This Thesis is brought to you for free and open access by the Graduate School at TRACE: Tennessee Research and Creative Exchange. It has been accepted for inclusion in Masters Theses by an authorized administrator of TRACE: Tennessee Research and Creative Exchange. For more information, please contact trace@utk.edu.

To the Graduate Council:

I am submitting herewith a thesis written by Blanche Hinds entitled "The Clothing Expenditures of 542 Tennessee Families." I have examined the final electronic copy of this thesis for form and content and recommend that it be accepted in partial fulfillment of the requirements for the degree of Master of Science, with a major in Human Ecology.

Elizabeth Lacey Speer, Major Professor

We have read this thesis and recommend its acceptance:

Drujillia Kent, Betty Michell

Accepted for the Council:

Carolyn R. Hodges

Vice Provost and Dean of the Graduate School

(Original signatures are on file with official student records.)

THE CLOTHING EXPENDITURES OF FIVE
HUNDRED AND FORTY-TWO TENNESSEE FAMILIES

CHAPTER I.

INTRODUCTION AND GARMENTS PURCHASED

This study is an analysis of the expenditures of approximately 550 Tennessee families classified by age, occupation, and sex groups for clothing purchased, ready-to-wear and made at home, during the year 1932 - 1933. The data were collected during the time between August, 1933, and May, 1934, and referred to the year previous.

The survey method was used for this study, which is a part of the Tennessee Living Study. Questionnaires were used for the recording of the data and were filled in by special workers during visits with the families. While the author of this study, did not make the form for the questionnaire, nor collect any of the data, she made this analysis of the information concerning clothing.

With the exception of Hardin County, the study is limited to families having 4, 5, or 6 members living at home. It is made entirely of small groups of families living close together under similar conditions. It is a study of the individual clothing expenditures of men and women, classified by age, by occupation of the family, and by sex.

In the Appendix is found a list of the counties and the number of families in each county included in the study.

It is hoped that the data herein may be of importance to heads of families, to teachers of home economics, and to others interested in clothing and textile problems.

TABLES I through XXIV give figures concerning clothing purchased by women and show that four each aprons and cotton dresses were usually purchased at a cost of \$.50 and \$1.00 respectively. The usual number of items of outerwear purchased was one each of the following at prices given: waists, \$1.00; sweaters, \$1.00; silk dresses, \$4.00; skirts, \$2.00; and raincoats, \$5.00. The number of knickers and outerbloomers purchased was too small for significance.

The usual number of underbloomers and brassieres purchased was four at a cost of \$.50 and \$.25 respectively. The usual number of following items was two: slips, \$.25; night dresses, \$.50; undershirts and unionsuits at \$1.00 each. One was the number of corsets and bathrobes purchased at prices of \$1.00 and \$3.50 respectively.

Cotton stockings were purchased four pairs to each person at a cost of \$.25 per pair. Silk stockings were purchased in larger quantities or twelve pairs each at a cost of \$.75 per pair. Shoes were purchased at a price of \$2.00 each pair and two pairs per person.

One was the number of hats purchased at the price of \$1.00 each.

Twelve handkerchiefs were purchased by each person at a cost of \$.05 each. All other accessories were usually bought in quantities of one and the following items were purchased at the price of \$1.00 each: mufflers, gloves, and handbags. Garters were purchased at a price of \$.10.

TABLES XXV through XLV show that of men's outerwear one was the usual number of workjackets, sweaters, suits, and

extra trousers purchased. Of these, \$1.00 was the usual price paid for sweaters and extra trousers; \$1.00 and \$1.50 each for work jackets; and \$18.00 for suits. Two was the number of dress shirts purchased, costing \$1.00 each. Work shirts and overalls were purchased in quantities of four each at the price of \$.50 and \$1.00 respectively.

With the exception of bathrobes, two was the number commonly purchased of all undergarments at prices of \$1.00 or less. The prices were: drawers, \$.25; B.V.D.'s and undershirts, \$.50 each and nightshirts \$1.00.

Usually there were six pairs of cotton and silk socks purchased at a cost of \$.05 and \$.10. \$1.00 a pair was paid for rubbers, one pair for each. Two pairs of shoes each were commonly purchased at the cost of \$3.00.

One was the number of caps and hats purchased at prices as follows: \$1.00 for hats and \$.50 and \$1.00 for caps.

One and six were the numbers of accessories usually purchased by the men in this study.

Gloves, mufflers, and belts were bought in quantities of one per year at the price of \$.50 each. Six was the number of handkerchiefs purchased costing \$.05 each.

The data for the upkeep of clothing seemed incomplete and any treatment of them in this study is with that insufficiency in mind.

CHAPTER II.

Percentage of Individuals Buying Clothing.

The TABLES XLVI through LIII of the number and proportion of women buying clothing show that the age groups of 16 to 20 years and 21 to 25 years led in the percentage buying outerwear.

A larger proportion bought silk dresses than bought any other article of outerwear. In two-thirds of the age groups making purchases, 50 per cent or above bought this item.

The same age groups (16 to 20 years and 21 to 25 years) that led in the percentage buying outerwear also led in the percentage buying underwear. A larger portion bought underbloomers than bought any other article of underwear. In 31 of the 43 age groups that made such a purchase, 50 per cent or above purchased this item.

In all age groups, with two exceptions, the proportion of women purchasing shoes was 87 per cent or above. In twenty-six age groups, one hundred per cent bought this item of footwear. The proportion purchasing hose was 50 per cent or above in the majority of age groups. A larger proportion bought cotton hose. The proportion that bought other footwear was 44 or less.

In all but six age groups, 50 per cent or more purchased some article of headwear.

The age groups of 16 to 20 years and 21 to 25 years showed the highest proportion that made purchases of accessories. In the majority of age groups the proportion buying accessories was 50 per cent or less.

The tables 54 through 60 of number and proportion of men buying clothing show there were more age groups among men than among women with a high proportion buying outerwear.

No age group was outstanding as leading in percentage purchasing underwear. It is noticeable that the Firm Industrial age group showed the highest proportions that bought all articles of underwear.

With one exception, 83 per cent or more of all age groups purchased shoes. One hundred per cent in the majority of age groups purchased this article of footwear. The age groups of 16 to 20 years and 26 to 30 years led in high percentage buying socks. Fifty per cent was the highest that purchased silk socks and 93 per cent was the highest proportion that bought cotton or wool socks. Thirty-nine was the highest percent that purchased overshoes.

The age groups of 6 to 10 years and 11 to 15 years led in the highest percentage buying caps and the 41 to 45 year age group showed the highest percentage that purchased hats.

The age groups from 21 to 40 years inclusive had the highest percentage (37 to 79 per cent) that made purchases of accessories.

CHAPTER III.

Per Cent Spent for Types of Garments.

A marked similarity may be noted between the percentage spent for the various types of clothing by the men and women in this study and the percentage spent by Illinois farm families¹ in a study made of the personal accounts of those families even though the age groupings in the two studies are not identical. These similarities are shown in TABLES LXI through LXVI which are a part of this study; and in TABLE LXVII and the quotation given below which were taken from the study mentioned above.

"Outerwear takes about half of the clothing money, from 53 to 58 per cent of the total for persons 15 years of age and over, and from 43 to 50 per cent for children under 15. Footwear takes about one-fourth of the clothing money for persons 15 or over, but increases to about one-third for children under 15. The percentage spent by women and girls for underwear is more than half again as much as that spent by men and boys in the same age groups. Women and girls spend relatively more for hats but less for accessories and upkeep than do men and boys."¹

1. Farm Family Living Outlook Charts and Conference Summaries, November, 1935., Bureau of Home Economics U. S. Department of Agriculture.

CHAPTER IV.

Number of Garments Homemade and Purchased.

Aprons, dresses, waists, skirts, slips, underbloomers, and nightdresses were the only articles of clothing for girls and women made at home in appreciable quantities. Snyder, in her study of trends in home sewing says, "Of outer garments, dresses are made most frequently, while slips are the most frequently made undergarments." ¹ TABLE LXVIII of this study shows 6,367 homemade outer garments of which 4,741 are cotton dresses and 221 are silk dresses. TABLE LXIX shows 4,157 articles of underwear made at home of which 1,877 are slips. It is shown that more outerclothing for women was homemade and more underwear, footwear, headwear and accessories were purchased ready-made than were made at home.

Of clothing for boys and men, workjackets, rompers, suits and nightshirts were the only articles made at home in appreciable amounts and all were made in much smaller quantities than were purchased ready to wear.

Dickens, in her study of the clothing and house linen expenditures of 99 rural families of Mississippi during 1928 and 1929 reported a large number of homemade garments were made for women and children under 6 years, for men and boys over

Snyder, Mary Ava, Present Trends in Home Sewing in Tennessee.

6 years a larger number of garments were purchased ready to wear.²

It is shown in this study that more garments were made for women than were made for men.

Omitting accessories and upkeep, there was a total of 9,550 homemade garments for women which averaged 11 garments per individual for farm women, 11 per individual for farm industrial women and 6 per individual for industrial women. The number made at home for men was 1,039 which averaged about one garment per individual for farm men, a little less than one garment per individual for farm industrial men and a little more than one garment per individual for industrial men.

The total number of garments purchased, omitting accessories and upkeep, for women was 23,605 which was a total of 20 garments per individual for farm women, 27 garments per individual for farm industrial and 28 garments per individual for industrial women. The total of garments purchased for men was 27,871 of which there was a total of 25 garments per individual for farm men, 33 garments per individual for farm industrial men, and 32 garments per individual for industrial men.

Again omitting accessories and upkeep, there was a total of 10,589 garments made at home and 51,476 garments purchased ready to wear by the men and women of this study.

CHAPTER V.

Average Annual Expenditures for Clothing.

The average amount spent by individual girls 2 to 10 years of age for clothing tended to be between \$10.00 and \$25.00; for girls from 11 to 15 years of age between \$25.00 and \$40.00; for girls from 16 to 20 years of age between \$40.00 and \$80.00; for women from 20 to 40 years of age between \$30.00 and \$75.00; and for those above 40 years of age below \$50.00.

The average amount spent for clothing for boys 2 to 10 years of age tended to be the same as for individual girls of these ages; for boys from 11 to 15 years of age between \$20.00 and \$30.00; for men from 16 to 20 years of age between \$35.00 and \$50.00; for men from 20 to 40 years of age between \$30.00 and \$60.00; and for those above 40 years of age below \$45.00.

The Farm Industrial groups led in the average amounts spent for clothing by both women and men in all but five age groups.

CHAPTER VI.

Summary

An effort has been made to show the number of ready-to-wear garments usually bought and the price commonly paid; the proportion of individuals making purchases of various articles of ready-to-wear clothing; the per cent spent for different types of clothing by women and by men; the number of garments homemade and purchased ready to wear; and the average annual expenditures for individual women's and men's clothing by age groups.

Some interesting facts have been shown. More individuals bought shoes than bought any other item of clothing.

The number of silk hose purchased by women and cotton or wool hose by men was high.

Women from 16 to 25 years of age led in the percentage buying outerwear, underwear, and accessories.

Women spent more for underwear but less for accessories and upkeep than did the men.

The highest average amounts spent for clothing were by women. A greater variety of garments and in larger quantities were made at home for women than for men.

Aprons, cotton dresses, slips, underbloomers, and night dresses were made at home in larger quantities than other women's garments.

Only about one-fifth as many garments were made at home as were purchased ready to wear. Of these there was an average of 11 garments each for the farm woman and for the farm industrial woman, and 6 garments per individual for the industrial woman; about one garment per individual for the farm man, a little less than one garment per individual for the farm industrial man, and a little more than one garment per individual for the industrial man.

The Farm group leads not only in the quantity of articles made at home but in the variety of home made garments.

The total per cent spent for clothing by both men and women was higher in the Farm Industrial Group than in the other occupational groups.

The average amount spent per individual was higher in almost all of the Farm Industrial Age Groups than in the other occupational age groups.

The following gives the year's purchase of the typical woman of the study: 4 aprons at \$.50 each; 4 cotton dresses at \$1.00 each; 1 silk dress at \$4.00; 1 waist and 1 sweater at \$1.00 each; 1 skirt at \$1.00; and 1 raincoat at either \$2.00 or \$5.00; 4 pairs of underbloomers at \$.50 each; 4 brassieres at \$.25 each; 2 slips and 2 night dresses at \$1.00 each; 2 undershirts at \$.25 and 2 unionsuits at \$.50 each; one corset at \$1.00; and 1 bathrobe at \$3.50; 4 pairs of cotton stockings at \$.25 each; 12 pairs of silk stockings at \$.75 each; 2 pairs of shoes at \$2.00 each; 1 hat at \$1.00; 12 handkerchiefs at \$.05; one muffler, one pair of gloves, and one handbag at \$1.00 each; and one pair of garters at \$.10.

The typical man of this study purchased ready-to-wear the following garments at prices given below: 4 workshirts at \$0.50 each; 4 pairs of overalls at \$1.00 each; 2 dress shirts at \$1.00 each; 1 sweater and 1 pair of extra trousers at \$1.00 each; 1 workjacket at either \$1.00 or \$1.50; 1 suit at \$18.00; 2 pairs of drawers at \$0.25; 2 B.V.D.'s and 2 undershirts at \$0.50 each; 2 night-shirts at \$1.00 each; 6 pairs of cotton socks at \$0.05; 6 pairs of silk socks at \$0.10; 2 pairs of shoes at \$3.00 each; 1 pair of rubbers at \$1.00; 1 hat at \$1.00; 1 cap at either \$0.50 or \$1.00; 1 pair of gloves, 1 muffler, and 1 belt at \$0.50 each; and 6 handkerchiefs at the price of \$0.05 each.
