For non-highway construction projects, a wage determination request must be made 30 days before advertising for bids. This request is made on Department of Labor standard form 308. This form, as well as the wage determination request, can be obtained from James E. Patching, Regional Administrator, Employment Standards Administration, U. S. Department of Labor, 1371 Peachtree St., N.E., Room 331, Atlanta, GA 30309. For further information by phone call Gerald M. Parks, 404/526-5801.

It is interesting to note that the Davis-Bacon Act was first signed into law by President Hoover in March 1931 as a measure to protect local contractors and workers from out-of-town contractors bidding for government work with low-paid labor. Ironically, today the opposite is often true with the Davis-Bacon Act requiring the payment of artificially high wages, particularly in the more remote and rural areas of the state. At one time President Nixon tried unsuccessfully to suspend the Davis-Bacon wage provisions as part of his economic stabilization program. The move met with tough opposition from organized labor who feel the act protects workers against exploitation, especially in times of high unemployment.

The Davis-Bacon wage requirements have been written into nearly every federal aid law since the original passage of the act, including general revenue sharing and most recently the Community Development Act. About the only exceptions are projects funded by the Farmers' Home Administration and Federal Disaster Assistance Administration.--LG
