FINAL 1980 POPULATION COUNT -- TENNESSEE MUNICIPALITIES

Prepared by Mike Tallent and Gary Mabrey, Municipal Consultants

Attached are the final population counts of the 1980 census for Tennessee municipalities, based upon information from the U.S. Bureau of Census. These figures are important since they are the multiplying factor in the distribution of state shared taxes for fiscal year 1981-82. They also should be used in preparing revenue projections for state shared taxes for fiscal year 1981-82 budgets, once per capita estimates are available.

These counts have to be certified by the Tennessee State Planning Office by June 30, 1981. If your city has annexed any territory within fiscal year 1980-81, you should make sure TSPO is aware of that annexation. The 1980 census probably does not include such recent annexations and, therefore, this should increase your certified count above those in the following list if the annexed area contained any population. To receive your fair share of tax collections, be sure to notify the State Department of Revenue of any businesses located in an annexed area.

Many cities have experienced substantial losses or gains when comparing the 1980 census counts to the most recent TSPO certified population count. An example of the impact of these losses or gains, based upon the current year's per capita distribution of state shared taxes, would have been approximately \$40.00 per person.

There may be some adjustments in the final counts due to the success of pending challenges by municipalities, or due to errors by the Bureau of Census in determining municipal boundaries. However, such adjustments will not affect state shared taxes for fiscal year 1981-82 if made after the June 30, 1981, deadline.
