IPS Expands Its Communication Tools

The Institute for Public Service (IPS) is the latest department at the University of Tennessee to jump on the social networking bandwagon.

IPS recently created a Facebook page as another way to share its successes and keep everyone informed of its day-to-day happenings. The UT County Technical Assistance Service (CTAS) also is using Facebook to publicize its County Officials Orientation Program this year. UT Knoxville as well as many of its departments also host Facebook pages.

“We understand that in this day and age, people receive their information in a variety of ways. From print to the Web to blogs and Facebook, we want to be able to reach people,” said Dr. Mary Jinks, vice president of public service.

In addition to Facebook, Jinks launched a blog (http://ut-institute-for-public-service.blogspot.com) at the end of 2009 and IPS recently unveiled its new password-protected Intranet. Both the blog and the Intranet are to be used primarily for internal communications. Employees can consult both for information on benefits, strategic planning, policies and employee news.

Tallent Named IPS Assistant Vice President

Current UT Municipal Technical Advisory Service (MTAS) Executive Director Mike Tallent began his recent appointment as Institute for Public Service (IPS) assistant vice president March 1.

In his new position, Tallent will oversee the Center for Industrial Services (CIS), the Law Enforcement Innovation Center (LEIC) and the Jimmy Naifeh Center for Effective Leadership. Assistant Vice President Chuck Shoopman will now oversee MTAS, the County Technical Assistance Service (CTAS) and all economic development programs.

“Mike is a valuable member of the IPS leadership team, and it is a natural move for him to step into the role of assistant vice president,” said Dr. Mary Jinks, vice president of public service. “Having been on board here for more than 30 years, he has a solid grasp of our public service mission and is dedicated to seeing IPS and its agencies fulfill that mission.”

Tallent joined MTAS in 1979 as a municipal management consultant and has served West Tennessee and Southeast Tennessee over the years, advising cities that range in size from Englewood to Chattanooga. His contributions and leadership at MTAS have helped the agency serve Tennessee cities through the years.

“One of the many blessings in my life has been the years I have worked for MTAS and the opportunities it provided me to serve the cities of Tennessee,” Tallent said. “The many friendships I have made during those years and the part I have been fortunate to play in assisting cities improve the efficiency and effectiveness of their operations have made those years with MTAS cherished years. Leaving MTAS was not an easy decision, but I look forward to and I am truly excited about the opportunities and challenges that will be afforded me in serving as assistant vice president for the Institute for Public Service.”

IPS has begun a search to fill the executive director’s position at MTAS.
Conversion Opportunities Available for Local Government Fleets in East Tennessee

The UT Municipal Technical Advisory Service (MTAS) is assisting cities with becoming more sustainable.

On Feb. 2, city mayors from Kingston, Rockwood, Harriman and Crossville and MTAS Municipal Management Consultants Dana Deem and Warren Nevad met in Kingston to explore new ways to further their sustainability efforts in fleet management.

The Tennessee Renewable Energy and Economic Development Council (TREEDC) and East Tennessee Clean Fuels Coalition (ETCFC) arranged the meeting with Flex Fuel U.S. to learn about ethanol conversion capability for local government fleets in East Tennessee. ETCFC Director Jonathan Overly and TREEDC Director Nevad recognized that the East Tennessee E85 conversion initiative would complement the commercial development of cellulosic ethanol in Tennessee and nearby installation of E85 pumps in Roane and Cumberland counties.

Flex Fuel U.S. developed a patented flexible fuel conversion kit that will allow a vehicle to run on any ethanol blend up to 85 percent ethanol. An electronic control module receives a signal from an alcohol sensor that reads the fuel blend, enabling drivers to fuel with E85 or gasoline in any combination from a single tank. There are no switches to flip and no mixing or blending. The electronic control module adjusts the fuel trim to compensate for the different fuel mixtures and optimizes the operation providing excellent drivability and fuel economy.

The FFV system allows the driver to use any combination of gasoline or ethanol — from 100 percent unleaded gasoline to 85 percent ethanol. A driver can therefore use unleaded gasoline if ethanol is not available.

Future plans include investigating the feasibility of implementing a pilot program to introduce the technology and measure the progress of this worthy initiative. For more information, contact warren.nevad@tennessee.edu.
CIS Helps Neighbor Develop Additional Ideas

Often, people don’t get to know their neighbors well, and sometimes they don’t get to know them at all — not so with Can-Do National Tape and its neighbor — the UT Center for Industrial Services (CIS).

Can-Do is an adhesive tape distributor and fabricator located in Nashville. Since 1972, Can-Do has been servicing the automotive, appliance, medical, electronics and industrial markets with pressure-sensitive adhesive and value-added converting services across the U.S.

As a result of the recent economic downturn, Can-Do President Rick Winkel was forced to examine how to grow his company in an increasingly competitive market. But where could he go to find these innovative ideas?

Winkel received a CIS newsletter with an ad regarding a program (Eureka Winning Ways) on how to stimulate innovative ideas for profitable growth. As it turned out, Winkel’s solution was just around the corner — in the same building with Can-Do. Winkel contacted Dan Miller, CIS field consultant, and arranged a meeting with Albert Tieche, CIS program facilitator for Winning Ways.

To provide the most efficient and practical solution, Tieche toured the Can-Do facility, and along with Winkel assembled a cross-function team consisting of sales, management, administration and production staff. A course of action was then recommended. It took them step-by-step through the process of generating new ideas and how to determine whether an idea had merit or if it was of no value to the business. With a clear, concise and well-presented agenda, the Can-Do group was pushed to think outside the box. As a result, the group found more than 90 new possible uses for adhesive tape.

“The program made us realize the potential for many of our products and helped us embark upon a path we would have never pursued on our own. We are continuing with the development of our idea and hope to have a workable prototype by the first quarter of 2010,” Winkel said.

“The staff at the UT Center for Industrial Services has been instrumental in putting us in contact with the right organizations, which will help make this project a success. It is a pleasure to work with the CIS staff, and we look forward to working with them on future projects.”

More IT News

The OIT Help Desk is available for IPS employees to use from any location. The OIT motto “One Contact Many Solutions” is backed up in a number of ways. Employees can get help by calling the help desk phone number at (865) 974-9900, give the person who answers the phone their NetID, and they will help with just about anything computer related. Secondly, employees can visit the OIT Help Desk Web site at http://help.utk.edu. Once there, they can enter their problem online via an interactive form or search the KnowledgeBase for answers to computer-related questions.

UT’s chief information officer also announced that Security Essentials, Microsoft’s malware anti-virus software is available to all employees, even to use on their home computers. For help with the software, faculty, staff and students can call the OIT help desk.
CTAS Spring Courses Include Solid Waste/Highway Training

The second phase of the UT County Technical Assistance Service’s (CTAS) new certification program for solid waste directors, the Solid Waste Professional Certification Program (SWPCP), will be conducted in March at Montgomery Bell State Park. The training will be led by CTAS consultants and will include the following classes addressing local government operations and functions: County Operating Budget, Capital Budgeting, Risk Management, Hiring and Firing and County Purchasing. CTAS has also arranged for two Solid Waste Association of North America (SWANA) courses to be conducted this spring to bring SWPCP participants closer to obtaining program certification.

In March and April, CTAS will offer a statewide work zone traffic control/flagging course for county highway field personnel such as maintenance, survey and utility crews. The workshop will describe current work zone standards and requirements; explain standard traffic control devices; outline the design and installation of traffic control schemes for short-term operations on streets and highways; describe proper flagging procedures; and explain liability issues involving highway agencies performing construction and maintenance operations.

Damewood Completes Leadership Certification

Andi Damewood, IT administrator in the UT Institute for Public Service (IPS) central office, has completed all requirements for the UT Leaders: Lighting the Way, Part 1 certification.

The 32-hour certification program prepares program participants for supervisory responsibilities and how to pursue commitment to continuing education and achieve job enrichment. Damewood, along with the other Part 1 graduates, was recently recognized at a breakfast.

Staff Applause

TO: CTAS TRAINING SERVICES
Training is a necessary ingredient for all levels of management and accompanying staff members. It is especially important in today’s changing world. I sincerely appreciate CTAS and the training services it provides to counties. It is my goal to have all trustee staff in Williamson County certified in the County Officials Certificate Training Program (COCTP) by the next fiscal year!

Walter “Joey” Davis, Williamson County Trustee

TO: CTAS STAFF
I just wanted to take the time to express my gratitude to you. Through your generosity, our school was able to serve five of our families at LaVergne Primary School. With your assistance, the lives of these families have been enhanced. For the gift of your time, contributions, and effort, I thank you. On behalf of these families and all of us here at LaVergne Primary School, I wish you the best for the New Year and look forward to working with you again in the future.

Lisa Vickrey, Instructional Leader, LaVergne Primary School

TO: DON GREEN, LEIC
The bloodstain pattern analysis training presented at the West Jordan Utah Police Department was outstanding. Your program specialist, Nathan Lefebvre, was instrumental in the arrangement and success of this training, which was attended by several law enforcement agencies from Utah as well as California and Idaho. The clear and precise instruction allowed all participants the opportunity to ascertain the science behind bloodstain patterns. The method of teaching was as enjoyable as it was interesting. The hands-on workshops and mock crime scene played a significant role in the success of the training. We would like to extend an invitation for future trainings at the West Jordan Utah Police Department through the University of Tennessee National Forensic Academy. There is a definite need among western states law enforcement agencies to become better informed and trained on forensic topics offered by the NFA.

Sergeant Travis Rees, West Jordan (Utah) Police Department

TO: WARREN NEVAD, MTAS
Congratulations to you, Greg Johnson, Mayor of Pikeville, and other leaders of the Tennessee Renewable Energy and Economic Development Council (TREEDC) on the well-attended, informative and successful conference in November held on the campus of the University of Tennessee Health Science Center. You drew a good-sized crowd of interested and interesting people. A lot of exciting and challenging information was shared. Thank you ever so much for allowing me to participate and for briefing me on what I was to do at the conference. I enjoy my involvement with you and am ever grateful for your leadership and friendship.

Joseph E. Johnson, UT President Emeritus

TO: NATHAN LEBVRE, LEIC
Wanted you to know how much I’m applying what I’ve learned at the National Forensic Academy to my work. I’ve already pulled out the notebook to help me identify a vehicle that had been burned beyond recognition. I’ve been taking longer on my calls purposefully running through my new repertoire of skills to make sure that I’ve done everything possible to find and collect evidence. It’s helped me be more thorough, more patient and more systematic. Also, since I passed the International Association for Identification (IAI) test, I feel like the pressure is on now to do a higher quality job. With the skills I learned in presentations, I feel comfortable in putting them together for courtroom presentations. I can’t thank you enough.

On a more gruesome, but positive note, I worked a kidnapping/sexual assault case yesterday, and I spent three hours working the suspect vehicle. The victim, a 10-year-old female, had been put in the trunk. I felt very confident working the vehicle with my new, improved skills. I took my time and did everything I could think of to locate evidence. I found the victim’s fingerprints in the trunk and collected numerous hair samples and other trace evidence. The prints turned out to be hers.

The University of Tennessee does not discriminate on the basis of race, color, religion, national origin, age, disability, or veteran status in provision of educational programs and services or employment opportunities and benefits. This policy extends to both employment by and admission to the university. The university does not discriminate on the basis of race, color, or disability in its educational programs and activities pursuant to the requirements of Title II of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) of 1990. Details and charges of violation concerning Title VI, Title IX, Section 504, ADA or any of the other above referenced policies should be directed to the Office of Equity and Diversity (OED), 1840 Melrose Avenue, Knoxville, TN 37996-3560, telephone (865) 974-2498 in Employment Act (ADEA) or any of the other above referenced policies should be directed to the Office of Equity and Diversity (OED), 1840 Melrose Avenue, Knoxville, TN 37996-3560, telephone (865) 974-2498 in Employment Act (ADEA), or any of the other above referenced policies should be directed to the Office of Equity and Diversity (OED), 1840 Melrose Avenue, Knoxville, TN 37996-3560, telephone (865) 974-2498. Requests for accommodation of a disability should be directed to the ADA Coordinator at the OED Office of Human Resources, 336 MLK, Knoxville, TN 37996-0435.
After 20 years of serving Tennessee cities as an attorney for the UT Municipal Technical Advisory Service (MTAS) Dennis Huffer retired at the end of January.

Huffer, who grew up on a farm in Lynchburg, shares an interesting story as to why he entered the law profession.

“Growing up on a farm, we were isolated and didn’t hear about a lot of different professions,” he said. “I only knew of three — teacher, lawyer and dentist. Early on, I picked dentist. I guess because I thought it rhymed well with Dennis. But later on, I developed an interest in politics so I thought I’d have to be a lawyer to help people. I think it was a good choice.”

After graduating from Moore County High School, he received his bachelor’s degree in English from Middle Tennessee State University. He received his doctorate of jurisprudence from the UT College of Law in 1976, the same year he was admitted to the Tennessee Bar.

He actually began working for the UT County Technical Assistance Service in 1977 and then moved to MTAS where he worked primarily on municipal consulting. In 1989, he left MTAS to become director of legal services for the Tennessee Municipal League’s Risk Management Pool. He came back to MTAS in 2001 as a legal consultant.

He has authored hundreds of MTAS’s publications and resource materials used by cities.

“I have enjoyed working for cities throughout the years,” he said. “Working with a great organization such as MTAS gives a lawyer a good vantage point to help, not harm society.”

Fellow MTAS Legal Consultant Josh Jones said in the short time he has worked with Huffer he has learned more from him than he did from his law school professors.

“His red pen has pushed me to be a better writer and his unwavering efforts for substance over style remind me to keep my decisions merit-based as opposed to self interest,” Jones said. “Likely, he has no idea of his influence on me personally, MTAS and municipal governments across Tennessee, and even if he does his humility would prevent him from acknowledging it. I will forever be better for my time working with Dennis.”

Dennis W. Huffer

Serving the University of Tennessee Institute for Public Service Municipal Technical Advisory Service September 1989 through January 2010
“Dennis has been a valuable member of IPS and we’re certainly going to miss his sharp legal mind. He has worked diligently and objectively through the years for Tennessee cities, and at the same time has been a trusted friend, mentor and colleague to everyone at IPS.”

Dr. Mary Jinks, Vice President of Public Service

“Dennis and I have worked together for many years and it has been a pleasure. His sense of humor and dry wit in stating the obvious in situations have often left me laughing out loud. His dedication and detail in his work in providing the best information possible to city officials is a great example of what MTAS is all about. He is a great friend and I wish him the best in his retirement.”

Armintha Loveday, MTAS Administrative Specialist

“I have worked with Dennis for over 30 years and believe he is unsurpassed in Tennessee municipal law. It’s not just that he can develop a superb legal opinion, he seems to do it with ease and at a speed that is sometimes amazing. In addition to his individual abilities, Dennis is also a team player willing to step in and do his part on any given task. Finally and very importantly, Dennis has a great sense of humor. He loves to laugh and loves to make others laugh. That is an important factor in the work place that is too often overlooked. We wish him the best, MTAS and Tennessee cities will miss Dennis Huffer.”

Mike Tallent, IPS Assistant Vice President
