Dear Dr. Norman:

Your recent memorandum to the University Scholars Program Committee was shared with the Commission for Women.

It concerns us that no women were selected on this important University committee. We believe women should actively participate in all University committees as their involvement brings balance and insight to any committee structure.

The Commission for Women discussed the names of several women who could serve effectively on a Scholars Program Committee. If you so desire, I would be pleased to provide you with their names and their respective qualifications. We believe that women on the committee will be of assistance in developing this idea to its maximum.

Dear Gail:

Thanks for your suggestion that university committees should always have women on them. I agree that this is an important consideration in our common life. In this case, I think Betty Ruth Carruth is the right person, and I am asking her to join the group.
