been funded externally by leaders in the field, including the American Diabetes Association, the United States Department of Agriculture, the American Heart Association, and the National Institutes of Health.

Dr. Xuemin Xu is an associate professor of pathobiology in the College of Veterinary Medicine. His work has fundamentally challenged the accepted dogma of Alzheimer's disease and may lead to specific targets for treatment and prevention of this debilitating disease. His research focus is on molecular mechanisms of intracellular signaling, and his work has been proven by a priority score in the top 5 percentile on his latest grant submission to the National Institutes of Health and a recent appointment to an NIH Study Section Scientific Review Panel.
