing. They must notify the NHP coordinator by April 1 of their sophomore year of their intent to participate in the NHP.

Students accepted into the program must remain in good academic standing, with a GPA of at least 3.5, and complete all Nursing courses with a minimum grade of B- or better.

Progression Policies and Procedures

Students admitted into the College of Nursing are eligible to continue into upper-division nursing courses if they meet the following criteria:
General Instructions for Requirements

Course Description
Provides beginning students the opportunity to practice health promotion, health restoration, and health maintenance within a specialty area such as childbearing women, children, individuals with mental health conditions, requiring critical care or aging adults. Builds on the foundation of nursing knowledge, communication skills, and critical reasoning to address unique needs of the specialty population selected. Experiences are
in a variety of settings, supplemented with simulation.

</table>

**Course Description**

Emphasis on leadership to examine the impact of innovation, practice excellence, intra- and inter-professional collaboration, and population health with specific population and/or setting. Builds on all previous clinical immersions to synthesize the scientific process, evidence based practice, clinical reasoning, and problem-solving to support clinical decision-making. Experiences are in a variety of settings, supplemented with simulation and service-learning experiences.

**Will this course be crosslisted?** Yes | No

**If yes, what is the crosslisting relationship for this course?** Primary | Secondary

**List all courses in this crosslisting relationship and note whether primary or secondary**
If this course is seeking Vol Core approval, please be sure to submit a separate Vol Core approval form.

Satisfies Volunteer Core Requirement:

**Contact Hour Distribution (if more than one instructional method)**
2 lab hours (90 clinical hours).

**Grading Restriction**  Satisfactory/No credit

**Repeatability**

**Credit Restriction**

**Registration Enforced (RE)**
Prerequisite(s): NURS 351, NURS 419, NURS 420, NURS 422.

Department Enforced (DE)
Prerequisite(s)

**Registration Enforced (RE)**
Corequisite(s): NURS 415, NURS 432, NURS 444, NURS 454.

Department Enforced (DE)
Corequisite(s)

**Recommended Background**

**Comments**

**Registration Restriction(s)**
Bachelor of Science in Nursing – nursing major (accelerated track).

**Registration Permission**

**Equivalency**

**Rationale**
To align grading modality with course design

**Impact on Other Units**
none

**Financial Impact**
none

College of Social Work - Social Work Major, BS in Social Work

General Catalog Information

College*  College of Social Work

Department*  College of Social Work

Program Name*  Social Work Major, BS in Social Work

Degree Type*  Bachelor of Science in Social Work

Program Type*  Undergrad (Major)

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
**uTrack Requirements**

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Natural Sciences (NS) - chosen from the Volunteer Core list.

Global Citizenship courses - chosen from the Volunteer Core list.

Arts and Humanities (AH) - chosen from the Volunteer Core list.

Expanded Perspectives - chosen from the Volunteer Core list.

Any Social Sciences course not already required for the major.

Engaged Inquiries (EI) - chosen from the Volunteer Core list.

Any unrestricted elective or social work course not already required for the major.

* Meets Volunteer Core Requirements.

Rationale*

Added Honors versions of pre-existing Vol Core courses to reduce course substitution requests in the future.

Financial Impact*

Minimal financial impact as those university honors students taking honors Vol Core courses would have taken these anyway.

Impact on Other Units*

Little to no impact on other units.

### General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

**Description**

The BSSW Honors Program provides a small group of academically high-achieving social work majors with an enriching, engaging, and individualized undergraduate academic experience and an opportunity to earn both a BSSW and an MSSW degree in five years. Honors students who satisfactorily complete all requirements for the Honors program and BSSW degree are eligible to apply for conditional admission into the Advanced Standing MSSW Program by completing the graduate application. Conditional admission is reserved for only those Honors students who enroll in the Advanced Standing MSSW Program in the summer semester immediately following completion of the BSSW degree and Honors Program. All declared social work majors with a cumulative grade point average of at least 3.5 are invited to apply for admission to the BSSW Honors Program.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

All curriculum and program requirements for the Online BSSW Program are identical to those required for the on-campus BSSW Program. All required social work courses will be delivered exclusively online using the UT approved online learning management system. Like the on-campus BSSW Program, students will work with their field coordinator to secure their required field/internship placements that occur in a real-world practice setting under the supervision of a professional social worker.

The Online BSSW Program is specifically designed for transfer students. Only transfer students who have earned 60 credit hours and an Associate of Art (A.A.) or Associate of Science (A.S.) degree from a regionally accredited community college are eligible to apply and participate in the Online BSSW Program. Transfer students who completed the Tennessee Transfer Pathway in Social Work are highly encouraged to apply.

Current students who earn an A.A. or A.S. and 60 credit hours through the Tennessee Reverse Transfer process are eligible to apply as well. Additionally, the Social Work Honor's Program is not an available option for students enrolled in the Online BSSW Program. Once enrolled in either the Online BSSW Program or on-campus BSSW Program, students will be permitted to switch to the other program only in extenuating circumstances and final decisions reside with the BSSW Program Director.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSA

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

**Course Description**
This course examines biological, psychological, and social theories and frameworks for practice with individuals and families across the lifespan, emphasizing the interaction between neurophysiological development, trauma, and environmental contexts. Students explore topics such as risk and protective factors that influence and shape development, while promoting resilience, the influence of culture, oppressive systems, and dynamic processes critical to risk and resilience for vulnerable populations. Additionally, students examine practice implications for promoting healthy development including early prevention policies, practices, and services.

**Will this course be crosslisted?**

### Change course status from active to:*
- Dropped (Inactive-Hidden)
- Archived

### Course Description
This course examines biological, psychological, and social theories and frameworks for practice with individuals and families. This course emphasizes the interaction between neurophysiological development and environmental contexts. Students explore topics such as risk and protective factors that influence and shape development while promoting resilience, and the influence of culture, oppressive systems, and dynamic processes critical to risk and resilience for vulnerable populations. Additionally, students examine practice implications for working with adults including family and social relationships, behavioral health challenges, chronic illness, and death and dying.

### Statement about Crosslistings

Only the course under the Subject Code and Course Number listed above on this form will be dropped. If multiple courses in a crosslisting relationship are to be dropped, fill out a separate Drop Course form for each. If dropping a primary course, additional Drop Course OR Revise Course forms will be necessary for ALL secondary courses.

### Equivalency

5. After you have completed all edits to the text, be sure to approve your proposal in the decisions tab on the right.
The College of Communication and Information fosters among students a sense of the legal and ethical responsibilities of access to information and the exercise of expression in a democratic society. Additionally, the College serves the professional goals of preparing students for careers in communication and information.

The College includes four schools – the Tombras School of Advertising and Public Relations, School of Communication Studies, School of Information Sciences, and School of Journalism and Media. Five undergraduate majors are offered – advertising, communication studies, information sciences, journalism and media, and public relations. The School of Communication Studies also offers an undergraduate honors program.

Programs for which accrediting is available are fully accredited. The advertising, journalism and media, and public relations programs are accredited by the Accrediting Council on Education in Journalism and Mass Communication. The information sciences master's program is accredited by the American Library Association and the National Council for Accreditation of Teacher Education.

Study Abroad programs are strongly encouraged in the College of Communication and Information. Students may select from a wide variety of faculty-led summer programs. CCI faculty members currently lead study abroad groups to variety of countries including England, Italy, Ireland, and Czech Republic. Students may also choose to participate in semester-long study abroad programs. Communication and Information courses are available at selected universities in a variety of countries. Students are encouraged to check the study abroad link on the college web site at https://www.cci.utk.edu/.

The College, or one of its units, is a member of the Advertising Research Foundation; American Academy of Advertising; American Advertising Federation; American Library Association; Association for Education in Journalism and Mass Communication; Association of Library and Information Sciences Education; Association of Schools of Journalism and Mass Communication; Broadcast Education Association; National Communication Association; Public Relations Society of America; Society of Professional Journalists; Southern States Communication Association; Tennessee Library Association; and Tennessee Press Association.

College Core Areas

Students in the Tombras School of Advertising and Public Relations and the Schools of Communication Studies, Information Sciences, and Journalism and Media study the following core areas.

- Overview/survey
- Writing
- Theory and research

Each unit designates a course (or courses) to fulfill the requirements.
No course that is part of the specific requirements of the college or of a student’s major can be taken under this option. With the exception of field experience courses or practica, this option applies only to general or unrestricted electives.

**uTrack Requirements**

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

**Internal Transfer and Readmission Requirements**

Students in other UT colleges interested in a major in the College of Communication and Information will be required to meet the milestones for their intended major. All students must schedule an appointment with an advisor in the CCI Center for Undergraduate Studies and Advising regarding their eligibility for the major. Students must have a minimum of a 2.0 GPA to declare a major in the College of Communication and Information. Until achieving good standing, an academic probationary student will be advised as a prospective student. A CCI advisor will determine the steps necessary to move from prospective to admitted student.

Communication and Information students readmitted to the University and left in good academic standing are readmitted into the College. Communication and Information students who readmitted to the University with below a 2.0 will be readmitted into University Transition. Once a 2.0 GPA is achieved, students are welcome to declare their major within the College of Communication and Information.

**Requirements for Graduation**

The Bachelor of Science in Communication is awarded to majors who complete a program of at least 120 hours prescribed under the advertising, journalism and media, or public relations requirements. Advertising, Journalism and Media, and Public Relations students must complete at least 72 hours in courses other than communication and information, journalism and media, advertising, and/or public relations. All students must take a course or courses designated by their school to address freedom of speech, law, and ethics. Students must achieve a cumulative grade point average of at least 2.0 in all College courses used to fulfill graduation requirements.

All courses in the core Public Relations progression, **PBRL 310 - Public Relations**
Minors, , , and must be completed with a grade of C- or better for the hours to count toward requirements for the major.

The Bachelor of Arts in Communication is awarded to communication studies majors who successfully complete the 120 hours prescribed under the communication studies requirements. Students must earn at least a C– in all communication studies courses completed for the hours to count toward requirements for the major. Students must achieve a cumulative grade point average of at least 2.0 in all College courses used to fulfill graduation requirements. CMST 260 - Professional Skills in Communication Lab, CMST 312 - Survey of Interpersonal Communication, CMST 342 - Survey of Organizational Communication, CMST 352 - Communication Theory, CMST 356 - Research Methods in Communication Studies, and CMST 499 - Proseminar in Communication Studies must be completed at UT Knoxville.

The Bachelor of Science in Information Sciences is awarded to majors who successfully complete the 120 hours prescribed under the information sciences requirements. INSC 201 - Foundations of Information Sciences, INSC 210 - Foundations of Information Technology, INSC 311 - User-Centered Design, INSC 260 - Programming for Information Applications, and INSC 380 - Information Management in Organizations are the core courses in the Information Sciences progression. The information sciences major offers three concentrations: Data, Information Management, and Analytics (DIMA), User Experience Design (UXD), and a general concentration. Students must earn at least a C- in all information sciences courses for the hours to count toward requirements for the major. Students must achieve a cumulative grade point average of at least 2.0 in all College courses used to fulfill graduation requirements.

For both the BA and BS, at least 18 hours in major courses must be taken at UT Knoxville.

Minors

Disciplinary minors are offered in advertising and public relations, communication studies, digital media, information sciences, journalism and media, social media analytics, and user experience design. An interdisciplinary minor in Broadcast Meteorology in cooperation with the Department of Geography and Sustainability is offered. Students interested in a disciplinary minor should complete the online minor declaration form accessed here. At least six of the credit hours required for a minor must be completed at UT Knoxville.

**Requested Content Changes for Catalog**

Exploratory tracks are available to students who have not yet decided on a specific program of study. These programs allow students to explore major options as well as make progress toward graduation through the completion of Volunteer Core (general education) courses.

- College Exploratory programs are designed for students who are deciding among one or more majors in the same college. More information on College Exploratory programs is available below.
- The University Exploratory program is housed within the Center for Career Development & Academic Exploration. Students in the program are advised by Academic & Career Exploration (ACE) Coaches who provide integrated academic and career planning support.
- Transfer students with more than 24 transferable hours must be admitted directly into a college.

General Catalog Information

College* Haslam College of Business

Department* Accounting and Information Management

Program Name* Accounting Major, BS in Business Administration - Collateral Option

Degree Type* Bachelor of Science in Business Administration

Program Type* Concentration

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Description

The University of Tennessee has one of the leading accounting programs in the nation. The program emphasizes the conceptual and applied understanding of business information and prepares students for careers in accounting and business.

The faculty strongly encourages students who desire to become professional accountants, such as Certified Public Accountants (CPAs), to continue their formal education in UT’s full-time, eleven-month Master of Accountancy (MAcc) program, which is described in the University's Graduate Catalog.

The primary objective of the 30 semester-hour MAcc program is to prepare students for careers as professional accountants. MAcc students select a specialty area in (1) audit/controls or (2) information management or (3) taxation.

Taken together, the BS and MAcc programs provide graduates not only with two academic degrees, but also with the educational requirements to sit for the CPA and/or CISA exam as well as the academic preparation to begin successful careers as professional accountants. Most states, including Tennessee, require 150 semester hours of education to sit for the CPA exam. At UT, students may earn 120 semester hours in the undergraduate program and then 30 hours in the MAcc program, for a total of 150 semester hours. The accounting faculty strongly encourages MAcc students to take the CPA and CISA exams as soon as they qualify.

The UT undergraduate accounting program offers its majors an opportunity to participate in two full-time, highly-structured internship programs. The first internship program emphasizes internships in industry. The second internship program emphasizes internships with public accounting firms. Both internship experiences are full-time and offer relevant work assignments and significant compensation.

The undergraduate accounting curriculum introduces students to the major functional areas of accounting (financial, managerial, etc.). The curriculum also requires students to choose a three-course collateral area in one of five areas that closely complement a career in accounting – business analytics, finance, information management, international business, or real estate.

The UT accounting program has separate accounting accreditation from AACSB International and is one of the first accounting programs to have earned this designation. As an accredited program, the UT accounting program continuously meets or exceeds a rigorous set of international accreditation standards and is peer reviewed on a regular basis.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes:

Must be completed by the end of the First Year. Chosen from the Volunteer Core list.
Students who have already completed MATH 132* with a C or better may substitute that for MATH 141*.
Any courses not already required for the major. Students admitted to Smith Global Leadership Scholars will fulfill 10 hours of electives with the following courses – BUAD 217, BUAD 317*, BUAD 417, BUAD 427, and BUAD 497.
Students admitted to Smith Global Leadership Scholars will complete the honors versions of these courses: ACCT 208, BUAD 337, BUAD 338, BUAD 457*, ECON 218*, FINC 308, and STAT 207*.
Students admitted to Smith Global Leadership Scholars will not take these courses due to content being covered elsewhere in their curriculum.
Students pursuing a collateral in Finance must choose FINC 306.
First-semester freshmen should take BUAD 100; transfer students should take BUAD 210.
At least three hours from courses among the Volunteer Core - Applied Arts and Humanities (AAH), Arts and Humanities (AH), Global Citizenship - International (GCI), Global Citizenship - United States (GCUS), or Social Sciences (SS) lists.
* Meets **Volunteer Core** Requirements.

## Accounting Collateral Options

## Advanced Foreign Language

(only available to students pursuing International Business as a secondary major)

9 Hours of 300+ Foreign Language as outlined in **International Business Major** requirements

## Business Analytics

BAS 320 Regression Modeling  
BAS 474 Data Mining and Business Analytics  
INMT 342 Introduction to Database Systems

## Finance

FINC 420 Financial Statement Analysis  
FINC 425 Investment and Portfolio Management  
FINC 455 Financial Management: Theory and Practice  
[Right] (FINC 425 is a co-requisite to FINC 455)

## Information Management

[Before]Complete:  
INMT 342 Introduction to Database Systems  
[After]
Complete two courses:

INMT 441 Introduction to Cybersecurity in Business
INMT 442 e-Enterprise
INMT 443 Business Applications and Tools
INMT 499 Special Topics in Information Management

(3 hours)

International Business

Nine hours from:
IB 407 Honors: International Business
IB 409 International Business
IB 429 International Economics for Business
IB 439 Global Supply Chain Management
IB 449 International Finance
IB 492 Off-Campus Study

(3 hours)

IB 499 Special Topics in International Business

BUAD 400 Special Topics

* or

MGT 472 Managing People in the Global Environment

IB 489 Study Abroad

Real Estate

FINC 381 Real Estate Principles
FINC 481 Real Estate Finance and Investment Analysis
FINC 482 Real Estate Cases
Rationale*

Updated program description for clean-up; supply chain management is no longer a collateral option, but real estate is.

Revised Finance collateral options; replaced FINC 450 with FINC 455 because 450 will no longer be offered. FINC 455 is a more rigorous version of FINC 450, but accounting students will be prepared for the extra rigor and theory.

Removed previous footnote 5 that recommended that students preparing to enter MAcc program should take ACCT 481; ACCT 481 is currently not offered; unknown if it will be offered again in the future. This reduces confusion/concern among students. Accordingly, updated other footnote numbers (5 and after) in program requirements.

Financial Impact*

No financial impact except for Finance 455 change. Finance department suggested the change. Should help the college budget by not needing to offer FINC 450 any longer and redistributing students into other already existing courses.

Impact on Other Units*

Finance department suggested Finance collateral change.

Have you consulted with all programs/departments that will be impacted by this change?* Yes ☐ No ☐

ADMINISTRATIVE USE ONLY

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
The University of Tennessee has one of the leading accounting programs in the nation. The program emphasizes the conceptual and applied understanding of business information and prepares students for careers in accounting and business.

The faculty strongly encourages students who desire to become professional accountants, such as Certified Public Accountants (CPAs), to continue their formal education in UT's full-time, eleven-month Master of Accountancy (MAcc) program, which is described in the University's Graduate Catalog.

The primary objective of the 30 semester-hour MAcc program is to prepare students for careers as professional accountants. MAcc students select a specialty area in (1) audit/controls or (2) information management or (3) taxation.

Taken together, the BS and MAcc programs provide graduates not only with two academic degrees, but also with the educational requirements to sit for the CPA and/or CISA exam as well as the academic preparation to begin successful careers as professional accountants. Most states, including Tennessee, require 150 semester hours of education to sit for the CPA exam. At UT, students may earn 120 semester hours in the undergraduate program and then 30 hours in the MAcc program, for a total of 150 semester hours. The accounting faculty strongly encourages MAcc students to take the CPA and CISA exam as soon as they qualify.

The UT undergraduate accounting program offers its majors an opportunity to participate in two full-time, highly-structured internship programs. The first internship program (summer program) emphasizes internships in industry. The second internship program (spring program) emphasizes internships with public accounting firms. Both internship experiences are full-time and offer relevant work assignments and significant compensation.

The UT accounting program has separate accounting accreditation from AACSB International and is one of the first accounting programs to have earned this designation. As an accredited program, the UT accounting program continuously meets or exceeds a rigorous set of international accreditation standards and is peer reviewed on a regular basis.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes

Must be completed by the end of the First Year. Chosen from the Volunteer Core list.
Students who have already completed MATH 132* with a C or better may substitute that for MATH 141*.
Students admitted to Smith Global Leadership Scholars will complete the honors versions of these courses: ACCT 208, BUAD 337, BUAD 338, BUAD 457*, ECON 218*, FINC 308, and STAT 207*.
Any courses not already required for the major. Students admitted to Smith Global Leadership Scholars will fulfill 10 hours of electives with the following courses -- BUAD 217, BUAD 317*, BUAD 417, BUAD 427, and BUAD 497.
Twelve hours chosen from IB 407, IB 409, IB 429, IB 439, IB 449, IB 492, IB 499, BUAD 400* or MGT 472; and IB 489.
Students admitted to Smith Global Leadership Scholars will not take these courses due to content being covered elsewhere in their curriculum.
Students who plan on pursuing the Master of Accountancy are encouraged to take **ACCT 411**.

First-semester freshmen should take **BUAD 100**; transfer students should take **BUAD 210**.

At least three hours from courses among the Volunteer Core: **Applied Arts and Humanities (AAH)**, **Arts and Humanities (AH)**, **Global Citizenship - International (GCI)**, **Global Citizenship - United States (GCUS)**, or **Social Sciences (SS)** lists.

*Meets **Volunteer Core Requirements**.

---

**Rationale**

Updated program description for clean-up. Collateral options are not a part of this program, so that portion of the description is removed.

Revised footnote 8. ACCT 481 is currently not offered; unknown if it will be offered again in the future. This reduces confusion/concern among students.

---

**Financial Impact**

None.

---

**Impact on Other Units**

None; the course is currently not offered.

---

**Recommended Background**

**Comments**

**Registration Restriction(s)**

**Registration Permission**

**Equivalency**
When BAS 454 was first developed, it was intended as a course that taught students how to use one of the most popular statistical software packages in use at that time, namely SAS (Statistical Analysis System). Although it is still a popular software for analytics in some areas of business, it is no longer the front-runner in the world of analytics software. The field of analytics has shifted from a purely analysis emphasis (which is SAS’s strongest feature) to more of a data presentation and visualization emphasis. Software packages such as Tableau and Microsoft Power BI are well known and powerful data visualization software packages. The corporate partners of the Business Analytics & Statistics Department (BAS) have been asking us to offer a course on data visualization software for some time so that our students are prepared to perform this important analytics function in their careers. Additionally, the Supply Chain Management Department (SCM), working with BAS, have developed an Operations Analytics collateral for their majors that involve courses from BAS. SCM have also requested the creation of such a course for these majors pursuing a collateral in Operations Analytics and if approved, this course will become an option (and eventually a requirement) for these students. The course will not be limited to SCM majors doing a collateral in Operations Analytics, but rather will be available as a Business Analytics elective for all majors that currently list BAS 454 among the Business Analytics electives. Changing the emphasis of this course from SAS to Tableau, Power BI or other data visualization software is an attempt to keep this "analytics software" course up to date and in line with the current demands of hiring companies.

Financial Impact* Initially, it is not anticipated that this change will require additional faculty or GTA resources. One of the current full-time faculty in BAS has agreed to develop and teach this course for the first time as part of their normal workload. The current supply of GTAs will be sufficient to handle this course at this early stage. If this course becomes a popular Business Analytics elective, it will shift demand away from other existing BAS electives, potentially resulting in no net increase in resource demands. However, this revised course has the potential to be very popular among the entire UTK undergraduate population, and decisions will be made in the future regarding the need for additional instructors to satisfy all potential demand, or perhaps restrict the supply of seats for this course (and possibly restrict enrollment to only HCB students).

Have you consulted with all programs/departments that will be impacted by this change?* □ Yes □ No □ Minor changes only/Not Applicable

Financial Impact*

Although the proposed change of prerequisite will allow all HCB students to take this course (after completing INMT 242), it is not anticipated that a large increase in demand for BAS 464 will result by making this prerequisite change.

Have you consulted with all programs/departments that will be impacted by this change?*

Equivalency
**Rationale**

The primary focus of the course is to help students grasp the potential of these emerging technologies and their practical applications within various business contexts. By exploring the capabilities and business impacts of these technologies, students will develop a broader awareness of their significance and how they are reshaping traditional business practices. This course serves as a catalyst for motivating students to further their learning and acquire advanced skills in their areas of interest. Throughout the course, students will engage in a combination of lectures delivered by experienced instructors and insightful talks from guest speakers representing diverse industries. These industry practitioners will offer valuable insights and real-world examples of how these technologies are transforming businesses across different sectors. Assessment in this course comprises in-class activities designed to gauge student comprehension of the material and foster interactive learning. Additionally, students will be required to complete a research essay, focusing on a specific emerging technology. By the end of this course, students will have developed a clear understanding of various emerging technologies. This course will empower students to shape their academic and professional paths with a keen awareness of the transformative possibilities these technologies offer.

**Impact on Other Units**

None

**Financial Impact**

College will find current faculty to initially offer the course through ESP or identify an adjunct to deliver the course through standard contract lecturer rates. College will fund the instruction with Undergraduate Business fee until tuition can be realized. No other units should be impacted.

**Equivalency**

**Rationale**  Smith GLS students are required to attend professional development engagement opportunities every Friday afternoon. We need a way to reserve this time on their schedules to prevent scheduling conflicts.

**Impact on Other Units**  None
Financial Impact*  None. These professional development engagement opportunities are already occurring as a part of the Smith GLS program for the last 15 years. The program has dedicated funding from the college, which covers faculty compensation. This is purely administrative nature to prevent students from scheduling other courses during the Friday afternoon time period.

Rationale*: Means of ensuring marketing students can get into major coursework earlier in their program of study. The aim in doing so is to ensure students are better positioned for internships in summer of Sophomore year and to allow for incremental knowledge to build across semesters rather than have students complete multiple 400 level courses (up to 4) in one semester (often their last semester) or complete the capstone before taking elective courses.

Student Information System ID
General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.
Description

The degree in Business Analytics is designed to prepare students for a career in business analytics by developing their business knowledge, their technical skills and their communication skills.

Business analytics involves the use of data analysis and computer models to make better business decisions. Organizations use business analytics to answer strategic questions such as (1) which products and services that we provide are most profitable (2) who are our most profitable customers and (3) where should we locate our retail outlets and our distribution centers. Business analytics are also used for tactical decisions in optimizing an organization's day-to-day operations, marketing, purchasing and pricing decisions.

Banks, credit card companies and insurance companies use business analytics to predict the profitability of potential customers and to offer better deals to the more profitable customers. Online vendors use business analytics to make recommendations to customers. Manufacturers use business analytics to optimize the location of their distribution centers and to optimally manage the movement of products through their supply chain. Retailers use business analytics to grow their revenues through customer loyalty programs. Sports teams have used business analytics to gain a competitive advantage in selecting players and in making tactical decisions on the field.

Business analytics is transforming the way traditional businesses make decisions. It is also the critical element in an entire industry of internet companies that provides services, search capabilities and social networking. These companies use business analytics to glean marketable insights from the massive amounts of data that they collect from their users.

The Business Analytics program also provides students the background to gain industry certifications in commercial software for data analysis and tools used for optimizing online sales and advertising. This further enhances students' job opportunities.

Students who major in Business Analytics need quantitative skills, interpersonal skills, an interest in business and a desire to be a pioneer in a rapidly growing new field.

General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for campus code or certificate type, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

Campus Code options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

Certificate Type options should be entered from the following list: Add-On, Stand-Alone
uTrack Requirements

Universal Tracking (uTrack) is an academic monitoring system designed to help students stay on track for timely graduation. In order to remain on track, students must complete the minimum requirements for each tracking semester, known as milestones. Milestones include successful completion of specified courses and/or attainment of a minimum GPA. uTrack requirements only affect full-time, degree-seeking students.

Footnotes:

Must be completed by the end of the First Year.
Chosen from the Volunteer Core list.
Students who have already completed MATH 132* with a C or better may substitute that for MATH 141*.
Any courses not already required for the major. Students admitted to Smith Global Leadership Scholars will fulfill 10 hours of electives with the following courses – BUAD 217, BUAD 317*, BUAD 417, BUAD 427, and BUAD 497.
Select two courses from the following (only 1 can be at the 300 level): BAS 310 (not available to Supply Chain Management collaterals), BAS 340, BAS 370S, BAS 454, BAS 464, BAS 471, BAS 475, BAS 476, BAS 494R (Melton Scholars only).
Students admitted to Melton Scholars program will enroll in **BAS 494R**; select one course from **BAS 310** (not available to Supply Chain Management collaterals), **BAS 340, BAS 370S, BAS 454, BAS 464, BAS 471, BAS 475, BAS 476**.

Students admitted to Smith Global Leadership Scholars will complete the honors versions of these courses: **ACCT 208, BUAD 337, BUAD 338, BUAD 457**, **ECON 218**, **FINC 308**, and **STAT 207**.

Students admitted to Smith Global Leadership Scholars will not take these courses due to content being covered elsewhere in their curriculum.

Students pursuing a collateral in Finance must choose **ACCT 203** or **ACCT 208**, and **FINC 306**.

First-semester freshmen should take **BUAD 100**; transfer students should take **BUAD 210**.

At least three hours from courses among the **Volunteer Core Applied Arts and Humanities (AAH), Arts and Humanities (AH), Global Citizenship - International (GCI), Global Citizenship - United States (GCUS)**, or **Social Sciences (SS)** lists.

* Meets **Volunteer Core Requirements**.

---

### Business Analytics Collateral Options

---

### Advanced Foreign Language

(only available to students pursuing International Business as a secondary major)

9 Hours of 300+ Foreign Language as outlined in **International Business Major** requirements

MARK 465 Strategic Digital Marketing
MARK 466 Integrated Marketing Communications Management
MARK 469 Professional Selling
MARK 475 Visual Marketing
MARK 485 Digital Consumer Insights

Real Estate

FINC 381 Real Estate Principles
FINC 481 Real Estate Finance and Investment Analysis
FINC 482 Real Estate Cases

Supply Chain Management

[Before] Complete:
SCM 309 Supply Chain Analytics and Decision Making

[After]
[Before] Complete two courses:
SCM 413 Logistics Operations
SCM 414 Manufacturing and Service Operations
SCM 421 Global Strategic and Sustainable Sourcing
**Rationale**

* Added Real Estate collateral to list of collateral options; Analytics is a discipline that is applicable to any area of business, and Real Estate is no exception. Real Estate organizations that have a strong analytics staff will outperform such organizations that don't. Adding this collateral opens the door to our Business Analytics students interested in applying their skills to the Real Estate industry.

Revised Finance collateral course options; The main reason this curricular change is needed is that FINC 450 will no longer be offered, and since that is currently a required course for Business Analytics majors doing this collateral, some sort of change was required. After discussion with the Finance Department, it was decided to allow Business Analytics majors doing a Finance collateral maximum flexibility in Finance courses they choose to complete this collateral (while still requiring FINC 420). The list of course students can pick from was recommended by the Finance Department as appropriate for Business Analytics majors pursuing a collateral in Finance.

Revised footnote 6 for clean-up to include more BAS course options for students admitted to the Melton Scholars program; all Business Analytics majors in the collateral option must pick two Business Analytics electives to satisfy degree requirements. Business Analytics majors doing the collateral option that are also admitted to the Melton Scholars program are required to enroll in BAS 494R - Quantitative Research in Business Analytics (3) as one of their two Business Analytics "electives". They must then choose one additional Business Analytics elective. At the time that the requirements for Melton Scholars were being developed, the coordinator of the Melton Scholars Program (Dr. Adam Petrie) did not like the emphasis of BAS 454 for Melton Scholars, and purposely did not include this course in the list of Business Analytics electives such students could choose from. However, assuming the proposal for changes to BAS 454 are approved (see other catalog change proposal documents for 2024-2025), Dr. Petrie DOES want this course to be among the options for such students. Unintentionally, when BAS 464 was created, it was left off the list of Business Analytics electives Melton Scholars can choose from. Adding BAS 454 and BAS 464 to the list of Business Analytics electives Melton Scholars can choose from simplifies academic advisors' jobs by making the list of Business Analytics electives all students can choose from the same, regardless of their involvement in the Melton Scholars Program.

Drop Workforce Analytics collateral; This collateral has low student enrollment, and one of the required courses, MGT 465, will no longer be offered. The Department of Management and Entrepreneurship is also dropping its Workforce Analytics track for Management majors. Students currently in the collateral will be provided with alternate means to complete their requirements.
Financial Impact*

Addition of Real Estate collateral: The Finance department approved of us adding this collateral for Business Analytics majors. We do not anticipate a large number of BAS majors to choose this collateral, so the impact on the Finance department will be minimal.

Revised Finance collateral course options: Finance department suggested the change. Should help the college budget by not needing to offer FINC 450 any longer and redistribute students into other already existing courses.

Revised footnote 6 for Melton Scholars: None.

Drop Workforce Analytics collateral: Minimal; as noted, enrollment has been low, and one of the courses is no longer offered.

Impact on Other Units*

Finance department suggested Finance collateral changes and approved adding the Real Estate collateral.

Management and Entrepreneurship department is dropping its Workforce Analytics track for Management majors and suggested we drop that collateral for BAS majors.

The economics major provides an opportunity to apply the theoretical and analytical rigor of basic managerial and macroeconomic tools to contemporary issues in economics and business. Students choose from a traditional option (27 hours in economics), a collateral option (complementary coursework in finance, mathematics, or statistics), a concentration in business analytics, a concentration in international business, or a concentration in Heath Integrated Business and Engineering. Electives, as well as major coursework under the traditional option, consider topics such as business/industrial organization and public finance, as well as international, quantitative, monetary, regional/urban, environmental, labor, and health economics. Majors pursue careers in the traditional business disciplines, consulting, all levels of government service, and a variety of other fields. The program provides excellent training for graduate work in economics, business, public policy, and law. Students planning to pursue graduate study in economics should elect the quantitative economics and mathematics collateral option.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

---

**Requirements**

**Rationale**

Adding a 5-year accelerated combined Bachelor's/Master's program. This program will greatly expand the career opportunities and earnings potential for graduates. Other major universities in Tennessee offer terminal master’s degrees in Economics that require 1.5 to 2 years to complete. This program provides an opportunity for our students to earn an advanced degree on an abbreviated timeline, which further increases the return on investment. Last, graduates of this program will have a much better chance of admission to a top PhD program, as there is a considerable gap between bachelor’s coursework and a PhD program in economics or finance.

**Financial Impact**

The proposed program will increase enrollment in existing 500-level economics courses. These courses at present have excess capacity. A *pro forma* financial analysis of the proposed program suggests that because our direct costs are low (we are adding just two graduate ECON courses), under the BAM model the program will be profitable for the department and college starting in the first year, and significantly more so in subsequent years. As such, the staffing impacts mentioned above should not cause any financial strain.

**Impact on Other Units**

The Department of Economics and the Department of Finance have collaborated in putting together this proposal. Corresponding proposals have been submitted at the graduate level, and likewise will be submitted for all versions of the BSBA in Economics and BSBA in Finance at the undergraduate level. Furthermore, a corresponding proposal for the BA in Economics through the College of Arts and Sciences is going through their curriculum processes.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone

---

### Requirements*

**Rationale**

The Finance Department will no longer offer FINC 450, which was formerly included in the "Choose 2" courses for the Finance collateral. In reviewing the "Choose 2" courses, the Finance department recommended considering the addition of IB 449 to the list and the recommendation was approved.

Added in language about new 4+1 program option. Adding a 5-year accelerated combined Bachelor's/Master's program. This program will greatly expand the career opportunities and earnings potential for graduates. Other major universities in Tennessee offer terminal master's degrees in Economics that require 1.5 to 2 years to complete. This program provides an opportunity for our students to earn an advanced degree on an abbreviated timeline, which further increases the return on investment. Last, graduates of this program will have a much better chance of admission to a top PhD program, as there is a considerable gap between bachelor's coursework and a PhD program in economics or finance.

### Financial Impact*

Should help the college budget by not needing to offer FINC 450 any longer and redistributing students into other already existing courses.

The proposed BSBA/MA program will increase enrollment in existing 500-level economics courses. These courses at present have excess capacity. A *pro forma* financial analysis of the proposed program suggests that because our direct costs are low (we are adding just two graduate ECON courses), under the BAM model the program will be profitable for the department and college starting in the first year, and significantly more so in subsequent years. As such, the staffing impacts mentioned above should not cause any financial strain.
The Finance department suggested the change. We believe adding IB 449 will offer students more flexibility in their decisions to pursue a Finance collateral, particularly if they have an international focus.

The Department of Economics and the Department of Finance have collaborated in putting together the accelerated/combined BSBA/MA proposal. Corresponding proposals have been submitted at the graduate level, and likewise will be submitted for all versions of the BSBA in Economics and BSBA in Finance at the undergraduate level. Furthermore, a corresponding proposal for the BA in Economics through the College of Arts and Sciences is going through their curriculum processes.

General Instructions for Description

This field is only for the introductory program text at the top of the page. All other program information and requirements must be entered into the "Requirements" field below.

Description

The economics major provides an opportunity to apply the theoretical and analytical rigor of basic managerial and macroeconomic tools to contemporary issues in economics and business. Students choose from a traditional option (27 hours in economics), a collateral option (complementary coursework in finance, mathematics, or statistics), a concentration in international business, or a concentration in Heath Integrated Business and Engineering. Electives, as well as major coursework under the traditional option, consider topics such as business/industrial organization and public finance, as well as international, quantitative, monetary, regional/urban, environmental, labor, and health economics. Majors pursue careers in the traditional business disciplines, consulting, all levels of government service, and a variety of other fields. The program provides excellent training for graduate work in economics, business, public policy, and law. Students planning to pursue graduate study in economics should elect the quantitative economics and mathematics collateral option.
General Instructions for Requirements

All program requirements must be entered into the Requirements field below.

If you are adding cores for **campus code** or **certificate type**, enter all applicable cores in the order they are listed using the content exactly as it appears below. For additional information or examples, please see the Curricular Submission Guide.

**Campus Code** options should be entered from the following list: Knoxville Campus, Distance Ed, Nashville Campus, UTSI.

**Certificate Type** options should be entered from the following list: Add-On, Stand-Alone.
