INTRODUCTION
This report is based upon activities of the Research Committee, UTK’s Commission for Lesbian, Gay, Bisexual, and Transgender (LGBT) People, conducted during spring 2007. The objectives of the report include:

- To assess the support provided to LGBT people at the University of Tennessee’s (UT) peer institutions (based on website analysis).
- To develop a methodology to quantitatively and qualitatively analyze the support provided to LGBT people at UT’s peer institutions.
- To create a checklist that provides a quantitative comparison of the support provided to LGBT people at UT’s peer institutions.
- To provide a detailed qualitative analysis of the support provided to LGBT people at UT’s peer institutions.
- To generate an initial assessment of the UT’s support of LGBT people as compared to its peer institutions.

Future applications as follow-up to this report will include a detailed assessment of UT’s performance in terms of its support of LGBT people based on comparison to its peer institutions (e.g., the Research Committee plans to develop and conduct a quantitative survey assessing and evaluating the UT’s campus climate for LGBT people). Findings in this report are based solely on information found on the websites of UT’s peer institutions. Follow-up research will involve establishing contacts with students, faculty, and staff at UT’s peer institutions to verify the accuracy, currency, and coverage extent of information presented on the websites of the select institutions. Suggestions for interventions and concrete strategies in support of LGBT people at UTK will be made to insure that UT does not stray far behind its peer institutions in terms of its support of LGBT people.

CONCLUSION
Based upon activities of the Research Committee conducted during spring 2007, this report provided an initial assessment of the UT’s peer institutions in terms of their support of LGBT people. The report also explored a methodology to quantitatively and qualitatively assess and analyze the academic institutions of higher learning in terms of their support of LGBT people.

An initial assessment of UT’s support of LGBT people (based on select variables) shows that UT is ranked in the bottom two universities as compared to its peer institutions. Concerted efforts will need to be made by UT administrators, faculty, staff, and students to improve their support of LGBT people, and thereby make the campus climate more conducive for LGBT peoples’ safety, learning, and participation in everyday academic life. Making adequate efforts on behalf of LGBT people will distinguish UT among other educational institutions by attracting the best students, faculty, and staff to UT. Such efforts will also give impetus to investing companies and multinational corporations searching for progressive regions for economic investments.
